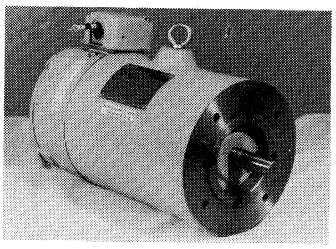
(A). Minertia Motor Standard Series
JKMM-25EM



(B). Minertia Motor Junior Series
JKCM-150EM

Minertia Motor®

HIGH PERORMANCE D-C SERVOMOTOR

"Slotless Armature"

CHARACTERISTICS:

1. Low armature inertia
2. High maximum torque
3. High torque to inertia ratio
4. High power rate
5. Low inertial time constant
6. Low inductive time constant
7. Smooth operation in wide speed range
8. Superior commutation performance
9. Superior linearity of torque vs. speed performance

APPLICATIONS:

1. Computer peripheral equipment
   - Magnetic tape transports capstan drive
   - Line printer paper feed
   - Card sorters
2. Machine Tools
   - N/C servo drive in milling machines, Lathes and drilling machines
   - Tracer system in milling machines, Lathes and drilling machines
3. General industrial machines
   - Radar and antenna drives
   - Edge position control for steel mill and textile
   - Electrode positioners

Characteristics & Ratings of *Minertia Motor*

JKSM: Minertia Motor Super Series — Inertial time constant is around one millisecond.

JKMM: Minertia Motor Standard Series — Inertial time constant is about 3 to 4 millisecond.

JKCM: Minertia Motor Junior Series — Moderate performance for general servo application.

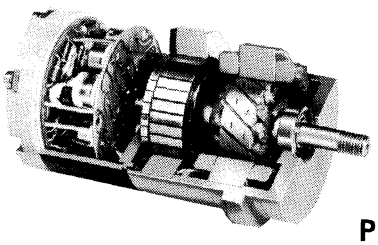
NEW TORQSYN® REMOTE POSITIONER ...A GEARLESS DIRECT DRIVE SERVOMECHANISM



Now, a complete gearless servo system in one small package. The Torqsyn® Remote Positioner is an integrated system available in Size 23, Size 16 and Size 11 housings, which converts input synchro data into accurate shaft position. High input impedance allows it to be driven by low power signal sources.

The Torqsyn® Remote Positioner may be used to drive Potentiometers, Encoders, Resolvers, Indicators, etc. In several models, either 60 Hz or 400 Hz signals may be accepted.

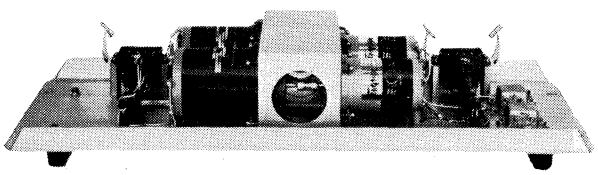
NOTE: Length does not include Shaft or Terminal Screws.

THE TORQSYN® REMOTE POSITIONER ...AS A BUILDING BLOCK

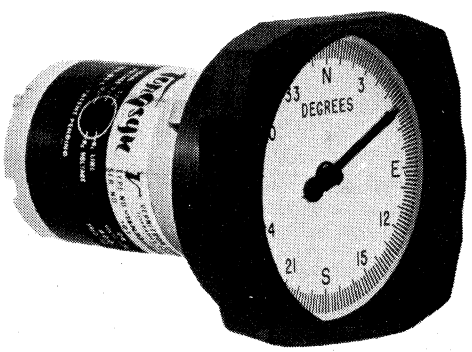
SYNCHRO SIGNAL AMPLIFIER



FEATURES:

- Accepts synchro signal from any transmitter
- High impedance input
- Drives large synchro transmitter
- Frequency change possible from driving to driven transmitter
- Can drive multiple receivers
- Single or multiple channels

INDICATOR PACKAGE



FEATURES:

- High impedance input
- High accuracy (10 minutes)
- No current feedback to source
- May be driven by low power source such as computer output.

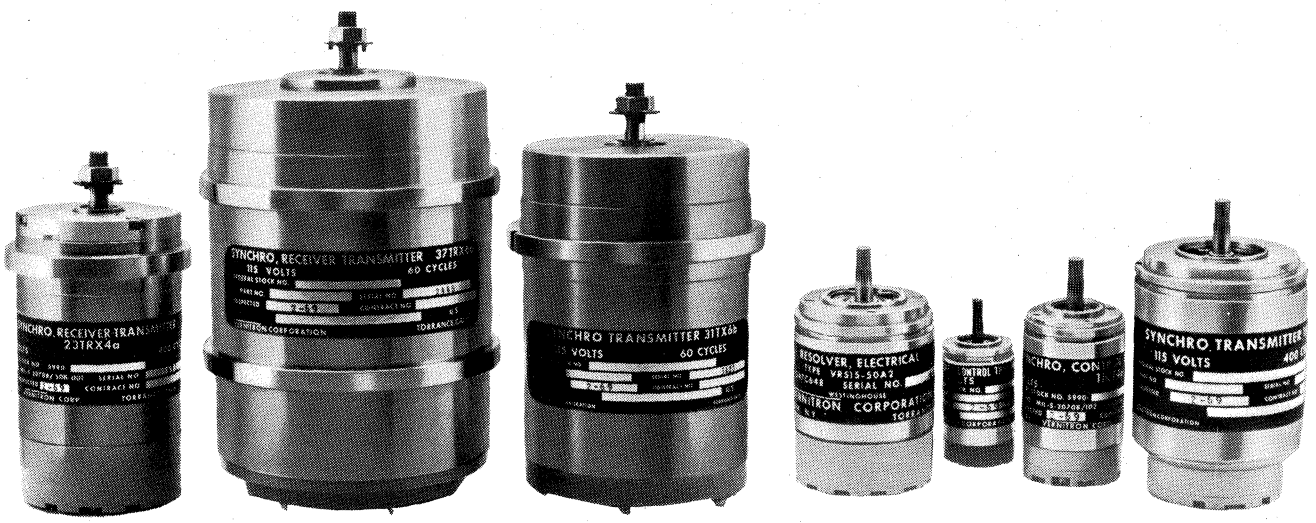
the quality name in control components



SYNCHROS

- ☐ Frame sizes 8 thru 45
- ☐ Latest Mil-Spec designs (modifications as you require)
- ☐ Accuracies down to 3 minutes
- ☐ Single and double ended shafts
- ☐ Stainless steel or aluminum housings
- ☐ Terminal block or lead types
- ☐ Brushless units
- ☐ Tandem units
- ☐ Transmitters, receivers, differentials, receiver/transmitters, linear synchros (induction pots)

RESOLVERS

- ☐ Bu Weps frame sizes 8, 11, 15 and 23
- ☐ Accuracies to .05% on computing types and 20 seconds on data transmission units
- ☐ Latest Mil-Spec designs (modifications as you require)
- ☐ Varying voltage, frequency and impedance levels
- ☐ Trimmed and Tuned Resolvers
- ☐ Phase Shifters
- ☐ Sweep Resolvers
- ☐ Temperature Compensated Units
- ☐ Brushless Resolvers
- ☐ Resolver Chains (booster and boosterless)

LO COST 3 • N SERIES

- ☐ A new series of Vernitron size 8 and size 11 **synchros and resolvers** designed for industrial control systems, flight instrumentation, etc. with **accuracies down to 5′.** High production quantity lines encompassing unique methods and in-process controls maintain strict quality standards at **new low cost levels.**
- ☐ 26 volt and 115 volt versions
- ☐ Variety of shaft configurations
- ☐ Hi and lo impedance
- ☐ Corrosion resistant housings
- ☐ Terminal boards or leads

PANCAKE SYNCHROS AND RESOLVERS FROM THE SOLVERE DEPARTMENT

Single Speeds — Accuracies to 10 seconds
Size Range — 1.2″ to 13.4″ O.D.

Multi-Speeds — Accuracies to 3 seconds
Size Range — 1.5″ to 13.4″ O.D.
Speeds — 2X to 72X

Dual Speeds — Available in wide range of sizes and speeds

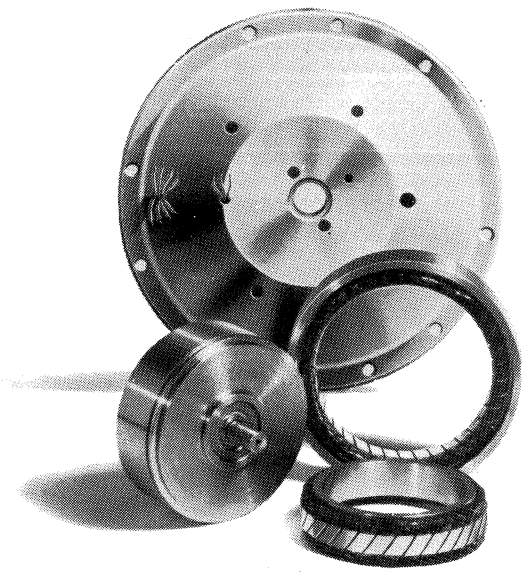
Tandem Assemblies — Dual, triple, combinations of speeds, also available with brushless torque motors

Brushless Designs — True brushless or flex lead designs, single or multi-speeds.

Housed Assemblies — Cartridge assemblies in stainless steel, aluminum, beryllium, or titanium to meet unique requirements.

Environment — Temperatures from −65°F. to +500°F. space applications—hard vacuum—10^{-14} Torr

Custom Designs — To your special requirements.



23-20 SERIES — 20 SECOND ACCURACY IN SIZE 23 HOUSING

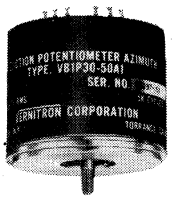
INDUCTION POTENTIOMETERS
(LINEAR TRANSFORMERS)

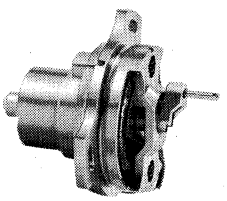


- Linearity to .25%
- Angular excursion to ±170°
- Standard housed sizes
- Pancakes — housed or unhoused

TRANSOLVERS

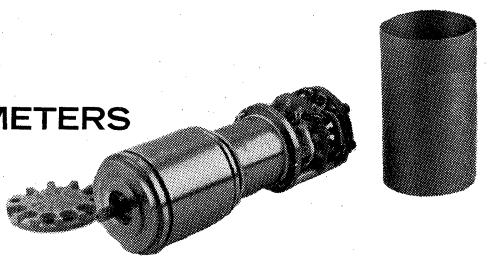
- Standard housed sizes
- Three wire in to four wire out
- Four wire in to three wire out

BRUSHLESS TRANSDUCER ACTUATOR



- Brushless DC torquer and multi-speed resolver
- Two minute accuracy to +500°F.
- 8 oz-in torque at +500°F.

INTEGRATING MOTOR TACHOMETERS

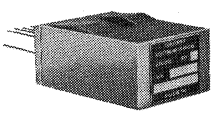


- Sizes 8, 11, 15, 18, 23
- Thermistor compensated
- Linearities of ±.05%

RESOLVER TACHOMETERS

- Provides position and rate information in navigation systems
- Size 11 resolver with integral tach generator. Less than 6′ angular accuracy

ELECTROMECHANICAL CONVERTERS



- Convert pulsed digital input to analog output
- Stepper motor and gear train drives size 8 precision resolver

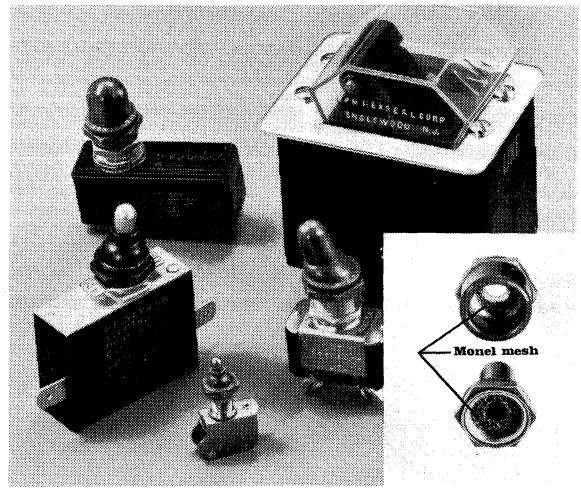
Environmental Switch Seals

APM Hexseals® keep out Gas, Liquids, Dust

APM Hexseal boots will seal any switch—pushbutton, toggle or rotary. Hexseals keep out air, gases and liquids and keep switches working longer and more reliably. Just replace the mounting nut with a Hexseal and you have a sealed switch for only pennies. For more data and prices, request Bulletin HEX-2.
APM Hexseals meet applicable Military applications including MIL-B-5423. Available in color.



RFI Shielded Switches If Required

In addition to their normal sealing functions, Hexseals can now protect sensitive equipment from harmful radiated or received interference. A unique Monel metal wire, molded or "stuffed" into the boot, effectively eliminates RFI.

Material: Silicone rubber unless otherwise specified.
Availability: Most items available for immediate delivery from stock.

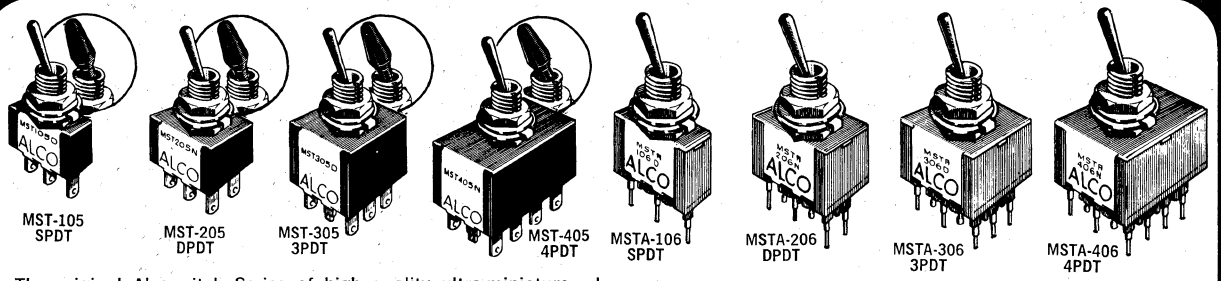
ALCOSWITCH

DIV. OF ALCO ELECTRONIC PRODUCTS, INC.



The original Alcoswitch Series of high quality ultra-miniature toggle switches combines high current capacity and long life in a ½" case. Slim, bat handle or optional plastic caps(*) are provided. Terminals and contacts are solid silver. Case material is black phenolic resin; 1/4-40 threaded bushing. Rated 5 amps at 115 VAC. SPDT and DPDT types have life cycle of over 80,000 on-off operations. High voltage barriers between terminals and contacts. Rated 5 amps @ 115 VAC.

Hardware supplied mounted. (On) Indicates momentary positions.

This new Alcoswitch Series fills a need for those who want the best product possible at an optimum price. Similar in appearance and specs to the Alco "E" Series but without the waterproof feature. Has the important features wanted in a good miniature: turret terminals, extra-wide contacts, heavier current capabilities, low-loss, high heat and high impact case construction. "No Tear" shoulder on bushing. Overall dimension allows use in tight quarters. Rated 6 amps @ 125 VAC.

E SERIES

The new "E" Series has the most-wanted features in miniature switches. Waterproof 'O' rings are located inside the toggle and on the shoulder. A mechanical shoulder on the bottom of the bushing prevents "tear-offs" when a single mounting nut is employed. High voltage barriers between terminals inside as well as outside. Case has a new, superior plastic material capable of withstanding a higher impact; guards against accidental damage. Low-loss case has extremely high resistance between terminals and case ground, and its high temperature coefficient is ideally suited for prolonged soldering and printed circuits. Turret type terminals are used for simplified wiring or for P.C. Extra-wide, solid silver contacts are bonded, not riveted, on copper-silver plated terminals. Long-life cycle over 100,000 On-Off operations at operating conditions (SPDT). Rated 6 amps @ 125 VAC.

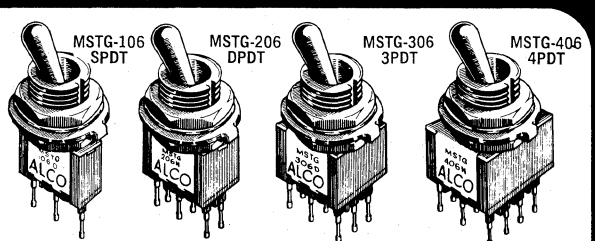
Hardware supplied mounted. Color-coded caps: see "A" Series story above



Mustang

The Mustang Series is for designers who prefer the feel of a larger toggle switch but have space limitations behind today's compact panel. The familiar ultra-miniature Alcoswitch ½" case is utilized, however the Mustang mounting requirements are the same as the larger switches with 15/32" bushings. This new Alcoswitch concept is a behind-the-panel space-saver in all Mustang models and it is especially true in the 3 Pole and 4 Pole Series where non-miniature switches are bulky in size. The Mustang switches have the most-wanted features as itemized in the "E" Series story (at left) with the exception of the waterproof 'O' rings. The case construction is of low-loss, high impact and high temperature materials with turret terminals and silver contacts. 6 amps @ 125 VAC.

Alco Miniature Power Switches combine a compact size, modern appearance and functional flexibility to meet today's control needs and mount in a 1" hole. Rated to carry 6 amps @ 230 VAC. These switches may be used to control circuits independently or with optional relays. All models supplied with a single (N.O.-N.C.) contact block but have provisions for an additional (Model SU) block thereby convertible to DPDT units.

3-Way Selector Power Switch is the same basic model as above but instead has a bar knob with pointer. Electrical and physical specifications are the same. Available in black only.

Key-Lock Push Button type is an accident-proof power switch that has its own key lock to prevent unwanted operations of machines and controls. The switch functions only when the key disengages the lock. Same specs as the series described above.

MSRE ( )
MRA ( )S — Less Knob

MRA ( )
with Knob

MRA Adjustable-Stop Rotary Switches are miniature types rated 500 mA @ 125 VAC. Features: adjustable-stop; non-shorting; 36° spacing; up to 4 poles on single deck; solid silver terminals and contacts. Types with suffix **S**, ⅛", dia. shaft less knob. Bushing, ¼-40.

MRA 12-Position Rotary Switches are slightly larger than standard MRA Series has ⅛" shaft and 30° spacing. Other specs similar to MRA Series. Knobs not included. Type MRA-1-12S can be converted to an adjustable-stop switch when used with KCVS-500 knob (see Alco knob listings).

MSRE Waterproof Rotary Switches are non-adjustable. Similar to MRA Series but feature internal and external 'O' rings. One-piece metal case construction, and terminals are epoxy sealed. ⅛" shaft. Ideal for printed circuits. Supplied less knob. Rated 500 mA @ 125 VAC. Can be converted to an adjustable-stop switch when used with KCVS-500 knob (see knob listings).

Conversion Unit For Rotary Switch Operation. Gangs miniature toggle switches (with ¼" bushings) for controlling multiple circuits simultaneously. Operating as a 2- or 3-position rotary switch, this unit is capable of ganging from 1 to as many as 5 toggle switch combinations that total up to 10 poles. Allows you to have enclosed contacts, and heavier current capabilities. Use with various types of switches to act as a 3-position rotary switch when used with CENTER-OFF or ON-ON-ON type toggle switches, or becomes a 2-position rotary when used with 1- or 2-pole toggle switches.

DESIGN YOUR OWN KEYBOARD ASSEMBLIES

REED SWITCH OPERATED KEYBOARD BANKS

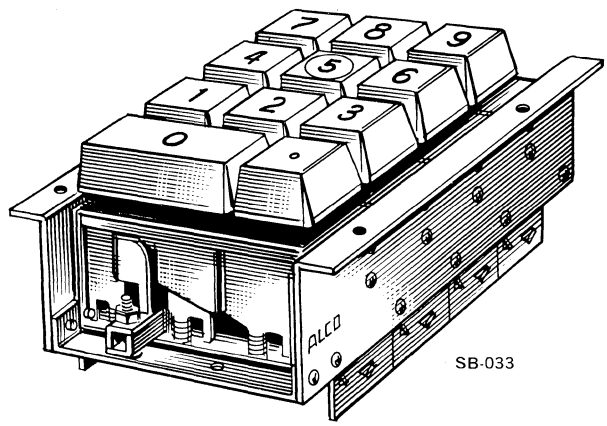
Now designers can be assured of highest reliability in data processing equipment. Short strokes provide a smooth operation of the switch plunger resulting in one of the finest keyboard actions obtainable. It is also suitable for test equipment, communication gear, and many other applications.

All details of this new switch line are designed for light pressure (5 ounces), operator's convenience, and positive input of data with long life under heavy office type of usage.

Highly efficient "single-pole open circuit" reed switches are used throughout assuring reliability and extremely long life expectancy. Square light grey buttons (19/32") have an industry standard 0-9 marking and format.

All switch positions contain a "positive lockout" between sections and rows. This feature prevents more than one position from operating at the same time. An extra "decimal" button is also provided to enhance design use.

This particular model shown is our standard SB-033 and is, therefore, available from stock without any design changes. This basic keyboard system is designed for flexibility and can be customized to meet the special needs of quantity users. Up to 12 switches may be installed in the basic module in any combination including momentary, locking maintained, or lockout design.



SB-033

SB-4C

PUSH BUTTON MODULES

This modular idea is a simple concept, which allows the design engineer to create his own custom push button layouts. Highly efficient single pole "normally-open" reed switches are used throughout thus assuring reliability and an extremely long life expectancy.

Light pressure (5 ounces) and short strokes result in optimum operators' convenience and positive input of data.

The basic module allows use of one to three switches in either momentary or alternate "push-ON-push-OFF" action. Stacking allows any number of these switch sections to be used in a group by themselves or with our mating 12 segment keyboard assemblies (SB-033, SB-034, etc.).

Standard size switch buttons are available separately in various colors, either single or extended buttons which span 2 or 3 switches. Note: that by use of longer buttons it is also possible to form 2 or 3 pole switch functions.

GLASS-TO-METAL SEALS

Exacting customer specifications are met with quality, glass insulated terminals manufactured by Airpax.

A wide variety of terminals are producible and glass can be color coded for identification. Leads can be kovar, sleeved solid copper or tubular. A large choice of standardized pins and lugs permits quick delivery to your specific needs.

Our Engineering Department will assure a seal to meet your requirement with a detailed analysis of your seal problem.

A 90 page catalog giving technical details is yours for the asking.

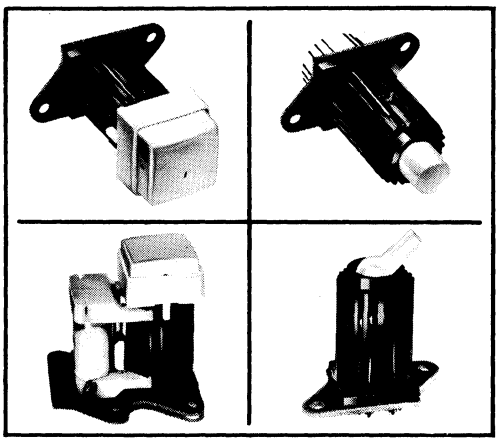
American Zettler, inc. | SWITCHES

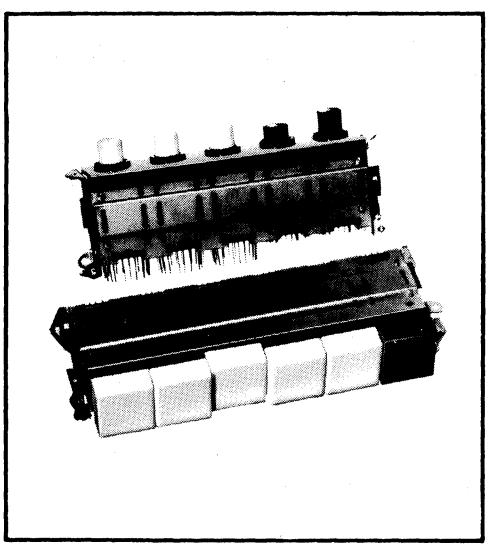
SERIES T-500 PUSHBUTTON AND TOGGLE SWITCHES

For chassis or PC board mounting only. No front panel screws. Six PDT fine silver self-cleaning slide-action contacts. Occupies less than one square inch of panel space. Only 1½" depth behind panel. Long-life special nylon parts used throughout. Pushbutton switches can be furnished with round ⅜" diameter or ¾" square buttons in white, black, red, yellow, green, or blue. Square buttons may be engraved or hot stamped. Illuminated pushbutton switches are available using T-1-¾ lamps, which are accessible from front. Prices from $1.00 to $7.00 (1-24 pcs).



BASIC SPECIFICATIONS

Contact Rating: 1 amp at 30 vdc or 0.2 amp at 115 vac.
Contact Arrangement: Two, four, and six form C contacts.
Life Expectancy: 10^6 mechanical; 5×10^4 at rated load.
Ambient Temperature Range: —20°C to +60°C.
Dielectric Strength: Under room conditions, 500v rms.
Insulation Resistance: Under room conditions, 10^9 ohms.
Terminals: Pierced solder lugs or PC pins.



PART NUMBERS FOR TOGGLE SWITCHES

(non-illuminated, white plastic toggles)

FUNCTION	PART NO.
Two-position	T 680
Three-position	T 681
Three-position: Lock, neutral, momentary	T 682

PART NUMBERS FOR PUSHBUTTON SWITCHES

FUNCTION	NON-ILLUMINATED		ILLUMINATED	
	round	square	round	square
Momentary	T 500	T 520	T 600	T 620
Push Lock, Push Release	T 540	T 560	T 640	T 660
Push Lock Reset Solenoid*	T 502	T 522	T 602	T 622

TO ORDER, add to the part number the color of button and contact arrangement.
*Standard solenoid is for 24 vac or vdc (200 ohms); other coils can be supplied to special order.

SERIES T-596 MULTIPLE SWITCHES

For front panel, chassis, or PC board mounting using 4-40 screws, single (T-500) pushbutton switches are frame-mounted. The above specifications apply; however, square button dimensions are ⅞" x 13/16" with 0.827" center-to-center spacing. Other versions, such as remote reset solenoid or heavy duty contacts for line switching, are also available.

Prices per station approximately $2.50 for non-illuminated; $4.50 for illuminated (1-9 pcs).

SWITCH CHARACTERISTICS

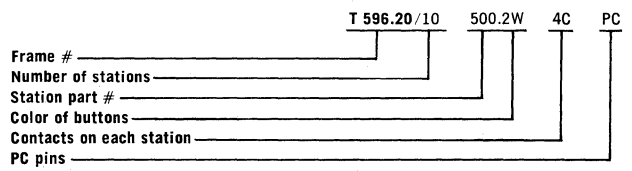
SWITCH FUNCTION	FRAME PART NUMBER	CAN BE COMBINED WITH THE FOLLOWING STATIONS	NUMBER OF STATIONS AVAILABLE
Non lock (momentary) Push lock, push release	T 596.10	Push lock, push release Non lock	3 to 11
Interlock	T 596.20	Non lock Push lock, push release	3 to 11
Interlock with one non-locking reset button	T 596.30	Non lock Push lock, push release	3 to 10 plus 1 RESET

STATION PART NUMBERS

FUNCTION	NON-ILLUMINATED		ILLUMINATED	
	round	square	round	square
Non-lock (momentary)	500.1	520.1	600.1	620.1
Interlock	500.2	520.2	600.2	620.2
All lock	500.3	520.3	600.3	620.3
Push lock, Push Release	540.4	560.4	640.4	660.4
Reset	500.0	520.0	600.0	620.0

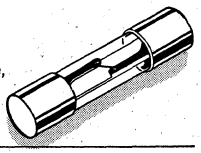
FOR EXAMPLE, TO ORDER:

A multiple-station pushbutton switch with: Ten interlock, non-illuminated stations with white round buttons, four form C contacts, and printed circuit terminals, the following part number would be developed: (See example at right)

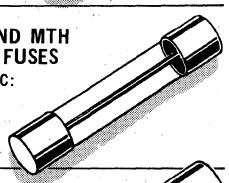


American Zettler, inc.
697 RANDOLPH AVE. ▪ COSTA MESA, CALIF. 92626 ▪ PHONE (714) 540-4190 ▪ TELEX: 67-8472

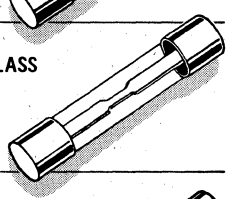
BUSS AGX FAST ACTING FUSES
¼ x 1 inch, glass tube, "quick-acting" type, 1/500 to 2 amp.



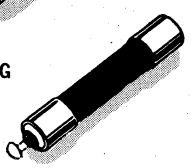
BUSS AGC AND MTH GLASS TUBE FUSES
¼ x 1¼ inch. AGC: 2½, 3 amps. MTH: 4, 5 or 6 amp.



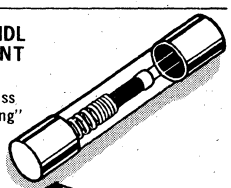
BUSS AGC GLASS TUBE FUSES
¼ x 1¼ inch. 4 to 30 amp.



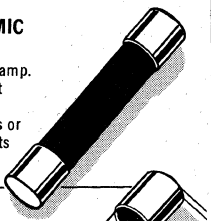
BUSS INDICATING FUSES
¼ x 1¼ inch, ¾ to 30 amp., and 13/32 x 1½ inch, 1/10 to 30 amp. Silverplated pin pops out when fuse is blown and provides quick, positive identification of faulted circuit . . . by visual signal, by activating an alarm, or both.



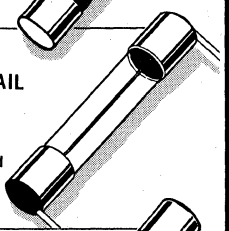
FUSETRON MDL DUAL-ELEMENT FUSES
¼ x 1¼ inch, glass tube "slow-blowing" 1/100 to 30 amp.



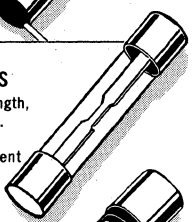
BUSS ABC CERAMIC TUBE FUSES
¼ x 1¼ inch, ¼ to 30 amp. For circuits having fault current capacity up to 25,000 amp. at 125 volts or 10,000 amps. at 250 volts



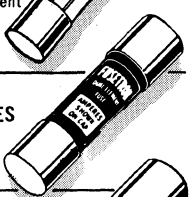
BUSS GJV PIGTAIL FUSES
¼ x 1½ inch, glass tube, with 1¼ inch leads of No. 20 tinned wire. 1/16 to 6 amp.



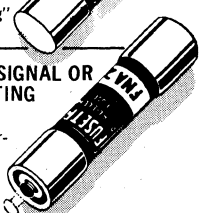
BUSS SFE STANDARD FUSES
5/8 to 1 7/16 inches in length, glass tube, 4 to 30 amp. Fuses of different amperages are of different lengths—to make it impossible to insert too large a size.



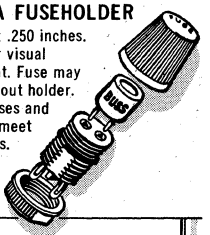
FUSETRON FNM FIBRE TUBE FUSES
13/32 x 1½ inch, dual-element "slow-blowing" 1/10 to 30 amp.



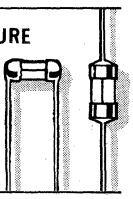
FUSETRON FNA SIGNAL OR VISUAL INDICATING FUSES
1/10 to 10 amp. Silver-plated pin pops out when fuse is blown and provides quick, positive identification of faulted circuit . . . by visual signal, by activating an alarm, or both.



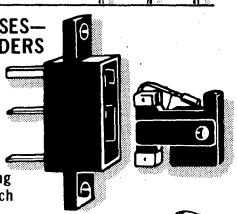
BUSS SUB-MINIATURE GMW FUSE AND HWA FUSEHOLDER
Fuse size only .270 x .250 inches. Fuse has window for visual inspection of element. Fuse may be used with or without holder. 1/200 to 5 amps. Fuses and holders available to meet military specifications.



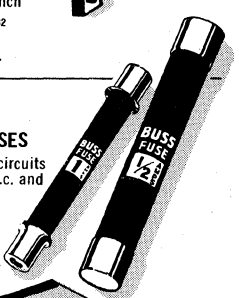
GFA TRON SUB-MINIATURE PIGTAIL FUSES
Body size only .145 x .300 inches. Glass tube construction permits visual inspection of element. Hermetically sealed. Twenty-three ampere sizes from 1/100 thru 15 amps.



BUSS GMT FUSES—HLT FUSEHOLDERS
Signal Indicating, Alarm Activating. For multiple circuit apparatus where space is at a premium. Holders take panel mounting space of only ¼ inch horizontal by 1 15/32 inches vertical. 18/100 to 10 amp.



BUSS HIGH VOLTAGE FUSES
For protection of circuits up to 20 KW on d.c. and 30KVA on a.c. 1/16 to 2 amp.



BUSS QUALITY
SMALL DIMENSION
FUSES and FUSEHOLDERS

FOR THE PROTECTION OF ALL TYPES OF ELECTRONIC & ELECTRICAL CIRCUITS & DEVICES

The complete BUSS line of fuses includes dual-element "slow-blowing," single-element "quick-acting" and signal or visual indicating types . . . in sizes from 1/500 amp. up—plus a companion line of fuse clips, blocks and holders.

Only a representative listing is shown here of the thousands of different types and sizes of fuses and holders available from BUSS.

All standard items are easily obtained through your BUSS distributor—but if you don't find what you want, get in touch with us.

When special fuses, fuse clips, fuse blocks or fuseholders are required, our staff of fuse engineers is at your service to help in selecting or designing the fuse or fuse mounting best suited to your requirements.

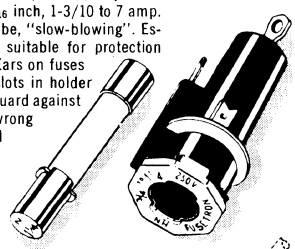
For detailed information on the complete BUSS line write for BUSS bulletin SFB.

BUSSMANN MFG. DIVISION, *McGraw-Edison Co.,* **St. Louis, Mo. 63107**

For fuses and fuseholders of unquestioned high quality . . .

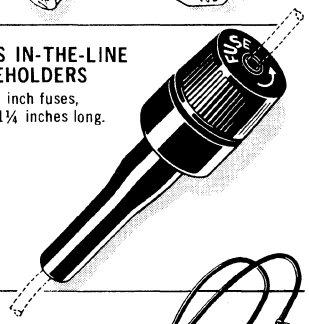
FUSETRON TYPE N FUSES AND FUSEHOLDERS

¼ x 1¼ inch, 0 to 1¼ amps. and ¼ x 1 13/16 inch, 1-3/10 to 7 amp. Glass tube, "slow-blowing". Especially suitable for protection of TV. Ears on fuses match slots in holder to safeguard against use of wrong size and type of fuse.



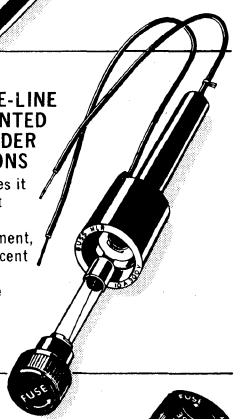
BUSS IN-THE-LINE FUSEHOLDERS

For ¼ inch fuses, ⅝ to 1¼ inches long.



BUSS IN-THE-LINE PANEL MOUNTED FUSE & HOLDER COMBINATIONS

HLR holder makes it simple to protect wide variety of devices or equipment, including fluorescent fixtures. Should fuse open, entire fuse-knob assembly is replaced.

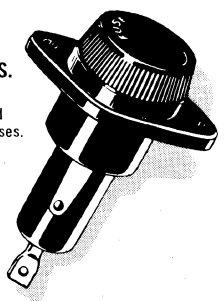


BUSS PANEL MOUNTED FUSEHOLDERS

Non-Indicating Series HJ, HK and HCM. For ¼ x 1, ¼ x 1¼ and 9/32 x 1¼ inch fuses.

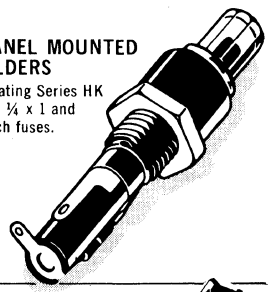
BUSS PANEL MOUNTED FUSEHOLDERS. SERIES HPC

For 13/32 x 1⅜ and 13/32 x 1½ inch fuses. Also available in military type.



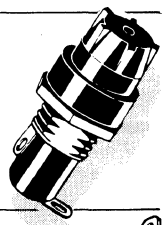
BUSS PANEL MOUNTED FUSEHOLDERS

Lamp Indicating Series HK and HJ. For ¼ x 1 and ¼ x 1¼ inch fuses.



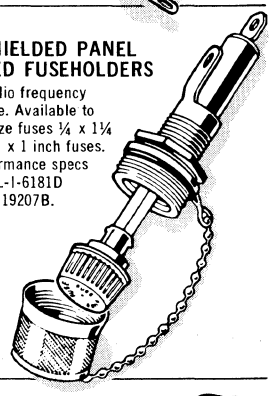
BUSS SPACE SAVER PANEL MOUNTED FUSEHOLDERS

Fuseholder only 1⅝ inches long . . . extends just 29/32 inch behind front of panel. Takes ¼ x 1¼ inch fuses. Holder rated at 15 ampere for any voltage up to 250.



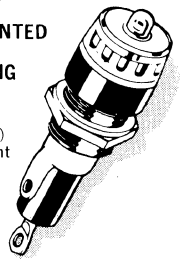
BUSS SHIELDED PANEL MOUNTED FUSEHOLDERS

Prevent radio frequency interference. Available to take two size fuses ¼ x 1¼ inch and ¼ x 1 inch fuses. Meet performance specs of both MIL-I-6181D and MIL-F-19207B.



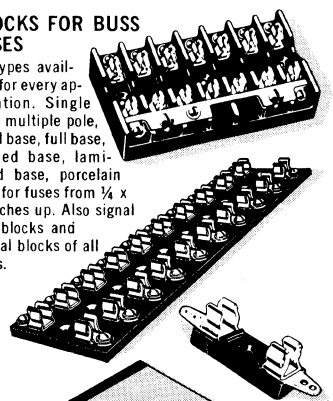
BUSS PANEL MOUNTED FUSEHOLDERS. VISUAL INDICATING SERIES HLD.

For ¼ x 1¼ inch BUSS GBA fuses (or GLD fuses) ¾ to 5 amps. Transparent knob permits visual indicating pin on open fuse to be seen.



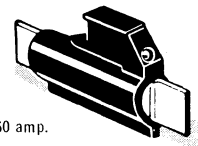
BLOCKS FOR BUSS FUSES

All types available for every application. Single pole, multiple pole, small base, full base, molded base, laminated base, porcelain base for fuses from ¼ x ⅝ inches up. Also signal fuse blocks and special blocks of all types.



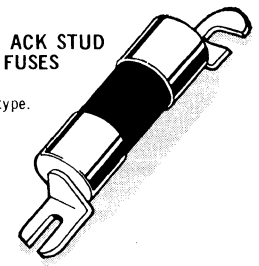
BUSS AIRCRAFT FUSES

Mechanical Indicating —Limiter type. Meet rigorous requirement of high speed, high performance aircraft. 1 to 60 amp.



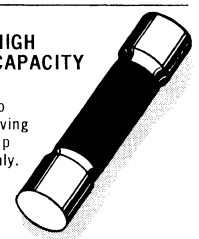
FUSETRON ACK STUD MOUNTED FUSES

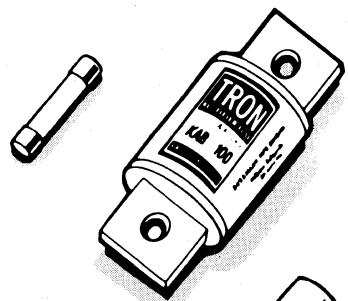
1 to 300 amp., dual-element type.



LIMITRON KTK HIGH INTERRUPTING CAPACITY FUSES

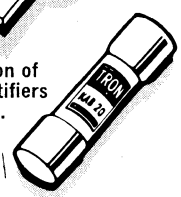
13/32 x 1½ inch, 1/10 to 30 amp. For circuits having fault current capacity up to 100,000 amps. AC only.

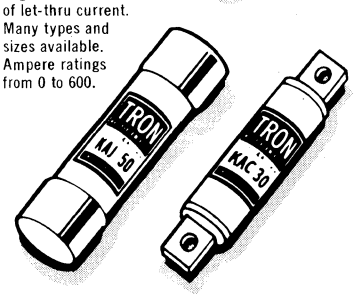




TRON RETCIFIER FUSES. For protection of Semi-Conductor Rectifiers and like applications.

Provide extremely fast opening on overload and fault currents, with a high degree of restriction of let-thru current. Many types and sizes available. Ampere ratings from 0 to 600.





for every protection need, insist on

SUPPLIED THE ECONOMICAL WAY ...THRU DISTRIBUTORS

BUSS QUALITY

Automatic Controls PRESSURE SWITCHES

DIAPHRAGM PRESSURE SWITCHES FOR ECONOMY AND FASTER DELIVERY

CUSTOM SET FOR PNEUMATIC AND HYDRAULIC APPLICATION

ENCLOSURES SOLVE ENVIRONMENT REQUIREMENTS

For absolute pressure requirement . . .
Cover is hermetically sealed and evacuated.

For gage pressure requirement in degrading environment . . .
Cover is hermetically sealed with standard atmosphere.

For differential pressure requirement . . .
Cover is vented to reference port.

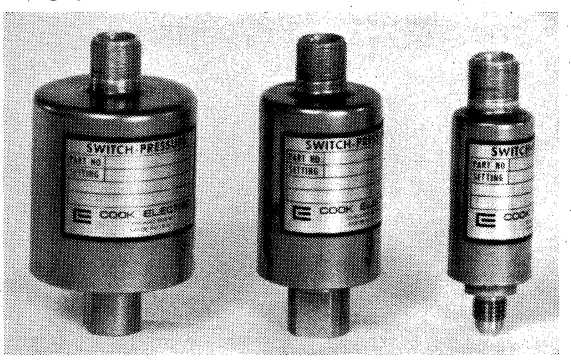
All covers are drawn non-corrosive stainless steel. On hermetically sealed units integrity is assured by glass-to-metal sealing of the connector.

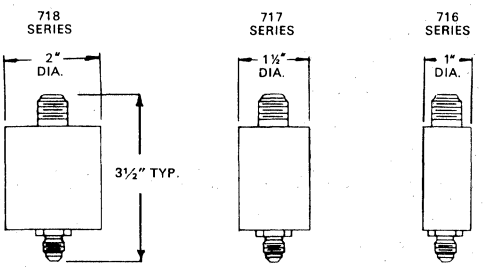
10SL-3P connectors are normally furnished. Other connectors can be provided on special order. A "commercial" protective cover is also available for even greater savings when the advantages of a sealed, stainless steel cover are not required.

Pressure Range of Setting	100 To 3000 PSIA	3 To 10 PSIA 20 To 500 PSIA	10 To 100 PSIA
Setting Tolerance	±3% at a specific temperature ±10% over ambient temperature range		
Dead Band Average	20% of setting		
Proof Pressure	4500 PSIA	2.5 x setting minimum	2.5 x setting minimum
Burst Pressure	7500 PSIA	5 x setting minimum	5 x setting minimum
Ambient Temperature	−65°F To 275°F		
Switch Contact Form	SPDT		
Current Rating	5 amp resistative at 28 VDC or 115 VAC		
Vibration	10G at 55 to 2000 CPS		
Shock	15G—11 MS MIL-E-5272C Procedure V		
Cycling Life	50,000 cycles minimum at .25 amp 25,000 cycles minimum at 5 amp.		
Weight	0.3 lb.	0.3 lb.	0.5 lb.

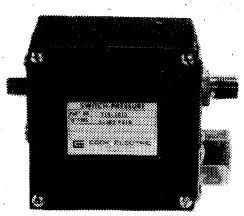
FEATURES

- Military reliability in accuracy and repeatability of setting.
- Zero leakage.
- Corrosion protection.
- Long system life.
- Versatility in your system design.
- New economy.
- Fast delivery.





PRESSURE SWITCHES



NEW OIL TIGHT SWITCH

The new Cook Electric oil tight pressure switch provides a combination of engineering advances that guarantee top performance for at least 20% longer than most other comparably-priced products in this field.

Three pressure ranges (0-500 psig), 15 AMP capacity, 50,000 operating cycles at rated load over ambient temperature ranges of —65°F to 180°F provide top performance.

Only three pressure ranges are required to cover a band of 0 to 500 psig. This means fewer switch variations to cover all of your pressure requirements — regardless of pressure media.

Direct panel mounting or direct on the pipe is another feature of this new pressure switch. Standard fittings are ¼" NPT, male or female.

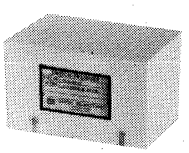
Both the pressure setting and deadband are adjustable using only a screwdriver.

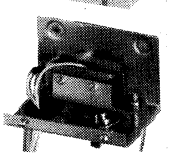
Part Number		Operate Pressure	Dead Band	Proof Pressure
Male Thread	Female Thread			
719-1031	719-1021	0-75	20-45	150
719-1032	719-1022	50-200	40-100	250
719-1033	719-1023	100-500	160-250	750

Life: 50,000 cycles minimum @ rated load. **Electrical Rating:** 15 amps @ 125, 250 or 480 vac.; ½ HP @ 125 vac, 1 HP @ 250 vac.; 0.8 amp @ 125 vdc, 0.4 amp @ 250 vdc. **Repeatability:** ±2% of maximum setting at fixed temperature. **Dielectric Strength:** 1500 VRMS 60 Hz terminal to case. **Ambient Temperature Range:** —65°F to +180°F. **Mounting:** Panel or direct to pipe. **Size:** Approximately 5" high x 3½" wide x 2½" deep. **Pressure Inlet:** ¼-18" NPT male or female.

OTHER FEATURES

- **Fusion-welded stainless steel pressure capsules prevent leakage, protect against corrosion, and guarantee a longer system life.**
- **Nickel chrome alloy diaphragms are used to assure complete accuracy and maximum repeatability at any pressure setting your particular system may require.**
- **Pressure switches can be pre-set to your specific requirement. The basic units are designed to fit a wide range of your pressure sensing needs. They may also be designed to conform to certain system fluctuations while maintaining peak performance levels.**
- **Fusion welding to the port mount produces a self-contained seal assembly. Maintenance is kept to a minimum.**
- **Gasketed die cast housing protects internal parts — oil tight.**





ADJUSTABLE PRESSURE SWITCH for INDUSTRIAL APPLICATIONS

A field proven pressure capsule has been adapted to a fully adjustable pressure switch.

Three pressure ranges are available to meet all requirements.

Adjusting the pressure setting can be done with a spin tight wrench, box wrench or similar tools. Settings in a range of 25:1 are possible with the lower range switch.

The sheet metal cover is held in place by two screws and is readily removed for either changing the pressure setting or connecting wires to the screw terminals on the snap switch. A rubber grommet is provided for open wiring or can be removed to accept ½" conduit fittings. Nothing interferes with the easy installation of the wiring to the pressure switch.

This compact switch may be panel mounted or mounted directly on the pipe. Standard fittings are ¼" NPT, male or female as desired.

Part Numbers		Nominal Setting	Setting Range - PSIG				Dead Band Max.	Proof Pressure
			Minimum		Maximum			
Female Thread ¼"-18 NPT	Male Thread ¼"-18 NPT	PSIG	Act	Deact	Act	Deact	PSIG	PSIG
719-0001	719-0011	10	3.5	0.5	25.0	22.0	6	100
719-0002	719-0012	60	21.0	1.0	125.0	105.0	30	200
719-0003	719-0013	250	120.0	70.0	500.0	450.0	50	1000

FEATURES

Wide Range of Adjustment: 25:1 in lower press. **Ease of Wiring. Ease of Mounting. Adjustment:** With spinner wrench with cover removed. **All Welded Construction:** (Pressure capsule). **Stainless Steel:** Pressure parts — accept all **gases and liquids. Repeatability. Compact.**

STANDARD SPECIFICATIONS

Life: 50,000 cycles minimum at rated load. **Electrical Rating:** 15 amps @ 125, 250 or 480V AC; ⅛ HP @ 125V AC, ¼ HP @ 250V AC; ½ amp @ 125V DC, ¼ amp 250V DC. **Dielectric:** 1500 v RMS 60 Hz. **Ambient:** —65°F to 180°F. **Repeatability:** ±5% at fixed temperature. **Mounting:** Direct to pipe or 2 - ¼" holes on 2¾" centers. **Size:** 4" wide, 2 1⁵⁄₃₂" high excluding pipe fitting, 2½" deep. **Pressure Part:** ¼" NPT male or female.

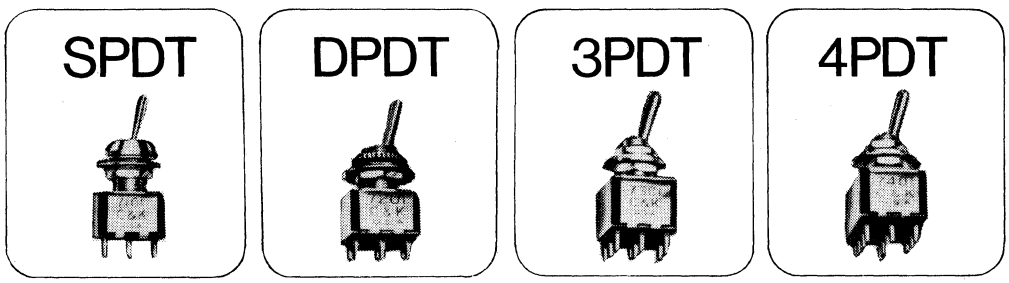
C&K SUBMINIATURE SWITCHES

Designed to meet the highest standards of quality and reliability. C & K's subminiature toggle and momentary pushbutton switches successfully combine maximum performance with minimum weight and small size. They are available in one, two, three, and four poles.

All of the switches feature rugged construction, simple mounting, excellent appearance, and long, trouble-free operation!

These subminiature toggle and pushbutton switches adapt to virtually any manual switching requirement in a very wide range of O.E.M. applications where space is at a premium!

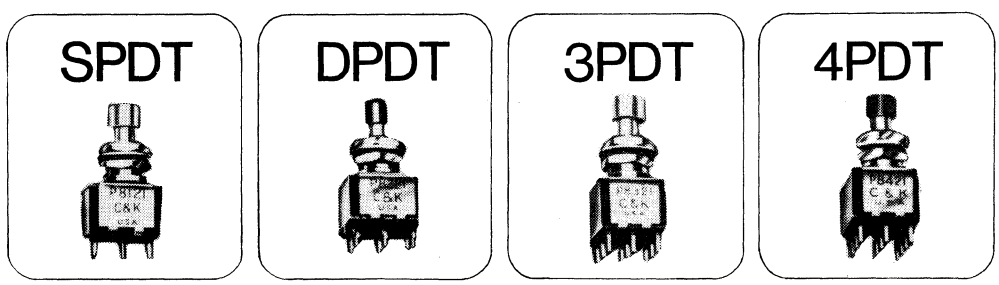
STANDARD CONFIGURATIONS — **TOGGLE SWITCHES**



General Specifications

Contact Rating: 5 Amperes resistive load @ 115 VAC — 28 VDC.
Insulation Resistance: 1000 megohms minimum.
Dielectric Strength: 1000 volts rms at sea level.
Electric Life: 100,000 make-and-break cycles minimum on all models ending in 01 only; all other models 40,000 cycles. 115 VAC — 28 VDC resistive load.
Initial Contact Resistance: 10 milliohms maximum at 2-4 VDC, 1 amp.
Contacts and Terminals: Working contacts Coin Silver
Operating Lever: Bright chrome plated brass toggle
Mounting Bushing: Nickel plated brass
Housing: Stainless steel
Case Material: General purpose phenolic.
Standard Hardware Supplied.
2 Hex mounting nuts
1 Internal tooth lockwasher
1 Keyed positioning ring

STANDARD CONFIGURATIONS — **PUSHBUTTON SWITCHES**



General Specifications

Contact Rating: 1 Ampere resistive load @ 115 VAC — 28 VDC. Designed for use in dry (very low energy) circuits.
Insulation Resistance: 1000 megohms minimum.
Dielectric Strength: 1000 volts rms at sea level.
Electric Life: 60,000 cycles minimum at full load.
Mechanical Life: 1,000,000 make or break cycles minimum.
Contacts: Gold
Terminals: Copper Alloy with gold plating. Epoxy sealed terminals standard.
Pushbutton: Nylon plunger and cap.
Mounting Bushing: Nickel plated brass, high torque to withstand 12 in-lb with no distortion or loosening of parts.
Housing: Stainless Steel
Case Material: General purpose phenolic.
Standard Hardware Supplied:
2 Hex mounting nuts
1 Internal tooth lockwasher

CTS CORPORATION ELKHART, INDIANA

Rotary Selector Switches

WHY ENGINEERS SPECIFY CTS ROTARY SWITCHES

CTS Reliability. The heart of selector switch reliability is the wafer. CTS offers two wafers with uniquely reliable characteristics. The CTS selector switch 212 wafer is of a molded, glass alkyd, rivet-free construction which will not break if dropped or jarred. It eliminates mechanical shifting of stator circuitry and terminals and allows the construction of more compact switches. Automated manufacture provides unprecedented uniformity. In each production run, all switches are identical, terminal placement is exact and permanent—the result is trouble-free assembly into your circuit. The CTS 216 wafer employs the more conventional "clip" terminals but utilizes unbreakable glass reinforced alkyd for both the rotor and stator. The precision molded stator incorporates strut spacers to evenly space the contacts and eliminate radial shifting as well as a rib design to increase insulation resistance. Tight quality control on both wafers and detents from the raw material stage through final assembly and packaging assures you of the fine quality and reliability associated with all CTS products.

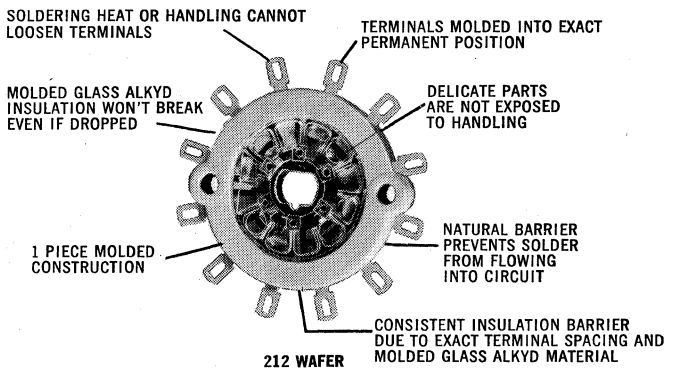
CTS Design Flexibility. CTS selector switches provide thousands of variations of shorting and non-shorting circuitry including mixed shorting and non-shorting circuit combinations within the same pole. Design flexibility's further enhanced by a wide selection of index assemblies, two wafer constructions which can be intermixed on the same switch and attached CTS manufactured power switches and variable resistors. CTS truly offers a one-source supply for the complete switch package.

CTS Military Switches. CTS types 211, 212 and 215 are available to meet the requirements of MIL-S-3786B, type SRO-3/C.

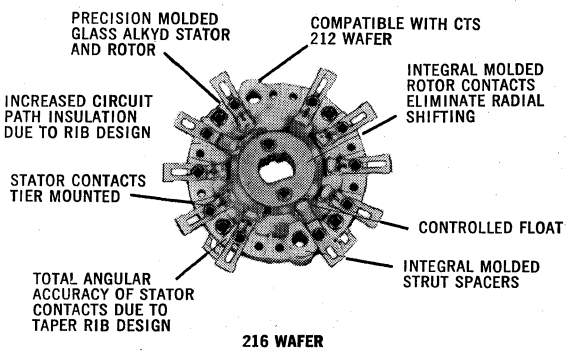
CTS Switches are Made to Your Exact Specifications. All orders received for CTS selector switches are handled individually and are custom manufactured to your exact specifications. The majority of applications can be met with switches which are custom designed from parts shown in this catalog, giving you the advantages of lower cost and faster delivery.

On special applications our engineering staff is at your disposal for designing the best and most economical switch to meet your exact requirements.

WAFERS



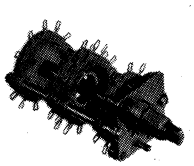
212 WAFER



216 WAFER

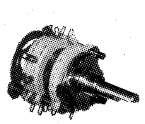
DETENTS

STAR WHEEL DETENT
Type 211



HIGHEST QUALITY • POSITIVE FEEL • 250,000 CYCLE LIFE • FREE FROM END AND SIDE THRUST • HIGH SWITCHING TORQUE 15—60" OZ.

DIE CAST DETENT
Type 212 ND



LOWEST COST OF ALL DETENTS • LOW COST STAKED CONSTRUCTION • AVAILABLE FOR 1 AND 2 WAFER SWITCHES • 20,000 CYCLE LIFE • SWITCHING TORQUE 18 — 40" OZ.

Adjustable stops on all detent except Type 212ND.

Description	Series	Data Sheet	Order From
1⅛" diameter rotary wafer switch with star wheel detent	211	4001	Calif.

PRINTED CIRCUIT SWITCH
Series 020-090
Series 001, 002, 003, 005

Eliminate expensive wiring and possibility of wiring error; these switches are designed for printed circuit board insertion. Electrical and mechanical characteristics similar to 1-1/2" switches (Series 020, etc. above).
Slide switches above available for printed circuits.

FOR IMMEDIATE DELIVERY
— many types are available from stock from Centralab Industrial Distributors.

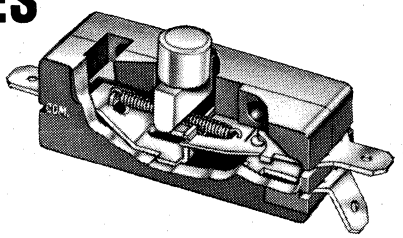
CHERRY®

LONG-LIFE PRECISION SWITCHES

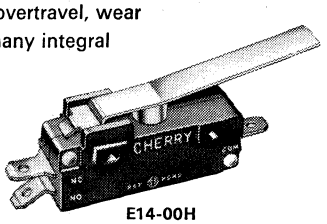
At the heart of every Cherry precision switch is the unique stainless steel coil spring that insures outstanding operating reliability and consistent performance. Precision-made, carefully assembled and tested, this rugged coil steel spring provides greater overtravel, greater repeatability of operating points in every Cherry Switch you specify.



GENERAL PURPOSE E-14 SERIES

A rugged switch with large overtravel, wear resistant nylon button and many integral hinged actuator variations.

Electrical Ratings—25 amps., 125-250 VAC—1 H.P., 125 VAC—2 H.P., 250 VAC

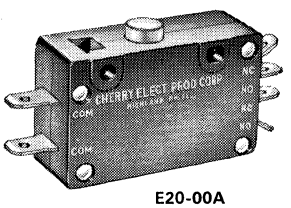


E14-00H

E-20 SERIES DOUBLE POLE SWITCH

Heavy-duty, yet extremely compact unit for double pole service, features wide range of actuator variations and large overtravel.

Electrical Ratings—20 amps., 125-250 VAC—1 H.P. 125 VAC—2 H.P., 250 VAC



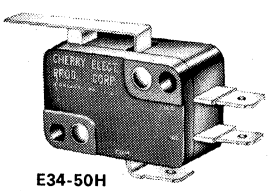
E20-00A

MINIATURE E-34 SERIES

Compact precision unit with high electrical capacity for heavy-duty miniature switch use. Available with QC, solder or screw terminals.

Electrical Ratings—15 amps., 1/2 H.P., 125-250 VAC

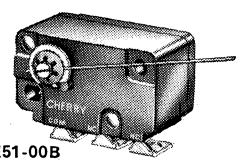
Miniature series available in a variety of electrical ratings with operating forces as low as 1-1/4 grams.



E34-50H

COIN SWITCHES

Low torque rotary action long life switch. Operating torque 4 inch-grams maximum.



E51-00B

Electrical Ratings—5 amps., 125-250 VAC

E51-00B Clockwise
.205 x .032 QC Terminals

Other coin switches available in variety of terminations and with counterclockwise actuation.

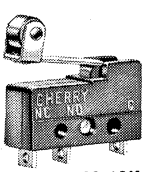
SUBMINIATURE E-62 SERIES

A high capacity subminiature switch with large overtravel and integral hinged actuators.

Electrical Ratings—10.1 amps., 125-250 VAC 1/4 H.P., 125 VAC

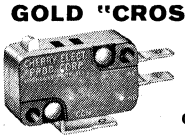
Switch Body—25/32" x 23/64" x 1/4"

Subminiature series available in light force version E-61 with electrical rating of 5 amps., 125-250 VAC.

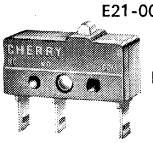


E62-10K

GOLD "CROSSPOINT" CONTACT SWITCHES



E21-00A



E63-00A

For positive switching of low energy solid state circuits. New Gold "Crosspoint" contacts provide high force per unit of contact area and virtually eliminate contact closure interference. Available in four basic cherry switches: E21 enclosed miniature; E63 subminiature; E53 low torque and S31 open type miniature.

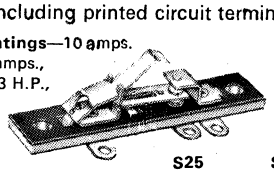
Electrical Ratings—0.1 amps., 125 VAC

Insertion Resistance—50 Milliohms Maximum

OPEN TYPE SWITCHES

Heavy-duty type for cam follower actuation. Can be ganged for multi-circuit control. Many actuator and terminal variations including printed circuit terminals on S30 type.

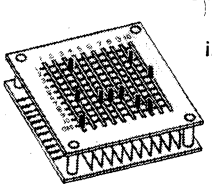
Electrical Ratings—10 amps. 125 VAC—5 amps., 250 VAC—1/3 H.P., 125-250 VAC



S25

S30

SELECTOR SWITCHES



C10-20A

So compact, one hundred sequencing positions are accommodated in 10 sq. inches of panel area. Cross-grid printed circuitboard eliminates soldering—no jungle of wires to cause problems either. Choose from eleven standard models with from 100 to 2780 switching positions.

ELIMINATE DOWN-TIME ON ROTARY & THUMBWHEEL SWITCHES

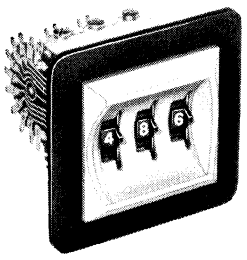
and also get accurate, precise control

UNLIMITED APPLICATIONS CDI switches offer fast sure settings and quick read-out for computer, automated and control equipment, and for test and programming applications, etc.

QUICK SERVICEABILITY Unique 5-second wafer replacement obsoletes other switches. Simply lift out old wafer, slip in new wafer. No unsoldering . . . no disassembling . . . no wire removing.

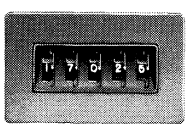
EXTREME VERSATILITY Regardless of size or shape needed CDI is well prepared to meet your every switch requirement.

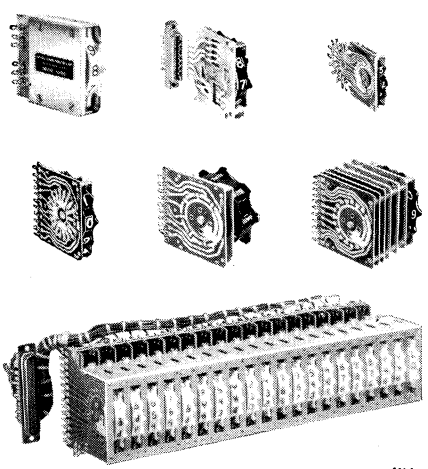
THUMBWHEEL SWITCHES



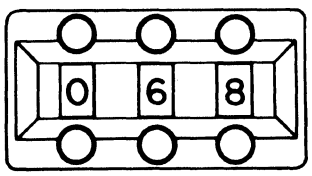
C•D•I

Digital and Binary. Meet MIL-S-22710. For critical reliability applications. Available with internal lighting MIL-L-25467A. Switch modules with panel and switching elements separately sealed for complete protection are available. Bezel types have no visible screws when rear mounted.





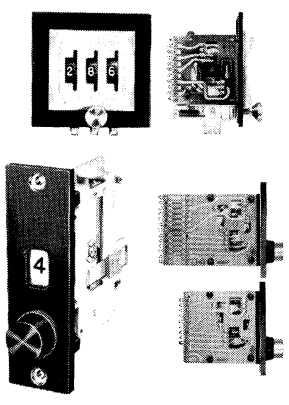
PUSHBUTTON SWITCHES



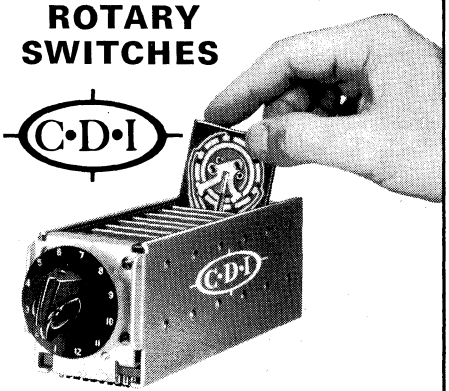
NEW MINI 10-POSITION ADD/SUBTRACT

Retrofits most miniature thumbwheel switch panel openings. 8 & 12 positions available. Simply push one button to add, the other to subtract. Each decade mounts on ½" centers. Over 1,000,000-operation service life.

C•D•I



ROTARY SWITCHES



For critical reliability applications. Meet MIL-S-22710. Removable wafers permit quick changing of programs, configurations, circuits. CDI patented switches with dust covers available in sizes 2" x 2", 3" x 3" and 4" x 4" with lengths to accommodate up to 36 wafers. Operation may be manual, motor or solenoid.

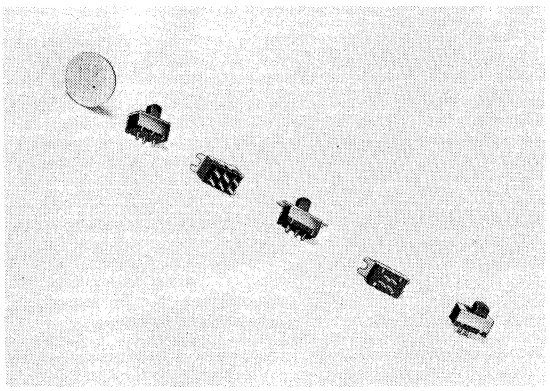
SWITCHES THAT MASTER JOB REQUIREMENTS CONCEPT THROUGH COMPLETION — YOUR DESIGN OR OURS

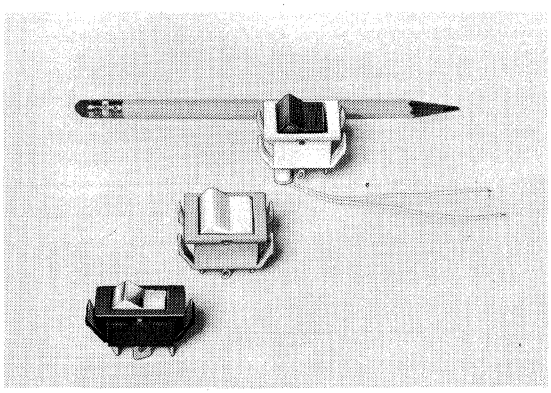
Chicago Switch, Inc., has special competence in microminiaturization, and the particular capability to expand production output severalfold rapidly (for that excellence in performance it was nominated for "Subcontractor of the Year").

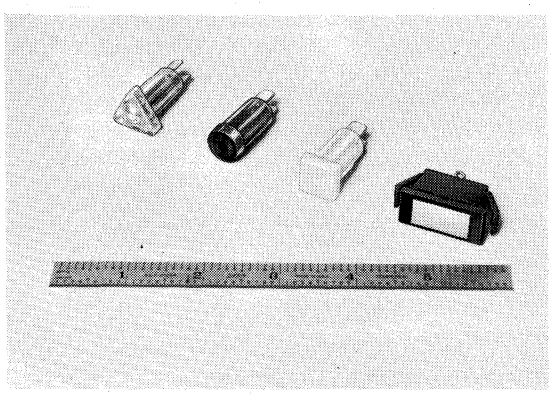
Principal product lines are microminiature control switches for ultra high quality portable electronic devices, modular leaf switches of various types, and slide, pushbutton and snap switches.

Company reputation as an outstanding supplier to Electronic Industry manufacturers is based on completely reliable delivery commitments, top quality control, ability to produce to even the most demanding requirements.

A highly creative engineering group, capable of exceptional technical flexibility, has produced many patented switch designs. Chicago Switch, Inc. is only a request away from putting the advantages of its alert staff to work for you. Make an advantageous management move — write or phone Chicago Switch today.







SUBMINIATURE SLIDE SWITCHES SOME WITH MILLION-CYCLE CAPABILITY

A growing family of mini-slides backed by more than five years of engineering and development; new hybrids continuously being born. Includes world's smallest slide switches with true snap (toggle-type) action in some of the SPDT and DPDT versions . . . in switch bodies measuring only ¼″ high x ½″ long x .300 wide.

Write and ask for data sheets No. 23-021.

SHARP ROCKER SWITCHES LIGHTED AND UNLIGHTED

The cleanest panel appearance, positive snap action, AND easy snap-in installation. Prices that "just can't be beat." Fine silver contacts standard.

Unlighted versions available in all circuits from SPDT to DPDT, maintained or momentary action, and 3-position/center-off, maintained or momentary on one or both sides.

Choice of any color in large quantity orders. Standard colors are: white, black, grey, red, and ivory. Button and bezel colors can be matched or mixed.

Lighted versions available in all circuits from SPST to SPST + SPDT, with buttons translucent red, amber, green or clear.

Lamps which can be assembled into these switches include 110V-250V neon with a choice of resistors, and 1V to 48V incandescent.

Ask for data sheets on the 26- and 27-Series rocker switches.

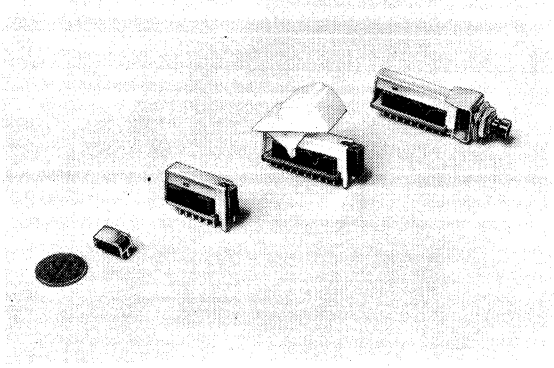
PANEL LIGHTS

- Permit coding of panel indicators by shape, as well as color.
- Available in red, amber, white, clear, and green lenses.
- Bezel of rectangular version and lens of any version can be hot-stamped with your legends, with bezel and hot-stamping colors to your specs. Standard bezel colors are white, black, red, gray, and ivory.
- All versions designed for fast snap-in installation, and available in 110V and 250V neon, 1V and 48V incandescent.

Refer to Series No. 15

CHICAGO SWITCH, INC.

2035 WABANSIA AVENUE
CHICAGO, ILL. 60647 • (312) 489-5500



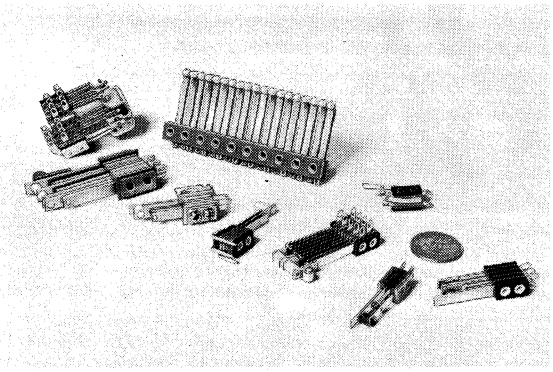
MULTI-POLE MINIATURE SLIDE SWITCHES AS MANY AS 5,000,000 ACTUATIONS

Top quality and service life for signal circuit P.C. applications — can even handle some power loads.

Shown are DPDT, Series No. 23-020; 4 PDT, Series No. 23-004; 6 PDT, Series No. 23-006. Thoroughly field proven in tape recorders, communication equipment, sensitive instrumentation.

"4C" and "6C" (4PDT and 6PDT)switches are available in push-on-push-off versions, as well as momentary versions. Options include half-rocker button (shown on a 6C), choice of any make-before-break or break-before-make combination of poles.

Panel-mount version also available (pictured on other 6C) for use with AMP terminal No. 42428-2 or equivalent.

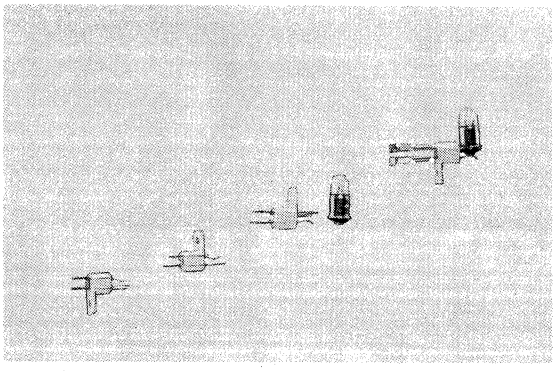


LEAF SWITCHES

- Designed to customer specs if desired, or quoted on existing customer design.
- Reliable delivery dates (customer references supplied on request).
- Versatile in-house tooling — will produce 90% of all existing leaf switches with no tooling charge.
- Special capabilities in extraordinary tooling needs.

Ask for the leaf switch capability brochure. Patented leaf switch with snap action, shown here, can be supplied in SPDT, DPDT, or 3PDT with an actuator blade, lifter blade or pushbutton bracket.

Ask for the 20,000 Series data sheet.



KLIPSOCKET™ FOR MIDGET-FLANGED BASED LAMPS

Finally there's a commercial connector for the T-1¾ M.F. based incandescent lamp. New Klipsocket™ (patent applied for) engages and disengages easily from the lamp base.

Two .093″ wide terminals accept AMP quick-connector No. 61005-1 or equivalent. Terminal material and the terminal holes are designed for easy soldering, if you wish.

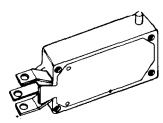
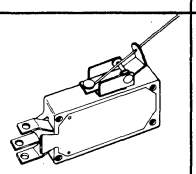
• Width, length, height-11/64" x 55/64" x 9/16" • Electrical capacity-5 amps 250 vac. res. • Operating pressure-3 oz. max. • Overtravel-.007 min. Movement diff.-.003 max.

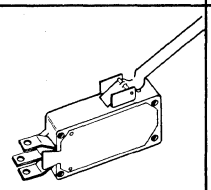
JMP-100
MINIATURE
• Width, length, height-17/64" x 15/8" x 61/64" • Electrical capacity-5 amp 125 vac. res. 3 amp 250 vac. res. • Operating pressure-27 grams max. • Extremely long life



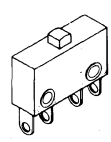
JMP-100-1
MINIATURE
• Width, length, height-17/64" x 15/8" x 13/64" • Electrical capacity-5 amp 125 vac. res. 3 amp 250 vac. res. • Operating pressure on wire actuator-5 gram inch • Any length or shape wire actuator



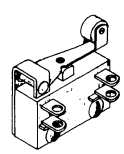
JMP-100-4
MINIATURE
• Width, length, height-17/64" x 15/8" x 13/64" • Electrical capacity-5 amp 125 vac. res. 3 amp 250 vac. res. • Operating pressure on blade 5 gram inch • Any length or shape blade actuator



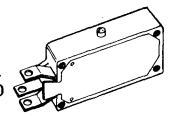
GM-100
SINGLE POLE, DOUBLE-BREAK
• Width, length, height-1/4" x 25/32" x 7/16" • Electrical capacity-10 amps 250 vac. • Operating force-8 oz. max. • Also available with end or out the cover terminals.



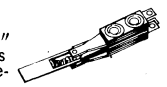
GM-320
SINGLE POLE, DOUBLE-BREAK, SIDE-MOUNTED ROLLER ACTUATOR
• Width, length, height including roller at rest-19/64" x 13/16" x 7/16" • Electrical capacity-10 amps 250 vac. • Also available with end or bottom terminals • Operating force-2 oz. at roller.



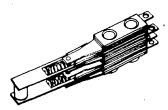
JMP-500
MINIATURE
• Width, length, height-17/64" x 15/8" x 59/64" • Electrical capacity-12 amps 125 vac. res. 6 amps 250 vac. res. • Operating force range-3 to 12 oz. • Move.diff.-.008 max.



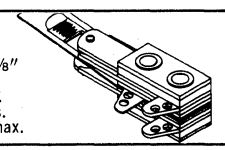
OBS-100
MINIATURE OPEN BLADE
• Width, length, height-3/16" x 15/8" x 5/16" • Electrical capacity-5 amps 250 vac. res. • Operating pressure-30 grams max.



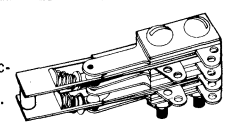
OBS-500
MINIATURE OPEN BLADE
• Width, length, height-3/16" x 15/8" x 43/64" • Operating force-70 grams max. • Electrical rating each pole-5 amps 250 vac. res.



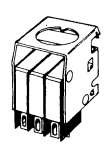
OBG-120
OPEN BLADE
• Width, length, height-3/8" x 21/16" x 1/2" • Electrical capacity-15 amp 125 vac. res. 7.5 amp 250 vac. res. • Operating force-4 oz. max.



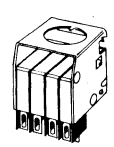
OBG-500
OPEN BLADE
• Width, length, height-3/8" x 21/16" x 13/16" • Electrical capacity each pole-15 amp 125 vac. res. 7.5 amp 250 vac. res. • Operating force-8 oz. max.



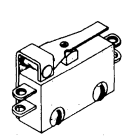
MOD-130
TRIPLE POLE, DOUBLE THROW
• Width, length, height-21/32" x 3/4" x 13/16" • Electrical capacity each pole-5 amps 250 vac. res. • Momentary action
• Meets mil specs.



MOD-140
4 POLE, DOUBLE THROW
• Width, length, height-3/4" x 3/4" x 13/16" • Electrical capacity each pole-5 amps 250 vac. res. • Momentary action
• Meets mil specs.



GM-210
SINGLE POLE, DOUBLE-BREAK, SIDE-MOUNTED LEAF ACTUATOR
• Width, length, height including actuator-19/64" x 5/8" x 7/16" • Electrical capacity-10 amps 250 vac. • Operating force-2 oz. • Also with bottom or out the cover terminals.



MOD-160
6 POLE, DOUBLE-THROW
• Width, length, height-23/32" x 13/32" x 1.0" • Electrical capacity-5 amps 250 vac. each pole • Momentary action • Meets mil specs.

What's the top value in low cost matrix switching?

Try the Telefunken OHS individually selectable, 9 pole, 12 position ordinate holding switch. Distributed exclusively in the U. S. A. by Cunningham.

Ideal for educational systems, intercom systems, many other audio and control applications. Brings you: **1. Compact size.** Only 3½" x 2½" x 3½".
2. Magnetic latching. Gives fail-safe protection against power failure. **3. Low cost.** Because of compact design and modern manufacturing methods.
4. Modular construction. Plug-in units easily replaceable—simplifies maintenance, reduces downtime.

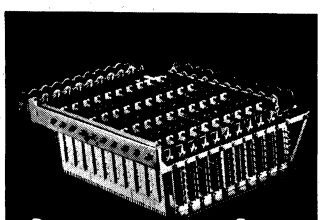
$57.75 ea.

OHS (Telefunken)
Ordinate Holding Switch

Switching systems problems? Let our know-how in systems engineering work for you with: **OHS (Ordinate holding) switches; crossbar switches** for general purpose/high-performance requirements; **McKee random access matrices** for high voltage and current; **reed matrix switches** for high frequencies.

What do you expect from a high-performance matrix switch?

Probably perfection. And here's one that comes pretty close. The Cunningham general purpose, high-performance crossbar switch: **1. Versatile.** Covers the full range of data acquisition requirements. Handles voltages from 1 microvolt to 1000 volts—usable up to 30 MHz. **2. Reliable.** 20-million operations per crosspoint assured. Up to 100-million are common.
3. Readily Programmable. By every control device from tape to direct computer input.

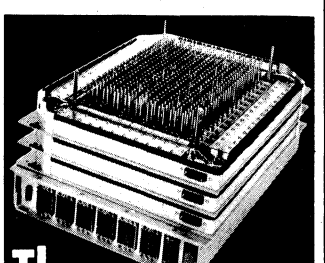


The Cunningham Crossbar Switch

Switching systems problems? Let our know-how in systems engineering work for you with: **Crossbar switches; McKee random access matrices** for high voltage and current; **reed matrix switches** for high frequencies; **Telefunken OHS (ordinate holding)** switches for low cost applications.

Looking for a "power house" random access switch?

You've got it with our McKee switch for harness and cable checking equipment, aircraft test systems, and engine test stands. It has: **1. High power capability.** Handles up to 2 amps at 4000 volts. **2. Programmability.** By every control device from tape to direct computer input.
3. Complete random access. Unique design permits signal to go in and come out at any point in the matrix.



The McKee Switch

Switching systems problems? Let our know-how in systems engineering work for you with: **McKee random access matrices: crossbar switches** for general purpose/high performance requirements; **reed matrix switches** for high frequencies; **Telefunken OHS (ordinate holding)** switches for low cost applications.

WIDEBAND CROSSBAR APPLICATIONS

Ultra reliable and exceptionally versatile Cunningham wideband crossbar switch matrices are particularly suitable for wideband high frequency switching and very low level, low impedance switching.

Cunningham wideband crossbars find application in the routing, distribution and accumulation of high speed data as well as audio video and analog switching systems.

TYPES

Cunningham wideband crossbar switch matrices are made in two patterns: One to provide group-to-group switching; the other for group-to-one switching. Either may be controlled by a coordinate electromagnetic or a direct electromagnetic actuator mechanism.

The electromagnetic actuator assembly is composed of a simple magnetic coil/armature mechanism or by a coil armature assembly wherein the magnetic core may be permanently magnetized to enable the mechanism to retain a connection in the absence of power. This latter technique is known as "magnetic latching" as related to Cunningham crossbar switches.

Either Type A or Type F switch is available with magnetically latched connections such that only momentary power is needed to coordinately operate the switch which will establish a connection at which time power may be removed. This results in exceptionally low operating power for a system as well as signal maintenance in the event of power failure. Both the group-to-group and group-to-one patterns are actuated by electromechanical assembly in one of two ways: by coordinate actuation and by direct actuation. In coordinate actuation a crosspoint is operated by energizing a select coil followed by operation of a hold coil which then closes six sets of contacts.* In direct actuation a crosspoint is operated by energizing an electromagnetic actuator located directly over the crosspoint. A separate coil is provided for each crosspoint.

FEATURES

- All Cunningham Wide Band Crossbars feature 20 million operations per crosspoint without adjustment.
- Typical life one hundred million operations per crosspoint.
- Excellent low level and dry circuit performance. Metallurgical symmetry results in exceptionally low (less than 0.1 microvolt per degree C.) thermal EMF's.
- Handles signals dc to 10 megacycles with high isolation.
- Gold contact, self wiping.
- Insulation resistance one million megohms.
- High speed operation 65 closures per second.
- Exceptionally high contact density.

*Six form A contacts are provided as standard. The various configurations of form C contacts and A and C combinations are available. Write for bulletin 114A.

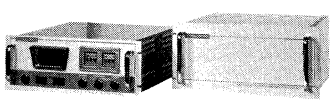
DATA ACQUISITION APPLICATIONS

The Cunningham Crossbar Scanner is basically a small switching system capable of connecting many signal circuits to one circuit, or distributing one signal circuit to many circuits sequentially or an accordance with BCD program signals from peripheral equipment.

The distinguishing characteristics of the Cunningham scanner in addition to its well-known crossbar matrix signal fidelity make it particularly suitable for handling low-level signals of less than 1 microvolt or high-level signals in excess of 500 volts. The wide band, high frequency capability of the Cunningham Crossbar Switch permits accurate routing and excellent fidelity in the transmission of analog or digital data particularly when such data is of the fast rise time, short duration type.

Cunningham scanners are also used in data logging applications, signal distribution systems, and automatic cable harness and printed circuit card continuity measuring systems. Cunningham Crossbar Scanners are suitable for 19" rack mounting and are powered from a nominal 117 volt 60 cycle AC line.

SCANNEX MODEL 309G



PRICE: $4295.00

The Model 309G features a permutation switch located on the back panel which permits selection of 600-1 wire channel configurations, 300-2 wire, 200-3 wire, and 100-4, 5 or 6 wire arrangements. Featured also on the Model 309G is complete remote random access, first and last channel selection, channel-path-complete signal output, end-of-scan signal output, BCD 1, 2, 4, 8 channel identification readout, internal and external drive selection, random-access, single scan or continuous scan control features.

Maximum channel sampling speed on the Model 309G is 60 per channels per sec.

MODEL 450 SCANNER

PRICE: $1695.00

The Model 450 is a 100 point crossbar scanner used for direct sampling of a wide dynamic range of signal voltages or currents. Four channel capacities are available as a factory wired option: 100-1 wire, 60-2 wire, 40-3 wire, and 20-6 wire channels are available. Operational modes include random access, single and continuous scan, clock pulse generator with speeds to 100 channels per second. For further details see Cunningham Bulletin 14450.

An IC Control for the Scannex Series is in development. It is compatible with DTL and TTL logic and will be available in mid-'69.

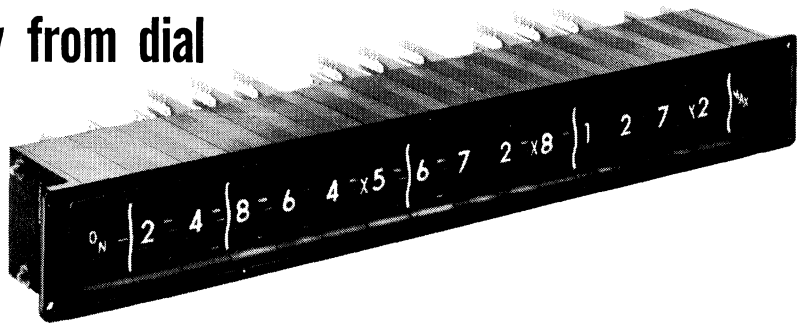
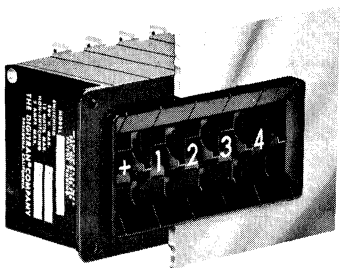
DIGISWITCH®

Converts directly from dial setting to coded electrical outputs.



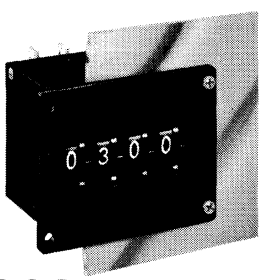


Series 300 general purpose Digiswitch

This is a compact, finger-actuated module only ½" wide, with 8, 10, 12 or 16 positions on the setting wheel. Stops may be inserted to limit the number of positions on the dial where required. More than 100 standard types of coded outputs are available, covering a wide range of capabilities such as the following:

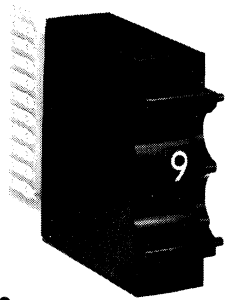
- Octal-to-binary conversion
- Decimal-to-binary conversion
- Conversion to binary with complement and provision for diodes
- Voltage divider
- Capacitance decade
- Resistance decade
- 8, 10, 12, 16 position "decimal" switches. Single pole and double pole, shorting and non-shorting

As many individual switch modules as required may be ganged into a single unitized assembly for simplicity of mounting. No separate escutcheon plate, secondary brackets or other special hardware is required—only four screws. Prices start at $5.00 per module.



Series 13000 front-mounted Digiswitch

The Series 13000 Digiswitch is identical in every way to the Series 300 except that the case is designed so that an entire assembly can be mounted from the front of the panel, completely covering the panel cut-out. No separate escutcheon plate or other hardware is required for mounting. The same codes, dial positions and other features available in the standard Series 300 Back-Mounted configuration are also available in the Series 13000 Digiswitch.



Series 9000 sealed and Series 19000 dust-sealed Digiswitches for industrial environments

The Series 9000 and 19000 Digiswitches are interchangeable in a panel mounting with the Series 400 shown on the next page. The basic difference between these two Series and the Series 400 is the extension of the printed circuit board from the rear of the switch case, providing direct component mounting on the printed circuit board. Output terminals can be directly soldered or will mate with standard printed circuit board connectors. Some modules in the Series 9000 and 19000 are available with wire-wrap or other special terminals.

The Series 9000 Digiswitch has the switch elements contained in a separate chamber within the switch case. An "O" Ring around the drive shaft and potting around the printed circuit board in the rear of the switch case provides a total seal as in the Series 400.

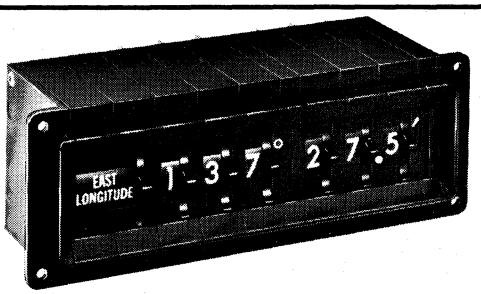
The construction of the Series 19000 is exactly the same except the potting of the printed circuit board at the rear of the case and the "O" Ring seal are left out. The Series 19000 provides an excellent dust seal in applications where total sealing is not important. Most of the codes available in the Series 300 are also available in the Series 9000 and 19000.

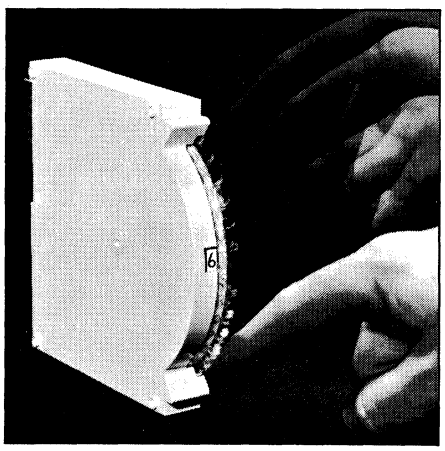
Turn page for additional units ▸

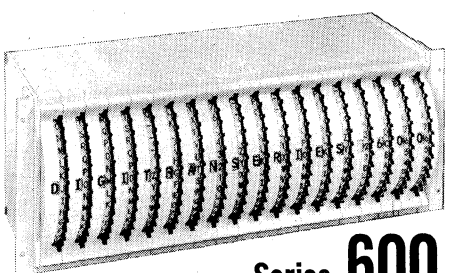
All DIGISWITCHES and MINISWITCHES are designed to meet the requirements of MIL-S-22710A

DIGISWITCH®

For accurate manual setting, visual readout and coded electrical outputs.







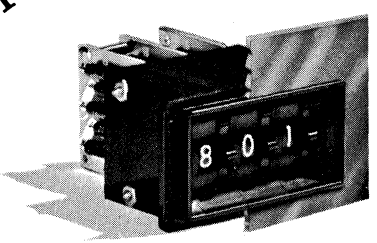
Series 600
Digiswitch for rapid setting

The Series 600 Digiswitch offers the operator the selection speed of a pushbutton, or slide bar switch, while it retains the in-line visual readout feature of a thumbwheel switch. All of the design characteristics of the Digiswitch line (modular construction, easy mounting, simple operation, savings in panel space) are retained. The setting wheel has up to 40 positions, yet all are readily available in no more than 4 wheel actuations.

The Series 600 offers extensive electrical output capabilities. For example, up to 6 bits of binary and 10 levels of output information can easily be obtained. The setting wheel consists of two parts: the right-hand side contains the operator selection positions and the left-hand side contains the in-line readout window positions. Provisions for the installation of diodes, resistors or other components directly on the circuit board can often be provided. Circuit board terminals allow the use of both standard-edge connectors or solder.

See Preceding Page

IT'S A POT!



DIGIVIDERS / DIGIDECADES
Thumbwheel operated voltage dividers and resistance decades.

Digividers and Digidecades are specifically designed for applications where precise digital setting of resistance or voltages are required. They are easy-to-read and operate, require little panel space, and give 10 times more accuracy than a potentiometer — at little added cost. In addition, the new units provide reliability, low contact resistance and repeatability of setting. For example, a change from 13 ohms to 913 ohms is made with one flick of a finger. Digividers are available with either Kelvin-Varley or Poggendorff circuits, a wide range of input impedances, and an accuracy of 0.1% of full scale. Digidecades resistance decades provide an accuracy at 25°C of 1% of setting.

Features and options available in the various series

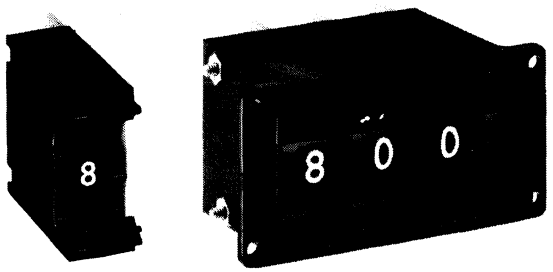
MINISWITCH®

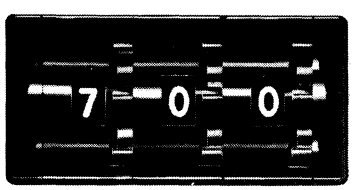
Where limited space presents a problem.

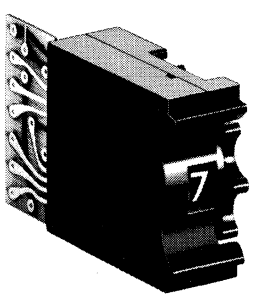


Series 8000 Miniswitch — standard

The Miniswitch is the smallest thumbwheel switch available. Compact and versatile, Series 8000 provides substantial savings in panel space. Each switch module requires a panel cutout only 0.96" high x 0.5" wide. Modular construction permits the ganging of any combination of switch modules into a single, unitized assembly. No separate escutcheon plates, special mounting brackets, or other hardware is required to mount an entire assembly.

All Miniswitches are available in two, eight or ten position—decimal or coded electrical output. Dial stops can be provided to limit the number of dial positions. Internal replaceable lighting is also available as an option in all Miniswitch Series. Some models in the Series 8000 Miniswitch have provisions for mounting components directly onto the printed circuit board.



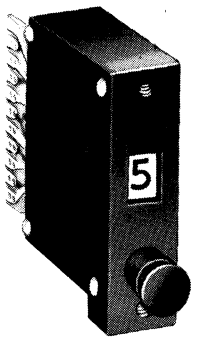


Series 700 Miniswitch — sealed

The Series 700 is constructed much the same as the Series 200 Miniswitch with the switching elements enclosed in a separate chamber, but the printed circuit board extends from the rear of the case. The Series 700 is totally sealed with an "O" Ring shaft seal and a window sealing the front of the case and potting around the back of the case and the printed circuit board. The extensions of the PCB provide for direct soldering and the mounting of components directly on the printed circuit board in some models. The Series 200 and 700 are interchangeable within the same assembly and conform to the same mounting dimensions.

Send for a FREE copy of the new Digiswitch-Miniswitch Catalog

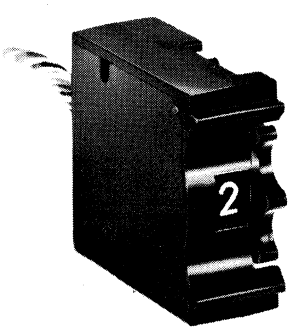
A new catalog describing all Digiswitch and Miniswitch units is available free on request. It includes complete technical data, truth tables showing codes and electrical output configurations, dimensional sketches, standard performance specification, prices, order blanks and typical applications. This catalog is reproduced in full in VSMF — The Microfilm Catalog File.



Series 12000 Miniature Pushbutton rotary switch

Series 12000 is a miniature pushbutton rotary switch which permits complete panel sealing to prevent contamination of switch and panel interior. Individual modules can be sealed from dust and moisture. Recommended for military communications and to meet requirements of MIL-S-22710A.

Series 12000 is available in all 8- and 10-position standard Octal and BCD Codes including complement and "true, not-true" functions. Width: .480 inch. Height: 1.30 inch. Weight: less than 0.4 oz. Low profile; button extends only 3/16" beyond the panel. Modules can be mounted on 0.5 inch centers. Metal case, sealed glass window, optional replaceable internal lighting, diodes may be mounted on PCB.

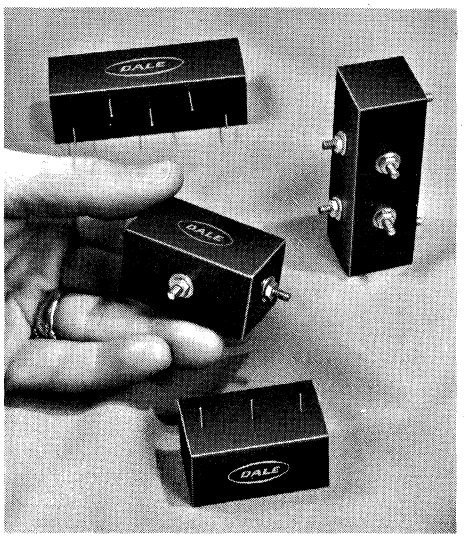


Series 200 Miniswitch—sealed

The Series 200 is the same miniature size and mounting conformity as the Series 8000 Miniswitch but is specifically designed for use in equipment which must operate in severe environments (sands, dust, salt spray, high humidity, temperature extremes, explosive atmosphere, etc.). All switching elements are enclosed in a sealed chamber within the switch case. No part of the printed circuit board is exposed. Wire leads serve as the output terminals.

All DIGISWITCHES and MINISWITCHES are designed to meet the requirements of MIL-S-22710A

DALE® SIOUX DIVISION SURGE ARRESTERS



■ SERIES LVP *Signal Line Protector*

Fail-safe design safeguards delicate solid-state receiving, amplifying and control circuitry against damaging transient voltages caused by lightning, capacitive coupling between signal and power lines, etc. Eliminates transient problems between the solid-state and electromechanical portions of switching circuits and control equipment.

PROTECTIVE CAPABILITIES

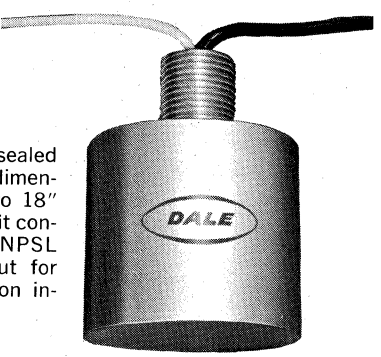
Clipping Voltage: 6-200 volts ±5% or ±10%. Voltage rise time can be as fast as 100 KV μsec. **Bypass Capability:** Will bypass repeated surges of up to 400 amperes with a 5x10 μsec. wave shape. Shorts permanently to ground with surges of greater magnitude. **Frequency Range:** 30Hz to 100KHz. **Shunt Capacity:** Less than 50 pf.

PHYSICAL SPECIFICATIONS

LVP-1 (for balanced lines): 1″x1″x1-7/8″; **LVP-3** (for unbalanced lines): 1″x1″x3-1/8″. **Terminals:** Printed circuit pins or 6-32 studs, LVP-1 = 3, LVP-3 = 5. **Housings:** Molded epoxy.

■ SERIES SPA *Secondary Power Arrester*

Designed for fuse or junction box mounting to protect against direct or indirect lightning and other transient voltages. Unit has hermetically sealed pre-ionized spark gap for increased sensitivity and stable breakdown voltage level. Exceeds all applicable NEMA, USAS, and IEEE standards.



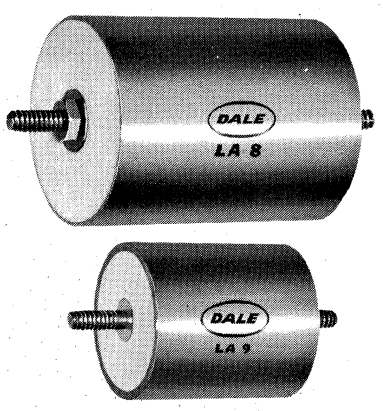
PROTECTIVE CAPABILITIES

DC Arc-Over Voltage: SPA-100 (120 VAC) 500-700 volts; SPA-200 (277 VAC) 600-800 volts. **Fast Rise Arc-Over Characteristics:** Typically 1500 volts with 10KV μsec. pulse applied; **Bypass Capability:** Will withstand repeated 10 KA (10x20 μsec.) current surges. Power follow current extinguished in 1/2 cycle or less. Voltage between terminals less than 2000 volts when conducting 20,000 amps of surge current. **Insulation Resistance:** Greater than 1,000 megohms initially, greater than 10 megohms after current pulses. **Shunt Capacity:** Less than 25 pf.

PHYSICAL SPECIFICATIONS

Spark gap hermetically sealed with soft solder. Overall dimensions: 1-3/4″Dx3″L. Two 18″ leads provided for circuit connection. Has 1/2″-14 NPSL conduit fitting with nut for mounting in any position indoors or outdoors.

■ SERIES LA *Miniature Size—Maximum Circuit Protection*



Patented design insures much greater reliability and repeatability than standard spark gap designs. Widely used to protect communications equipment from lightning and to guard industrial controls and radios from heavy transient spikes.

PROTECTIVE CAPABILITIES

Spark-Gap Arc-Over Voltage: LA8 = Factory adjustable from 1500 to 4000VDC ±20%; LA9 = Factory adjustable from 500 to 5000 VDC ±20% (10% available). **Bypass Capability:** LA8 = 10 current surges each rising to 15,000 amp peak in 5 μsec. and containing total charge of 21 coulombs; LA9 = 100 current surges of 300 amps peak with 2x4 millisecond wave shape. Both types will perform as stated without damage to arrester or equipment attached and with less than 20% change in original DC breakdown voltage. **Insulation Resistance:** Greater than 1000 megohms initially and greater than 10 megohms after rated current surges. **Shunt Capacity:** LA8 = 7.7 mmfd, LA9 = 3.5 mmfd.

PHYSICAL SPECIFICATIONS

LA8 = 2-1/2″ outside length. Body 1-55/64″ L x 1-1/4″ D. Weight 4 oz. LA9 = 1-5/8″ outside length. Body 1″ L x 3/4″ D. Weight 2 oz. **Mounting:** Clip, stud or flange; **Terminal:** LA8 = UHF female or "N" type coax connector, wire or 6-32 stud; LA9 = 4-40 stud or wire. **Seal:** LA8 = Dustproof; LA9 = Hermetic.

■ ADDITIONAL MODELS

- Aircraft lightning arresters of all types
- Arresters for high voltage circuits
- Miniature transient suppressors for circuit board mounting.

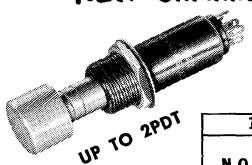
NEW Slimline by "switchline"



A new 2100 series Slimline version of our standard Illuminated Pushbutton Switch featuring silver slide bar action. Add BR after part number for mounting on ⅜" centers. Utilizes AN3140-T 1-¾ or ALC-100 bulb. All other specifications same as standard.

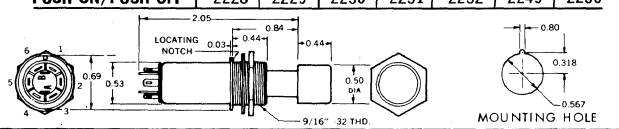
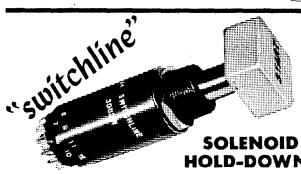
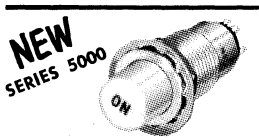
PUSH ON/PUSH OFF	2228	2229	2230	2231	2232	2249	2250





Switchline Illuminated Pushbutton switches with an integral hold-down coil which is activated with switch. Holds the pushbutton in the depressed position until coil is de-energized returning it to relaxed position. Available in all circuit configurations up to 6 PDT. Same secifications as standard model.



FRONT PANEL MOUNT MINIATURE MOMENTARY SWITCHES

An exceptionally short momentary switch available in circuit configurations up to 2 PDT. Clear anodized case. All specifications same as standard model except plunger travel which is 3/32".

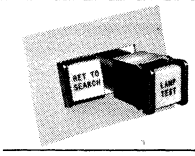
60 SERIES LOW COST SELF MOUNTING SWITCH ASSEMBLY

This series features our 2100 switch incorporated as an integral part of the mounting hardware. All plastic, front mounting case with barriers. "U" shaped channel bracket is easily attached to back of panel and switch is installed with two screws. Same circuitry and specifications as 2100 series.



"switchline" MOUNTING ADAPTERS

- Snaps in from front panel
- Mounts in panel thickness up to ⅛"; for thicker panel mounting add "Z" to Model No.
- Fingernail groove in lens for easy removal
- Bezel available in white, gray or black Lexan.

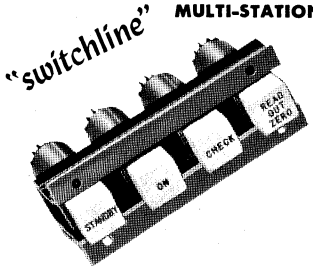
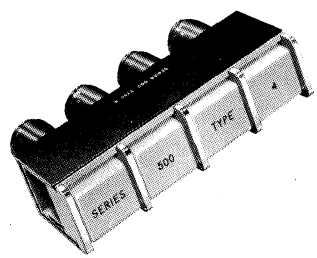
"switchline" MULTI-STATION ASSEMBLIES



SERIES 400

Multi-station switch assemblies designed for sub-panel mounting by means of a flanged "U" channel. All standard Switchline switches can be incorporated with several types of mechanical interlocking/lockout actions between stations. Up to 12 stations in one or two row configurations.



SERIES 500

A new line of front panel mounting assemblies featuring long-lasting chrome barriers between each switch. All standard Switchline switches in ten types of tracking action and switching sequences. Up to 12 switches in single or dual row on ⅞" or 1" centers.

TYPE I — Mounting frame only.
TYPE II — Momentary and lockout.
TYPE III — Independently maintain and locked out.
TYPE IV — Interlock and lockout.
TYPE V — Maintained with master release.
TYPE VI — Maintained with remote master release.
TYPE VII — Maintained with remote master release and master release lockout.
TYPE VIII — Interlock and lockout with master release.
TYPE IX — Interlock and lockout with remote master release.
TYPE X — Interlock and lockout with remote master release and master release lockout.

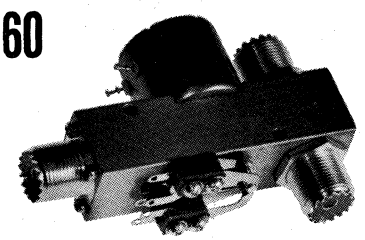
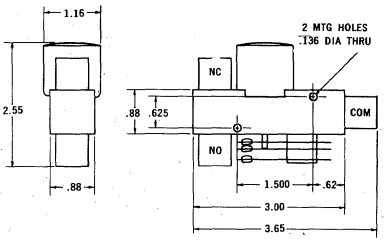
SPDT REMOTE

SERIES 60





FEATURES — The Series 60 are remote operation, ruggedly constructed, SPDT coaxial relays designed for operation from low-level to 1 KW. They are offered with or without 2 Form C auxiliary contacts. For transmitter-receive applications they are available with a special high isolation "G" connector at the NC or receive position. This "G" connector increased the isolation to greater than −100 db at frequencies up to 500 Mhz, although it reduces the power rating through this connector to 20 watts. "G" connectors will increase the listed VSWR above 400 Mhz.

Typical electrical characteristics are shown below when used in a 50 ohm transmission line. UHF connectors and solder terminals are not recommended above 400 Mhz.

ORDERING INFORMATION

Select coil voltage and replace the XX with the two digits for the complete part number. Example: 60-260442 is the SPDT relay with UHF connectors for 115V AC operation with 2C auxiliary contacts.

ELECTRICAL CHARACTERISTICS

Freq. Mhz	VSWR	Crosstalk —db.	Insertion Less —db.	RF Power Rating
0-50	1.05	45	.05	1 KW
100	1.06	40	.05	1 KW
400	1.12	30	.1	750 W
1000	1.3	25	.15	500 W

MODIFICATIONS

Available on special order:

1. Moisture sealing of all entrances to RF portions.
2. Microswitch type auxiliary contacts.
3. Gold finished RF contacts.

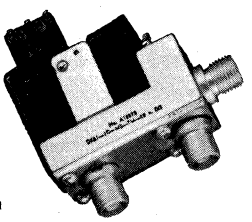
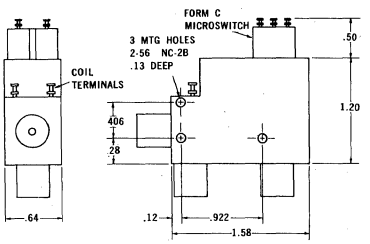
SPDT REMOTE

SERIES 61





FEATURES — The Series 61 are small SPDT switches for military and severe environmental applications and designed to withstand the applicable requirements of specification MIL-S-3928B. The balanced armature actuator prevents contact chatter under high frequency vibration and severe shock. They are offered with many types of connectors and 1 or 2 Form C microswitch auxiliary contacts. Gold finished contacts provide reliable operation at low levels.

ORDERING INFORMATION

Select coil voltage and replace XX with the two digits for the complete ordering part number.

Example: 61-240312 is SPDT switch with TNC connectors 48 DC coil and 1 Form C microswitch.

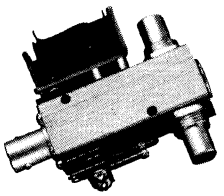
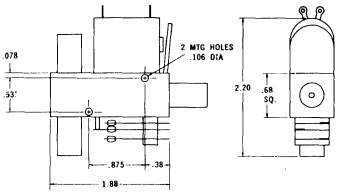
SPDT REMOTE

SERIES 77





FEATURES — The Series 77 are medium size, light weight, low priced coaxial switches for industrial and less critical military applications. The "T" shaped connector configuration has the common connector at one end and the NO and NC connectors 180° apart at the other end. They are available with or without 1 Form C auxiliary contacts.

ORDERING INFORMATION

(1) Select coil voltage and replace XX with the two digits for the complete ordering part number.

Example: 77-230932 is switch with phono conns, 1 C aux. contacts and 26 DC coil.

(2) Standard with 2 ft. cable lengths.

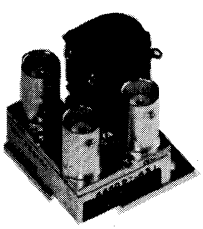
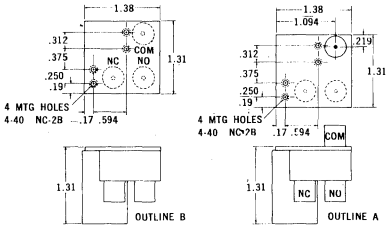
SPDT REMOTE

SERIES 163-164





FEATURES — These series are low priced general purpose coaxial switches for use up to 1000 Mhz and are intended for military and other applications where reliability is important. The Series 163 has the common connector passing through the mounting surface, while the Series 164 has all connectors opposite to the mounting surface. Gold diffused contacts are used for reliability at low signal levels. The unused connector is open circuited (non-shorting).

ORDERING INFORMATION

Select coil voltage and replace XX with the two digits for the complete ordering part number.

Example: 163-2632 is SPDT switch with "F" connectors and 115 AC coil.

ELECTRICAL CHARACTERISTICS

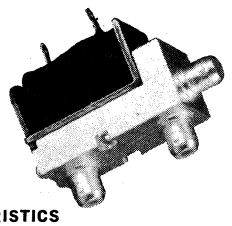
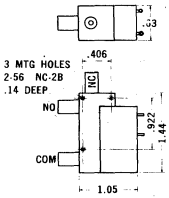
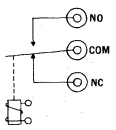
SPDT REMOTE

SERIES 169







FEATURES — The Series 169 are small, flat mount switches for use up to 1 Ghz. They are offered with a wide selection of connectors (TNC and smaller) and all standard coil voltages. Gold finished contacts provide reliable operation at low levels. The mounting holes are spaced the same as the Series 61, and they are interchangeable in most applications.

ORDERING INFORMATION

Select coil voltage and replace XX with the two digits for complete ordering part number.

Example: 169-2406 is the switch with MB connectors and 48 DC coil.

ELECTRICAL CHARACTERISTICS

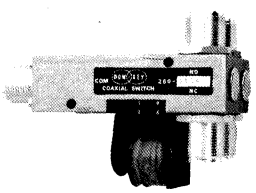
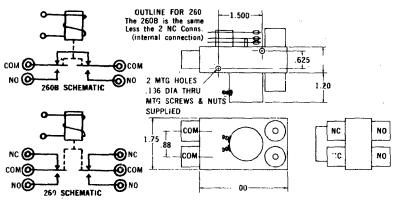
DPDT REMOTE

SERIES 260





FEATURES — These are remote operation, ruggedly constructed, coaxial switches designed for operation from low level to 1 KW. There are two basic types: The 260 is a standard DPDT switch with 6 connectors. The 260B is a similar item, except there is an internal connection between the NC contacts, leaving only 4 connectors. The latter type is widely used for inserting a circuit element, such as a power amplifier, between two normally connected elements, such as an exciter and antenna.

Both types are offered with a wide variety of connectors and coil voltages and with or without auxiliary contacts.

ORDERING INFORMATION

(1) Select coil voltage and replace XX with the two digits for the complete ordering part number.

Example: 260B-260442 is the 260B with UHF connectors, 115 AC coil and 2 Form C auxiliary contacts.

ELECTRICAL CHARACTERISTICS

Typical high frequency measurements are shown below with the switch in a 50 ohm transmission line. UHF connectors are not recommended above 400 Mhz.

Freq. Mhz	VSWR	Crosstalk —db.	Insertion Less —db.	RF Power Rating
0-50	1.05	45	.04	1 KW
100	1.06	40	.05	1 KW
400	1.12	30	.1	750 W
1000	1.3	25	.15	500 W

SPECIFICATIONS

RF and auxiliary contacts - Fine silver. Auxiliary contacts are rated 5 amps. 115 V AC

LIFE EXPECTANCY
1,000,000 cycles

OPERATING TIME
25 ms. approximately

WEIGHT
12 oz. approximately

MODIFICATIONS

Available on special order:

1. "G" type high isolation connectors on NO or NC.
2. Moisture sealing of all entrances to RF portions.
3. NC connectors on the 260B in place of the standard NO.
4. Microswitch type auxiliary contacts.
5. Gold finished RF contacts.

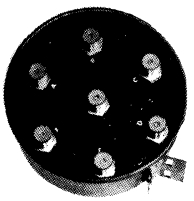
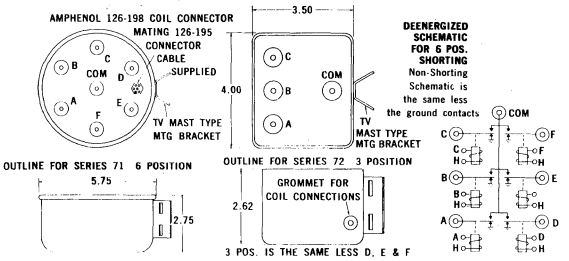
MULTI-POSITION REMOTE

SERIES 71-72





FEATURES — The Series 71 and 72 are low priced, high power multi-position switches commonly used for switching antennas, transmitters or receivers at frequencies up to 500 Mhz. Both types are in weatherproof sealed cans and may be mast mounted. They are available with a wide selection of connectors, coil voltages, and shorting or non-shorting contacts. They have a separate actuating coil for each position. Any one or more inputs (outputs) may be connected to the common.

ORDERING INFORMATION

(1) Select coil voltage and replace XX with the two digits for the complete ordering part number.

Example: 72-230202 is a Series 72 3 position coaxial switch with BNC connectors, non-shorting contacts and 26 DC coil.

ELECTRICAL CHARACTERISTICS

Typical high frequency measurements in a 50 ohm transmission line.

Freq. Mhz	VSWR	Crosstalk — db Shtg.	Crosstalk — db Non-Shtg.	Insertion Loss — db	RF Power Rating

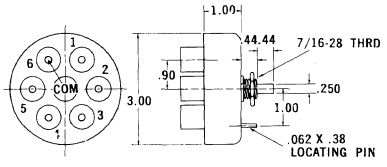
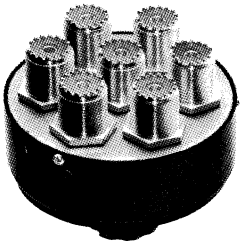
MULTI-POSITION MANUAL

SERIES 78





FEATURES — The Series 78 are manually operated switches with true coaxial switching members (not wafer switches). They are offered in 2, 3, 4 and 6 position types, plus a transfer or crossover type and a DPDT type.

The useful frequency range is 0-1 Ghz except 500 Mhz with UHF connectors. The unused connectors are open circuited (non-shorting).

Switch is operated by pull-knob turn method.

ELECTRICAL CHARACTERISTICS

Typical electrical characteristics are shown below in a 50 ohm transmission line.

Freq. Mhz	VSWR	Crosstalk — db.	Insertion Less — db.	RF Power Rating
50	1.05	60	.03	1.5 KW
100	1.06	55	.04	1 KW
400	1.15	45	.05	1 KW
1000	1.3	30	.1	500 W

SPECIFICATIONS

WEIGHT
10 oz. approximately

MATERIALS
Connectors - silver plated brass
Body - black anodized aluminum
RF Contacts fine silver

MOUNTING
Clearance hole for 7/16 thread and 3/4 hole for locating pin supplied with mounting, nut, lock washer, knob, and escutcheon plate.

PART NUMBERS & FUNCTION

Connector Type	PART NUMBERS AND FUNCTION 1P2T	1P3T	1P4T	1P6T	2P27	Transfer
UHF	78-0204	78-0304	78-0404	78-0604	78-0704	78-0904
N	78-0201	78-0301	78-0401	78-0601	78-0701	78-0901

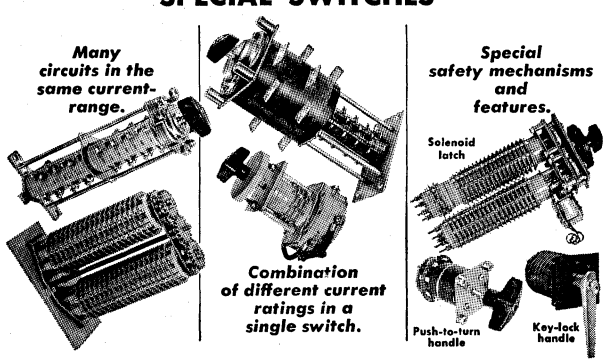
SPECIAL SWITCHES



Poles, positions, ratings, sequences, safety features — all are furnished to your special requirements.

With our unique design, we can combine "off-the-shelf" parts in literally millions of ways. We have no minimum-order requirement and you pay no tooling charges. There's no cost penalty even if you want only one switch of a kind.

Ask for Bulletin No. 8 It gives basic data on seven series of turn-to-operate switches, including some with interrupting ratings of 200 amperes, and shows many safety features. If you have an immediate problem, dial 617-335-5200.

THIS **NEW** 24-PAGE CATALOG IS JUST OFF THE PRESS.

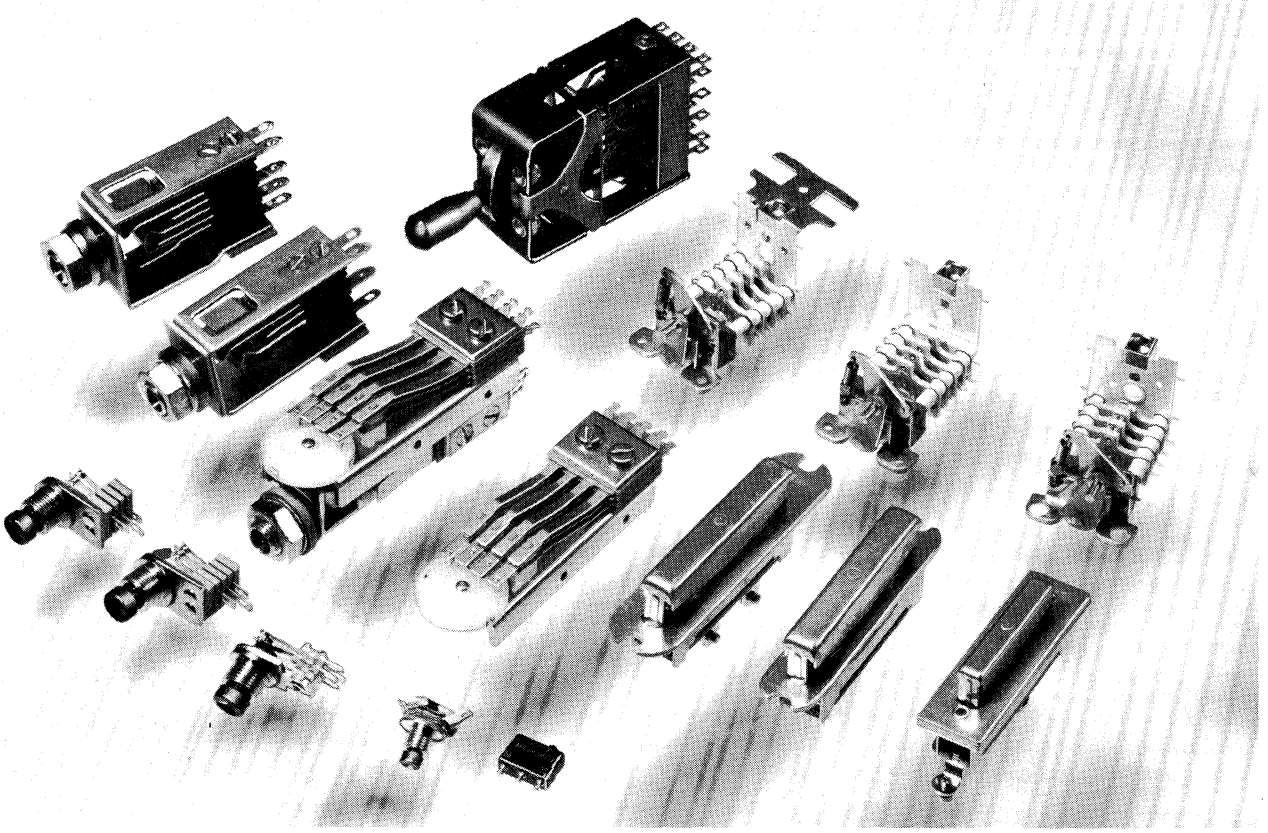
Nanasi CUSTOM PRECISION SWITCHES

LEVER ▪ PUSH BUTTON ▪ PUSH-TO-TALK ▪ MICRO ▪ ROTARY



TELEPHONE and ELECTRONIC SWITCHES

made to order for the specific application — made to order for the rigid budget

Nanasi customers include many of the most prominent manufacturers of telephone and electronic systems. From their revolutionary new designs to the everyday bread-and-butter types, they rely heavily on our unique capabilities for rapid turn-around and high output production for custom precision switches. Any configuration, any size, any complexity — Nanasi can respond quickly with a prototype or a million run to keep pace with prescribed schedules. The happy results are job fitted switches to meet all applicable MIL specs or commercial requirements — at off-the-shelf speed and economy.

Typical samplings are shown here of Nanasi custom made lever, push button, push-to-talk, micro and rotary switches. They represent many refinements contributed by our own specialist technology... every part meticulously fabricated and assembled like a fine watch... and each switch tested like the entire system depended on it. If you want reliability to the nth degree-try Nanasi.

Write or call for details and literature.

CUSTOM BUILT SWITCHES ▪ PRECISION MECHANICAL ASSEMBLIES ▪ TELEPHONE SYSTEM MODULES ▪ SPECIALIZED JOB & MEASURING TOOLS

Until now, choosing between mercury or reed switches meant a compromise. Mercury switches offer long life and no contact bounce, but they are bulky and limited to one mounting position. Reed switches are smaller and mount in any position, but have a shorter life, variable contact resistance, plus significant contact bounce and noise.

But there is no need to compromise any more. Now Logcell® Mercury Film Switches combine the advantages of mercury and reed switches. Magnetically actuated Logcell Switches are half the size of miniature reeds switches – occupy only 1% of the volume of conventional mercury switches. They operate in any position, have no contact bounce or AC noise, and withstand moderate shock and vibration. Wherever precise limit, proximity or pushbutton switching is required, consider Logcell Switches:

- Long life – tested to billions of cycles
- Operation in any mounting plane
- No contact bounce
- Form "C" SPDT contacts
- No measurable AC contact noise
- Thermal noise less than 0.2 microvolt
- Linear repeatability to 0.005 in.
- Inherent memory – switch latches in either position until reactuated

Get complete information about revolutionary new Logcell Mercury Film Switches – and Logcell Mercury Film Relays – by writing to Fifth Dimension Inc., Box 483, Princeton, New Jersey 08540 or calling (609) 924-5990.

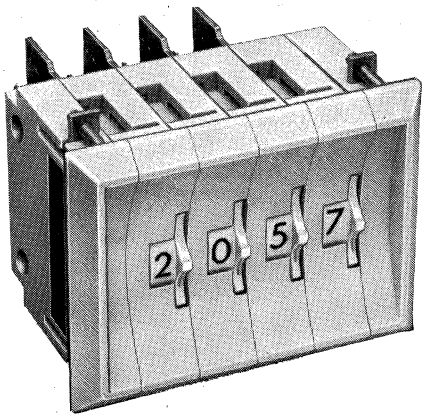
SWITCHES

CR103 TYPE F THUMBWHEEL SWITCHES



General Electric's CR103 Type F Thumbwheel Switch can save you panel space by replacing old "wafer"-type switches. It can be used wherever data are manually inserted into a machine or process — such as welding control, computer systems, and numerical control.

Each switch module is only ½-inch wide, 1¾-inches deep and 2-inches high. An assembly with 24 switch modules takes up only 12 13/16-inches in panel width.

The Switch is rated 3-amperes carrry, 150-volt a-c/d-c and is available in standard-duty and oiltight forms. Phenolic printed circuit boards are available in decimal, binary coded decimal, binary with complement, binary with oddbit parity and binary complement forms. Switch assemblies can be factory-assembled with up to 24 modules — up to 7 modules for oiltight forms.

FEATURES

- **True Oiltightness** — both for switch **and** for panel integrity. Never before offered in the industry!
- **Ordering Flexibility** — order the switches factory-assembled or purchase modules as individual units to be mounted and replaced separately. If you want to make up your own Standard-duty switches, you can order end blocks, spacers, shafts, and switch modules. Your choice of termination — plug-in, wire wrap, or taper tab/solder. Oiltight forms are available factory-assembled only.
- **Appearance Flexibility** — G.E. Thumbwheel Switches offer a wide selection of numeral color combinations. Wheels are also available with plus-minus coding. Housings ar offered in grey, black, white or beige.
- **Durable Construction** — tough, unbrekable Lexan® switch bodies, wear-resistant Delrin* wheel and Fairprene* gaskets (on oiltight forms) give this switch maximum operating life with low maintenance. The switch is easy to operate, even with a gloved hand.
- **Easy Mounting and Installation** — entire unit is assembled with four mounting shafts and eight screws at end of shafts — no matter how many switches in line. The Assembly is held snug to panel front by a simple bracket-screw design and can be mounted on any panel thickness up to ⅜-inch.
- **Neat Appearance** — large, easy-to-read numerals or symbols provide in-line visual readout of switch position. Modern switch design presents clean panel face — no screw heads on outside of panel. Spacers with solid front can be inserted to permit easy numeral or symbol series separation.

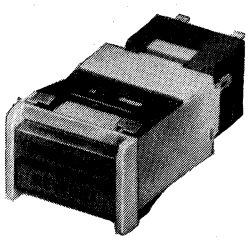
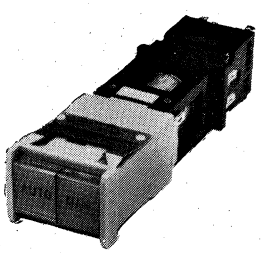
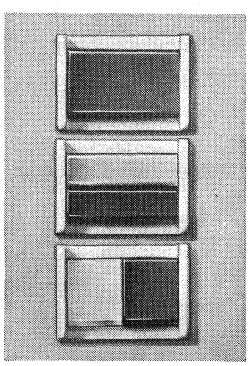
CR103 TYPE D ILLUMINATED PUSH-BUTTON SWITCHES



Illuminated push button/light with horizontal lens caps installed



Illuminated magnetically-held push button with vertical lens caps installed



Solid or split color fields give added flexibility. Colors can be mixed in the split field forms for even more combinations.

General Electric's new line of CR-103 Type D illuminated push buttons are designed for a wide variety of applications such as control and instrument panels, office machines, laboratory instruments, computers and other data processing equipment. Matching indicating lights are shown in Section 3900 on page of General Electric indicating lights.

Push buttons are rated 5 amp carry, 30 amp make at 125 volts a-c; 3 amp inductive at 30 volts d-c; 0.55 amp inductive at 125 volts d-c. Lamps are rated 28 volts maximum.

FEATURES

- Units snap into panels from front without tools, and can be gang-mounted horizontally to save space or for group functions.
- Convenient slide-on lens caps in five colors; four housing colors. Units are single button only, and have solid, horizontally- or vertically-split color fields.
- Legend inserts for all forms can be printed or engraved on acetate or similar material of 10 mils or less thickness.
- Three types of contact action are available: momentary contact with or without audible indication, maintained contact (push-on, push-off), and magnetically held contact with or without audible indication. Terminals are designed for either quick-connect or solder connections.
- Miniature flange-base incandescent lamps such as GE No. 327 (28 volts) or GE No. 328 (6 volts) are easily replaced without tools; without removing housing from panel. Lamps are supplied by customer.
- 2-lamp and 4-lamp forms are available.

Excellence in Rotary Switches

Standard Switches

	Series No.
.500" Dia. O.D.–36°, 45° or 60° angles of throw–1 or 2 poles–1 deck	50
.562" Dia. O.D.–30° angle of throw–1, 2, 3, or 4 poles–1 deck	51
.687" Dia. O.D.–36° angle of throw–1 or 2 poles–1-12 decks	8
.750" Dia. O.D.–30°, 45°, or 60° angles of throw–1-6 poles–1-12 decks	9
 1.01" Dia. O.D.–36° angle of throw–1 or 2 poles–1-10 decks	24
1.015" Dia. O.D.–36° angle of throw–1 or 2 poles–1-12 decks	42
1.170" Dia. O.D.–30°, 45°, 60°, or 90° angles of throw–1-6 poles–1-12 decks	44
2.280" Dia. O.D.–30° angle of throw–rated at 15 Amps. at 125 VAC Resistive	19

The above standard switches are available with the following features:

	Series No.
Spring Return—a rotational force is required to maintain contact at one or more switch positions	8, 9, 24, 42 or 44
Isolated Position—one or more switch positions can be isolated from contact by normal rotation of shaft	9, 42 or 44
Printed Circuit Terminals—switch positions have printed circuit terminal for PC board mounting	8, 9, 24, 50 or 51
Concentric Shafts—two switches in one: both rotary; one rotary and one push button; or one rotary and an add-a-pot adapter	43 and 54
Panel Sealed—switches have shaft seals and panel seals to prevent moisture reaching behind panel	8, 9, 42, 44, 50 or 51
Military Type—switches have been tested and meet MIL-S-3786/4, and MIL-S-3786/20	42, 44, 50
Adjustable Stop—switches have stops which can be set and reset for any number of active positions	42, 44, 50 or 51
Keylock—using adapter switches can only be operated with key acting as shaft knob	42 or 44
Coded—switches convert decimal (10) inputs to computer codes	42
Homing Rotor—switch positions are all shorted except one	44
Progressively Shorting—each additional switch position is shorted as shaft is rotated 1 thru 6 positions	44
Unidirectional—switch shafts may be rotated in one direction only	24, 42, 44
Tap—30° angle rated at 15 amps. at 125 VAC resistive	19

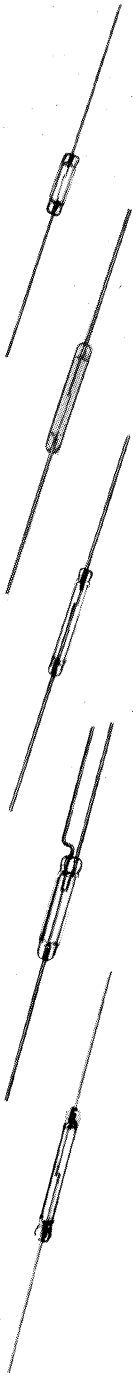
HAMLIN

MICRO/MINI/TINY/SUB-MINIATURE MAGNETIC REED SWITCHES



MMRR-2
"The Grain of Wheat" — a micro-miniature Form A reed switch designed specifically for ultra-high speed, low level switching systems — extremely small in physical size for high density circuit packaging.

MINI-2
"The MINI-REED" — a low profile Form A reed switch designed specifically for low power, high speed switching with maximum sensitivity. Can be packaged into a completed relay with a finished height of .187 inches and with a relay operate power of around 150 milliwatts.

MTRR-2
A tiny Form A reed switch designed for compatibility with tiny Form C packaging. The off-center gap also makes it ideal for permanent magnet applications. Performs equally well at high or low electrical loads.

MTRF-2
A tiny Form A reed switch designed specifically for RF frequencies from 30-100 MC with negligible resistive losses. The physical dimensions is such that 52½ ohms impedance levels are obtainable with proper packaging.

MRH-DT
A tiny Form C reed switch designed specifically for high performance, instrument grade applications. Special manufacturing and inspection processes insure stable contact resistance at low level electrical loads.

MRG-DT
The first tiny Form C reed switch available commercially. Ideal for moderate current and voltage applications. Available from stock with standard terminal spacing or with other spacings optional.

MRL-DT
A tiny Form C reed switch with characteristics ideal for commercial grade applications where low cost is a requirement and broad tolerances are acceptable.

MSRH-2
A sub-miniature Form A reed switch designed specifically for high performance, instrument grade applications. Special manufacturing and inspection processes insure stable contact resistance at low level current.

MSRR-2
A sub-miniature Form A reed switch designed specifically for moderate current and voltage applications. Performs equally well at high or low levels.

MSRR-2CD
A sub-miniature Form A reed switch with a contact arrangement designed specifically for close differential operation. Ideal for permanent magnet applications where minimum magnet travel is required.

MSRR-2WD
A sub-miniature Form A reed switch with a contact arrangement designed specifically for wide differential. Ideal for applications where snap action or latching characteristics are required.

MSRL-2
A sub-miniature Form A reed switch with characteristics ideal for commercial grade applications where low cost is a requirement and broad tolerances are acceptable.

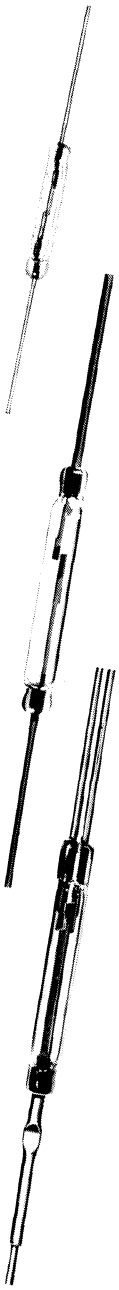
MINIATURE AND COMPACT MAGNETIC REED SWITCHES



MRH-2
A miniature Form A reed switch designed specifically for high performance, instrument grade applications. Special manufacturing and inspection processes insure stable contact resistance at low level current.

MRR-2
A miniature Form A reed switch designed specifically for moderate current and voltage applications. Performs equally well at high or low electrical loads.

MRL-2
A miniature Form A reed switch with characteristics ideal for commercial grade applications where low cost is a requirement and broad tolerances are acceptable.

MRH-15
A miniature Form A reed switch designed specifically for applications requiring high insulation resistance.

MRMF-2
A miniature Form A reed switch with thermal EMF properties approximately 10% of the standard reed switch. Specifically designed for RF frequencies up to 30 MC, the physical dimensioning is such that 70 ohms impedance levels are obtained with proper packaging.

MRO-2
A miniature Form A reed switch featuring breakdown voltages to 2 KV without sacrificing any of the physical and performance criteria of the conventional miniature reed switch. Ideal for cryogenic environments.

MRR-5
A miniature Form A reed switch with a pressurized atmosphere. Designed specifically for applications requiring miniature sized packaging with high voltage breakdown at a reasonable cost.

SRR-2
A compact Form A reed switch designed specifically for moderate voltage and current applications. Performs equally well at high or low electrical loads.

SRT-2
A compact Form A reed switch designed specifically for direct operation of AC or DC relays and solenoids at switch loads up to 100 V.A. (AC). Unique contact arrangement separates the magnetic and electrical circuits to minimize bridging.

SRR-3
A compact Form A reed switch designed specifically to eliminate varying capacitance between contacts upon opening. Ideal for circuits where ringing is undesirable.

DRG-DT
A compact Form C reed switch designed specifically for moderate current and voltage applications. Performs equally well at high or low electrical loads.

DRG-DTH
A compact Form C reed switch with a pressurized atmosphere to increase the contact rating for higher electrical loads and insure a minimum contact resistance for completely reliable low level applications.

DRT-DTH
A compact Form C reed switch with a pressurized atmosphere and tungsten contacts. The atmosphere increases the contact rating while the contact material is ideal for inductive loads.

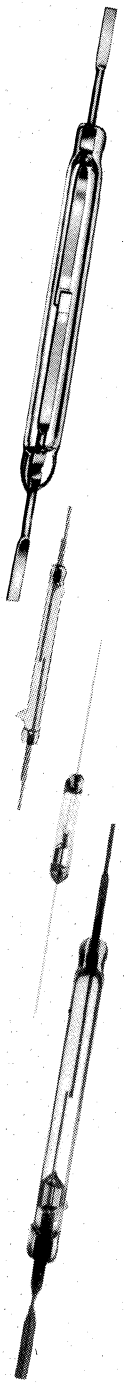
HAMLIN

STANDARD AND MERCURY-WETTED MAGNETIC REED SWITCHES



DRG-2
A competitively priced standard size Form A reed switch. Ideal for applications where the load is relatively small, and very exacting contact resistance is not a necessity.

DRR-1
A standard size Form A reed switch designed specifically for moderate current and voltage applications, performs equally well at high or low electrical loads.

DRS-2
A standard size Form A reed switch designed specifically for uniform contact resistance under dry circuit conditions or for high inrush loads.

DRR-5
A standard size Form A reed switch with a pressurized atmosphere. Designed specifically for applications requiring standard sized packaging with high voltage breakdown at a reasonable cost.

DRT-5
A standard size Form A reed switch with a pressurized atmosphere and tungsten contacts. The atmosphere increases the contact rating while the contact material is ideal for inductive loads.

DRS-5
A standard size Form A reed switch with a pressurized atmosphere designed specifically for applications with high inrush loads or high breakdown voltage requirements.

DRVT-5
A standard size Form A reed switch designed specifically for applications requiring breakdown voltage up to 5KV without sacrificing any of the physical and performance criteria of conventional reed switches.

DRVT-10
A standard size Form A reed switch designed specifically for applications requiring breakdown voltage up to 10KV without sacrificing any of the physical and performance criteria of conventional reed switches.

DRVT-15
A standard size Form A reed switch designed specifically for applications requiring breakdown voltage up to 15KV without sacrificing any of the physical and performance criteria of conventional reed switches.

DRVT-20
A standard size Form A reed switch designed specifically for applications requiring breakdown voltage up to 20KV without sacrificing any of the physical and performance criteria of conventional reed switches.

DRVT-25
A standard size Form A reed switch designed specifically for applications requiring breakdown voltage up to 25KV without sacrificing any of the physical and performance criteria of conventional reed switches.

MRC-3
A miniature Form A reed switch with mercury-wetted contacts. Ideal for dry circuit or no contact bounce applications where the ultimate in reliability is required.

HRC-1
A standard size Form A reed switch with mercury-wetted contacts. Ideal for dry circuit applications or high inrush loads.

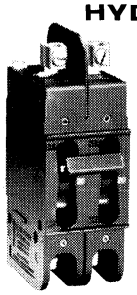
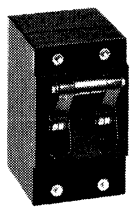
HEINEMANN

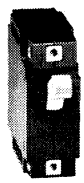
HYDRAULIC-MAGNETIC CIRCUIT BREAKERS



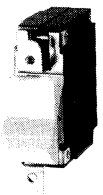
E-FRAME



SERIES AM12



SERIES JA



JC1

Heinemann breakers offer almost unlimited options: integral or fractional ratings from 10 milliamp to 100 amp, and in steps to 225 amp; single and multipole models (to six poles); breakers for 60 or 400 Hz AC, or DC service; breakers that meet Mil Specs; and models with special internal circuits like relay-trip and calibrating-tap for control functions. Hydraulic-magnetic actuation assures that ratings and trip points are unaffected by ambient temperature changes. A wide selection of time-delay characteristics permits close match of breaker to equipment requirements. Request the Heinemann Engineering Guide (Bulletin 202), or the Condensed Guide (303), or contact your Heinemann representative. Individual product bulletins listed below.

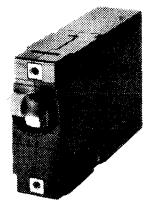
E-FRAME: Smaller than other E-Frame breakers, competitively priced. Approx. 5¾h x 2w x 2⅝"d (2-pole). Available in 1 to 4 poles.

SERIES AM12: 1 to 6 poles. Special circuits available. Approx. 2½h x 1½w x 2½"d (2-pole).

SERIES JA: Compact OEM breaker. Only 2.5 oz/pole. 1, 2, or 3 poles. Approx. 2h x ¾w x 1⅞"d (1-pole).

SERIES JA VARIANTS: Single-pole snap-in Model JB1 installs in rectangular panel cutout without need for screws or tools. Single-pole Model JC1 (shown) substitutes attractive white or gray rocker handle for standard toggle. Bulletins 3360 and 3380.

SOLID-STATE ELECTRONICS PROTECTORS



The new **Heinemann JA/Q™ Electronics Protector** provides security, in a single package, against three of the major causes of failure in solid-state components: voltage transients, overvoltage, and overcurrent. A solid-state voltage sensor detects overvoltages and transients on the supply line. If their amplitude exceeds a predetermined safe level, the detector fires, shunting the load (typically within 500 nanosec). The protected equipment never sees the full transient. The shunted current surge is then sensed, and the protector trips, disconnecting the equipment. Current ratings 0.5 to 10 amp DC, firing voltages 5 to 50 volts DC. 2h x .75w x 3.93"d. Bulletin 3370.

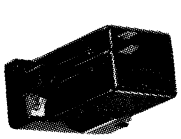
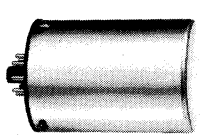
*AC voltages are 60 Hz unless marked with (400~).

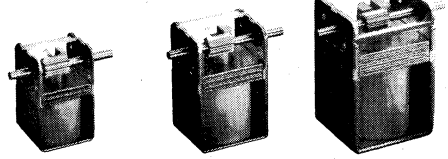
TIME-DELAY AND OVERLOAD RELAYS





Silic-O-Netic® overload relays: close-tolerance overload protection. Always carry 100% of rated current, trip as low as 115% of load. Up to 70 amp. Bulletin 5103.
Silic-O-Netic time-delay relays: dependable, economical, for delays from ¼ to 120 seconds. Five models: open or enclosed contacts, dust-proof covers, hermetic, or trip-indication. Continuous-duty coils, DPDT contacts eliminate slave circuits, reduce equipment costs. Bulletin 5006.

STEPPING MOTORS



Roto-Netic® stepping motors operate on a totally new principle: simple linear force (solenoid-actuated) converted to discrete rotary motion. Starting torque from 1.4 to 25 oz-in. with avg. power consumption less than 12 watts. Eight, ten, or twelve steps per shaft revolution with no cumulative error. Minimum life 10 million steps, typical life 30 million steps. Priced substantially below motors of comparable performance. Bulletin 702.

HEINEMANN ELECTRIC COMPANY 2636 Brunswick Pike, Trenton, N.J. 08602

BUILDING BLOCK UNITIZED MODULAR PUSH BUTTON SWITCH SERIES C, CL, CC

New

Completely new and revolutionary unitized construction.

A Start with basic momentary switch.
B Add wire staple to convert to push-push action.
C Add release bar unit for interlocking action.
D Add lamp contact unit for illumination.
E Choice of four different snap fit buttons.
F Add blocking discs and pins for blocking action.

STANDARD FEATURES

Disengage plastic lock bar to remove plunger and bridging contacts from front for servicing or replacing. without disturbing position or connections. Solder lugs on top- PC terminals on bottom (2 amp. rating). Two, coil spring loaded, center pivoting, contact bridges for each PDT.

Non shorting contacts.

OPTIONAL FEATURES

Blocking action – no 2 buttons depressed at the same time.
Shorting contacts.
Timing contacts either leading or lagging.
Gold plated contacts.
Auxiliary solder lug switching contacts on top of switch module (1 amp.).

CONTACT SURFACES

Standard = Hard silver plating .0004 inches.
Special = Silver plated .0004 inches plus hard gold covering .00012 inches.

CONTACT SWITCHING

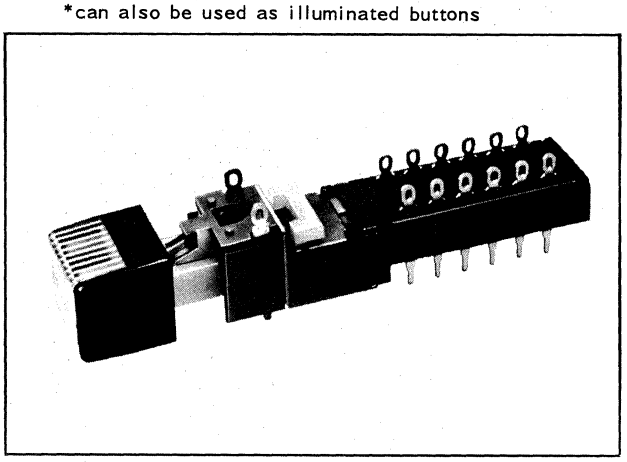
Standard = Non shorting

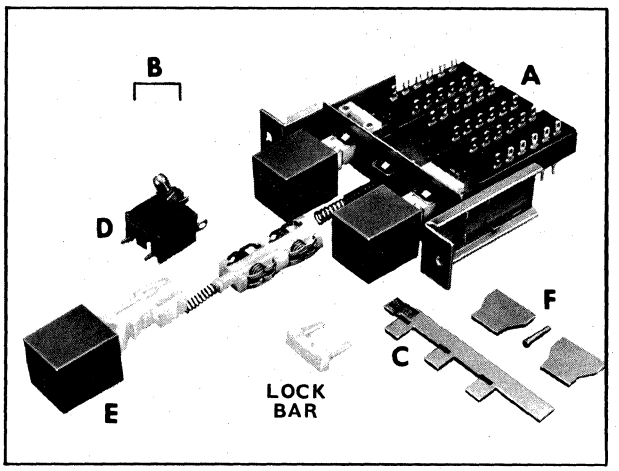
Shorting = ks
Leading = V
Lagging = N

CHASSIS AND STATION DATA

Model number	17.5	22.5
Center to center spacing	.690	.886
Number of stations	1-15	2-12
Standard buttons	CB CJ CQ* CR*	CH*

*can also be used as illuminated buttons





Switch modules in 4 different lengths

2PDT 4PDT 6PDT 8PDT
.197" solder lugs – top, .197" PC term. bottom.

+1no +1PDT/1no +2PDT/1no +3PDT/1no
.197" auxiliary contacts – top side only.

MECHANICAL ACTION

Gr = Interlocking

Gr_1 Gr_2 = Two or more independent interlocking groups.

oA = Momentary

AoR = Central release key Momentary action

EE = Push to make push to break

Z = Central release for independent interlocking groups, or individual latching.

Sp = Blocking action only one key down. Switching is delayed to increase margin of safety.

Series CC available in multiple banks up to 10x10.

Series CL available in multiple banks up to 10x10.

Series CL is illuminated – Slip on lamp holder L (uses type 4622 lamps). See lamp table.

ELECTRICAL DATA

Max. voltage 1000V
Max. current 2 A cos $\varphi = 0.8$
Max. rating 250W AC
Max. rating 100W DC
Test voltage between contacts & chassis 1500V
Insulation resistance $10^{10}\ \Omega$
Contact resistance 6m Ω

MECHANICAL DATA

Key travel = .315"
Contact travel = .197"
Key pressure 2&4PDT $\approx$ 35 OZ.
Key pressure 6&8PDT $\approx$ 49 OZ.
Life cycles $\approx$ 500,000 cycles under load.

IEE® WELCOMES YOUR INQUIRIES. Dimensional drawings and quotes on request. Quantity prices less than 65¢ per station.

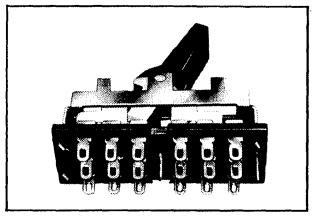
INTERNATIONAL ELECTRO EXCHANGE CORP. 6851 Oxford St., Minneapolis, Minn. 55426 PHONE: (612) 929-7875 TWX: 910-576-2469

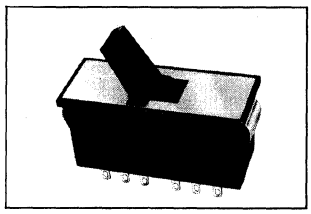
New

SPECIAL LEVER SWITCH SERIES Y

With two independent two or three P.D.T. contacts and three lever positions.

SCHADOW





Type of Contacts
standard: non-shorting

- ks — shorting
- V — timing contacts, leading
- N — timing contacts, lagging

Contact Arrangements

- 2u — two independent D.P.D.T.
- 3u — two independent 3 P.D.T.

Contact Material
standard: fixed terminals .0004 in. silver-coated bridging contacts .0004 in. solid silver plated

- 3Au — additional SELREX with gold plating .00012 in.

Mounting Facilities

- YA — for twist – tab mounting
- YB — for screw mounting
- YC — multiple sets (standard for screw mounting)
- YD — flush fitting switch for quick mounting in high impact – 1/8" thick panel plastic case hole size 1.582 x .578

Lever-stop Positions

- 3R — left, zero, right
- 1R — zero, momentary action on left and right
- 2R — zero and left (or zero and right), right (or left) momentary action

Terminals

- L — soldering lugs
- S — P.C. terminals

Technical Data
max. current 1 A
max. voltage 300 V
max. rating 50 W
Test voltage 1500 V RMS
standard insulation resistance 5 x 10^{10} ohms (after 96 hrs., 70°F. 100% RH)
for special requirements up to 10^{12} ohms
contact resistance 10 m ohms

PIANO KEY SWITCHES SERIES KD AND KE

Features: Retains all the advantages of Series D&E switches. Key switch mechanism secures to switch chassis with only 2 screws. Switch terminals may be flow soldered to PC Board prior to assembly. Easy to service since the key can be withdrawn by simply disengaging a catch. The switch contact plungers are then removable from the front without disturbing the remainder of the assembly. Available .689" and .787" centers.

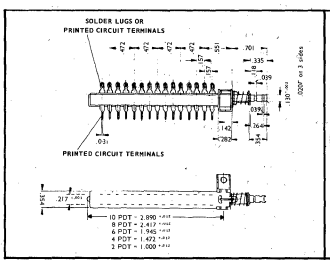
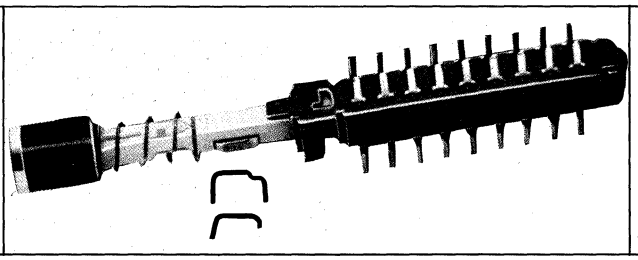
SECTION 5100

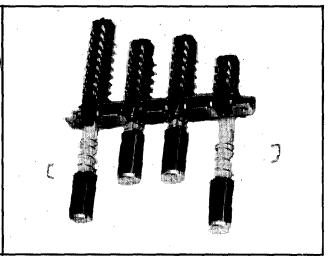
New MINIATURE MODULAR PUSH BUTTON SWITCH SERIES F

Uniquely designed to improve versatility and serviceability.

SCHADOW







Compress spring and lift out locking staple to remove plunger and bridging contacts from front of switch w/o disturbing switch position or electrical connections. Exchanging short staple for a long staple converts switch from momentary to push-push action.

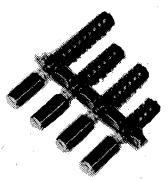
Features: Inexpensive • Proven dependability • Modular design • Versatile • Completely enclosed • Up to 10 PDT • Infinite combinations • Solder lug or PC terminals • Smooth slide action • Largest selection of chassis spacings • Largest selection button styles and sizes • UL and CSA approved 4A 250VAC power switch • All dimensions permit retrofit with most competitively priced switches.

Available 2, 4, 6, 8 and 10 PDT. Power switch available w/2, 4, and 6 PDT integrated.

MINIATURE SERIES F PUSH BUTTON SWITCH KIT LIST PRICE $19.95

KIT CONTENTS

23 Switches
Non-shorting contacts
16 - 2PDT
4 - 4PDT
2 - 6PDT
1 - 8PDT



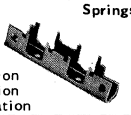
40 Assorted Buttons
All are push-on snap fit type – No epoxying necessary.

12 Chassis
2 - Single Station
2 - 2 Station
2 - 4 Station
2 - 6 Station
2 - 8 Station
2 - 10 Station

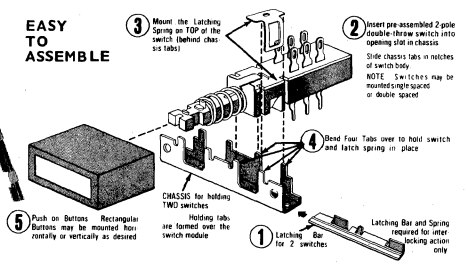
23 Wire staples to convert momentary to push push

10 Assorted Latching and Release Bars

10 Latching Springs



EASY TO ASSEMBLE



CONTACT MATERIAL:
Fixed contact surfaces silver coated .0002"
Moving contact surfaces silver coated .0004"

TYPES OF CONTACTS AVAILABLE:
Solder lugs top, PC terminals bottom
PC terminals on top and bottom .197"
PC terminals top .539", PC terminals bottom .197"

SPECIAL TYPES:
oA = Momentary (spring return)
Gr = Interlocking
Gr_1, Gr_2 = Divided into independent interlocking groups
AoR = Operation w/o latching but releasing interlocking
EE = Push to make – push to break
NE 15 = Power switch 4A/250VAC DPDT (D or E Series)
NF 15 = Power switch 4A/250VAC DPDT (F Series)

TECHNICAL DATA:	Series D	Series E	Series F
Max. current	1 A	1 A	1 A
Max voltage	250 V	300 V	300 V

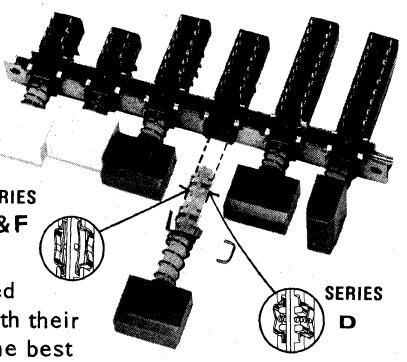
IEE® WELCOMES YOUR INQUIRIES
Dimensional drawings and quotes on request.



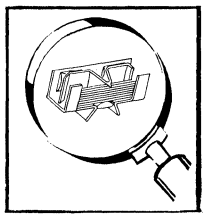
Enlarged view showing silver plated bridging contacts with their spring balance for the best contact pressure and durability.

INTERNATIONAL ELECTRO EXCHANGE CORP. 6851 Oxford St., Minneapolis, Minn. 55426 PHONE: (612) 929-7875 TWX: 910-576-2469

STANDARD PUSH BUTTON SWITCHES TYPE M, MM, ML

FEATURES: Novel patented design sliding contacts. Contacts silver plated Unique design positive action. Small dimension 500V rating. All standard action operations. Up to 4 PDT on wafer .79" deep. Up to 8 PDT on wafer 1.54" deep. Use double button to double capacity of contact per station. 15 stations maximum in one row. IEE fluorescent type button also available. Series MM provides double deck up to 30 stations. Wide selection of buttons. ML Series provides illumination. **FLOATING CONTACT** principle use short double sided solid contact plates with balanced steel spring. Guarantees: equal pressure at all contact points, extremely low resistance and self inductance plus smooth movement of keys.

Available 2, 4, 6 and 8 PDT.



CHASSIS GROUPING DATA

Model 17.5
Center to center .689"
No. of stations 1-15
MM Series up to 30 stations

MECHANICAL ACTION

Momentary (oA)
Push push (EE)
Interlocking (Gr)
Individual latching with central release key or solenoid (E+Z)
Blocking (SP) delayed switching to provide safety margin
Power switch* N 10/2a 2A/ 250V AC
Power switch available with 2PDT integrated

DIMENSIONS

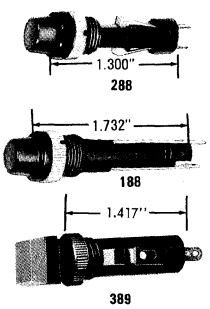
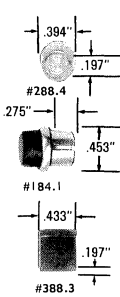
IEE PILOT LAMP SOCKETS AND LENS



288.1 Single round pilot lamp socket uses #288-4 lens.
288.4 Round flat t ˅ plastic lens.
188.2 Single round pilot lamp socket uses #184.1.1, #79.2 or #288.4 lens.
184.1 Round flat top glass lens.
79.2 Same as above but convex top. (Both with plated metal ferrule)
389.1 Single square pilot lamp socket uses 388.3 lens.



388.3 Square flat top, plastic lens.

All lens available in red, green, blue, yellow, clear and white.

All lamp sockets require .402" mounting hole. Use Type 5530 lamps as shown in miniature switchboard lamps table below.

PANEL LAMP INDICATOR ASSEMBLY MODEL 388

FEATURES:
- Modernistic building block design
- Removable colored lenses, square or round.
- Up to 10 modules may be locked together into one bank.
- Small space requires only 7/16" x 5" x 1½" (depth) for 10 lamp bank.

LAMP EXTRACTORS
#110 for Type 5530 lamps
#153 for Type 6844 lamps

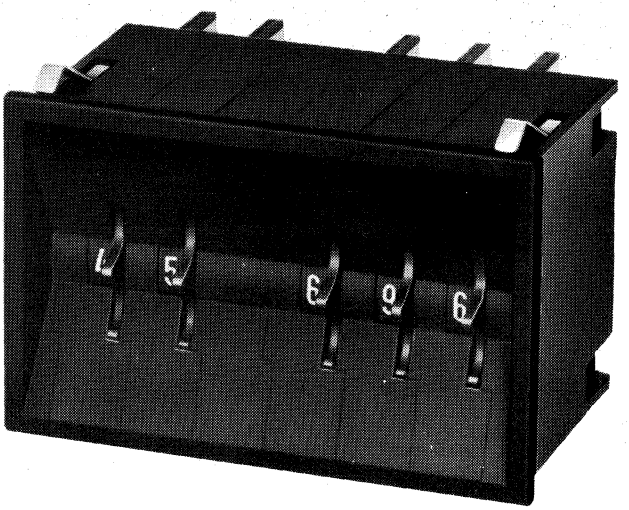
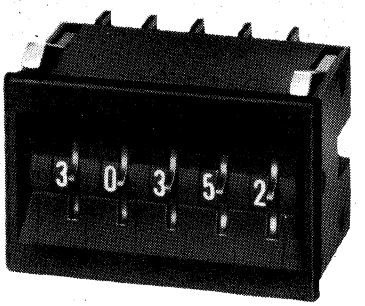
THUMBWHEEL SWITCHES





Get coded outputs from simple dial settings

Model B INTERSWITCH* MODULES

2.300" h. x 2.700" d. x 0.500" w. (per module)

Positive indexing, decimal input to binary or decimal output. Front mounting, simple rectangular cut-out. Cam spring retention. Matte black, matte tan.

Units Available:

2 position, double pole (0, 1 or +,—)
10 position, single pole
11 position, single pole
2 x 5 position, double pole
10 position, binary codes
11 position, binary codes
blind slave, with decimal carry
10 position, dial only module
end plates
spacers

Optional Features:

dial stops
make before break contacts
component mounting board
decimal point light conductor
illuminated dial
colored thumbwheels

Technical Data:

rated current 1 amp
contact rating (resist. switching) 0.1 amp
max. working volts 50 ac or dc.
contact resistance, including PC board $7 \times 10^{-2}\ \Omega$
temperature rating —20 to +60 C
operating life 1×10^{6} operations
wiring termination solder or edge connector

Model M INTERSWITCH* MODULES

1.300" h. x 1.500" d. x 0.315" w. (per module)

Feature ultra-thin modules. Positive indexing, decimal input to binary or decimal output. Front mounting, simple rectangular cut-out. Cam spring retention. Matte black, matte tan.

Units Available:

2 position, double pole (0, 1 or +,—)
10 position, single pole
11 position, single pole
2 x 5 position, double pole
10 position, binary codes
11 position, binary codes
10 position, dial only module
end plates
spacers

Optional Features:

dial stops
component mounting board
illuminated dial
colored thumbwheels

Technical Data:

rated current 1 amp
contact rating (resist. switch) 0.1 amp
max. working volts 50 ac or dc.
contact resistance, including PC board $7 \times 10^{-2}\ \Omega$
temperature rating —20 to +60 C
operating life 1×10^{6} operations
wiring termination solder or edge connector

Model T INTERSWITCH* MODULES

1.150" h. x 1.250" d. x 0.500" w. (per module)

Miniature modules are interchangeable mechanically and electrically with other similar thumbwheel switches. Any combination of these modules may be "ganged" into one complete, compact assembly that requires no special mounting brackets or hardware. Circuit board contained within switch case.

SWITCH ASSEMBLIES

Assemblies consisting of any combination of switches or options are available from stock, at Burlingame, Calif.

SPECIAL MARKINGS

Dials or switch bodies can be imprinted with any combination of numbers, letters, etc., to meet your needs.

MORE SWITCHES ...MORE DATA

Find out about our complete line of thumbwheel switches. We can furnish special switches for your particular designs—and we can deliver on schedule to solve your problems—to do your job.

J-B-T 30th Year®

TOGGLE SWITCHES

HEAVY DUTY TYPES, INCLUDING MS25068, MS35058, MS35059, ST40, 42, 50, 52 SERIES

NOMINAL RATINGS — 20 Amp. at 125 VAC, 10 Amp. at 250 VAC . . . **MIL-S-3950C** — MS35058 models with suffix -21 and above, similar MS35059 types, and the outstanding **4-POLE SERIES** exceed the rigorous electrical requirements of MIL-S-3950C, and are recommended for maximum performance. All MS models have bushing seal to meet sand and dust test and latest toggle seal splash test, also former MIL-S-3950B 15-foot head of water submersion test . . . **Bulletin TS-966A.**

MEDIUM DUTY TYPES, INCLUDING MS25098 AND MS25100 SERIES

NOMINAL RATINGS: 6 Amp. at 125 VAC, 3 Amp. at 250 VAC . . . Popular for communications circuits and many other uses. All MS medium-duty models use bushing seal plus case-to-terminal seal in meeting sand, dust, splash and submersion tests described above . . . **Bulletin TS-966A.**

NEW SUBMINIATURE TYPES, SINGLE, DOUBLE, 3-POLE AND 4-POLE

NOMINAL RATINGS: 5 Amp. resistive load at 125 VAC, 24VDC. Series JMT, with distinctive **Green** body, is manufactured by J-B-T in Connecticut. JMT series combines trouble-free construction of standard size J-B-T switches with drastic reduction in size and weight. Single pole types are ¼" thin and weigh only 0.19 oz. Other models are correspondingly compact and light . . . **Bulletin JMT-448, and Supplementary Sheets.**

ROTARY AND LEVER SWITCHES

STANDARD 14- AND 20-POSITION, AND A REMARKABLE NEW 12-POSITION

For dependable performance in instruments and test equipment, J-B-T makes space saving 14- and 20-position switches in both laminated and molded constructions. **NOMINAL RATING:** 1 Amp. inductive load at 125 VAC, 5 Amp. momentary (not make and break) **MULTIPOLE SERIES 20M** increases circuit versatility with up to 4 poles per deck. **MOLDED LEVER SWITCHES** in this series provide up to 5 live positions, 2 circuits per deck . . . **Catalog 568.**

NEW V/M SERIES fully enclosed $1\frac{13}{16}$" dia. switches, 12-position, carries 5 Amp. and breaks 2 Amp. at 115 VAC. Features of this remarkable switch include adjustable torque, initial contact resistance under .002 ohms, and parasitic thermal emf under one microvolt . . . **Catalog VM-68.**

SUB-MINIATURE, MIL-S-3786B, TYPE SR05

Made to many performance levels of MIL-S-3786B, the 1" dia. Style SR05 switches are precision built for low-current usage where size, weight and reliability are important. With patented wafer design, Series 7000, 1-6 decks can have full 12 live switching positions per deck; Series 5000, 1-4 decks, can have up to 11 live switching contacts on each side of each dual duty deck with a maximum of 8 poles per deck. Lever types, panel sealed, and general purpose variations available . . . **Catalog SM-33.**

QUICK GUIDE TO TYPICAL J-B-T PRODUCTS

VIBRATING REED FREQUENCY METERS AND ELAPSED TIME METERS

J-B-T Vibrating Reed Frequency Meters are made in a wide variety of case styles and sizes, standard and sealed, panel and portable; in many frequency ranges and reed groupings. Permanently accurate within ±0.3%, or better if required. Elapsed Time Meters are made in case styles compatible with other panel instruments, in 5- or 6-digit models, reading in hours and tenths at 60 cps. 110-125 volts. Variations for other frequencies and voltages available . . . **Catalog 568.**

Model 34-FG
9-Reeds, 60 cps.

Model 31-EGW-5

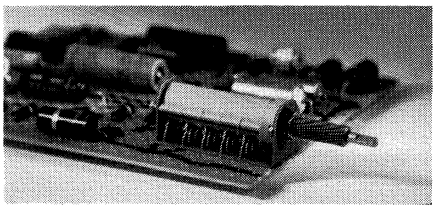
JANCO

DESIGN VERSATILITY SOLVES APPLICATIONS PROBLEMS

MICRO-MINIATURE PRINTED CIRCUIT PLUG-IN ROTARY SWITCH

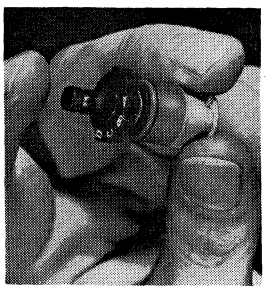


This new printed circuit plug-in rotary switch is available in 30° (2500), 36° (1-2500), and 45° (2-2500) indexing. The new printed circuit plug-in rotary switch features extended terminals and is especially designed to line up terminals with standard circuit board hole patterns. This feature lends itself to wave soldering instead of hand soldering of terminals.

For complete technical data, see Micro-Miniature Rotary Switches 2500 Series on opposite page.

MICRO-MINIATURE ROTARY SWITCH FEATURES A UNIQUE POSITIONING AND INSTANT RELEASE BUTTON

This new micro-miniature rotary switch has four positions with the unique ability to return to a predetermined position by pushing the button.



MODEL 1-2516

SPECIFICATIONS:

- Totally enclosed explosion-proof construction.
- Designed to meet and exceed MIL-S-3786.
- Electrical rating: make and break 100 MA at 6 VDC.
- Life characteristics: 25,000 cycles (one cycle being from Position 1 to Position 4).
- Shock and Vibration: shock rating of 125 G's; Vibration rating of 300 G's; 5 to 500 CPS.

For complete technical data see micro-miniature rotary switches 2500 Series on opposite page.

Max. Pos.: 4
Body Dia.: 2.125"
Electrical Rating:
15 amps Ind. 30 v dc
Available in 1 and 2 poles per deck construction.

MODIFICATIONS AVAILABLE

The following modifications can be supplied on any of the basic switches shown on this page.

(1) Shorting or non-shorting contacts
(2) Bridging of contacts (miniature only)
(3) Momentary positions, whereby, the rotor contact, when released, returns to a predetermined position
(4) Isolated or guarded positions, whereby, the knob must be depressed or pulled out to enter or leave a particular position or positions
(5) Single or multi-pole construction
(6) Continuous rotation or the use of stops
(7) The use of a solenoid for remote switching applications
(8) The use of a key-lock feature
(9) The possibility of ganging various switches to be gear driven for an application requiring an unusual number of poles

Available in single pole only per deck construction.

GENERAL SPECIFICATIONS/1900 series

ELECTRIC RATING: carry 10 amps continuous. Make & Break—see individual switch data

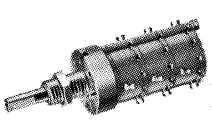
VOLTAGE DROP: 0.1 volt or less at rated amperage. Initial Contact Resistance .003 OHM

LIFE: 10,000 double cycles make and break rated amperage

TORQUE: 1 to 3 inch lbs.

SWITCHES DESIGNED AND BUILT IN ACCORDANCE WITH THE FOLLOWING SPECIFICATIONS:
MIL-S-6807B (rotary switches enclosed)
MIL-S-3786B (rotary switches)
MIL-E-5272C (environmental testing)

MICRO-MINIATURE ROTARY SELECTOR SWITCH / 2500 SERIES



With unitized construction

Available in 30°, 36° and 45° indexing, with 12—10 and 8 pos. max.
Body Diameter: .623 inch.
Electrical rating continuous: 8 amps at 28 v dc.
Switching rate:
0 to 0.25 amp resistive 0 to 28 v dc.
0 to 0.25 amp resistive 0 to 115 v ac.
0 to 0.12 amp inductive 0 to 28 v dc.

Available in 1, 2, and 3 pole construction.
TORQUE: 5 to 9 inch ounces.
CONTACT RESISTANCE: .005 ohms average.
INSULATION RESISTANCE:
100,000 megohms minimum at 100 volts.
10,000 megohms minimum at 500 volts.
DESIGNED AND BUILT to meet the environmental and functional requirements of MIL-S-3786B.

JOSLYN

FULL-LINE' SURGE PROTECTION

YOUR COMPLETE SOURCE OF TOP PERFORMANCE PROTECTORS . . . FOR PROTECTING ELECTRICAL/ELECTRONIC EQUIPMENT FROM: VOLTAGE TRANSIENTS · CURRENT TRANSIENTS · DIRECT LIGHTNING STRIKES · OVER-ILLUMINATION

PRECISION SPARK GAPS

Typical applications: used to protect against surges due to switching, breakers closing-opening, static, reflected waves, capacitive discharge, corona, system faults, contact with foreign circuits, EMP, fuse blowing, lightning (induced or conducted), ionization, motor starting, arc welding.

They protect solid state circuitry, computers, carrier circuits, relay coils, telephone circuits, microwave and radio equipment, sensitive equipment, open wire carriers, fire alarms, traffic controllers, rectifiers, modulators, traveling wave tubes, pyrotechnic devices.

They replace carbon block arresters, light sensitive gaps, open air gaps, high maintenance protection devices, fragile gaps, mechanically incompatible gaps, radioactivated gaps.

They may be used as activation devices in pyrotechnic devices, lamp starting circuits, laser pulsers.

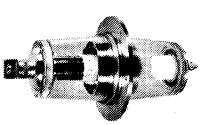
1705-03



1908-01 (AD969-DMA)

ANTENNA ARRESTERS

receive only

Used in conjunction with precision spark gaps on receivers, to attentuate voltage spikes to negligible levels. Available in many models and frequencies. Consult factory for full listing.

ANTENNA LIGHTNING ARRESTERS

receive and/or transmit

Used on commercial and military aircraft for direct lightning diversion. Qualified per Mil-A-9094 (as amended). Frequency range from 40 kc/s to 36 mc/s. Consult factory for full-line offering and complete device specifications.

JOSLYN
ELECTRONIC SYSTEMS
A DIVISION OF JOSLYN MFG. AND SUPPLY CO.

As critical circuitry advances in sophistication, precision fuse protection becomes increasingly vital. For 40 years, Littelfuse has enjoyed a fine reputation as a manufacturer of top quality products in the electronic circuit protection field. Each and every Littelfuse product receives the ultimate in precision engineering, design know-how and quality craftsmanship. These are the reasons why the name Littelfuse has become the synonym for quality in the field of electronic circuit protection.

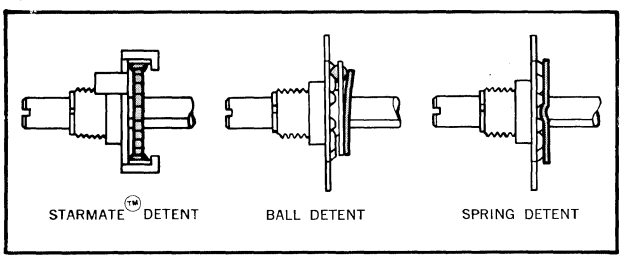
ROTARY SWITCHES

When it comes to selecting a source for rotary switches, you'll find Wilmington Controls fully equipped to service you in these important areas: (1) quick, competent response to engineering requirements, (2) fast prototype delivery, (3) dependable production scheduling, and (4) consistent quality levels.

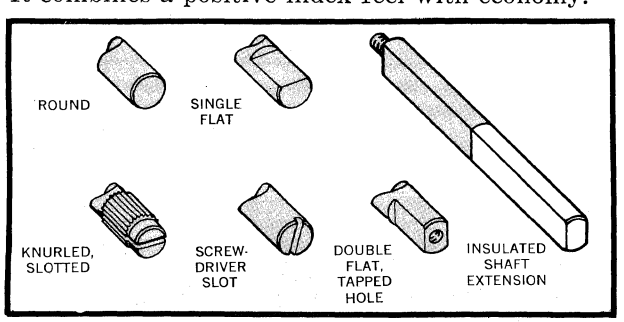
Our switch engineering experience dates back to 1947, when rotary switches were first applied with Ledex rotary solenoids to perform remote stepping and complex circuit programming functions. Over the years we have helped many customers to simplify their circuitry, reduce wiring requirements, and cut system costs. This experience we gladly share with you.



1. *Starmate detent:* Two bearing balls are spring loaded to operate against a precision indexing cam. The balls oppose each other with balanced pressure to eliminate side loading and extend switch life. This superior detenting concept is time proven in Ledex long-life stepping motors.

2. *Ball detent:* A spring loaded ball bearing rides in and out of the "hill and valley" positions in the front plate. The ball detent has a crisp detenting feel even more positive than that of the spring detent.

3. *Spring detent:* a formed stainless steel spring with a coined spherical surface rides in and out of "hill and valley" positions in the front plate. It combines a positive index feel with economy.



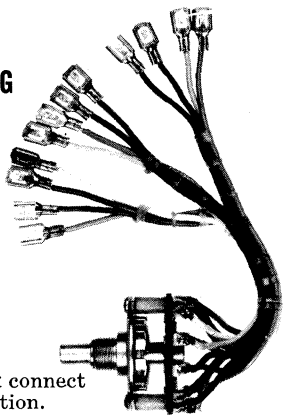
Commonly used shaft designs for commercial and military applications. Others made to specifications.

To meet your requirements for rapid delivery service, we stock a wide variety of standard parts which can be quickly modified. Our tooling is designed for quick setup and fast change-over, to further add to our ability to give you short delivery cycles. And to assure consistent quality, random production samples are regularly routed to automated test instrumentation for vigorous life and other quality verification tests.

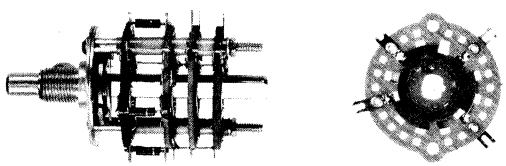
From the early design stages on through production runs we are geared to produce quality switches . . . **fast.** Whether you're concerned with new switching applications, or investigating new sources for existing ones, we welcome the opportunity to work with you.

IDEAS IN SWITCH ENGINEERING

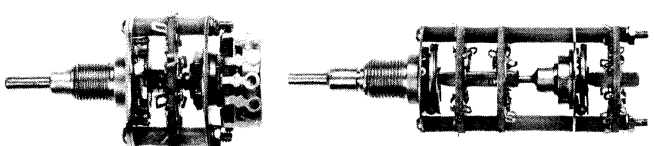
Supplying quality switch hardware is just one phase of our business. We take a special pride in our time-proven ability to simplify circuitry, upgrade the switch, and hold costs down. In most cases we can supply pre-wired assemblies with external components installed for less than it might cost you to purchase parts and assemble them in your plant.



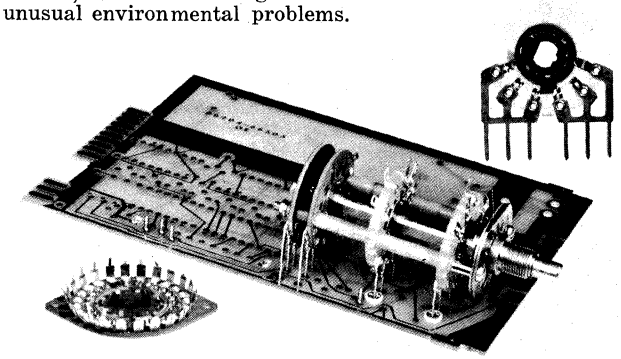
Switch pre-wired with quick connect terminals for simplified installation.



Slotted terminals permit resistors and other components to be inserted in place. They eliminate need for jumper wires, reduce soldering time, keep size down.



Concentric shafts, dual index mechanisms to drive potentiometers, snap switches and other loads. Special bushings, shields, brackets also engineered to solve unusual environmental problems.



Printed circuit terminals, available for perpendicular or parallel mounting (to PC board) expand switching versatility.

SWITCH SECTION HIGHLIGHTS

contact and rotor blade materials

silver plated brass

Most economical. Has .0001″ minimum silver to assure silver-to-silver contact (low contact resistance) throughout life of most applications.

silver alloy

Used when consistent low contact resistance is required for minimum life expectancy of 200,000 contact flexures.

gold plated silver alloy

(a) .00003″ minimum gold; an economical way to assure positive solder contacts and prevent tarnish during long storage life.

(b) .0002″ minimum hard gold; assures gold-to-gold contact for over 50,000 contact flexures and then silver-to-silver contact for 150,000 additional contact flexures.

SILVER PROTECTION PROCESS	WHERE APPLIED	COMMENTS
Water Dip Lacquer	*On Contacts*	*Applied as standard on all silver alloy and silver plated brass contacts to retard tarnishing for soldering ease.*
.00003″ Gold Plate	*a) On Contacts and Rotors*	*An economical means to assure positive circuit make after extended shelf life; also offers soldering ease. Meets MIL specs.*
	b) On Contacts only	*Primarily used for soldering ease after extended shelf life. Meets MIL specs.*
Hot Tin Dip	*On terminal end of contacts only*	*Primarily to assure good contact solderability after extended shelf life. Meets MIL specs.*

STATOR INSULATION GUIDE

STATOR INSULATION	MIL SPEC.	USABLE TEMPERATURE LIMIT (°C)	MINIMUM INSULATION RESISTANCE (MEGOHMS)	
Phenolic	*MIL-P-3115, type PBE-P*	*100*	*1,000*	*Most economical, most commonly used. Though non-nutrient to fungi, varnish impregnation per MIL-V-173 is available. Meets most military and commercial application requirements.*
Epoxy-Glass	*MIL-P-18177, type GEB*	*125*	*10,000*	*Economical, excellent structural and dielectric strength. Lower moisture absorption rate than phenolic.*
Silicone Glass	*MIL-P-997C, type GSG*	*125*	*10,000*	*Good RF characteristics. Lower structural strength than epoxy glass, and slightly higher in cost.*
*Mycalex**	*MIL-I-10A, Grade L-411*	*150*	*10,000*	*Good structural and dielectric strength, lowest moisture absorption.*
Kel-F	*MIL-M-55028-A, Grade 3*	*125*	*20,000*	*Excellent structural and dielectric strength. Low moisture absorption.*
Ceramic	*MIL-I-10A, Grade L-422*	*150*	*10,000*	*Very low dielectric loss and moisture absorption.*

*Mycalex sections supplied with Kel-F rotors.

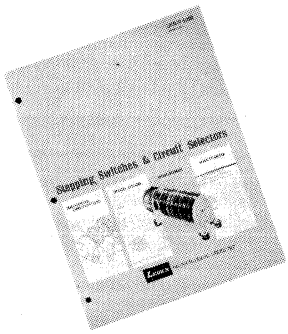
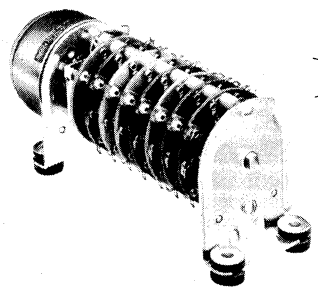
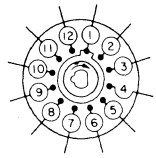
STEPPING SWITCHES/CIRCUIT SELECTORS

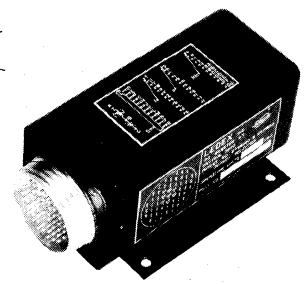


Thirty Six Stock Models
Choose from 36 stock models, 2, 4, 6, 8, 10, 12, 18, 20 and 24 positions; 28 and 100 VDC. "Stepping Switches and Circuit Selector" catalog lists complete specs on stock models plus useful engineering information on basic control switching and application of basics to solve complex problems. Also includes simplified building block approach to specifying pre-engineered stepping switches and circuit selectors.





Ledex Rotary Switches are used for transfer switching, remote control of predetermined circuit patterns, remote sequencing of complex switching arrangements, or in programming checkout and sequential operations. They are known best for their ability to perform multiple switching functions reliably, in limited space, and under severe operating and environmental conditions. Available in open construction, pre-wired modules or as packaged control solutions.

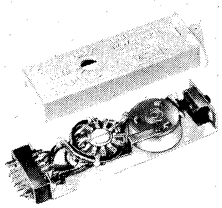


Ledex Hermetically Sealed Switches are engineered to withstand severe shock and vibration, such as encountered in aircraft, missile and military applications, and to provide added switching reliability in adverse environments. Used extensively in aero/space and underwater guidance controls, as mode selectors, in rocket firing devices, and in a variety of military control functions that demand a high degree of reliability.

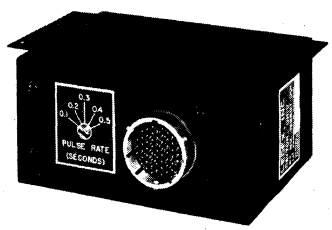
PACKAGED CONTROL SOLUTIONS

Here are examples of Ledex Stepping Switches designed into compact, reliable armament control packages, either solid state or electromechanical, or combining the best characteristics of both.

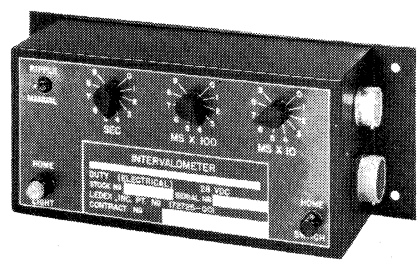
Whether your problem involves armament controls or commercial control functions, there's a good chance Ledex has already solved a similar problem.



Miniaturized Armament Control Intervalometer
A flat disc-shaped solenoid is used in the 12-position stepping switch. It is used to fire 19 rockets in pairs sequentially, in speeds ranging from 10 to 20 ms intervals.



40-position Intervalometer with single or optional 5-speed ripple fire control
40-position intervalometer has 5 adjustable control speeds for rocket firing at intervals of 100, 200, 300, 400 or 500 milliseconds. Hybrid design combines best characteristics of solid state and electromechanical products for optimum performance, minimum weight, maximum reliability and lowest cost. Firing time intervals are maintained at ±5% through a voltage range of 22 to 31 vdc.



Universal Stores Dispenser Intervals Variable on Digital Basis

All solid state and among the most flexible of Ledex intervalometer designs, this one permits the pilot to vary release intervals to any rate ranging from 30 ms to 9.99 seconds in increments of 10 ms. It includes a stepping switch to distribute sequential fire commands. Timing tolerance is ±10% over a voltage range of 22 to 32 volts and temperature to −55°C to +85°C. The package includes built-in suppression to protect solid state circuitry when switching inductive loads.

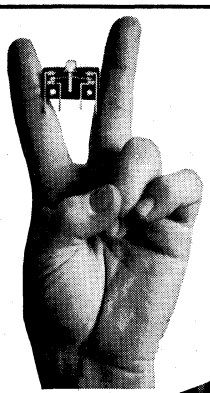
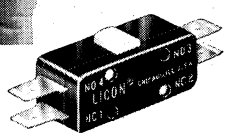
BASIC SWITCHES FROM LICON FASTEST GROWING FULL-LINE SWITCH SUPPLIER



BUTTERFLY® DOUBLE-BREAK SWITCHES

The unique Licon® Butterfly double-break switch design is built around two blades that flex simultaneously, then actuate with a positive snap. A full line of 2, 4 and 6-circuit miniature, subminiature and heavy-duty Butterfly switches meet every basic switch need.



TYPE II

High electrical rating and long mechanical life in one compact package. Ideal for a wide range of applications.

ELECTRICAL RATING
125/250 v AC: 10 Amps
125 v AC: ½ HP
250 v AC: ¾ HP
30 v DC: Form X or Y—15 Amps Res.
Form X or Y—10 Amps Ind.
Form Z— 10 Amps Res.
Form Z— 7 Amps Ind.

TYPE 16

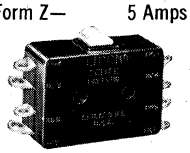
Features two circuit control, direct cam operation with double bearing guided button plus high shock and vibration resistance.

ELECTRICAL RATING
125/250 v AC: 10 Amps
28 v DC:
Form X or Y—10 Amps Res.
Form X or Y—7,5 Amps Ind.
Form Z— 10 Amps Res.
Form Z— 5 Amps Ind.

TYPE 18

Big switch rating in the smallest double-break switch—.200″ x .500″ x .350″.

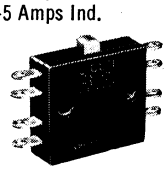
ELECTRICAL RATING
125/250 v. AC: 8 Amps
28 v DC:
Form X or Y—8 Amps Res.
Form X or Y—5 Amps Ind.



TYPE 22

Insures exacting double-break switch performance for 3-phase motors, permits simplified controls for multiple circuits.

ELECTRICAL RATING
125/250 v AC: 10 Amps
125 v AC: ½ HP
250 v AC: ¾ HP
30 v DC: Form XX or YY—15 Amps Res.
Form XX or YY—10 Amps Ind.
Form ZZ— 10 Amps Res.
Form ZZ— 7 Amps Ind.



TYPE 26

Provides simultaneous operation of two Licon Butterfly double-break mechanisms in one case. Eliminates the need for dual components and complicated actuators.

ELECTRICAL RATING
125/250 v AC: 8 Amps
28 v DC: Form XX or YY—10 Amps Res.
Form XX or YY—7.5 Amps Ind.
Form ZZ— 10 Amps Res.
Form ZZ— 5 Amps Ind.

TYPE 36

Simultaneous operation of three poles through a special linkage between mechanisms. Eliminates the need for three components and complementing actuators.

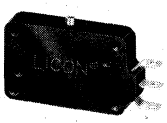
ELECTRICAL RATING
125/250 v AC: 8 Amps Res.
28 v DC: Form XXX or YYY—10 Amps Res.
Form XXX or YYY—7.5 Amps Ind.
Form ZZZ— 10 Amps Res.
Form ZZZ— 5 Amps Ind.

TYPE 25 THIN SWITCH

The thin switch is designed for commercial applications which require utmost reliability at low price. Typical applications include coin and vending machines, timers and counters.

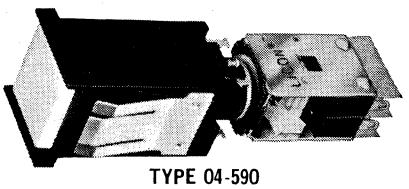
ELECTRICAL RATING

On-Center	Off-Center
12 Amps Res.	6 Amps Res.
7 Amps Ind.	3 Amps Ind.



LICON® LIGHTED SWITCHES

Widely used on computers, machine tools, office machines, guidance control and a wide variety of applications. Heart of Licon lighted switches are the ultra-reliable Butterfly® Double-breaks for long life and dependable performance. Wide selection of colors, sizes, mounts and actuators.



TYPE 04-590

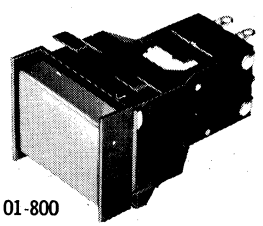
Dressy panel appearance with four bulb illumination. Simple snap-on switch module, front-of-panel bulb service. Standard in black or clear anodizing.

TYPE 04 BARRIER MOUNT

Remove one or more switches without disturbing other units. Serves as safety separator between ganged switches. Also aluminum matrix barriers.

TYPE 01-700

Low cost momentary 1-lite stationary bulb in one-piece molded housing. Cylindrical, square or round lens caps. Front-of-panel bulb servicing.



TYPE 01-800

Styled for maximum in function/appearance criteria. Has integral plastic housing that snaps in from front panel. Available in one and two pole, momentary and alternate action.

LICON® INDUSTRIAL SWITCHES

The most dependable machine tool and industrial switches on the market. Meet all OEM and replacement needs, and provide compatibility and interchangeability at the lowest possible cost. Wide selection of models, mountings, actuators.

TYPE 30-100 OVERTRAVEL PLUNGER SWITCH

General purpose limit or push button switch for circuit controls of heavy duty applications. The overtravel plunger provides added switch protection and also permits greater flexibility of application. Other models feature roller arm, roller plunger, sealed plunger, sealed roller arm, sealed palm button for a wide variety of applications.

Operating force.....10 oz.±4 oz.
Release force.....3 oz. min.
Pretravel.....030 max.
Overtravel.....7/32 min.

Panel Mount

Movement differential available from .101" to over .040". 100 gram to 2 lb. operation force available. Terminals available with a No. 6 screw and cup washer, No. 6 screw and lockwasher or No. 8 screw with these same fastener choices. Custom terminal designs available. Auxiliary mounting plate available for panel mount.

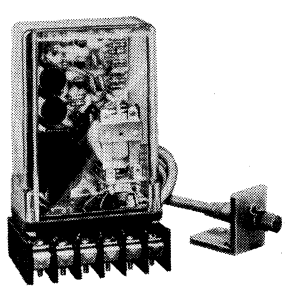
BUTTERFLY® DOUBLE-BREAK SWITCHES

The theory behind the unique Licon Butterfly® Double-Break switch design, switch characteristics and ratings, and a catalog of the complete line.

LICON® LIGHTED SWITCHES

A complete description of the Licon Lighted switch line, physical and electrical properties, design considerations and a catalog of the 1-lite, 2-lite, and 4-lite series.

NEW!
70-700 PROXIMITY SWITCH



The 70-700 consists of two basic modules, a control module and a remote potted sensor. The control module contains a 10 amp relay and a transistor oscillator, both housing in a plastic plug-in case which mates with a 12 terminal heavy duty JIC style socket (supplied). A NEMA Class 1 metal enclosure is also available for housing both the control module and heavy duty socket.

SPECIFICATIONS

Accuracy — The circuit will actuate, at a given sensor to conductor spacing, within 0.0005".

Sensing Range — For the .750" diameter sensor .110" Min. — .261" Max., and for the .440" diameter sensor .048" Min. — .148" Max.

Speed — Up to 1000 operations per minute possible.

Ambient Temperature Ranges — 30° to + 250° F for the remote sensor, 0° to + 150° F for the control module.

For complete information about the full line of Licon switches, write for G105 catalog.

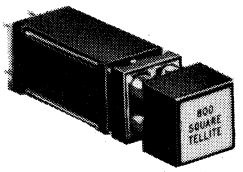
MSC Master Specialties Lighted Pushbutton Switches, Pilot Lites

For more than a quarter of a century, Master Specialties Company has specialized in the development and production of warning and display systems, word indicator lights, and illuminated pushbutton switches. Today, the company produces a broad line of information display and control devices for the nation's military and space programs and for commercial aviation, industrial process control, public utilities and commercial equipment of all types. This product selection guide will enable you to quickly select the right MSC product for your application.

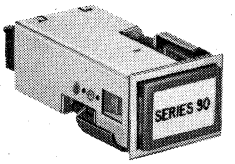
Series 800 Square Tellite® Switch

Miniature pushbutton switch with modular design and outstanding plug-in features. Reduces wiring installation time by 71% while increasing reliability. Available in standard matrices containing up to 144 channels.



Miniature Tellite® Series 90E Switch, Series 80E Pilot Lite

Companion pushbutton switches and indicators with matching panel cutout and front-of-panel appearance. Flush mount design, with positive hard mount from front of panel. Provide broad capabilities in minimum space. Half the size of equivalent competitive units. Provide two-lamp reliability, or separate lighted indication in one unit.



Comparative design and performance characteristics

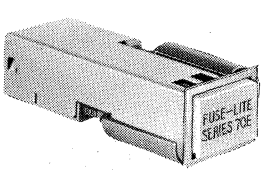
This tabulation of outstanding characteristics permits you to select quickly and easily the MSC product most suitable to your requirement. Once you have made your choice, we invite you to write for complete catalog information. Or, if you prefer, contact the nearest regional sales office or distributor where you will receive prompt attention to your request.

Characteristics	Series 800 Square Tellite® Switch	Miniature Tellite® Series 90E Switch, Series 80E Pilot Lite
Basic Unit Types Available	Indicator Lite, Switch Lite, Switch Lite with Holding Coil	Switch Lite, Switch Lite with Holding Coil, Pilot Lite
Switch Configurations and Actions	2PDT or 4PDT, momentary or alternate action	2PDT or 4PDT, momentary or alternate action
Overall Unit Size, H x W x L	.750" x .750" x 3-1/8" max.	1.000" x .750" x 3.093" max. (switch) 1.000" x .750" x 2.400" max. (pilot lite)
Lamp Type / Number of Lamps / Voltage	Four T-1-3/4 incandescent 6, 12, or 28 volt based lamps (115 VAC neon lamps available)	Two T-1-3/4 incandescent 6, 12, or 28 volt based lamps (115 VAC neon lamps available)
Lamp Circuits Available	Common ground, vertical or horizontal split	Common ground
Wiring Terminations	Crimp type (soldering possible)	Solder type (switch) Solder or screw type (pilot lite)
Switch Contact Ratings	5 amps resistive @ 115 to 250 VAC, 5 amps resistive, 2.5 amps inductive @ 30 VDC	3 amps resistive, 1-1/2 amp inductive, 1 amp lamp load N.A. for Series 80
Relamping	Front of panel without tools	Front of panel without tools
Display Screen Arrangements	Full display, vertical or horizontal split display, 3 and 4-way split display	Full display, 2-way horizontal or vertical split, two-color
Color Control Method	Silicone rubber slab filters in amber, blue, green, red, white. Projected color also available	Silicone rubber slab filter in amber, blue, green, red, white
Lens Types Available	Lighted letters or lighted background, letters either legible or not when unit is unlighted	Lighted letters or lighted background, letters either legible or not when unit is unlighted
Mounting Method	Units plug and lock into pre-fabricated mounted racks	Hard mount from front of panel with integral mounting sleeves
Unit Weight, Nominal	1 oz. (module); .7 oz. (mounting rack)	2 oz. (switch) 1-1/4 oz. (pilot lite)
Optional Features Available	RFI screens, two-color full display, panel plugs	RFI screen, drip-proof seal, spacer barriers, switch guard
Price, Basic Unit with 2-Pole Momentary Switch, 500 Pieces	$9.20	$6.30 (switch) $1.80 (pilot lite)

OTHER MSC INFORMATION DISPLAY AND CONTROL DEVICES

SERIES 70E WORD INDICATING TWO-LAMP FUSE HOLDER

Perfect for quick identification and replacement of open fuses. Provides easy panel front mounting and relamping. Choice of resistance limiter, isolated lamp/fuse, and 250V circuits. Accepts standard industry fuses. Features two-lamp reliability and rugged construction for further dependability. Available for MIL-F-19207 applications as Series 70H.



UNLIGHTED SWITCH ASSEMBLIES

Series 14. 2PDT or 4PDT unit with momentary or alternate action. Positive snap-action design assures instantaneous contact transfer. Also available for MIL-S-8805 applications as Series 14H. **Series 19.** Building block pushbutton switch. Removable color pushbuttons, facing nuts and switch modules provide design flexibility. **Series 16.** Precision two position toggle switch assembly. 2PDT or 4PDT maintained/maintained. Simultaneous transfer of all switch contacts. Also available for MIL-S-8805 applications as Series 16H. **Series 21.** three position toggle switch with three separate lever actions for positive contact transfer. **Series 22.** Precision sequence actuator. Programs four miniature SPDT switch modules for any combination of switching modes in up to twelve sequential steps.

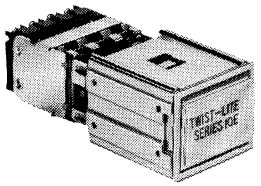
MSC Master Specialties Lighted Pushbutton Switches, Pilot Lites

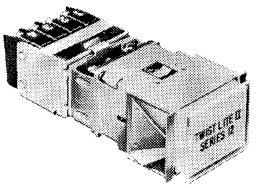
Series 10E Twist-Lite®

Features positive hard mount sleeve, individual lamp color control and four-way split display. Also functions as word indicator for design compatibility. Withstands extremes of shock and vibration due to hard mount feature. Available for MIL-S-22885 requirements as Series 10H.



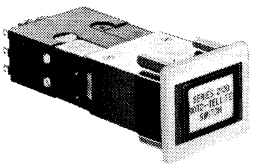
Series 12 Twist-Lite®

Versatile switch with simplified spring-clip mounting and numerous mounting configurations. Twelve different styling options available. Combination of features makes unit ideal for industrial, commercial and military control panels. Approved by Underwriters Laboratories.



Series 2100 Roto-Tellite®

Reliable lighted pushbutton switch designed for rigorous, versatile duty in military/aerospace airborne and ground support equipment. Available in a wide variety of channel configurations. Can be grouped in many combinations at factory, shipped ready to install.



Characteristics	Series 10E Twist-Lite®	Series 12 Twist-Lite®	Series 2100 Roto-Tellite®
Basic Unit Types Available	Indicator Lite, Switch Lite, Switch Lite with Holding Coil	Indicator Lite, Switch Lite, Switch Lite with Holding Coil	Indicator Lite, Switch Lite, Switch Lite with Holding Coil
Switch Configurations and Actions	2PDT or 4PDT, momentary or alternate action	2PDT or 4PDT, momentary or alternate action	2PDT or 4PDT, momentary or alternate action
Overall Unit Size, H x W x L	.960" x 1.200" x 2.790" maximum (momentary)	.860" x 1.250" x 1.950" max.	1.515" x 1.812" x 3-5/8" max. (single unit with cover plate)
Lamp Type / Number of Lamps / Voltage	Four T-1-3/4 incandescent 6, 12, or 28 volt based lamps (115 VAC neon lamp available)	Four T-1-3/4 incandescent 6, 12, or 28 volt based lamp (115 VAC neon lamps available)	Four T-1-3/4 incandescent 6, 12, or 28 volt based lamps (115 VAC neon lamps available)
Lamp Circuits Available	Common ground, full display, vertical split or horizontal split; or each lamp separately grounded	Common ground, full display, vertical split or horizontal split; or each lamp separately grounded	Common ground, vertical or horizontal split
Wiring Terminations	Solder type	Solder type	Solder type
Switch Contact Ratings	Silver: 5 amps @ 125 to 250 VAC, 5 amps resistive, 3 amps inductive @ 30 VDC Gold: 1 amp resistive, 1/2 amp inductive @ 30 VDC	Silver: 5 amps @ 125 to 250 VAC, 5 amps resistive, 3 amps inductive @ 30 VDC Gold: 1 amp resistive, 1/2 amp inductive @ 30 VDC	5 amps @ 125 to 250 VAC, 3 amps inductive @ 30 VDC (sea level)

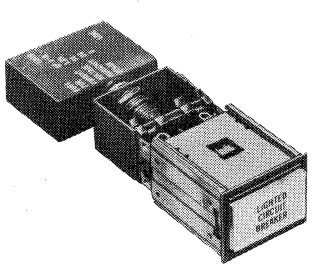
Display Screen Arrangements	Full display, vertical or horizontal split display, 3 and 4-way split display	Full display, vertical or horizontal split display, 3 and 4-way split display	Full display, vertical or horizontal split display, 3 and 4-way split display
Color Control Method	Silicone rubber bulb filters in amber, blue, green, red, white, yellow. Colored lenses also available	Silicone rubber bulb filters in amber, blue, green, red, white, yellow. Colored lenses also available	Silicone rubber slab filters in amber, blue, green, red, white
Lens Types Available	Lighted letters or lighted background, letters either legible or not when unit is unlighted	Lighted letters or lighted background, letters either legible or not when unit is unlighted	Lighted letters or lighted background, letters either legible or not when unit is unlighted
Mounting Method	Hard mount from front of panel with integral mounting sleeves	Spring clip, mounting barrier or spring clip with spacer barrier	Front of panel, with small screwdriver
Unit Weight, Nominal	3.1 oz.	3.1 oz.	4 oz.
Optional Features Available	Switch guard, drip proof seal, RFI screen, master test control capsule, four color "Full" display, quick connect and wire wrap terminals, Snap-on circuit breaker (see back cover)	Meets applicable requirements of MIL-S-22885 and CSA.	Circuitry (test and dimming), matrices with single cover plate, two-color.
Price, Basic Unit with 2-Pole Momentary Switch, 500 Pieces	$9.25	$5.00	$18.00

OTHER MSC INFORMATION DISPLAY AND CONTROL DEVICES

LIGHTED PUSHBUTTON CIRCUIT BREAKERS

Assembly consists of snap-on circuit breaker, 4-lamp word indicator and re-set actuator assembly. Provides up to four-way split, word and color variety, styling compatibility with other MSC indicators. SPST breaker designed to meet military requirements. Flush mount design ensures operating safety. Offers 50 MA to 20 amp protection with choice of delay times.



WARNING AND DISPLAY SYSTEMS

Master Caution Systems. Complete warning systems for monitoring several functions and providing positive fault identification with illuminating word indicators. Meets exacting military requirements. Widely used in prominent military and commercial aircraft, missile ground support equipment and exacting industrial applications.

AVA — Audio/Visual Annunciator. Combination system with lighted word indicators and corresponding pre-recorded voice messages. Features small size. Ideal for fault identification in aircraft, ground support equipment and military applications. Also excellent for monitoring status in industrial or commercial process control installations.

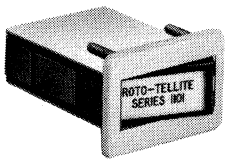
MSC Master Specialties Lighted Word Indicators

Comparative design and performance characteristics

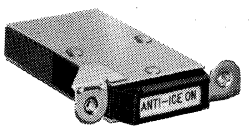
Series 100/1100 Roto-Tellite®

Flush mounted model available with two standard lens sizes (narrow 100, wider 1100) and a wide variety of matrix configurations. Ideal when application calls for rugged, dependable performance in environmental extremes.



Series 6000/7000 Roto-Tellite®

Available in two sizes, the narrow 6000 and wider 7000 — mounts flush with front panel. Small size, low cost, high quality features are ideal for cockpit applications and numerous industrial, commercial and military requirements.



Series 4000/5000 Tellite®

Push-to-relamp indicator offered in two sizes, the Series 4000 and the larger Series 5000. Both are ideal for numerous industrial, commercial and military applications. Relamping accomplished simply by depressing display face then pulling face forward on captive runners.

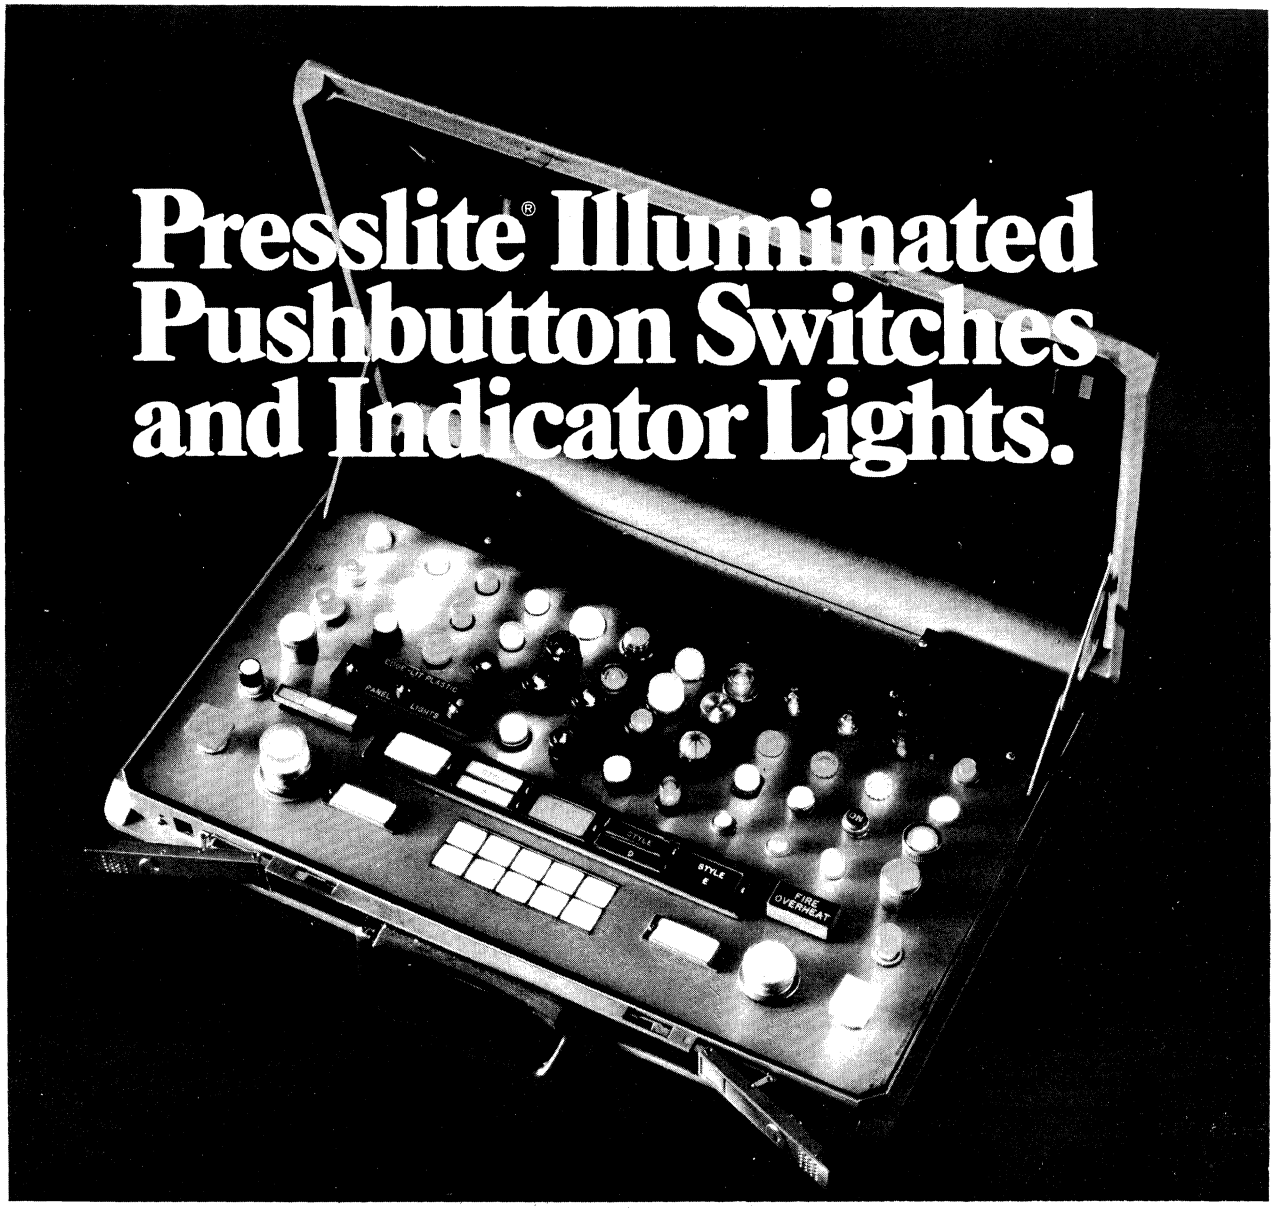
Presslite® Illuminated Pushbutton Switches and Indicator Lights.



Whatever your panel problem, you'll find the solution with Marco-Oak's Presslite pushbutton switches and matching indicator lights. Here's why:

- **Versatile mounting**... broad line of hardware, ¼" to 1" mounting hole sizes
- **Environment-proof**... oil- and watertight in all types and sizes.
- **Securely-shielded**... against EMI/RFI transients.

Presslite Switches—Improved materials assure a long life of over a million cycles. And, they provide crisp appearance and safety features not previously available for front panel layout. Recessed types also available.

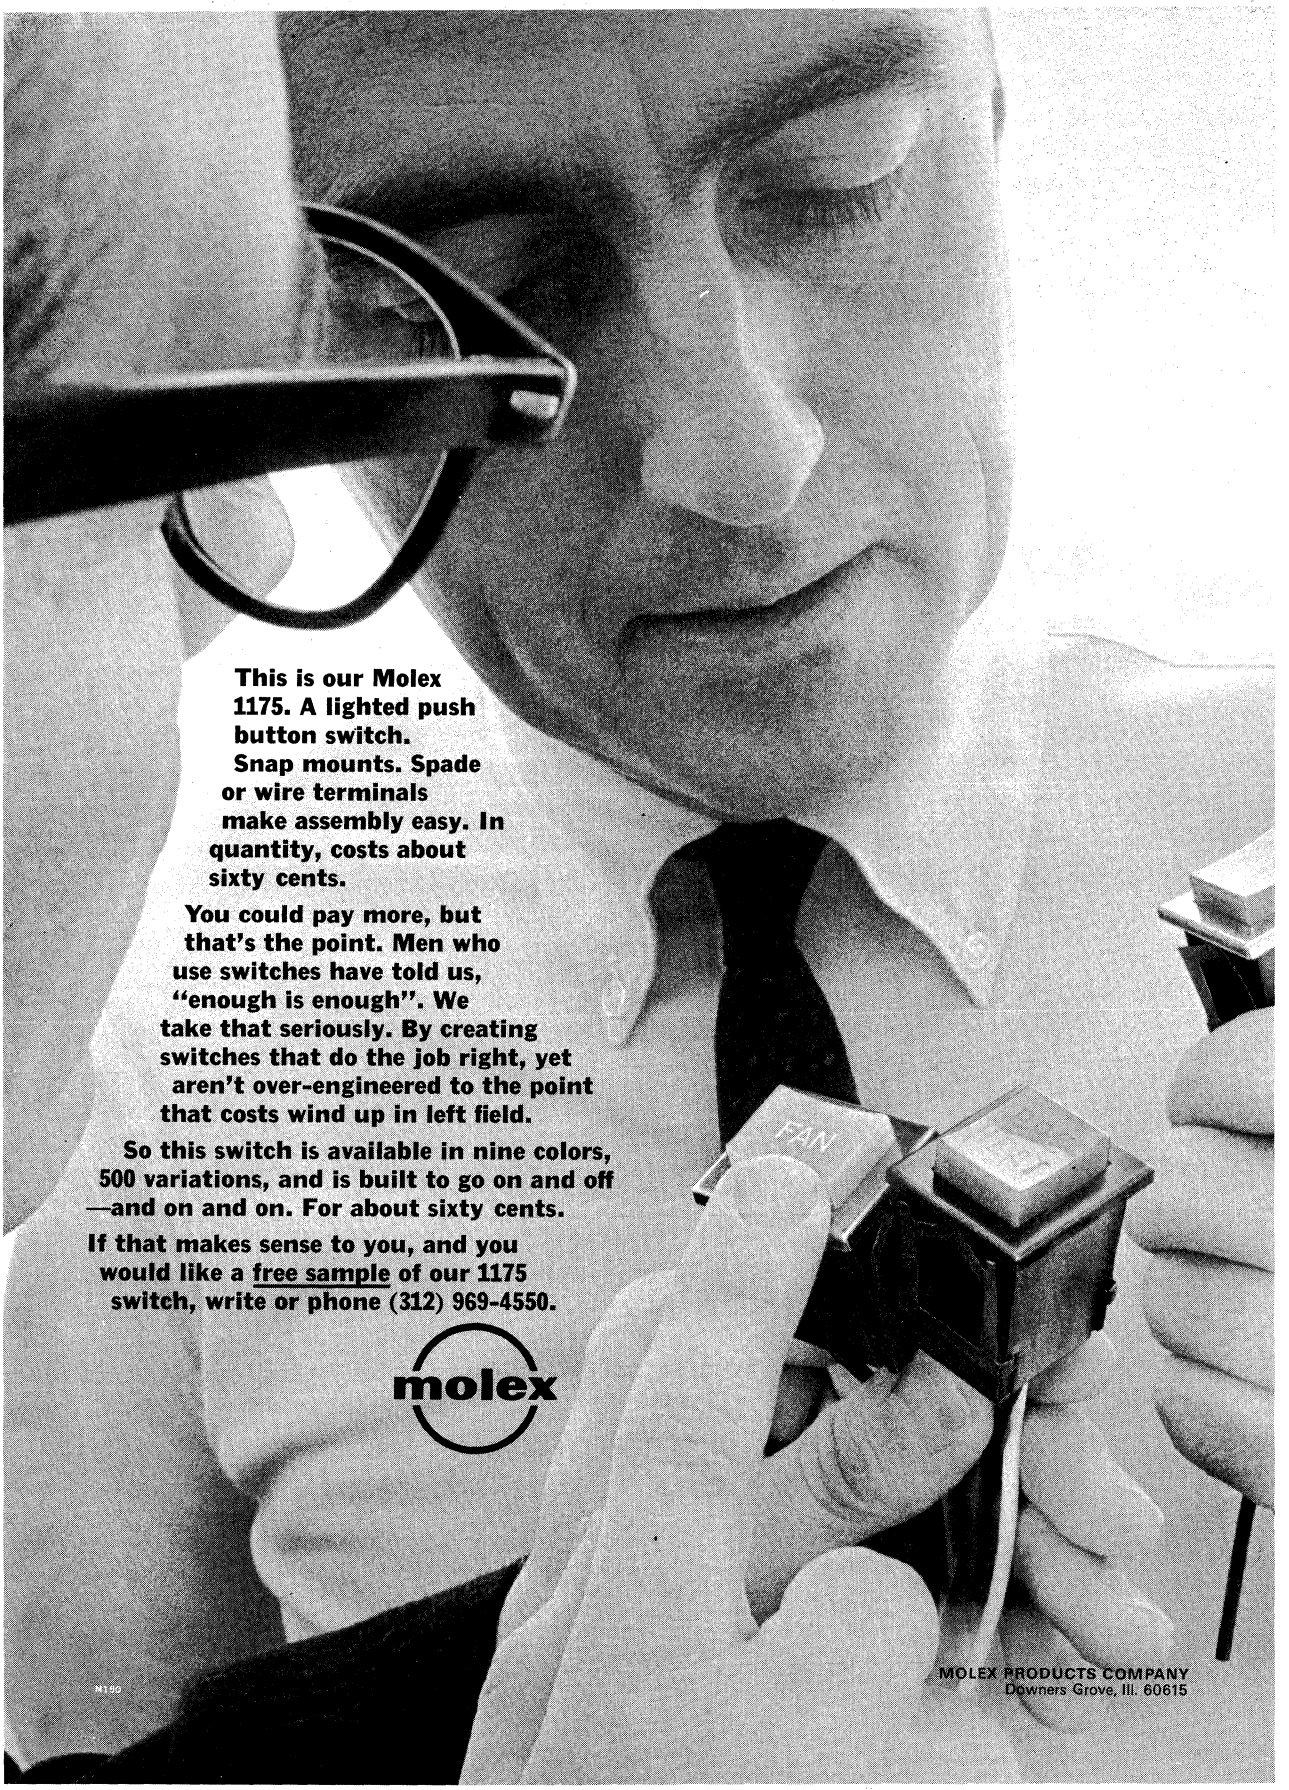
A new model has linear contacts (instead of snap-action) and a unique over travel mechanism to prevent contact damage from excessive operating force or arcing from insufficient operating force.

Indicator Lights—They're completely compatible with Presslite pushbuttons and adaptable to any panel. Press-to-test is a special feature offering you wide options of choices on lamps, lettering or legend markings.

And, these indicator lights exceed all commercial and military specs—including MIL-L-3661B and MIL-S-22885.

Presslite switches and indicator lights are the result of long years of experience in design and manufacturing. Special applications and difficult design problems are welcomed. For full details, write today for: Presslite Catalog S-68 or Indicator Light Catalog L-68.

MARCO-OAK
A DIVISION OF OAK ELECTRO/NETICS CORP
P. O. Box 4011 207 S. Helena Street
Anaheim, California 92803
PHONE: 714-535-6037 • TWX: 714-776-6111



This is our Molex 1175. A lighted push button switch. Snap mounts. Spade or wire terminals make assembly easy. In quantity, costs about sixty cents.

You could pay more, but that's the point. Men who use switches have told us, "enough is enough". We take that seriously. By creating switches that do the job right, yet aren't over-engineered to the point that costs wind up in left field.

So this switch is available in nine colors, 500 variations, and is built to go on and off —and on and on. For about sixty cents.

If that makes sense to you, and you would like a free sample of our 1175 switch, write or phone (312) 969-4550.

Molex Connectors and Switches are also available from Electrical/Electronic Distributors through Waldom Electronics, Inc.

MICRO SWITCH Freeport, Illinois

A Division of Honeywell

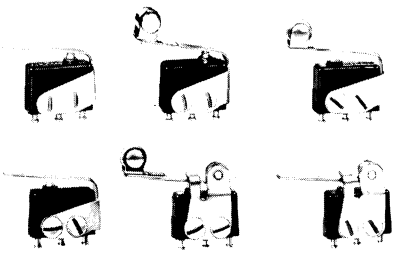
TYPE "1SX" SUBMINIATURE BASIC SWITCHES

.50 x .35 x .20

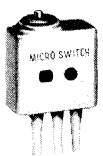
- Smallest SPDT switch.
- Weighs only 1/28 ounce.
- Temperature range: —100°F to +250°F or +375°F.
- Operating force as low as 3 oz. or as high as 5 oz.
- Differential travel as low as .002 inch to .005 inch.
- Contact arrangement is SPDT.
- High arc-resistance; high-impact case.
- Six auxiliary actuators.
- Turret terminals for easy soldering.
- UL and CSA listed.
- Military listed.

Electrical Rating:
Silver contacts: 7 amps, 125 or 250 vac; 4 amps ind. and 7 amps. res. 28 vdc.
Gold contacts: 28 vdc; 2 amps inrush; 0.5 amp ind.; 1 amp res.

AUXILIARY ACTUATORS



TYPE "XE" ENVIRONMENT-PROOF SWITCHES



.62 x .60 x .32

- Enclosed plastic basic "ISX" switch.
- Corrosion-resistant aluminum housing.
- Molded silicone rubber plunger seal.
- Terminals encased in epoxy resin.
- Operating temperature range is —65°F to +221°F.
- Auxiliary actuators available.

Electrical Rating: 7 amps, 115 vac or 28 vdc.

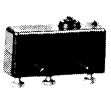
TYPE "SM" SUBMINIATURE BASIC SWITCHES

- Up to 10 ampere capacity.
- Standard temperature range: —100°F to +250°F.
- Several terminal variations.
- Gold or silver contacts.
- Integral or auxiliary actuators.
- Extra long life switches: 10,000,000 mechanical operations.
- Corrosion resistant levers.
- UL and CSA listed.
- Military listed.

Electrical Ratings:
125-250 vac, 5 amps; specials to 10 amps, 125-250 vac. 30 vdc; inductive, 3 amps sea level and 2.5 amps 50,000 feet; resistive, 5 amps sea level and 50,000 feet.
Gold contacts: 30 vdc, inductive, 0.5 amp; resistive, 1 amp.

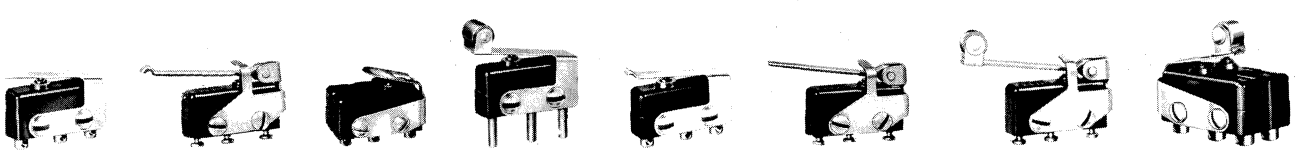
"SM"
BASIC SWITCH
.78 x .36 x .25

CENTER
PLUNGER

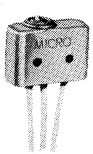


INTEGRAL LEVERS

AUXILIARY ACTUATORS



TYPE "SE" ENVIRONMENT-PROOF SWITCHES

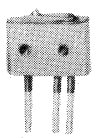


.88 x .60 x .35

- Enclosed plastic basic "SM" switch.
- Corrosion-resistant aluminum housing.
- Molded silicone rubber plunger seal.
- Terminals encased in epoxy resin.
- Operating temperature range is —65°F to +221°F.
- Auxiliary actuators available.

Electrical Rating:
5 amps, 115 vac or 28 vdc.

TYPE "HM" HERMETICALLY-SEALED SWITCHES



.79 x .50 x .25

- Metal-to-metal and glass-to-metal seals.
- Meet Military Specification for explosion-proof, and corrosion-resistance.
- Operating temperature ranges from —300°F to 500°F.
- Auxiliary actuators.
- Circuitry is SPDT.

Electrical Rating:
5 amps resis. and 3 amps ind., 28 vdc.

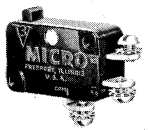
MICRO SWITCH Freeport, Illinois

A Division of Honeywell

TYPE "V3" MINIATURE HIGH CAPACITY SWITCHES

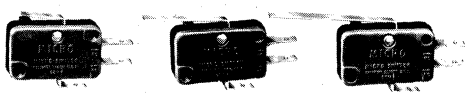
- Circuitry: SPDT, SPNO, SPNC.
- Operating Force: From 8 grams to 14 ounces.
- Differential Travel: .002 inch to .016 inch.
- Actuators: Auxiliary and integral as shown.
- Standard Temperature Range: —100° to +185°F., Specials to +600°F.
- Low Force
- Extra Long Life: 10,000,000 operations
- Terminals: Solder, screw or quick connect terminals.
- Ideal for gang mounting.
- UL and CSA listed.
- Military listed.

Electrical Rating:
30 vdc: Ind., 10 amps at sea level, 6 amps at 50,000 feet; res., 10 amps; motor load, 6 amps.
125-250 vac: 10 or 15 amps; gold contact designs for dry circuit use.

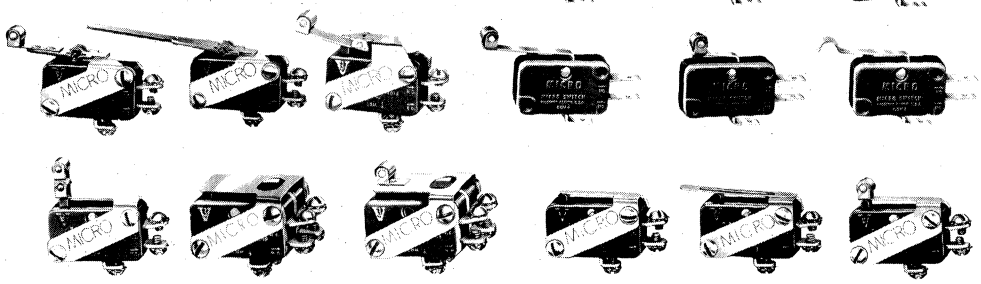


1.10 x .63 x .40

INTEGRAL LEVERS



AUXILIARY ACTUATORS



STANDARD SERIES "BZ", "BA", "BE", "BM", "MT", AND "DT" BASIC SWITCHES

- Circuitry: SPST, SPDT, DPDT, pulse or sequence action, momentary or maintained contact.
- Characteristics: Sensitive operating forces measured in grams; differental travels as small as .0002 inch.
- Temperature Range: Down to —65°F, up to 400°F.
- Terminals: Several variations of solder, screw and quick-connect types.
- Actuators: Hundreds of configurations tooled and available.
- UL and CSA listed.
- Accurate repeatability.

Electrical Ratings and Circuitry

BZ — SPDT
15 amps, 125, 250 or 480 vac

BA — SPDT
20 amps, 125, 250 or 480 vac

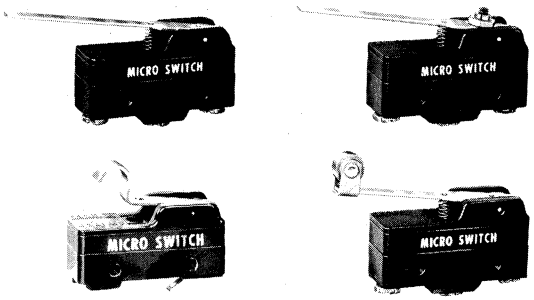
BM — SPDT
22 amps, 125, 250 or 480 vac

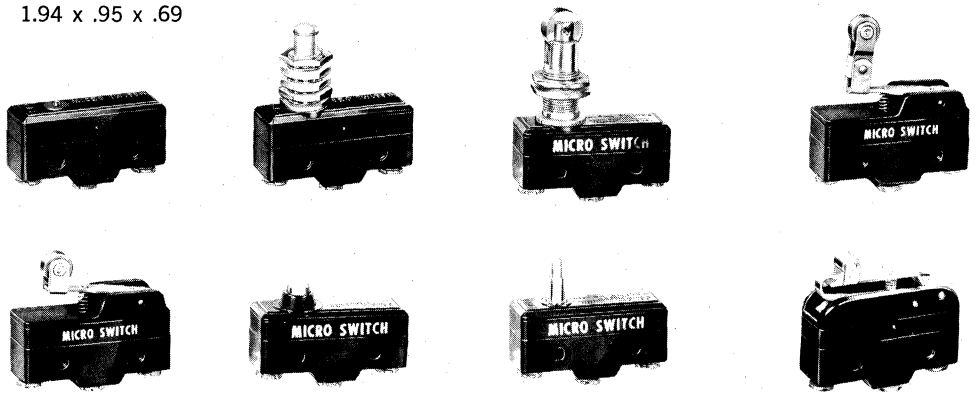
BE — SPDT
25 amps, 125, 250 or 480 vac

DT — DPDT
10 amps, 125 or 250 vac

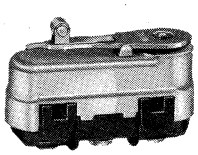
MT — SPDT
10 amps, 125 vac or vdc

1.94 x .95 x .69





TYPE "HS" HERMETICALLY-SEALED SWITCH



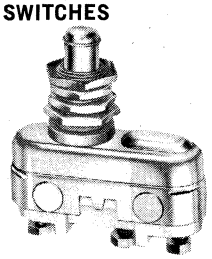
- Metal-to-metal and glass-to-metal seals.
- Meet Military Specification for ex-explosion-proof and corrosion-resistance.
- Operating temperature range is —65° to +180°F.
- Variety of actuators.
- Circuitry is SPDT.

Electrical Rating: 25 amps, resis., 10 amps, ind., 28 vdc. 1 amp resis. and ind.,125 vac.

"HT" HIGH TEMPERATURE SWITCHES

- Monel enclosure on a ceramic base.
- Meets Military Specifications for corrosion and shock resistance.
- Operating temperature range is —321°F to +1000°F.
- Variety of actuators.
- Circuitry is SPDT.

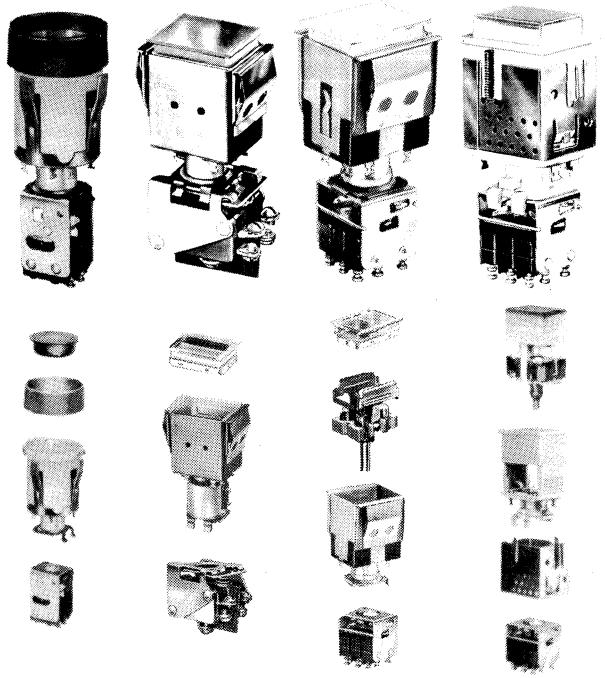
Electrical Rating: 10 amps resis., 5 amps ind., 4 amps motor load, 2.4 amps lamp load, 28 vdc.



MICRO SWITCH Freeport, Illinois

A Division of Honeywell

SERIES 2 LIGHTED PUSHBUTTON SWITCHES



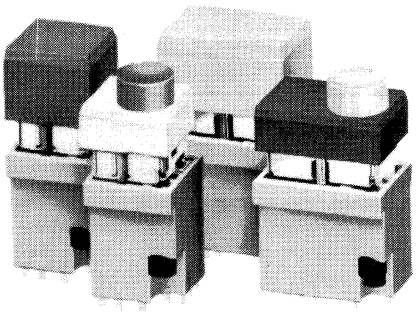
MODULAR LIGHTED PUSH BUTTON SWITCHES

Series 2 Rectangular and round display. Snap-in mount. Solenoid pull-in and/or hold-in coil for remote control.
Series 2C200 Snap-in mount. Relamp without tools. Available with RFI shield, and solenoid pull-in or hold-in coil for remote control.
Series 2N Shock-resistant spring lock mount. Hold-in coil. Relamp without tools. Colored housings.

GENERAL FEATURES:

in BUTTONS—Choice of 1, 2, 3, or 4-section buttons.
in COLOR—Wide selection of transmitted and projected (filtered) color schemes, and 1 to 4 lamps for up to 4-color display.
in CIRCUITRY—Up to 4-pole double-throw and 2-circuit double-break contact arrangements.
in RATINGS—Wide selection of modules for handling low energy to heavy duty electrical loads.
in WIRING—Solder, screw or quick connect wiring terminations.
in MOUNTING—Snap-in flange and barrier mountings or spring-lock panel attachment.
in REMOTE CONTROL—Only MICRO SWITCH has both remote actuation and release of switching contacts.

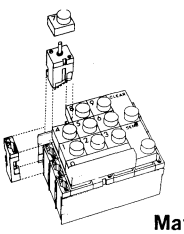
KB SWITCH/DISPLAY MATRIX



KB Switch/Display Matrix—makes it practical for you to design and assemble a custom man/machine interface for each individual panel. KB gives you a complete new set of modular keyboard components.

Included are: plug-in power switches with lighted display; plug-in lighted indicators; plug-in encoding switches with up to eight output bits in each. Unique mounting modules allow you to assemble a complete keyboard at the bench—complete with encoding, wiring, interlock or lockout system.

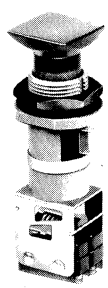
- Flexibility in pushbutton control and lighted display.
- Flexibility in arrangement of panel layouts.
- Flexibility in data entry (inputs).
- Introducing a new module-matrix mounting technique.
- Plug-in elements for fast assembly and easy field changes.
- "Add-on" modules provide mechanical interlock.



Matrix Mount

"KB" PUSHBUTTON SWITCHES

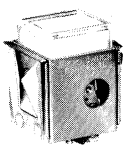
Lighted plug-in power switches have a 2 or 4-pole double-throw double-break circuitry, and momentary or alternate action. Electrical rating: 28 vac,, 3 amps, ind., 5 amps, resis.; 115 vac, 5 amps resis. or ind. Reed plug-in switches have 1 or 4 SPNO circuitry, in momentary or alternate-action versions. Hermetically-sealed reeds provide immunity to contact contamination. Ideal for dry circuits.



SERIES 50PB LIGHTED PUSHBUTTON SWITCHES

- Bushing mounting.
- One-lamp indication.
- Wide choice of button shapes and colors.
- Momentary or alternate action.
- Electromagnet maintained action.

Electrical Ratings:
SPDT—5 amps, 125-250 vac;
5 amps, res., 3 amps ind., 30 vdc.
2 CKT DB—10 amps, 125-250 vac;
½ hp, 125 vac.; 10 amps, 30 vdc.



SERIES 302PB LIGHTED PUSHBUTTON SWITCHES

- Miniature size—occupies less than one cubic inch.
- One or two-section display, two-lamp indication.
- Two single-pole double-throw switches.
- Momentary or alternate action.
- Snap-in mounting.
- UL and CSA listed.

Electrical Rating:
7 amps, 115-230 vac;
7 amps, res., 4 amps ind., 28 vdc.

MICRO SWITCH Freeport, Illinois

A Division of Honeywell

UNLIGHTED PUSHBUTTON SWITCHES

- COMPACT DESIGN
- WIDE CHOICE OF OPERATIONAL CHARACTERISTICS
- AVAILABLE WITH OR WITHOUT SEALED CONSTRUCTION

Series PB bushing mount pushbutton switches find wide use on electronic and commercial-industrial panels. They are available with 1, 2, 3 or 4-pole double-throw contact arrangements, momentary or alternate action, with or without panel sealing, and in miniature size and low force designs.

Electrical Rating: (For all Series PB, except pushbuttons with hermetically sealed switch units.)

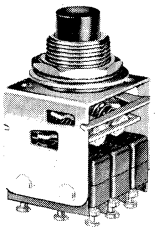
30 vdc-5 amps res. sea level or 50,000 ft., 3 amps ind. sea level, 2.5 amps ind. 50,000 ft., 24 amps max. inrush. UL and CSA listing for basic switch:

125 or 250 vac .....5 amps

Touch-Feedback Switches

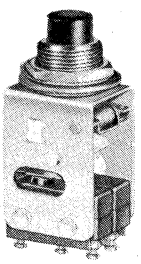
Momentary-Action (PB)

When the button is operated, a force is transmitted back to the finger, indicating that circuit transfer has taken place. There is a choice of black, red or green concave surface buttons. Switches have double turret solder type terminals.



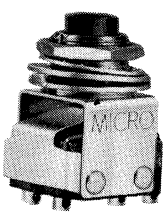
Alternate-Action Switches (PB)

Alternate-action "push-on push-off" switches transfer circuit each time the button is pushed and maintains the contact position until pushed again. Terminals are double turret solder type.



Short Travel Switches (PB)

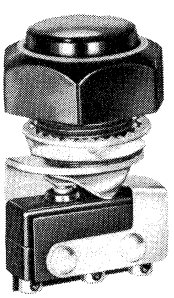
These switches are similar in appearance to the touch-feedback design, but have a leaf actuator for lower operating forces and shorter travel.



With Button and Panel Seals (PB)

Momentary-Action

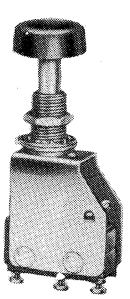
This two-piece design assembly enables the pushbutton to be separated from the switch unit and mounted in the panel. The switch unit is then easily wired and snapped into place from behind the panel. There is an elastomer seal bonded between the plunger and button collar and an "O" ring seals the button assembly to the panel front.



Low-Force Rapid Operating Action (PB)

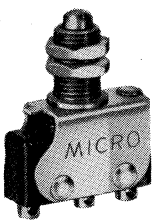
Developed for one-finger rapid-repeat operation, this switch is ideal for equipment requiring high-speed keyboard style control. Concave buttons are supplied detached for mounting.

Momentary-Action



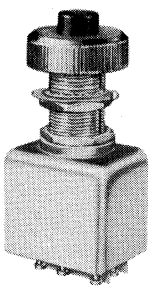
Miniature Size Switches (PB)

Catalog Listing 1PB5 is a single-pole double-throw miniature pushbutton switch, weighing only 0.3 oz. It has a steel button to enable use under hinged plates or paddle levers, in addition to manual operation.



Sealed at Bushing, Button, Panel and Switch Units (PB)

Catalog Listing 2PB901-T2 meets the submergence requirements of MIL-STD-108D (up to 10 p. s. i. water pressure for one hour). It is sealed facenut-to-panel, button-to-facenut, and bushing-to-facenut (prevents entry of water from back of panel. up and over bushing wall). The two SPDT switch units are potted in a corrosion-resistant metal enclosure. The knurled facenut is chrome finished to provide an attractive panel appearance with the black button.

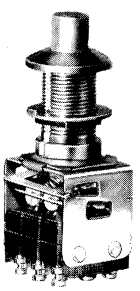


Series 6 Modular Pushbutton Switches

- Easy-to-assemble modules
- Choice of three facenut types, including one with Panel seal
- Wide array of switch modules

Pushbutton modules consist of an operating button, mounting bushing, two hexnuts and a keying washer. Mounting clips are provided at the base of the bushing for attachment of switch modules (or optional hold-in coil modules). They can be mounted in panels up to .312" thick.

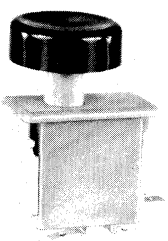
Electrical Rating: Depends on switching modules used. From milliamps to 20 amps, 125 vac.



"DM" Snap-In Mount Switches

Switch snaps in securely without tools. Adapts to panels .045" to .100" thick. Quick-connect terminals allow quick wiring.

Wide choice of actuators: four styles of pushbuttons, in red or black; push-pull (maintained) action; mechanical limit or interlock plunger. Available with single-pole double-throw or double-pole double-throw circuitry, momentary or maintained switching action. Rugged, corrosion-resistant plunger and case; high electrical capacity—UL and CSA listed at 10 amps, 125 or 250 vac; ⅓ HP, 125 or 250 vac.

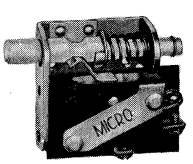


Door Interlocks

For use on hazardous electronic equipment. They automatically cut power when service door or drawer is opened, protecting personnel and equipment.

To test circuits with the power "on" the actuating rod can be manually set to a maintained-on-position. When the door or drawer is closed following test or service, the actuating rod automatically returns to the normal or reset position so that next time the door is opened, power is cut off. This feature eliminates the danger involved in "tying down" or wiring around conventional switches.

Electrical Rating: To 15 amps, 125, 250 or 480 vac; ½ amp, 125 vdc; ¼ amp, 250 vdc.



MICRO SWITCH Freeport, Illinois

A Division of Honeywell

TOGGLE SWITCH ASSEMBLIES

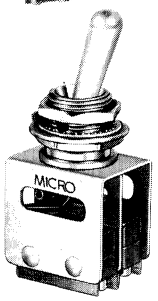
Toggle switch assemblies couple a toggle switch operator with one or more precision "SM" or "V3" type basic switches. In two position devices (type 6AT and 23AT), the normally open contacts of all basic switches are actuated when the toggle lever is located in the keyway position. In three position devices, such as the 22AT, one set of normally open contacts are actuated in each extreme position, while all switches in the center position are released, closing the normally closed contacts.

Electrical Ratings: Toggle switches with "V3" basics: 15 amps, ⅓ hp, 125-250 vac; ½ amp, 125 vdc; ¼ amp, 250 vdc. 10 amps, ind. or resis., 30 vdc.

Toggle switches with "SM" basics: 5 amps, 125-250 vac; 3 amps ind., 5 amps resis., 30 vdc. Gold contacts: 1 amp, 125 vac. 0.5 ind., 1 amp resis., 30 vdc.

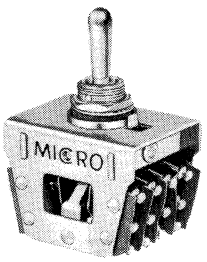
Type "6AT"

- Two bushing sizes—¼ in. and 15/32 in.
- Silver or gold contacts.
- UL and CSA listed.
- Short depth behind panel.
- Control 1, 2, or 3 pole, double-throw precision basic switches.
- Solder or turret terminals.
- "SM" basic switches.



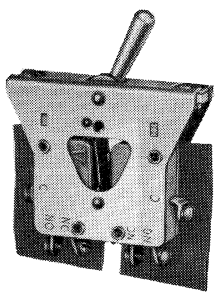
Type "13AT" and "23AT"

- Standard toggle, tab, or pull-to-unlock levers.
- Momentary and maintained level positions.
- 2, 3, and 4 pole versions.
- Silver or gold contacts.
- UL and CSA listed basic switches.
- Solder or turret terminals.
- "SM" basic switches.



Type "22AT"

- Panel and lever seals.
- Momentary and maintained poisitions.
- Contain 8 SPDT silver contact "SM" basic switches.
- UL and CSA listed basic switches.
- Single lever operates 4 basic switches in each extreme position.

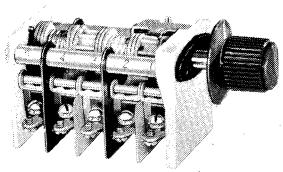


Type "AT" High Capacity

- 2, 4, 6, 8, or 10 switch control.
- High electrical capacity.
- Maintained and momentary positions.
- 3 hole mounting—rugged construction.
- "V3" basic switches.
- Two toggle lever lengths are offered.
- One of two banks of basic switches operated at each extreme position of the lever.

ROTARY SWITCHES

Rotary selector switches offer a means of switching as many as eight different circuits with one small, compact assembly. These switch assemblies are available with from one to eight switching units and from two to eight detent positions with a 45 degree angle between detents. The detent mechanism gives a positive "feel" of each position. Almost any desired switching sequence is possible.



Electrical Rating:
Up to 15 amps, 125 or 250 vac.
Up to 20 SPDT circuits.

TOGGLE SWITCHES

Manufactured and tested to meet military specifications — shock, vibration, corrosion, altitudes, etc. Provide excellent tactile feedback. One-hole mounting, with locking hardware—prevents switch rotation. Special circuitries include three-position multi-circuit ON-ON-ON operation. Solder, leadwire and screw terminals. Choice of bushing sizes. Varied toggle level configurations. Magnetic hole-in designs permit remote electrical release, with manual override option.

Electrical Rating (In Amperes):

Type "TL" and "TP"

30 Volts DC			125 VDC	250 VDC	115 Volts AC			220 VAC	Continuous
Ind.	Res.	Lamp	Res.	Res.	Ind.	Res.	Lamp	Res.	
15	25	7	0.75	0.5	10	15	3	6	40

Type "TW"

Electrical Rating: 5 amps res., 2 amps ind., 30 vdc and 115 vac.

Type "TS"

15 amps, 125-250 vac; ½ hp, 125 vac; 1 hp, 250 vac; 5 amps, 125 vac "L".

Type "TW"

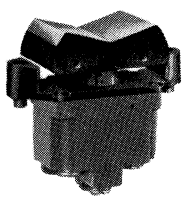
- Miniature size, lightweight.
- Two- and three-position.
- Momentary and maintained operation.
- 1- and 2-pole.
- Molded-in solder terminals.
- ¼" bushing.

Type "TL"

- Completely sealed.
- Standard and pull-to-unlock toggle levers.
- Two- and three-position.
- Momentary and maintained operation.
- 1-, and 2-, and 4-pole.
- Tested to MIL-S-3950.
- Step terminal design.
- Screw terminals.
- 15/32" bushing.

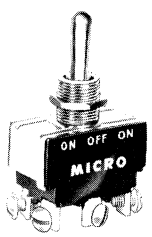
Type "TP"

- Rocker button actuator.
- Transparent and translucent, above panel and flush panel buttons (suitable for legending or edge lighting).
- Momentary and maintained operation.
- 1-, 2-, and 4-pole.
- Three hole mount.
- Screw terminals, step design.



Type "TS"

- Built to withstand military requirements of vibration and shock.
- Molded bushing seal.
- Keying washer and keyway prevent switch rotation.
- Optional panel seal.
- Solder, screw or quick-connect terminals.
- UL and CSA listed.



Type "ET" Magnetic Hold-in Switches

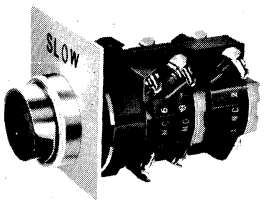
Built-in solenoid permits conversion from momentary to maintained contact and remote electrical release. "ET" switches offer several options in toggle configuration, circuitry, and terminal designs. Meet Military Specifications for explosion-proof and immersion-proof. Temperature range is −65°F to +158°F.
Toggle lever can be released manually.

Electrical Rating:
From 4 to 10 amps resis., and 2.5 to 7 amps, ind., 28 vdc.

MICRO SWITCH Freeport, Illinois

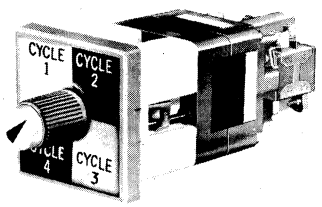
A Division of Honeywell

"PT" HEAVY DUTY OIL TIGHT PUSHBUTTON SWITCHES



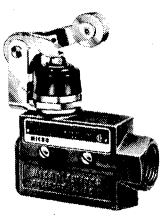
PT devices are used in a broad range of control applications where rapid operator identification of the control is necessary, oiltight construction is needed, and heavy duty (high inrush or reactive) loads are being driven. Choice of pushbuttons, lighted pushbuttons, indicators, selectors, selector-push, and potentiometers. May be ordered as components, units, or stations. Heavy duty and electronic duty contact blocks provide complete circuit flexibility. Contact blocks may be tandem mounted without mounting hardware.

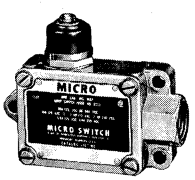
COORDINATED MANUAL CONTROL



Coordinated manual control. Line consists of 4 matching units, indicator, pushbutton, selector, and selector-push units. Distinctive and compatible panel appearance, legends on display field saves space on panel. Available with heavy duty or electronic duty contact blocks. Stacking of contact blocks increases circuitry.

ENCLOSED SWITCHES

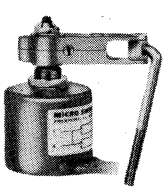




- Cast aluminum housing.
- Side or flange mount.
- Temperature Range −25°F to +160°F
- Sealed or unsealed actuators.
- Momentary contact.
- Captive cover screws.

Up to 20 amps, 125, 250 or 480 vac, 1 hp, 125 vac, ½ amp, 125 vdc.

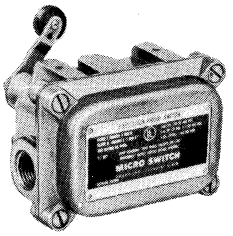
TYPE "EN" LIMIT SWITCHES

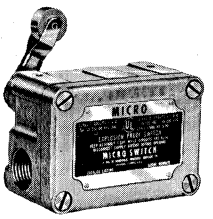


Type "EN" limit switches are the most versatile line of environment-proof switches available. Many combinations of actuators, circuitry, terminals and electrical ratings are offered to meet the demands of military/aerospace and commercial aircraft applications.

Electrical Ratings: 5 amps res. or ind., 115 vac. 5 amps res., 3 amps ind., 28 vdc.

EXPLOSION-PROOF SWITCHES

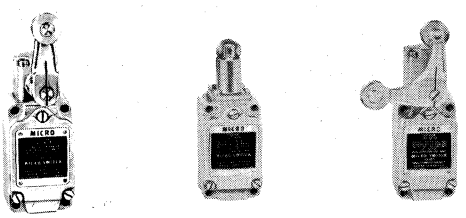




- Compact, rugged housing.
- Ample wiring space.
- Replaceable switching unit.
- Mounts from 4 sides.
- Roller arms adjustable through 360°
- Non-sparking rollers and plungers.
- These switches meet applicable portions of NEMA classifications 7 and 9.
- UL and CSA listed.

Electrical Rating: Up to 20 amps, 125, 250 or 480 vac.

"LS" LIMIT SWITCHES



- Sealed against oil, water and dust.
- Rugged cast aluminum housing.
- Temperature Range: Standard −20°F to +160°F. High temperature to +250°F.
- Interchangeable and replaceable parts.
- Easy wiring.
- Momentary or maintained contact.
- Wide variety of actuators.
- Surface or cavity mount.
- Variations include switches with: Low force and low pretravel. Lighted circuit-position indicator. Solvent resistant seals. Captive cover screws.
- Plug-in versions for quick, easy replacement.

Electrical Rating: 10 amps, 125, 250 or 480 vac.

PROXIMITY SYSTEMS

Proximity Switches are solid state electronic devices which, without physical contact, react to the presence of metal within their detection field. They generally consist of a sensor, an amplifier and a relay.

- Unaffected by vibration and shock.
- No moving parts to wear out.
- Versatility in mounting.
- Small size.
- Easy mounting.
- Centralized wiring and adjusting facilities.
- Immediate operation.
- No warm up.
- No moving parts.

MICRO SWITCH Freeport, Illinois

A Division of Honeywell

MERCURY SWITCHES

Mercury switch contacts are hermetically-sealed to resist effects of dust, dirt, oil, and corrosive fumes. They provide quiet, dependable, trouble-free operation. Contact arrangements may be SPST, SPDT, or 2-CKT.

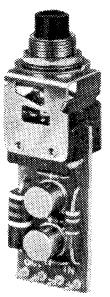
Mercury switches are position sensitive, so may be actuated by natural movements of machine parts.

Some operating temperature ranges are —35°F to +500°F, 14°F to 221°F, and —65° to 221°F.

Current carrying capacity is as high as 70 amperes, 30 vac in some versions and as low as 0.3 ampere, 230 vdc in others.

ELECTRONIC CIRCUIT PACKAGES

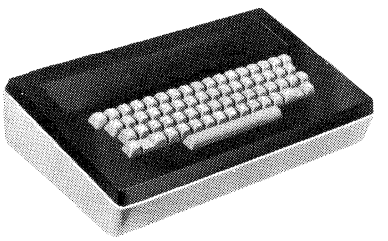
ED circuits provide shaped-wave and single-pulse output without contact bounce. There is a wide range of pulse widths and output voltages. These devices eliminate engineering time on components for electrical circuits. Pulse circuits are available as separate units or in switch circuit assemblies.



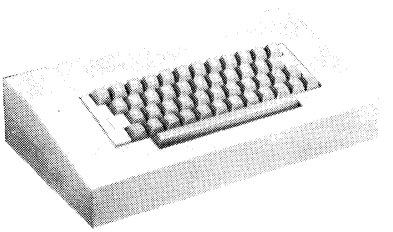
KEYBOARDS

MICRO SWITCH keyboards are completely wired and solid-state encoded keyboards. Pre-engineered options provide flexibility for factory modification of standard designs to meet custom requirements. There is a choice of keystyles and arrangements, legends, and number of keys. Any codes up to 8 bits may be provided. Interlock options prevent generating an erroneous code.

SOLID STATE KEYBOARD SWITCHING



REED SWITCH KEYBOARD SWITCHING



CATALOGS

Catalog 50—describes over 1000 types of small precision snap-action switches, enclosed switches, limit and proximity switches for commercial and industrial use.

Catalog 51—presents a complete line of manually-operated switches including lighted and unlighted pushbutton switches, toggle switches, and rotary switches.

Catalog 52—details a complete line of small precision switches for military, aerospace and mobile equipment. Included are hermetically sealed and environment-proof types.

Catalog 69—Panel controls for pilot duty or electronic and commercial use. Oil-tight indicators, pushbuttons, selectors and selector-push assemblies feature multi-function switching capabilities and up to four lighted legends.

Catalog 71—"PT" Series offer multi-circuit blocks for heavy-duty or electronic use; new square plates for maximum legend area; choice of operating options including push, push-pull, selector and selector-push.

Bulletin ED—presents a selection of electronic pulse circuits which provide a wide range of shaped-wave, single-pulse outputs without switch contact bounce.

MICRO SWITCH OFFERS:

1. The world's largest selection, and local availability—meaning we can provide the practical answer to your design requirements right off-the-shelf.

2. The world's largest research and development facilities devoted exclusively to switch design—meaning the answer you need may be on file waiting for a problem like yours to come along.

3. The world's largest group of trained field engineers specializing in precision switching—meaning we can add a switch specialist to your design team for the asking.

These benefits can be helpful to you in finding the right combination of switch design, quality and cost.

Call a Branch Office or Authorized Distributor (see Yellow Pages, "Switches, Electric"). Or, write for catalogs.

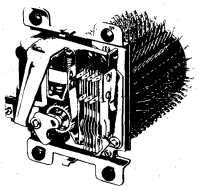
ROTARY STEPPING SWITCHES



SPECIFICATIONS

Ambient Temperature Range
−55° to +85°C.
Insulation Resistance
In excess of 1000 megohms at 500 V.D.C.
Dielectric Strength
Measured for one minute at sea level between conducting parts and grounded frame break down voltage is in excess of 750 volts R.M.S.
Contact Resistance
Measured between terminals with a short circuit current of 1 amp and open circuit voltage of 6 volts is less than 50 milliohms.
Contact Rating
standard—silver plated bank contacts with nickel silver wipers, rated one amp at rest; .05 amp non-inductive load when stepping; .05 inductive load with adequate spark suppression.
optional—gold plated bank contacts and wipers which should be specified for low level switching. *Off*—normal contacts—bifurcated springs with gold alloy contacts rated at .4 amp non-inductive. *interrupter contacts*—(Form B only) tungsten contacts rated at 2.5 amps non-inductive.
Finish
On all metal parts where practical, zinc plate, chromate treated to MIL-F-14072, is used to ensure maximum resistance to corrosion.

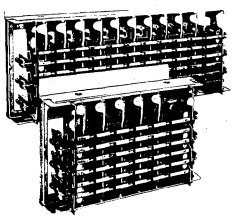
CROSSBAR SWITCHES



North Electric Crossbar switches are the most economical means of providing maximum switching capacity (inputs to outputs) with telephone type reliability.

Standard 1200 point crossbar switch designed on matrix coordinate principle. 10 x 12 configuration with 10 contacts per crosspoint.

The compact crossbar unit provides a capacity of up to 600 switching points for many varied switching combinations. It has 5 x 12 coordinates with up to 10 contacts per crosspoint.

Both crossbar sizes can be obtained with 10 Form A, 9 Form B, or 5 Form C contacts.

Features include multi-path selection, double-wound hold coils, ball bearing pivot pins, no sliding actuators, and minimum maintenance. There are virtually no moving parts or mechanical wear.

SPECIFICATIONS

Size
1200 point crossbar
length 23 inches
weight 29 lbs.
600 point crossbar
length 14.3 inches; width 5.4 inches, height 8.7 inches
weight 18 lbs.
See additional specifications on page 3.
Contact Rating
Bank contacts are bifurcated silver, or gold which with adequate spark protection, are rated at 100 MA at 48 VDC or 110 VAC. They provide a life in excess of 50 x 10^6 operations. Off normal contacts are bifurcated silver, rated at 0.4 amperes at 48 VDC or 110 VAC with proper contact protection.
Contact Resistance
Less than 50 milliohms for silver or gold contacts.
Terminals
Can accommodate 2 No. 20 A.W.G. or 4 No. 24 A.W.G. on spring sets and 4 No. 24 A.W.G. on off-normal. Terminals will also accept AMP Faston No. 110 connector or equivalent.
Timing
Typical operate and release times.
operate of select bar —15 MS
delay required
for damping —15 MS
operate of hold bar —15 MS
total operate time is —45 MS
release time of
select bar is — 8 MS
delay time required before operation of new cycle is 30 MS, therefore, a complete typical cycle time is approximately 83 MS.
Insulation Resistance
Greater than 10^5 megohms at 500 VDC conductor to frame and between conductors with a 35% relative humidity at 25° C.
Ambient Temperature Range
−55° C to +85° C.
Dielectric Strength
Form A contacts 1200 V RMS conductor to frame and between conductors.
Form B and C contacts 1000 V RMS conductor to frame and between conductors.
Coil Data
Select and hold magnet coils are available for operation on 24, 48, and 100 volts D.C. Hold magnets require approximately 12 watts to operate and 1.5 watts per coil to hold.
Mounting
3 screws up to ¼" diameter are required, it is also recommended that spacing washers p/n 001070 are used to minimize vibration.
Enclosure
Dust cover provided over entire front of all switches which incorporates a transparent flame retardant observation panel.

PRECISION SWITCHES

For more than a third of a century, we have been designing and manufacturing reliable relays. This engineering and production know-how is now being devoted to our new line of precision switches. These quality snap-action switches are designed to meet or exceed industry standards for electrical ratings and life characteristics. Operating forces, actuating characteristics and mounting dimensions makes these switches directly interchangeable with many competitive types. P&B precision switches meet Underwriters' Laboratories and Canadian Standards Association requirements.

PRECISION GENERAL PURPOSE SWITCHES — TYPES A1 G

Meet Underwriters' Laboratories and Canadian Standards Association Requirements

For Types A1 G1 — Contact arrangement: SPDT. Ratings: 15 amps, 125, 250, or 480 volts AC; ½ amp 125 volts DC; ¼ amp 250 volts DC; ⅛ HP 125 volts AC; ¼ HP 250 volts AC.

For Types A1 G2 — Contact arrangement: SPDT. Ratings: 20 amps, 125, 250, or 480 volts AC; 1 HP 125 volts AC; 2 HP 250 volts AC; 10 amps 125 volts when controlling tungsten filament lamp loads on AC circuits.

PRECISION MINIATURE SWITCHES TYPES A1 M

For Types A1 M1 — Contact arrangements: SPDT. Ratings: 30 volts DC; inductive: 10 amps at sea level, 6 amps at 50,000 feet; resistive: 10 amps; motor load: 6 amps.

Meet Underwriters' Laboratories requirements for 15 amps, 125, or 250 volts AC; ⅓ HP 125/250 volts AC; ½ amp 125 volts DC; ¼ amp 250 volts DC.

For Types A1 M2 (low operating force) — Contact arrangements: SPDT. Rating: 30 volts DC; inductive: 5 amps at sea level, 5 amps at 50,000 feet; resistive: 5 amps; motor load: 5 amps.

Meet Underwriters' Laboratories requirements for 10 amps, 125 or 250 volts AC; ½ amp 125 volts DC; ¼ amp 250 volts DC; ⅓ HP 125 volts AC.

For Type A1 M4 (low differential) — Contact arrangement: SPDT. Ratings: 30 volts DC; inductive: 1 amp at sea level, 1 amp at 50,000 feet; resistive: 2 amps; motor load: 1 amp.

Meet Underwriters' Laboratories requirements for 10 amps, 125 or 250 volts AC.

For Type A1 M5 (gold contacts)—Contact arrangement: SPDT. Rating: 28 volts DC; inductive: ½ amp; resistive: 1 amp; inrush: 2 amps.

PRECISION SUBMINIATURE SWITCHES TYPES A1 S

For Types A1 S1 — Contact arrangement: SPDT.

Rating:

Meet Underwriters' Laboratories requirements for 5 amps, 125 or 250 volts AC. The 30 volt DC rating is as follows: inductive: 3 amps at sea level and 2.5 amps at 50,000 feet; resistive: 5 amps at sea level and 50,000 feet; maximum inrush: 24 amps.

For Types A1 S5 (gold contacts) — Contact arrangement: SPDT. Rating: 28 volts DC; inductive: ½ amp; resistive: 1 amp; inrush: 2 amps.

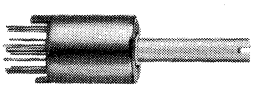
Immediate action... Oak distributors' shelves stock the broadest line available

Hundreds of rotary, pushbutton and lever switches!

All switches have Oak-pioneered, double-wiping contacts—self-cleaning, longer lasting; brass, silver-plated with additional gold plating. Various insulations available—phenolic silicone-glass fiber, steatite, Kel-F, diallyl phthalate. Electrical rating: break 1 amp. at 28 vdc, or 0.5 amp. at 110 vac, resistive; carry 5 amps. Unique Oakote packaging assures long shelf life by protecting against tarnish and corrosion.

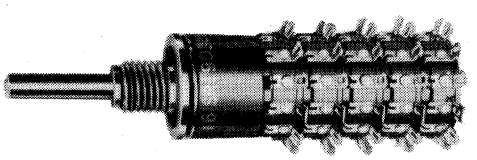


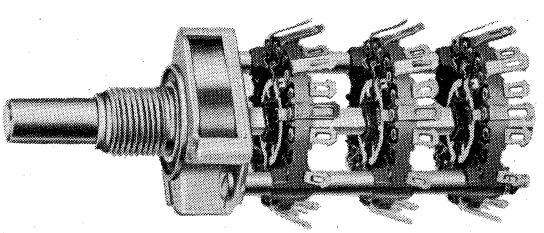
SMALL, BUT MIGHTY... ONLY .300" DIAM.

Small as it is, this rugged 10-position switch still performs at 23,000 G's, with vibrations conforming to MIL-S-3786. What's more, it's specially designed for freestanding mounting on printed circuit boards. Withstands military salt spray requirements as well as −65° to +85°C. environments.

SLIGHTLY BIGGER... BUT ONLY ½" DIAM.

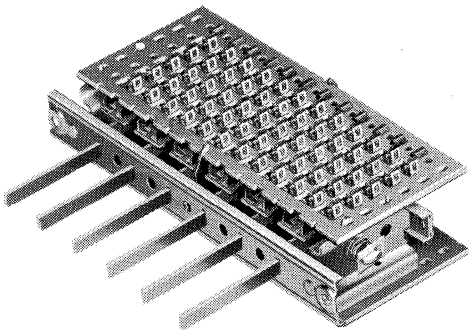
These compact rotary switches provide superior insulation and dimensional stability—even under severe environments, where small size is essential. Oak-pioneered double-wiping contacts are silver alloy (gold-plated to prevent tarnish) assure negligible contact noise and circuit resistance through rated life. Materials and finishes withstand 50-hour salt spray test.





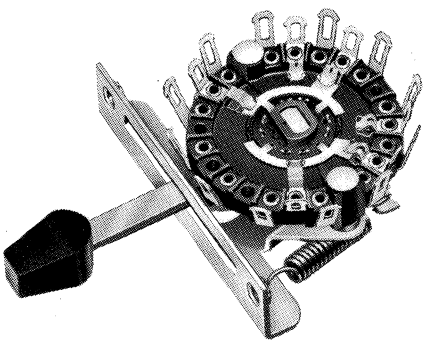
STILL BIGGER ROTARIES...

a wide variety of choices in 1" to 2 5/16" diam. sizes, 1-6 sections, 2-23 positions, 1-18 poles, 2 3/8" shafts grooved for break-off. They're also shorting and non-shorting, ball-type indexed, with one fixed and one adjustable stop per switch, and standard 50-hour salt spray (or special 200-hour) finishes.



PUSHBUTTONS GALORE...

...configurations of 2-12 buttons, 8-48 poles, positive latching, shorting and non-shorting, depress to engage or release. Type 130 adaptable to lighting—with DeLuxe Pushbuttons.



LEVER SWITCHES ALSO...

...2-6 poles, 2 or 3 position, shorting or non-shorting, positive indexing. Economy Type 189 and Type 184 with molded stators for miniaturized circuitry.

Moduline Switches...

Fast, in over 2 million variations

The Moduline™ system eliminates time-consuming designing for you. You simply order by the numbers, and parts are assembled from hundreds on file. It's a convenience type of switch—halfway between the Distributor line and Custom OEM—only much faster... in quantities of 1-99.

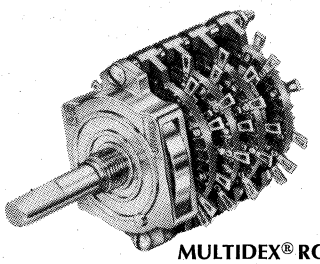
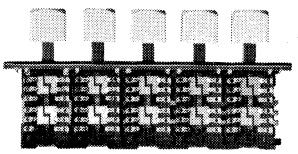
Oak Engineered custom OEM Switches

Oak offers you the broadest line of custom OEM switches available... engineered to give you the best switch that can be assembled to meet your design problems. Here are the customized variables—tailored to your needs: Insulations include phenolic, silicone-glass, ceramic, Mycalex, Kel-F and diallyl phthalate. Temperature ranges from Standard Commercial (−25° to +85°C.) to Military (−65° to +85° C.). Contacts are Oak-pioneered double-wiping to provide self-cleaning, long life. Five choices fit each application best, shorting and non-shorting, rated from 10,000 to 200,000 cycles. Finishes are Standard Commercial, 50- or 200-hour salt spray. Electrically, these switches break 1 amp. @ 28 vdc or 0.5 amp. @ 110 vac.



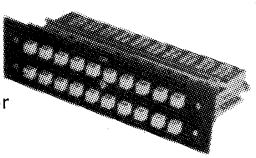
MULTIDEX® ROTARIES

...these universal rotary switches will put a lot of the older and bigger ones out of business. They're smaller, more economical and still offer all of the features and options of expensive custom-made OEM switches. What's more, they cut engineering design expenses.



PUSHBUTTONS GALORE

...single or multiple buttons and/or rows, lighted or unlighted, 1-12 buttons per row, latching or non-latching.

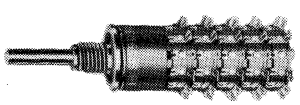


MOLDED PB'S

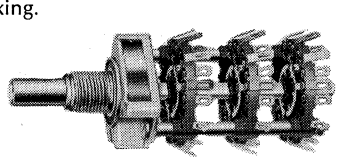
...designed especially for computers with fast response, short stroke, light touch. High reliability, optional actions, individual lighting options, pre-wired assemblies.

OAK'S TINY .300" diam. switch... this microminiature performs like a giant, at 23,000 G's with vibration conforming to MIL-S-3786.

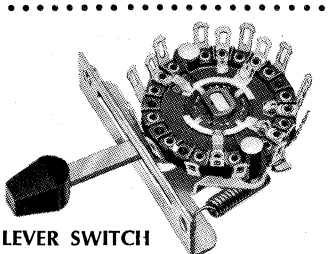
SUBMINIATURE ½" switch... also provides superior insulation and dimensional stability —even under severe environments, where small size is essential.



AND THE 1" ACORN SWITCH... an engineered combination of molded diallyl phthalate stators and Oak's exclusive Unidex™ indexing.

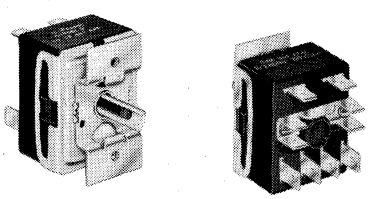


IF YOU NEED BIG ROTARIES... Custom switches up to 2 17/32" diam. are yours in variations from 3 positions 120° throw to 28 positions 12.85° throw. Five types of shafts with 57°-90° terminal bends.



NEW LEVER SWITCH

Oak's #184 lever switch gives you versatile miniaturization, with molded diallyl phthalate stator for improved dielectric properties and more clips. Many options available.



HEAVY-DUTY SWITCHES

...for appliances, vending machines, motors, heaters, etc. Three-wire or two, up to 35 amps., 240 volts and 250°F. Many positions, SP or DP.

Oak Rotary Solenoid Selectors

compact, rugged, reliable for remote actuation

Oak Solenoids are compact and lightweight as compared to the high actuating torques and flexibility they provide for remote switching. Virtually solid metal, their low residual flux means fast response and most efficient conversion of electrical to mechanical energy. Armature is supported by three ball bearings in inclined races to provide stable mechanical balance. Thus axial thrust from the energized solenoid coil is converted into rotary thrust with negligible friction.

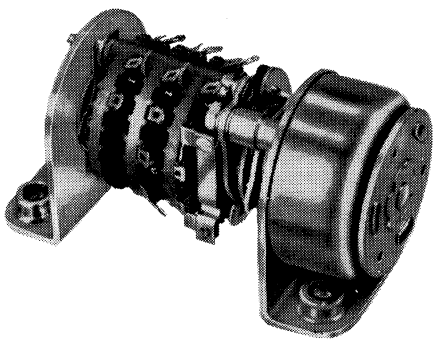
Typical uses: master-slave circuits, sequential timing circuits, counting applications.

Our engineers will help you design them into missiles, satellites, machine tools, scoreboards, computers, communications equipment and many other applications. Hermetically-sealed assemblies made to order for service in extremely adverse environments.

SUB-ASSEMBLY SERVICE...
time-saving, money-saving

Ease the load on your production facilities by letting Oak fabricate your rotary solenoid and switch subassemblies. These can be completely mounted and/or prewired. Components or leads can be added, plugs and sockets incorporated... all to your specs. These package units simplify assembly and maintenance. Let Oak engineers smooth out your production operations and save you time and money at the same time.

WIDE SELECTION AVAILABLE



Subminiature . . . for use where space and weight of components are of prime importance such as aerospace use. Small, but rugged and dependable at only 3.8 oz. weight. (as shown)

TO

Extra heavy-duty motor...produces high torque capable of driving standard switch sections, plus other external loads. Available in foot or flange mounting.

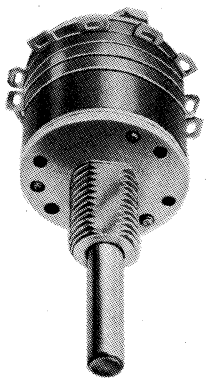
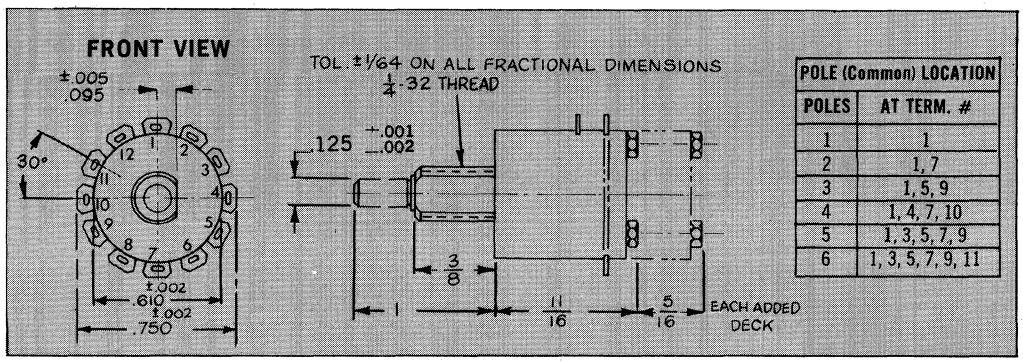
RCL *miniature rotary switches*

SERIES "C"

- Up to 12 active positions per deck shorting or non-shorting, with 30° spacing.
- Shorting **AND** non-shorting poles may be grouped on one deck in any combination.
- As many as 6 poles per deck.
- All individual deck parts are self-contained, and are permanently molded into place.
- Available with adjustable stops.





POLE (Common) LOCATION	
POLES	AT TERM. #

"OFF-THE-SHELF DELIVERY"

U.S. Pat. #3352979

ELECTRICAL FEATURES

1. Initial contact resistance — .010 max.
2. Current carrying capacity — 5.5 amps.
3. Current breaking capacities
   ¼ amp — 115 V.A.C. resistive
   ¼ amp — 28 V.D.C. resistive
   ⅛ amp — 28 V.D.C. inductive.
4. Dielectric strength (voltage breakdown) —
   a. between any two adjacent positions — 800 v RMs (60 cycles).
   b. between any active position to ground 1500 V (60 cycles).
5. Insulation resistance (measured at 25°C, 50% RH at sea level) — 10^5 megohms.
6. Thermal EMF — 1 microvolt/°C maximum.
7. Capacitance — between adjacent active contacts .5 MMFD Max.

MECHANICAL FEATURES

1. Life expectancy — 200,000 mechanical operations.
2. Detent — positive stainless steel roller-type detent snaps from position to position. Detent housing made of special high-strength plastic, providing positive action and minimal wear.
3. Stop strength — Designed to withstand 10 inch-lbs. rotational force.
4. "Molded in" terminals give exceptional terminal strength.
5. Terminal locations clearly marked on rear cover plate.
6. "Wrap-around" turret-type solder lugs are integral with individual contacts.
7. On any one deck of a multi-pole switch, a variety of combinations of shorting (MBB) and non-shorting (BBM) actions may be obtained.
8. Materials and finishes:
   Rotor — Lexan
   Rotor blade — Beryllium copper (gold plated)
   Contacts & solder terminals — solid silver alloy
   Housing — Diallyl Phthalate
   Stator — Diallyl Phthalate
   Shaft — stainless steel
   All brass parts nickel plated
9. One piece contact terminal construction has holes large enough to accept two #22 AWG wires.
10. Shaft and panel seal may be specified by using prefix "S" before switch type numbers.

MULTI-DECK SWITCHES UP TO 9 DECKS AVAILABLE

For multi-deck version of these switches, indicate number of decks as follows. Merely change first number of coding as shown:

Number of decks	
One deck	1 1-CB-4
Two decks	2 1-CB-4
Three decks	3 1-CB-4

*"M" = Shorting action (MBB)
"B" = Non-shorting action (BBM)
* Supplied unless otherwise specified.

Code: 2 6—CM—2

- 2 — number of decks
- 6 — poles per deck
- CM — Series
- CB — non-shorting
- CM — shorting
- 2 — Positions per pole

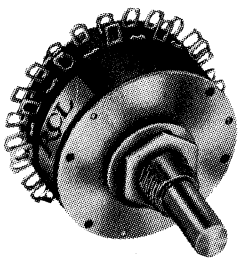
e.g. this is 2 decks, 6 poles per deck, Series "C" shorting action, 2 positions per pole.

RCL ELECTRONICS, INC.
General Sales Office:
700 South 21st Street, Irvington, N. J. (Area Code 201) 374-3311 • TWX 710-999-5511

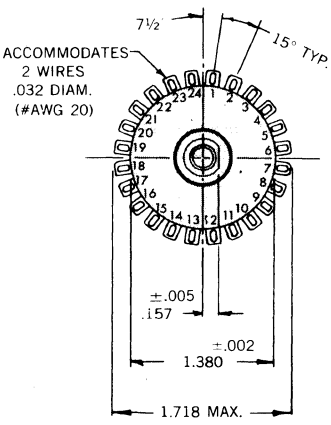
RCL *miniature rotary switches*

SERIES "E" 1⅜" BODY DIAMETER

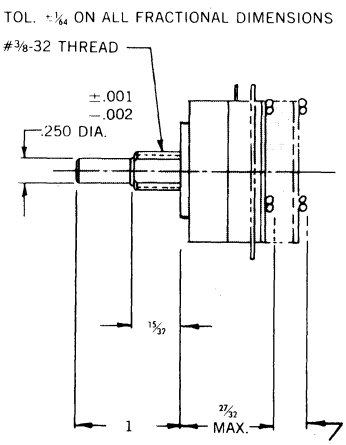
- Competeitively priced with many open deck wafer switches
- Exceeds the exacting specifications of most "instrument type" switches
- Up to 24 active positions per deck, **shorting or non-shorting,** and up to 12 poles per deck
- Meets all applicable requirements of Mil S-3786-B
- Available with concentric shaft
- Available with adjustable stops



Poles	Pole (Common) Location At Term. #
1	1
2	1, 13
3	1, 9, 17
4	1, 7, 13, 19
5	1, 5, 9, 13, 17
6	1, 5, 9, 13, 17, 21
7	1, 3, 5, 7, 9, 11
8	1, 3, 5, 7, 9, 11, 13
9	1, 3, 5, 7, 9, 11, 13, 15
10	1, 3, 5, 7, 9, 11, 13, 15, 17
11	1, 3, 5, 7, 9, 11, 13, 15, 17, 19
12	1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21



FRONT VIEW



5/16 EACH ADDED DECK

ELECTRICAL FEATURES

- Contact resistance: .010 max. initial
- Current carrying capacity: 10 amps
- Current breaking capacity (rated load at 125°C):
  2 amps — 115 VAC Resistive
  1 amp — 28 VDC Resistive
  5 amps — 28 VDC Inductive

MECHANICAL FEATURES

- Life expectancy: 200,000 mechanical operations.
- Rotational Torque: 20 to 80 ounce-inches depending on number of poles per deck and number of decks.
- Stop Strength: 15 pound-inches.
- Solder terminals will accept two .032 diam. (AWG #20) wires.
- "Molded-in" terminals result in exceptionally high contact stability, completely eliminating movement.
- Shaft and Panel Seals may be specified by using Prefix "S" before Switch Type Numbers.
- Explosion Proof per paragraph 4.8.12 of Mil-S-3786B.
- Weight: 1 Deck Switch 1.75 oz. For each additional deck add .500 oz.

APPLIANCE SWITCHES

HIGH SNAP SWITCHES

FEATURES:

- Meets with JIS-C-6571, MIL & JAN standards
- High performance
- Long life
- Unique construction—6 patents

APPLICATIONS:

- High load (especially motor load, 550W 250V) machine tools, industrial machinery, electric tools, projectors, etc.
- High reliability & performance communication equipment, measuring equipment & instruments, medical equipment, electrical equipment for vehicles, ships, and aircraft, computers, office machines, etc.
- Electrical home appliances, optical instruments, lighting, disposal, air-conditioning, acoustical equipment, musical instruments, etc.
- Signal controls, broadcasting equipment, X-ray devices, telephones, radios, etc.

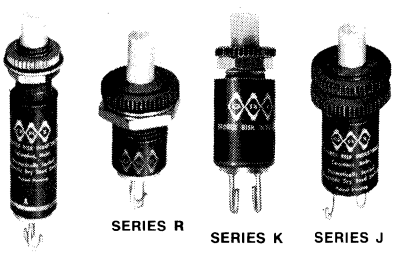
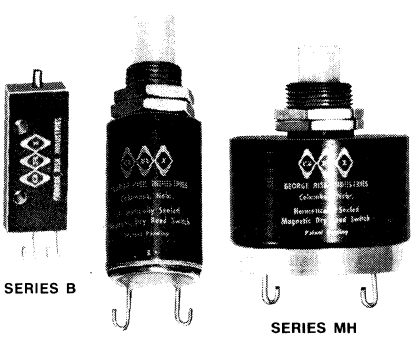
Dry Reed Type PUSH BUTTON SWITCHES

FEATURES

- ☐ Hermetically sealed contacts
- ☐ Low closed contact resistance
- ☐ Ideal for dry circuits or higher current application
- ☐ Exceeds Mil Specs.
- ☐ Momentary action
- ☐ Life expectancy in the millions
- ☐ Explosion proof
- ☐ Low bounce characteristics
- ☐ Terminals weldable and solderable





LENGTH OF ALL TERMINALS .300" MAX.

***NOTE:** Series R, K, J, available with 15 oz. operating force only. All other Manufacturing Types listed are for 8 oz. Button operating force of 17 grams can be supplied, if needed. To specify, change letter "H" in "Mfg. Type" to "F". (Example: TI-**H**A4 to TI-**F**A4.)

BUTTONS & ACCESSORIES

Information on a complete range of button accessories (Delrin and Aluminum) can be obtained by contacting the factory. Colors available for standard buttons and accessories include: white, red, black, green, blue. Illuminated buttons also available.

NO-BOUNCE SWITCHES

GRI now offers mercury-wetted reed switches (momentary). Contact Bounce — none. Maximum contact resistance 50 milliohms after 10 million operations at full load. Mounting Position — 30° out of plane (horizontal or vertical). Write for full information.

GEORGE RISK INDUSTRIES

SERIES 500 KEYBOARDS

The standard G.R.I. Model 573 alpha-numerical keyboard shown is housed in a modern-styled case with hand rubbed walnut ends.

There is a total of 73 keys arranged in a combination of the standard diagonal and in-line format. The 45 alpha-numeric and graphic symbol keys are in the standard diagonal arrangement. The other 28 keys which comprise the space bar, 2 shift keys, shift lock, carriage return, back space and 22 other functions are arranged in line.

The diode matrix board generates a 7 bit US ASCII code + parity and strobe.

An electronic interlock circuit prevents generation of an invalid code if 2 or more keys are depressed at the same time.

All code, strobe and function lines terminate through a 24" cable connected to an Amphenol connector #57-30360. The connector also receives the external voltages for the electronics.

Depressing and holding down either of the shift keys puts the 45 alpha-numeric and graphic symbol keys in upper case. The shift lock key holds these keys electronically in the upper case when depressed. Momentarily depressing the shift keys releases the shift lock.

HIGH RELIABILITY to meet your most exacting standards. Solid state encoding and dry reed switching assures long, trouble-free, dependable performance.

FLEXIBILITY—Unique design makes for easy modification to meet your needs.

ECONOMY—Most custom designs can be achieved at low prices because of the universal format design.

QUALITY ASSURANCE—Whether you buy any one of the 3 standard models or a complete new design, you can be assured your system's exact requirements will be met.

COMPLETE KEYBOARDS—Whether you choose any of the 3 standard models or a special keyboard to your own specifications, you can minimize your assembly and installation costs.

SOLID STATE ENCODING—Maximum uptime is assured through the use of proven trouble-free solid state encoding.

OFF-THE-SHELF—Any one of the 3 standard models are readily available for your prototype evaluation, eliminating time-consuming and expensive development costs.

OPTIONS—The Series 500 Keyboards have been carefully planned to offer you custom designs with a minimum of expense and a short lead time.

SPECIFICATIONS SERIES 500 KEYBOARDS

KEYBOARD

Number of alpha-numeric keys: 10 to 73
- Standard Model 573—73 keys
- Standard Model 556—56 keys
- Standard Model 547—47 keys

Data Lines: 7 lines ASCII + parity + strobe
Total 8 lines plus strobe

Electronic Interlock: On all coded keys. Strobe is inhibited if two keys are depressed at same time.

Keys: Magnetically operated dry reed

Shift and Shift Lock: Electronic

Keybutton Force Level: 2½ ± ½ oz.

Key Stroke: 3/16"

Key Bounce Characteristics: Less than ½ millisecond

Key Top Colors: Grey, dark blue. Other colors on special order.

Key Top Marking: Up to 15 characters (in three rows of 5 characters) engraved and paint filled.

Key Format: Diagonal and in-line combination.

ELECTRICAL

Input Power: 115 V. 60 Hz, 40 watts max.

Output: Into Amphenol connector #57-30360
- 7 parallel code lines plus parity
- Common key line + 5 V DC
- Strobe — 5 V
- Groundline
- +22 V DC
- Separate common to L.H. 5 function keys
- Separate common to bottom 6 function keys
- Separate common to R.H. 10 function keys
- Total of 21 coded function lines

Logic Output: • Logic 1 = +5 V • Logic 0 = 0 V

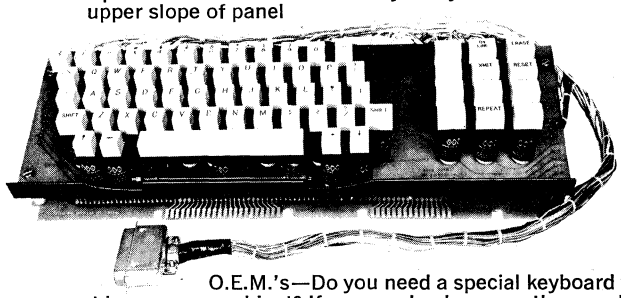
DIMENSIONS

15⅞" wide x 11½" deep x 4⅜" high

APPROXIMATE WEIGHT

Operating 12 lbs. Shipping 17 lbs.

OPTIONS
- Illumination on any key
- Any specified key arrangement from 10 to 73
- BCD or IBM code or any special code to customer specifications
- Internal power supply may be eliminated and customer can supply own power through wires provided for in connector
- May be supplied without diode matrix or electronic lockout
- May be supplied without case
- Up to 10 additional function keys may be mounted on upper slope of panel



O.E.M.'s—Do you need a special keyboard to mount in your own cabinet? If you need only one or thousands, we will customize them for you at low cost. Fast service, too!

OMRON *Precision Snap-Action Switches*

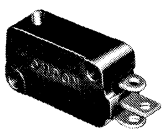
SIGMA

Z-15G

General Purpose Basic Switch for use in a wide variety of applications. Compact, lightweight and accurate. Many actuators available.

S-5G

Subminiature Basic Switch for small instruments and appliances. Long life and sealed types available.



VV-15-1A

Miniature Basic Switch. Identical to "V" type, except will make and break 15 Amps AC. Can be supplied for low-force and low capacity operation.

WL-10FCA32-TS

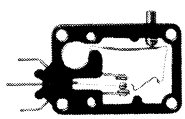
Two Circuit Double Break Limit Switch. Available in standard or plug-in, and flanged or flush mounting models. Die-cast case for drip-, dust-, and oil-proof operation.

Z-15GS55

Sealed Basic Switch for operation in adverse environment of dust and/or moisture. Covered plunger assembly and adhesive bonded case.

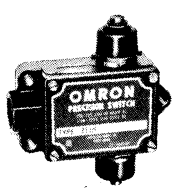
J-5

Sub-subminiature Basic Switch. 100,000 minimum mechanical operations. For use as an operating and controlling switch of electronic circuits and where mounting space is limited.



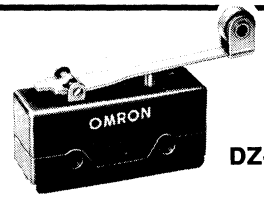
VF-5-1A

Low-force Flare Basic Switch. Extremely thin, compact switch to make and break 5 Amps, AC. Where space is limited, these switches can be readily ganged.



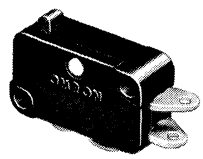
ZF-15ENRN-RS

Precision Switch. Basic Switch enclosed in rugged case for increased mechanical strength. This enclosed switch can be replaced without removing the case assembly from its mounting.



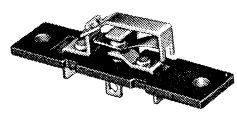
DZ-10GV2

DPDT Basic Switch. Suitable for controlling two independent circuits or two circuits of different voltage. Will make and break 10 Amps AC.



V-15-1B

Miniature Basic Switch for industrial and consumer appliance use. Available in heatproof, long life and low force operation types. Will make and break 10 Amps AC.



VN-10

Skeleton Switch. Light and inexpensive switch suitable for consumer appliances. Its snap action mechanism will make or break 5 Amps AC.

C-5

Low Torque Basic Switch. A compact switch requiring less than 4 gram-inches to make or break 5 Amps AC. Many actuators available.

ACTUATORS:

Made of high quality, stainless steel for direct push, rotary cam and linear action operation. Auxiliary actuators available to satisfy any specifications regarding switch direction, place of installation, position and operating force.

FEATURES:

U. L. Listed — Approved by Underwriters' Laboratories, Inc. (File E-32667).

Economical — Low initial cost and long service life.

Compatible — Can be used interchangeably with leading competitive types.

Rugged Construction — Highly resistant to abuse, eliminating the expense of frequent replacement.

The Sigma line of Omron precision, snap-action switches are the most economical and reliable switches available for automatic and semi-automatic controls. They are constructed to meet or exceed all existing industrial standards and military specifications for electrical capacity and service life. A wide selection of actuators, contact gap, terminal specifications and mounting configurations make these switches directly interchangeable with the leading competitive types. For further information concerning Omron snap-action switches, contact your nearest Sigma representative.

Sigma also markets a wide range of relays (see section 4500) and a complete line of instruments and controls (see section 2900).

STACKPOLE ROTARY SWITCHES

SPECIALLY DESIGNED TO GUARD AGAINST EXPOSURE— CONTACT CONTAMINATION—PRODUCTION DAMAGE

-FEATURES-

COMPLETELY ENCLOSED — Both index mechanism and electrical sections are completely enclosed, providing an environment proof assembly.

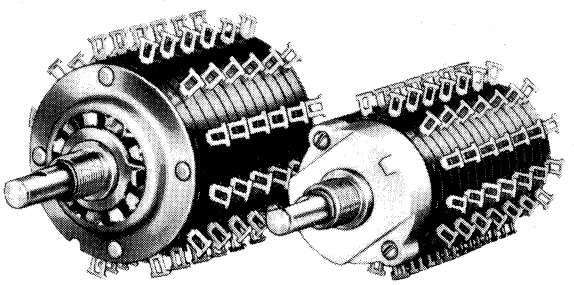
EXPOSURE AND CONTAMINATION PROOF — Corrosive atmospheres, dust, dirt and moisture are permanently sealed out, while lubricants are sealed in.

PRODUCTION DAMAGE ELIMINATED — Solder and flux cannot get into vital switch parts. Rugged integral terminals and contacts are permanently molded in position and will not loosen or move even under extreme soldering heat. Accidental production damage is eliminated.

FIELD PERFORMANCE ASSURED — Switch assemblies are torsionally rigid and rugged to withstand rough usage. Field tampering is abolished.

UNIQUE MODE OF SWITCHING — Reliable and long life switching, with low and consistent contact resistance, is assured under extremes of shock and vibration by a self-centering, spring loaded, silver alloy wiper. Complex switching arrangements, with intermixed shorting and non-shorting functions, are attainable not only on single sections, but also between sections. Standard index angles include 15°, 30°, 36°, 60° and 90°. Special angles available on request.

VERSATILITY — Enclosure maintaining spacers may be incorporated between sections to facilitate hardware mounting and special space requirements. Additional standard variations include electrostatic shields, dual concentric switches with attached line switches or potentiometers, gasket sealed construction, coded output and hi-voltage applications.



Series 600 1⅝" Dia. and Series 100 1⅛" Dia.
Environment Proof Rotary Switches

EXPLOSION PROOF — Standard enclosed construction is inherently explosion proof in accordance with Mil-S-3786B, paragraph 4.8.12.

VIBRATION — Conforms to low frequency vibration test Mil-S-3786B, paragraph 4.8.4.

SHOCK — Conforms to shock test type M, Mil-S-3786B, paragraph 4.8.5.1.

standard grigsby co.

*"Wedgelock" is the exclusive patented construction of Standard Grigsby Switches. All electrical contacts are fastened to the insulating stators or wafers by means of the "T" slug. This forced fit prevents any loosening of the contacts as often happens in conventional rivet construction when solder heat is applied. The unique shape of the "T" slug design also eliminates rotation and twisting of contacts thus assuring maintenance of accurate timing throughout switch life.

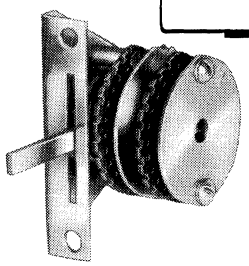
3010

Standard Grigsby has the linear action answer to your switching needs. A complete range of push button switches designed to meet a variety of performance requirements, from single button switches to multi-button modular assemblies.

Type	Poles Per Button	Button Spacing	Terminal Type	Contact Type	Insulation	Life Expectancy To	Electrical Rating	Mechanical Action
G Series 1 to 20 Buttons	2 to 12	15mm .590") 18mm (.708") 20mm (.787")	Printed Circuit or Solder Lug	High Reliability Double Wiping	Best Grade Phenolic	500,000 Cycles	5 Amp @ 125 VAC	Spring-return, push-push and inter-locking action in various combinations, with or without block-out.
PBPC 400 1 to 10 Buttons	2, 4, 6 or 8 Poles, Double Throw, Per Button	10mm 12.5mm 15mm 17.5mm 20mm	Printed Circuit	Single Wiping	Glass Filled Alkyd Stator	25,000 Cycles Minimum	4 Amp @ 125 VAC	Spring-return, push-push and inter-locking action.
3010 and 3M	Switching From 1 Pole, On-Off to 4 Pole, 2 Position	Designed Primarily for Single Button Applications	Printed Circuit or Solder Lug	Single Wiping	Best Grade Phenolic	25,000 Cycles Minimum	1 Amp @ 125 VAC	Normally spring-return action; push-push optional.

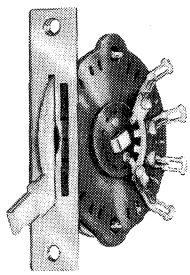
standard grigsby co.

Lever Switches



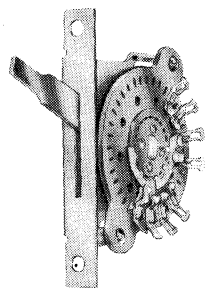
TYPE SMLR

- 1¼" Mounting Centers
- Insulation — phenolic or epoxy glass
- 2 to 4 positions With 30° throw (Max. 3 pos.) or 22½° throw (Max. 4 pos.)
- Spring return available from either side to a center position. Electrostatic shields are available
- A.C. Line Switch available in 30° throw
- Electrical Rating (Resistive) .150 MA. at 125 Volts; Maximum voltage—125 Volts; Maximum Current —2.5 Amps @ 6 V RMS



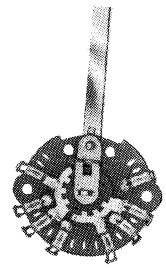
TYPE 6MLR

- 1⅝" Mtg. Centers
- Insulation—phenolic
- 3 positions
- 30° throw
- Electrical Rating (Resistive) .5 Amps at 125 Volts; Maximum Voltage—450 Volts; Maximum Current —3.5 Amps @ 6 V RMS



TYPE 6050LR

- 2³⁄₃₂" Mounting Centers
- Insulation—phenolic or epoxy glass
- 5 positions
- 20° Throw
- Electrical Rating (Resistive) .5 Amps @ 125 Volts; Maximum Voltage—450 Volts; Maximum Current —3.5 Amps @ 6 V RMS



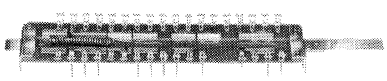
TYPE 612LR

- Economical lever switch where detent is incorporated as part of a single wafer
- Available with or without mounting bracket
- Insulation—phenolic
- Available in 25.7 or 30° throw
- Electrical Rating (Resistive) .5 Amps at 125 Volts; Maximum Voltage—450 Volts; Maximum Current —3.5 Amps at 6 V RMS

Slide Switches

TYPE 150SL

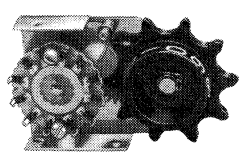
- 2 position with 2 to 12 poles
- Available with 9 to 21 contacts
- Insulation—phenolic
- Solder lug or printed circuit terminals
- Double throw—manual or spring return
- Contacts staked to base with "Wedgelock" construction
- Electrical Ratings (Resistive) .5 Amps at 125 Volts; Maximum Voltage—450 Volts RMS; Maximum Current —3.5 Amps @ 6 V RMS



TYPE 300SL

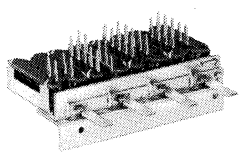
- Two position with 3 to 18 contacts on each side
- Insulation — phenolic
- Solder lug or printed circuit terminals
- Double throw — either manual or spring return
- Contacts staked to stator with "Wedgelock" construction
- Electrical Ratings (Resistive) .5 Amps at 125 Volts Maximum Voltage — 450 Volts RMS Maximum Current — 3.5 Amps @ 6 V RMS

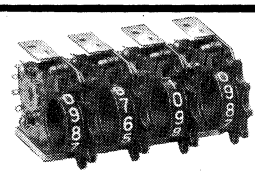
Thumbwheel Switches



SMT switches are the latest of the Standard Grigsby thumbwheel family and are in keeping with the trend towards subminiaturization. These switches utilize the sub-miniature SM type stators and may be produced with either one or multi-wafer assemblies driven by a common thumbwheel. T-101 thumbwheel switches are available with either single or double wafer sections, and utilize a stator equivalent in size to the 4M series.

Ganged Switches





Most Standard Grigsby switches may be supplied ganged. Standard and custom made brackets are available. Write or phone for details.

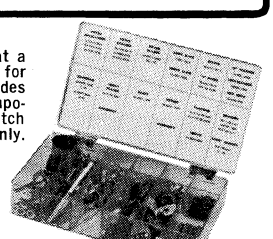
Sample Switch Kit

Standard Grigsby Switch Kits are available for most types at a nominal charge for use by laboratories and Design Engineers for prototype assembly. The basic kit for each switch type includes detent assemblies, wafers, clips, strut-screws, and other components required to produce a minimum of (25) switches. The switch kits are intended to be used in making prototype assemblies only.



LET US SAMPLE YOUR SPECIFIC REQUIREMENTS

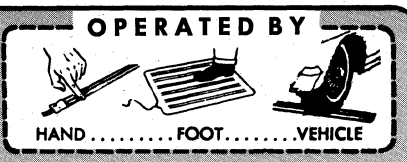
TAPESWITCH®

PRESS-AT-ANY-POINT RIBBON type & MAT type SENSING SWITCHES

OPERATED BY



BUY THE RIBBON SWITCH IN THE SIZE YOU NEED!

SUCCESSFULLY PROVEN IN ALL INDUSTRIES. PATENTED CONSTRUCTION WITHSTANDS MANY TONS OF FORCE YET CLOSES ON LIGHT FINGER PRESSURE. TAPESWITCHES ARE UNEXCELLED FOR—SAFETY . . . AUTOMATION . . . ANTIBURGLAR SYSTEMS . . . COUNTING . . . TIMING . . . DOOR CONTROL . . . LIGHT SWITCHING . . . MACHINE CONTROL . . . MATERIAL HANDLING INSTRUMENTATION . . . COMPUTER AND CONSOLE SWITCHING . . . AND MANY OTHER APPLICATIONS.

These versatile sensing switches may be used directly with **electro-mechanical devices** and **solid state devices.**

Pressure at any point from hand, foot, or vehicle will cause contact. These are ideal for instrumentation and control tasks because of their **flat configuration, "Press-at-any-Point" operation,** and **sealed** qualities.

TAPESWITCHES are designed in accordance with the best principles of switch and cable design, with jacketing and insulation meeting the requirements of MIL-C-9154 and MIL-I-631C respectively. Results are exceptional stand-by reliability (required in alarms) as well as excellent contact performance.

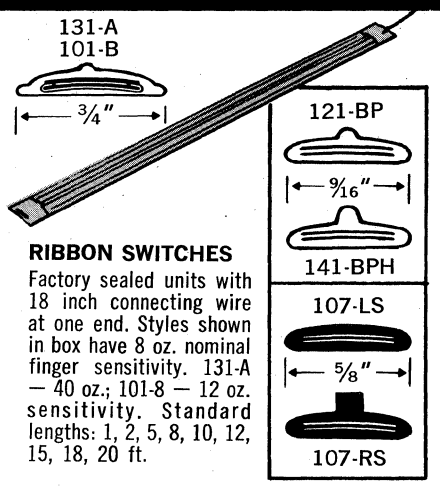
Typical life tests with repeated impacts at ONE POINT on a Tapeswitch have given over three million operations without failure. (24 Volt AC relay coil 0.3 Amperes)

RATINGS: All Tapeswitch products are rated 117 VAC, at 1 Ampere. However for floor switching, 30 VAC or less is recommended.

NOTE: U.L. classification for Ribbon Switches does not presently exist.

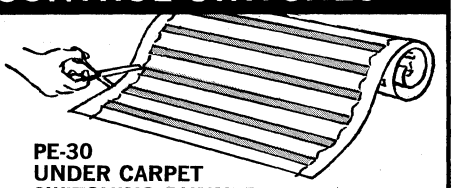
CALL OR WRITE FOR OUR COMPLETE CATALOG C4-E.

A FEW TAPESWITCH CONTROL SWITCHES



RIBBON SWITCHES

Factory sealed units with 18 inch connecting wire at one end. Styles shown in box have 8 oz. nominal finger sensitivity. 131-A — 40 oz.; 101-8 — 12 oz. sensitivity. Standard lengths: 1, 2, 5, 8, 10, 12, 15, 18, 20 ft.

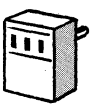


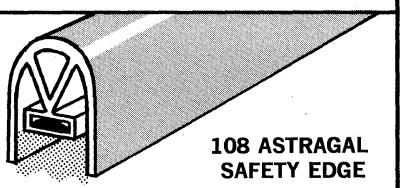
PE-30 UNDER CARPET SWITCHING RUNNER

30 inches wide x 3/32 inches thick and can be cut to any length from 25 ft. or 5 ft. roll. For indoor use under carpeting. Tapeswitches in parallel between Polyethylene sheets. Tinned wires for easy twisting or soldering connections.

TAPESWITCH RELAY R-1

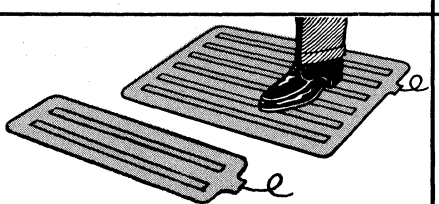
FOR NORMALLY CLOSED OR NORMALLY OPEN OPERATION OF ANY TAPESWITCH. Plug-in unit gives NC or NO control of 117 Volts AC, 5 Amperes. Built-in low voltage transformer.





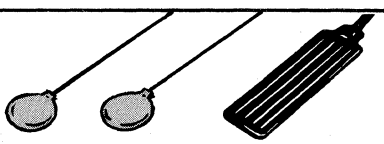
108 ASTRAGAL SAFETY EDGE

Unique patented design universal safety cushion switch for leading edge of doors, machinery, etc. Responds to side thrust and head-on thrust. Std. lengths: 6, 8, 10, 12, 15, 20, 25, 30 ft. OTHER STYLES ALSO AVAILABLE. Mounts on edges 1" to 2½" wide. Cushion depth 1⅞".



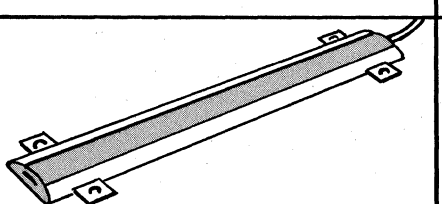
CVP SWITCHING MATS

CVP style mats are durable yet flexible, and only ⅛ inch thick (approx.). Available in sizes 20 x 32 inches, 17 x 23 inches and 6 x 23 inches. Very popular items.



NC-3 NO-1 FOOTSWITCH 111

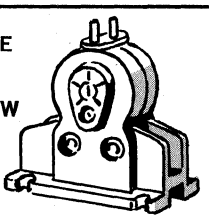
NC-3 is a unique normally closed wafer style switch 1⅛" diameter, by 3/16" thick. Designed to sound alarm when object is lifted off switch. NO-1 similar form but normally open. 20 oz. nominal sensitivity. Footswitch 111 normally open flat rugged, sealed switch, 2" x 5" x ¼" thick.



RBMA ROAD SWITCH

Successful, rugged roadway switch for counting, timing, controlling by vehicles. Replaceable sealed switch element. 2" wide, 7/16" thick. Std. lengths: 2, 3, 5, 8, 10 ft. Cast iron end protectors available.

SENSITIVE AIRWAVE SWITCH MODEL AW



Pneum. push button

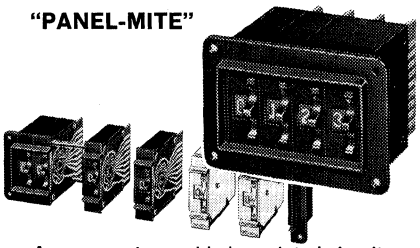
High quality diaphragm switch with adjustable sensitivity. For operation by **tubing squeeze** / impact, air motion, vacuum. Remote push-buttons for explosive environments, etc. Silver contacts operate normally open or normally closed.

TAPESWITCH CORPORATION OF AMERICA

320 BROAD HOLLOW RD., FARMINGDALE, N.Y. 11735 • (516) 694-6312—(212) 895-8713

THUMBWHEEL SWITCHES

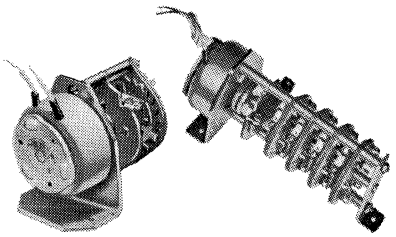
"PANEL-MITE"



A compact, molded, printed-circuit wafer switch for limited space and in line readout. **Modular type for either front or back of panel mounting:** modules ½" between center lines, height 2". Single or double pole, 10 position, binary or complementary codes, standard. Other codes available on request. Adjustable stops available.

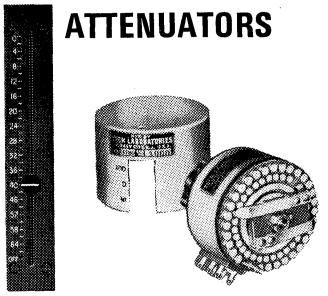
Delivery from stock!

STEPPING SWITCHES



TECH LABS switches are now standard equipment in missiles as well as in ground controls. Furnished sealed to meet all specs. Write for details. Prices on request.

ATTENUATORS



A complete line of audio and r.f. attenuators with both manual and REMOTE CONTROL. We will design components to meet your specific requirements, if standard units are inadequate. Please write for catalogue and send us your specs for estimate.

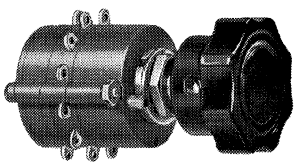
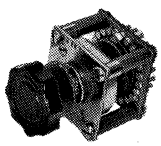
TAP SWITCHES



TYPE 3A MINIATURE TAP SWITCH

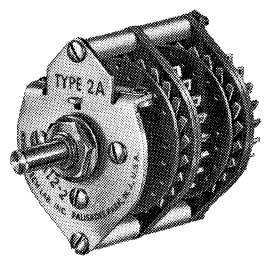
Molded from Diallyl Phthalate
Has adjustable stop

Specifications
Size: 1" diameter. 1¼" with terminals. 1 deck, 1-1/16" long. ½" for each additional deck.
Rating: 1200 volts rms, 2000 VDC, 5 amps. (carrying) 115 V.
Insulating resistance: 100 megohms minimum at 500 volts DC.
Life: 1.5—2 million revolutions.
Temperature range: —65°C to 100°C.
Mounting: single hole.



TYPE 10A TAP SWITCH

A multi-deck switch of small dimensions, 1-5/16" sq. This is a precision switch designed to meet high requirements in smallest possible space. Up to 24 positions, shorting. Adjustable stop available.



TYPE 2A & 2M

The Type 2A, a standard control switch for precision instruments and equipments, comes in 2-24 positions and 1-4 poles per deck, with phenolic insulation. The 2M is identical except for Melamine insulation. Both are rated for 3 AMP and have adjustable stops. Code "S" denotes "shorting" and "N" "non-shorting".

Type	Code	No. Pos.	No. Decks	Poles /Deck

HOW TO SELECT

1 SELECT MODEL REQUIRED — MODEL ☐

2 SELECT TRIP POINT VOLTAGE — VOLTAGE ☐

TRIP POINT should be at maximum "safe" voltage level your circuit can handle without damage, and should be as close to your regulated voltage as possible, yet high enough to prevent nuisance tripping. Be certain to allow for regulation tolerance of power supply and nominal trip tolerance of Protector.

AC trip points are selected by choosing a point between *peak* voltage (not RMS) and circuit failure level.

3 SPECIFY AC OR DC — TYPE ☐

4 SELECT OPERATING CURRENT LEVEL — SERIES ☐

Choose SERIES within which circuit's nominal current range falls.

5 SELECT OPTIONAL FEATURES — OPTIONS ☐

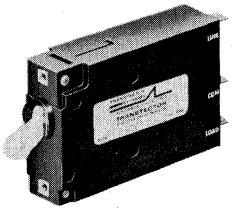
6 IF USING CURRENT LIMITING POWER SUPPLY

Verify the maximum CONTINUOUS POWER DISSIPATION of the Series selected. If power to be dissipated exceeds specified wattage, select next higher Series. Assume maximum voltage drop across protector to be 1.25VDC at rated temperature.

PART NUMBER ☐ ☐ ☐ ☐ ☐
1 2 3 4 5

COMBINATION CIRCUIT PROTECTORS

Protect against transient voltages, currents and shorts with one unit. Overvoltage, undervoltage, under/overvoltage, multi-sense, vari-adjust options. Operating temperature −55° to +85° C. Complete unit dimensions: 3.25″ L x .75″ W x 2.0″ H. Custom trip points available.



CURRENT TRIP POINTS
Instantaneous trip breaker is standard. Time delay available.

VDC MODELS (50 VDC Max.)	VAC MODELS (250 VAC Max.)
AMPS 1, 2, 3, 5, 7, 10, 15, 20	AMPS (60 cps operation) 0.5, 1, 2, 3, 5, 7, 10, 15, 20 (400 cps operation) 2, 5, 10, 15, 20

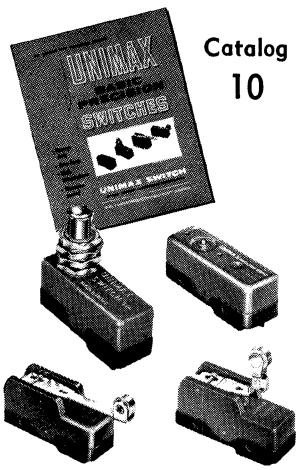
UNIMAX SWITCH

The **complete** line of snap-acting switches for military and commercial applications. For detailed information about electrical ratings, dimensions, mountings, actuators, and operating characteristics, refer to these catalogs.

BASIC PRECISION



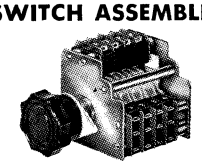
Catalog 10

covers basic-precision, heavy-duty, high-current, high-sensitivity, high-temperature, moisture-sealed, and direct-current switches. Gives operating characteristics of switches with plunger, lever, and roller actuators. Shows terminal and switch enclosures and attachable actuators. Includes electrical and mechanical life data.

Electrical ratings

up to 25 amperes
2 horsepower
250 volts
UL and CSA listing

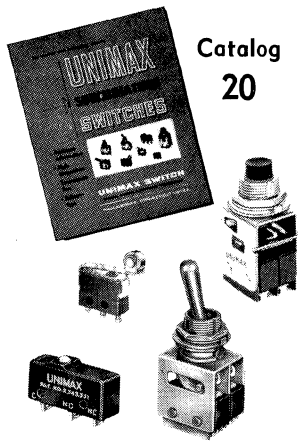
SWITCH ASSEMBLIES



8-pole sequence-selector switch

Our switch application department will work with you in designing special mountings and actuators for single switches or combinations of switches to meet your design and performance requirements.

SUBMINIATURE



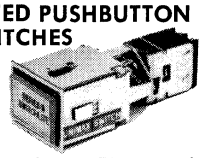
Catalog 20

covers subminiature and miniature-subminiature switches and switch assemblies in basic, moisture-sealed, high-temperature, and environment-free types. Gives operating characteristics of switches with integral or auxiliary actuators. Shows designs to dimensional and test requirements of MIL-S-6743 and MIL-S-8805.

Electrical ratings

up to 7 amperes
250 volts a-c or
28 volts d-c

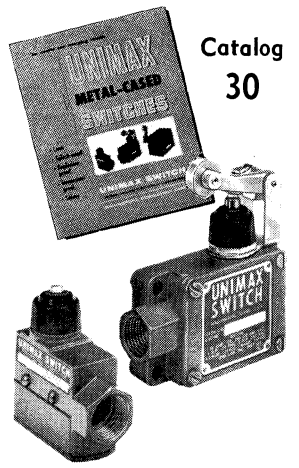
LIGHTED PUSHBUTTON SWITCHES



Unimax Series 9 LPB controls are designed to meet the requirements of MIL-S-22885. Choose from a wide range of display styles and color coding, 2, 3 or 4 pole, momentary or alternate switching. Features include front-panel mounting with a single screw, internally bussed lamp circuits and simple pull-push relamping. Exclusive spring-loaded lamp sockets eliminate usual terminal-to-lamp continuity problems.

Ask for Catalog 50-1.

METAL-CASED



Catalog 30

covers switches in cast metal housings that protect the basic switch against mechanical damage as well as against environments common in industry. Shows housings and actuators particularly suited to industrial safety and automation services. Constructions include splash-proof, explosion-proof, and immersion-proof enclosures.

Electrical ratings

up to 20 amperes
480 volts a-c and
2 hp, 250 v. a-c.
UL and CSA listings

MINIATURE SUB-MINIATURE SWITCHES

with integral actuators

Exceptionally compact SPDT switches meet MS2457-1 per MIL-S-6743. Turret terminals molded into housing of high strength phenolic. Integral actuators permit wide choice of operating means and simplify installation. Can be stacked five to the inch. 28 v.d-c.

Ask for Catalog 20.

GENERAL-PURPOSE

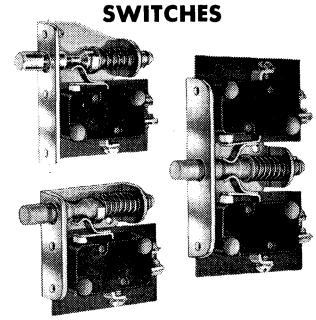
Catalog 40

covers miniature, general-purpose, open-blade, and moisture-sealed switches widely used for automatic control in household appliances, office machines, vending machines, and other electrical apparatus. Includes double-pole and high-current designs with lever, roller, plunger, and pushbutton actuators.

Electrical ratings

up to 25 amperes
1½ horsepower
250 volts a-c
UL and CSA listings

AUTOMATIC-RESET SWITCHES



Break circuit when door opens; allow manual closing for live-circuit tests; automatically restore safety inter-lock on reclosing. SPDT or DPDT action at 15 amperes 250 volts a-c.

Ask for Bulletin No 412

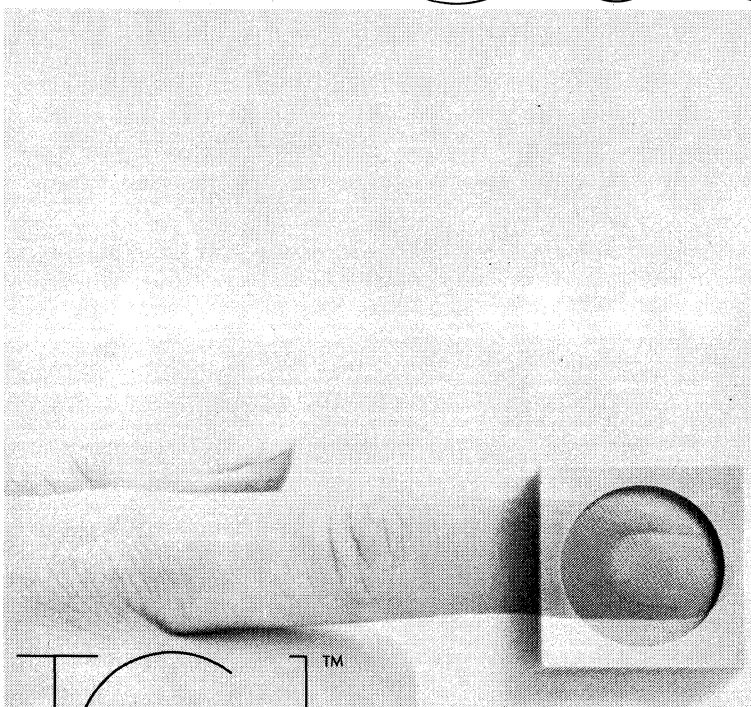
INTRODUCING TOUCH



TC-1™

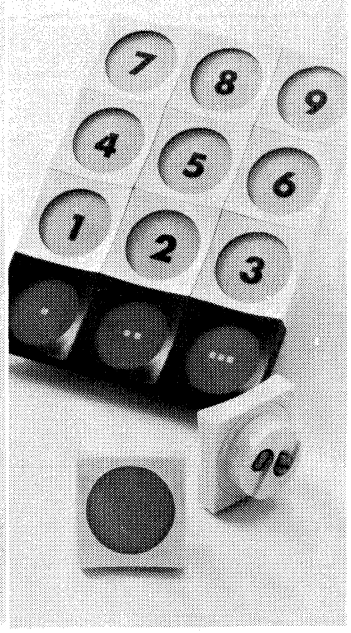
THE TOUCH CONTROL YOU CAN AFFORD TO USE... ANYWHERE

A true retrofit for virtually any momentary switch... Nothing seems to move, yet switch function is fulfilled. The new TC-1 works when you touch it! Breaks the barriers for cost, size and durability of touch operation... breaks the ceiling on efficiency enforced by the limits of any visible-action switch.

Utilizing departures in operating concept, the TC-1 touch control offers all the characteristics of good contact practice with outstanding features:

- ☐ Currently available 120 VAC, 28 VDC, 200 Watts... TC-1 offers a potential for a wide range of voltages and current ratings.
- ☐ Long, trouble-free operation.
- ☐ Rugged, sealed-unit construction with a case of unbreakable Lexan®—weather and moisture resistant.
- ☐ Compact size and simple mounting.
- ☐ Excellent appearance with varied colors and legendizing.

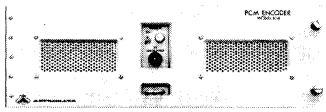
The TC-1 can be used alone, in tandem, or as a keyboard. Possibilities are unlimited. It's a new technological concept in switching that calls for a new way of looking at things. And it's from a new source... Wild Rover Corporation... people determined to find better ways to do things. For more information and catalog, call 201 768-8436 (collect!) or write: WILD ROVER CORPORATION, Herbert Avenue, Closter, N.J. 07624.

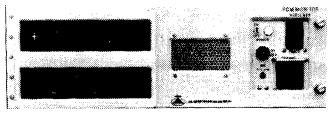


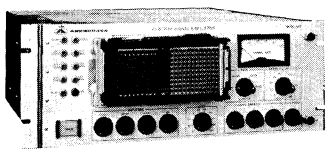
ASTRODATA

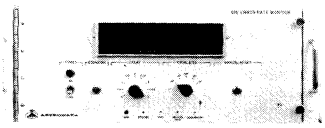
A Complete Line of PAM/PDM and PCM Telemetry Products

PCM Telemetry









Model 630 Airborne PCM Encoder

- Digital or analog input to any channel
- Bit rate up to 100k Hz
- NRZ-M and NRZ-L outputs
- Up to 45 words per frame
- Up to 13 bits (plus parity) per word
- Automatic offset and scale factor calibration

Model 635 PCM Monitor

- Accepts up to 13 encoder inputs
- Displays in both binary and scaled and offset decimal units
- Records and reproduces post-detected telemetry signals
- Separates multiplexed FM video signals
- Decommutates PCM, PDM and PAM signals
- Presents selected demultiplexed and decommutated data on display devices

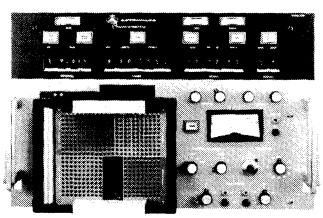
Model 600 PCM Signal Simulator

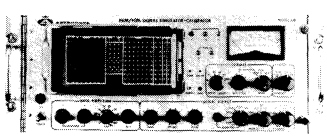
- Five independently programmed words
- Any frame length — 2 to 512 words
- Any word length — 2 to 32 bits
- ID mode subframe synchronization

Model 620 Bit Error Rate Monitor

- Five-digit decimal Nixie display — direct reading in bit error rate
- Selectable test length from 10^3 to 10^7 bits
- Compares source data bit-for-bit to test data
- 0 to 4 bits range delay in increments of ½ bit to compensate for delay in unit under test

PAM / PDM Telemetry





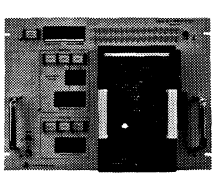
Model 604 PAM / PDM Decommutator / Subdecommutator

- Versatility and Performance Offered in the Model 603, plus Subdecommutator Features
- Digital outputs in binary and/or BCD formats
- Auto-set and auto-slice / gain capability for completely automatic set-up

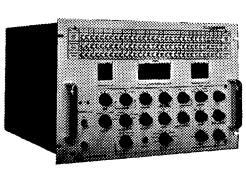
Model 611 PAM / PDM Signal Simulator / Calibrator

- 130 Channels
- Independently Programmed Data Level for Each Channel Allows Simulation of Virtually Any Format
- Remotely Controllable

PCM

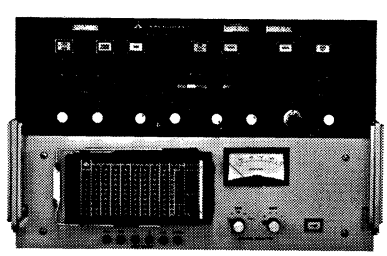


Model 612
PCM DECOMMUTATOR
- Up to 512 words per main frame
- Up to 512 words per subframe
- Up to 32 bits per word
- ID mode subframe synchronization
- Up to 8 syllables per word

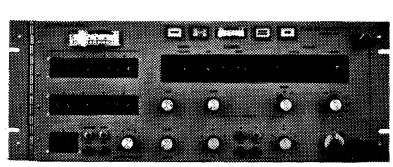


Model 613
PCM SIGNAL SIMULATOR
- Three independently programmed words
- Incrementing ID subframe sync word
- Built-in noise generator
- Any frame length — 1 to 799 words
- Any word length — 1 to 32 bits

PAM/PDM



Model 603
PAM/PDM DECOMMUTATOR
- Wide capture range ±30% from preset center rate
- Rates from 1 channel/sec to 10,000 channels/sec—continuously selectable without changing plug-ins
- Frame lengths up to 130 channels
- Pattern recognition technique employed with selectable automatic IRIG frame or programmable frame synchronization



Model 607
PAM DECOMMUTATOR
- Up to 90 channels per main frame
- Up to 10,000 channels per second
- Pattern recognition for frame synchronization
- Accepts PAM (RZ), PAM (NRZ) or PDM time multiplex input formats

SIGNAL CONDITIONING EQUIPMENT

Short Form Catalog

INDUSTRIAL

If you have a tough, tricky or unusual problem, the Engineering and Management Team at HRA is the key to its solution. We have the facilities, the talent and the desire to provide you with perfection through miniaturization — small, lightweight, and rugged reliability describes HRA components.

HRA's manufacturing facilities utilize the most advanced techniques known to solve its customers unique problems. With rigidly enforced Quality Assurance and Quality Control procedures HRA's customers are assured high production of the best possible quality on schedule.

MILITARY

The components on these pages represent a few HRA solutions to unique customer problems, but HRA's capabilities are by no means limited to the manufacture of stock items . . . our facilities are available to you for the development of equipment of highest reliability for the most specialized applications. Check us out, find out how we can provide prototypes when **you** need them, schedule production units to meet **your** schedule, to **your** exact specifications, at the greatest possible savings in cost.

SERIES 1300 STANDARD OSCILLATORS

Type	Frequency Range	Temperature Range	Temperature Coefficint	Input VDC	Output Waveform	Size Volumle
RC	100 Hz to 1 MHz	−40°C to +85°C	50 ppm/°C	+4 to +40 or ±Voltages	Sine or Square	½ cu. in.
LC	1KHz to 100 MHz	−40°C to +85°C	50 ppm/°C	+4 to +40	Sine or Square	½ cu. in.

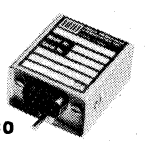
SERIES 1400 CRYSTAL OSCILLATORS

Type	Frequency Range	Temperature Range	Temperature Coefficient	Input VDC	Output Waveform	Size Volume
Xtal	100 Hz to 10 KHz	−40°C to + 70°C	10 ppm/°C	+4 to +40	Sine or Square	1.5 cu. in
Xtal	10 KHz to 1 MHz	−40°C to + 85°C	10 ppm/°C	+4 to +40	Sine or Square	1.0 cu in.
Xtal	100 KHz to 10 MHz	−40°C to +105°C	5 ppm/°C	+4 to +40	Sine or Square	½ cu. in.
Xtal	10 MHz to 125 MHz	−55°C to +105°C	5 ppm/°C	+4 to +40	Sine	½ cu. in.

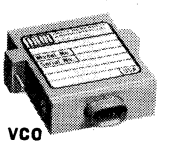
SERIES 1500 VOLTAGE CONTROLLED OSCILLATORS

Type	Deviation	Frequency Range	Temperature Range	Temperature Coefficient	Input VDC	Input Sensitivity	Output Waveform	Size Volume
RC	Up to ±40%	100 Hz to 3 MHz	−40°C to +85°C	50 ppm/°C	+4 to +40 or ±Voltages	50 mv and up	Square	1 cu. in.
RC	up to ±20%	100 Hz to 3 MHz	−40°C to +85°C	50 ppm/°C	+4 to +40 or ±Voltages	10 mv and up	Sine or Square	½ to 1.5 cu. in.

INDUSTRIAL VCO



MINIATURE VCO



MICROMINIATURE VCO

SERIES 1600 AMPLIFIERS

Type	Input Sensitivity	Frequency Response	Voltage Gain	Temperature Range	Input VDC	Stability	Common Mode	Size Volume
Mixer Amplifier	Above 250 mv	within ±0.5 DB from 100 Hz to 200 KHz	Adjustable from 1 to 20	−20°C to +85°C	+28 VDC ±10%	±0.5%	N/A	½ to 2 cu. in.
Differential DC Amplifier	Down to 50 mv	DC to 5 KHz	Up to 100	−20°C to +85°C	+28 VDC	±0.5%	±7v	½ cu. in.
Differential DC Amplifier	Down to 100 mv	DC to 5 KHz	50	−20°C to +85°C	+28 VDC	±0.5%	±50v	½ cu. in.

SERIES 1700 POWER SUPPLIES

Type	Input Voltage	Output Voltage	Temperature Range	Ripple	Stability	Load	Size Volume
DC - DC Regulated Supply	+28 VDC 20%	Fixed or Adjustable 5 volts up to 40 volts	−40°C to +85°C	0.5% Peak to Peak	Up to ±0.5%	Milliamperes up to 5 amps	1 cu. in. Depending on Load
DC - DC Regulated Supply	+5 VDC ±20%	Fixed or Adjustable 5 volts up to 40 volts	−40°C to +85°C	0.5% Peak to Peak	Up to ±0.5%	Milliamperes up to 5 amps	1 cu. in. Depending on Load

SPECIAL VOLTAGE CONTROLLED OSCILLATORS

Type	Deviation	Frequency Range	Temperature Range	Temperature Coefficient	Input Sensitivity	Output Wave Form	Input Voltage	Size
FM Record Amplifiers, up to 7 speed	Up to ±40%	Up to 1 MHz	Ambient up to full MIL Spec.	Down to 50 ppm	20 mv and up	Square or Sine	+4 to +40 or ± Voltages	Case or card down to 1″ x 2″ x 0.3″

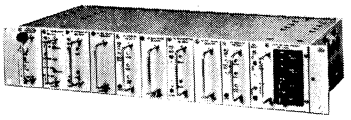
COMMUNICATIONS DIVISION

Since 1922

Transmission Terminals For Data, Control, Telephone, Telegraph and Telemetering Applications

AM and FS Voice

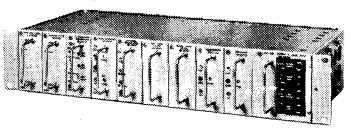


The 2056 Series represents the ultimate in tone channel design in as much as a single packaging concept is employed to accommodate all tone channel requirements for any application.

AM channels may be intermixed with FS channels and various combinations of both types of receivers and transmitters are accommodated.

Basic modules are provided which are common to all applications. Special requirements which are peculiar to particular systems and applications are provided by accessory modules mounted on plug-in cards similar to the basic modules and connected at the rear of the mounting shelf. This packaging concept provides for maximum economy and versatility since basic modules are common to all applications encountered in telemetering, control and telegraph applications.

SSB Voice



The Model 2710 SSB Terminal was designed to provide a high quality voice channel for voice communication or data transmission for application to microwave, static, power line and radio system basebands. Two basic groups, one of 14 channels, and occupying the frequency spectrum 4-60 kHz, the other of 12 channels, and occupying the frequency spectrum from 60-108 kHz are available. The channels may be applied singly or in groups without common equipment. Since the 2710 is particularly suitable to low density requirements no attempt has been made to overcrowd components which would reduce system flexibility and complicate system and maintenance procedures. All basic circuitry including channel filters are provided with front panel test points and controls for convenience in system monitoring and servicing. By dual translation, channels up to 300 kHz are available.

High Speed Data

RFL Data Sets are compatible with and will transmit into Bell Sets (103A-103B-103F-202B-202D). Recent FCC changes allow customer owned data sets to directly connect to standard telephones at great cost savings.

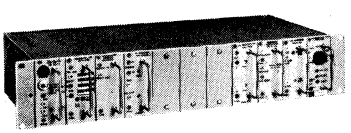
The Model 2056 operates at any speed up to 2400 bits per second on a non-synchronous basis on standard bands, and much higher, with wider bands.

The new coherent modem, Model 3227, is capable of transmitting high speed binary coded data and clock information simultaneously. There is no need for expensive synchronized clocks in end-equipment. The need for accurate timing is also eliminated, permitting operation through adverse conditions.

The Model 4000 data channel provides its own synchronized output at both the receiver and transmitter. It is capable of high-speed rates for both clock and data information and operates at discrete bit rates of 600, 1200, 1800 and 2400.

The newly designed Model 25400 Adjustable Delay Equalizer is totally compatible with all RFL data sets as well as all other data transmission facilities. This variable system provides precise equalization of communication paths with respect to either phase or amplitude, or both, which is essential to high-speed data transmission. Resultant flat response and amplitude attenuation insures distortion-free transmissions over minimum grade voice lines.

Analog Telemeter

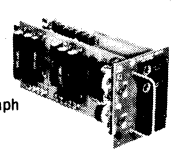


The Model 2203 Variable Frequency Telemeter system provides complete circuitry for telemetering DC or low frequency AC voltages by means of an audio frequency shift carrier which is modulated at a sub-audio frequency rate of 10 to 30 Hz or by polar current pulsed at 10 to 30 Hz. Full-scale span of the measured DC quantity is represented by the 10 to 30-cycle modulation frequency which is directly proportional to the EMF applied to the transmitter. At the receiver, the telemeter signals are demodulated, and the output DC potential or current is directly proportional to the modulated signal. This output may be used to operate potentiometer recorders and DC milliammeters. Modified modules are also available for modulation frequencies of 7.5 to 15 Hz for use over narrow band transmission facilities. Other frequencies are also available.

Any DC input voltage range of 20-millivolt to 1000-millivolt span is available as standard. Modules are also available for slide-wire and higher voltage inputs. Output current from the receiver has a 2-milliampere span into 2500 ohms maximum for 10 to 30-Hz modulation frequency variation. Output current up to 50 ma also available.

All terminals are fully transistorized and miniaturized using modular type construction for minimum space requirements and ease of maintenance, allowing a maximum of channels to be installed without sacrificing versatility, performance and system adaptability. All units are standard 19" rack mounted with other mounting options available.

DC Loop Option Module



Provides all common telegraph options

Accessories

A wide range of accessory units are available for all systems. Some include a 2, 10 or 50 watt power amplifier. Compandors for improved signal to noise ratio. System regulators for wide line attenuation changes. Matrix systems for economical transmission of numerous control functions. Special mounting shelves and weatherproof enclosures.

FREQMETERS, DISCRIMINATORS, PHASEMETERS

Solid state frequency-to-dc converters and discriminators will linearly convert frequency or repetition rate of signals to a proportional dc output. Waveforms can be sine, square, pulse, sawtooth or triangular. Standard models are available to cover a wide range from zero to 300 kcps. Expanded scale, differential frequency, under/over frequency and phase detectors are available (meter, meter relay and relay types are also available). These units have been designed for applications where stability, ruggedness, long life, efficiency and freedom from maintenance are prime requisites. Miniature, stable and rugged designs make these units ideal for military, aerospace, industrial and portable applications.

Only the Models 400 to 440 Freqmeters are basic f-dc converters, the output being proportional to the product of frequency and peak input voltage. The 410KF to 440KF are solely frequency dependent (independent of peak input voltage). 450KF to 480KF units require lower drive (millivolts). 410M to 440M units have a visual panel meter readout. The 410MR to 440MR have a visual panel meter relay readout with external min-max adjustments. The 486E is an expanded scale Freqmeter while the 491ME is a mirrored-scale visual panel meter version. The 411 and 421 units are difference Freqmeters. The 401 series FM discriminators are for IRIG channel telemetering. The 471 is a Hi-Lo pass frequency sensitive relay suitable for under/over frequency and speed detection and control. The 476 frequency detector is a narrow bandpass frequency sensitive relay. The 791 Phasemeter is a phase-to-voltage converter.

You'll find microfilm data sheets and application notes in VSMF or the Thomas Supplementary File.

If you have a special requirement, phone, wire or write for an immediate reply or catalog. Shipments can be same day, if you call early.

OSCILLATORS, CONVERTERS & OPERATIONAL AMPLIFIERS

DESCRIPTION

Solid state oscillators and converters are available in many types (MIL-SPEC too). S-100, S-200 are LC sine oscillators (rugged and stable). The S-300 is tuneable, not as rugged, but excellent for ground support equipment. C-110, CH-114 (400 cps reference) are heater-crystal controlled, fully encapsulated for ruggedness. PG-111, PG-112 and PG-113 are crystal controlled, (no heater) square wave generators, ruggedized and miniature for airborne, military and space applications. The TF-120 is a tuning fork reference sine oscillator. Series 300VF Voltage-To-Frequency converters change analog signals to the frequency (time) or digital domain (use electronic counter) and are perfectly matched to our Series 400KF Freqmeters. The V-510, V-513 (20 millivolt input) Voltage Controlled Oscillators (VCO) are designed for IRIG FM telemetering. The V-521 is a micro-version of the V-510 (without output bandpass filter). AD-551, AD-552 (20 millivolts input) are Voltage-To-Frequency Converters with sine wave output. PF-1001, PF-1007 are Pressure-To-Frequency Converters (potentiometer type) respectively matched to a V-510 VCO and a 300 VF V-to-F converter. The OS-1005 converts Pressure-to-Frequency directly via varying inductance (diaphragm type). The 5001 FM Transmitter and the 5002 VCO go together for a single channel miniature telemeter. The 5021 TELEMOD combines the two in a single micro-package. The TCD-101 is a solid state chopper or demodulator driver (square wave inverter) with 4 isolated output windings. The Model 3001 differential operational amplifier is a workhorse and you can assign it to a multitude of analog functions. The Model 3051 is an isolated single-supply (28 VDC) version of the 3001 (dual-supply). The Model 3002 op-amp is superlative in its capabilities, i.e. microvolt input, 0.6 microvolts/°C. and 2 picoamps/°C. drift, 300 megohm input impedance, short-circuit proof, no compensation required, no latch-up, zero offset adjustable, wide temperature range, microminiature, replaces chopper-stabilized amplifiers. You'll find microfilm data sheets and application notes in VSMF or the Thomas Supplementary File. Phone, wire or write our engineering department for a quick considered quote on your specifications or for our catalog. Shipments can be same day if you call early.

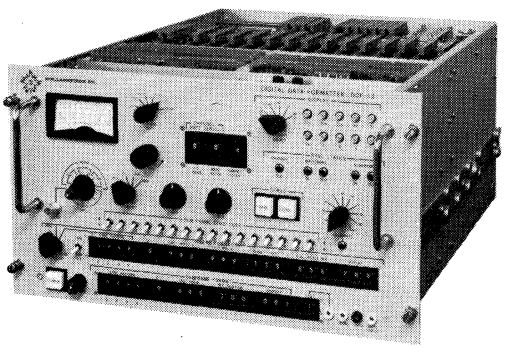
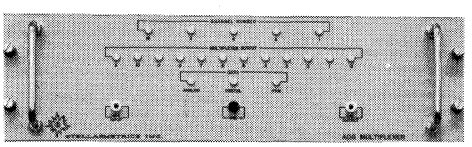
ANALOG PRODUCTS



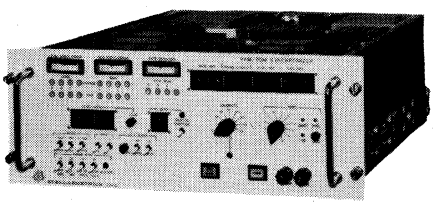
PAM-to-PCM CONVERTER DECOMMUTATOR

The DDF-13 Digital Data Formatter is a versatile telemetry synchronizer which provides signals, conditioned and formatted, for use with PCM decommutation equipment, digital processors and ancillary D-A units. The DDF-13 will function with input signals having up to 999 channels per main/prime frame and up to 999 channels per sub-frame, at channel rates from 1 to 12,000 channels per second. The DDF-13 is completely compatible with requirements of IRIG 106-66 and industrial formats.



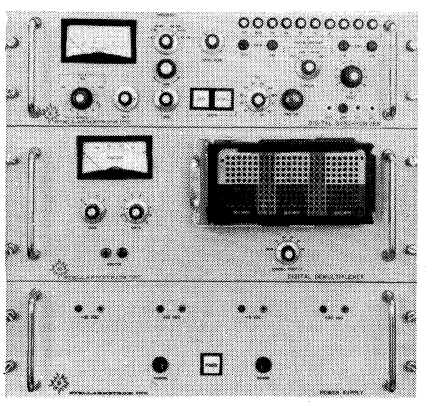
MULTIPLEXER/A-D CONVERTER

Series MADC Multiplexer/Converters are self contained multiplexers with sample-and-hold amplifier, analog-to-digital converter, power supplies and control logic in a single unit. Operations performed by the MADC include multiplexing of up to 400 high, low or mixed level analog inputs, amplification, sample-and-hold operation, and analog-to-digital conversion with serial or parallel binary or BCD digital word output. Throughput rates range up to 100 Kilosamples per second with a resolution up to 12 bits.



100 KHz PAM DECOMMUTATOR

The APS-1000 PAM and PDM Decommutation System provides for input signal conditioning, synchronization (frame and pulse) for PAM RZ/NRZ and PDM normal or differentiated signals with pulse rates from 1 Hz to 100 KHz. The system provides both parallel analog and parallel digital (10-bit) data for recording and processing. The APS-1000 is completely compatible with requirements or IRIG 106-66 and industrial formats. All controls are settable from the front panel, with toggle switches and thumbwheels used as applicable for setup and operation ease. The unit is of modular solid state design, and uses DTL integrated circuits in digital sections.

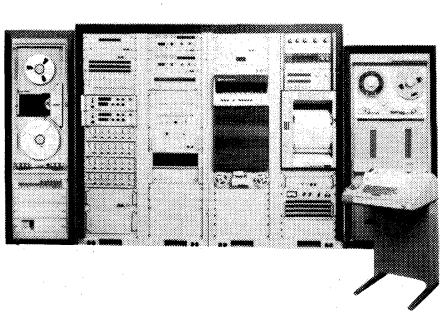


10 KHz PAM DECOMMUTATOR

The DD-1024 PAM/PDM Decommutation System is a general purpose system that allows reliable decommutation of complex PAM formats in several environments of high noise and missing channels. The system will accommodate all IRIG 106-66 formats plus special formats, and is composed of the following individual Stellarmetrics units:

DS-10 Synchronizer
*DD-XX Demultiplexer
DP-10 Power Supply

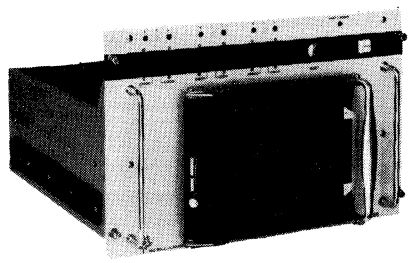
*Available with a choice of demultiplexers to accommodate a 90 or 130 channel main frame.

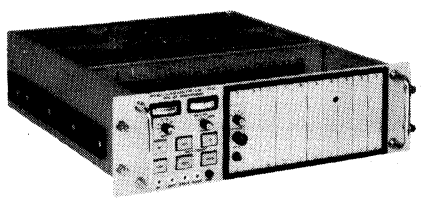


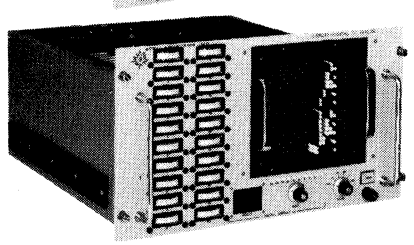
TELEMETRY PROCESSOR SYSTEMS

The Omega IV Telemetry Processor, one of the 4024 series of production telemetry ground stations that operate simultaneously on several frequency modulated and time-division-multiplexed inputs, with frequency responses totaling 100 KHz. Synchronization and processing are accomplished with up to 100 KHz PAM inputs. Under complete program control for all functional parameters, including signal routing, subcarrier discrimination, PAM/PDM synchronization, tape search and control, multiplexer sequencing, data compression, D-A addressing and oscillograph control, the system throughputs processed and identified data to magnetic tape and oscillograph recorders.

DATA SYSTEMS and COMPONENTS





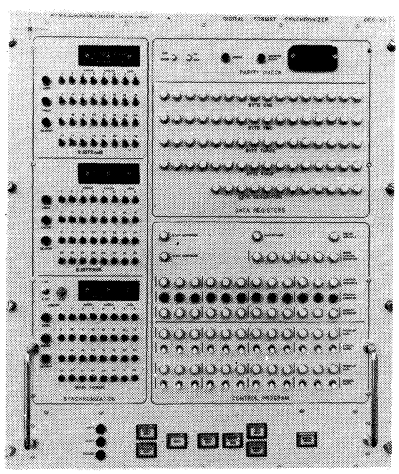


PATCH PROGRAM PCM DECOMMUTATOR

The Model DD-2024 PCM Decommutation System is a general purpose system permitting reliable decommutation of complex PCM formats in the most severe noise environments. The system is composed of three self-powered Stellarmetrics units.

Model DBS-20 Digital Bit Synchronizer
Model DFS-20 Digital Format Synchronizer
Model DDA-20 Digital-to-Analog Display

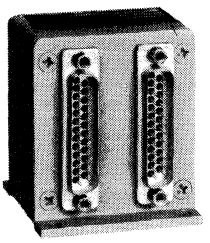
The system uses solid-state plug-in modules to provide total flexibility. Integrated circuits are used in the system for all digital functions.



STORED PROGRAM PCM DECOMMUTATOR

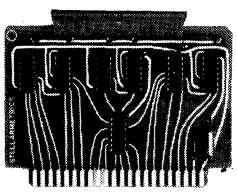
Series DFS-30 Digital Format Synchronizer provides the functions of serial-to-parallel conversion, sync-pattern recognition, format synchronization, word or channel identification, data routing to digital-to-analog converters and bi-level storage flip-flops. The DFS-30 will accept many types of format strategies, since each input PCM data word in the format is under direct control of a specific core memory word programmed for its use. The memory used is an integrated circuit interface, 1.5 microsecond cycle time, 32 bit by 2048 word, random access magnetic core memory.

DIGITAL PRODUCTS



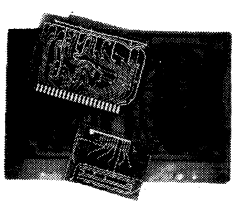
AIRBORNE COMMUTATORS

These airborne solid state commutators are versatile, rugged units designed to provide an accurate, stable telemetry pulse train in standard IRIG or special formats. Modular design flexibility permits PAM or PDM outputs, RZ or NRZ, or hybrid units utilizing either Junction FET designs (Series 251) or new flexible MOS FET designs (Series 300) in a wide variety of channel quantity and rate combinations with or without internal power ground isolation. Stellarmetrics commutators may be ordered in standard or special configurations to meet ordnance, missile, or satellite telemetry applications, and special ordnance design techniques permit shock protection up to 43,000 Gs. Small size, light weight, expandable channel capacity, and flight-qualified solid state circuitry make Stellarmetrics electronic commutators ideal for aerospace telemetry programs.



DIGITAL LOGIC CARDS

Stellarmetrics offers a complete line of high performance, multi-function digital logic and analog interface cards, power supplies, and associated packaging hardware. Logic cards are available in DTL integrated circuits or in compatible discrete component configuration. Standard cards encompass more than 100 different circuit functions.



PRINTED CIRCUIT BOARDS

Stellarmetrics has the complete in-house capability to produce fast, quality prototype or volume production of printed circuit boards. These capabilities include: ☐ complete art work and photo service ☐ photo engraving and silk-screening ☐ commercial or military grade base material ☐ plating of nickel, rhodium, gold through hole and solder coating ☐ precision quad-drilling, contour routing and precision sanding ☐ hardware installation of eyelets, funnelets, terminals and connectors ☐ processes in accordance with MSFC-STD-154 ☐ quality control system in accordance with MIL-Q-9858A Stellarmetrics also has the capability for assembling of printed circuit boards and flow soldering.

THERMOELECTRIC COOLERS

INTRODUCTION TO THERMOELECTRIC PRODUCTS

Thermoelectric cooling units have many unique advantages over other types of coolers in their application area.

SIZE

They can be tailored to fit the application by easy addition or subtraction of modules to fill the need accurately and avoid waste.

POWER INPUT

Due to tailored modular construction, power requirements can be reduced to a minimum. Power is provided through a single pair of leads.

RELIABILITY

There are no parts that wear or clog, and no delicate moving parts. Gases, corrosive liquids or chemicals that will leak or dissipate with age are also eliminated. These features result in greatly reduced maintenance requirements.

LOGISTICS

There are no requirements at the load for pumping refrigerant or for a source of coolant such as liquid nitrogen to be added during operation of the system.

REMOTE CONTROL

The unit and heat sink are required in the cooling area; the power supply and most other control equipment can be mounted and operated remotely.

COOLING RANGE

Thermoelectric coolers are capable of operating from any heat-sink temperature from +100°C to —100°C.

TEMPERATURE CONTROL

Simple electronic control schemes allow control within a fraction of a degree of desired load temperatures above or below ambient.

APPLICATION OF THERMOELECTRIC PRODUCTS

ELECTRONIC COMPONENTS

Cold traps for vacuum chambers
Crystals
Discrete silicon components
Inertial guidance systems
Infrared detectors
Integrated circuits
Lasers
Masers
Nuclear radiation detectors
Parametric amplifiers
Photomultiplier tubes
Vidicon tubes

TEMPERATURE CONTROL UNITS

Constant temperature chambers
Environment chambers
Integrated circuit test chambers
Temperature baths

COMMERCIAL REFRIGERATION

Aircraft water coolers
Cream coolers
Display cabinets
Ice cube makers
Photo developing solution coolers
Picnic baskets
Restaurant service-stand coolers

MEDICAL AID LABORATORY INSTRUMENTS

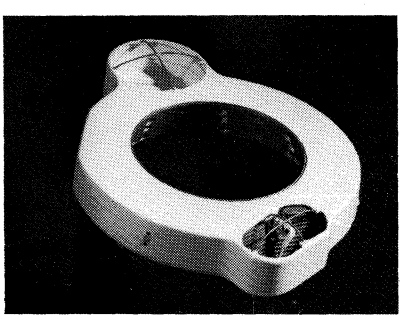
Blood coagulators
Cold probes
Dew point hygrometers
Microscope cold plates
Mobile drug coolers
Surgical instrument-coolers
Test tube coolers

CUSTOM DESIGN

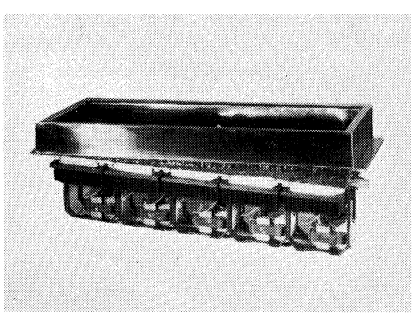
Engineering back-up is available for designs to meet customer specifications

SPECIAL ASSEMBLY

Ring type cooler to stabilize the inertial navigation system at 40°C and pump 280 watts with an input power of 338 watts.



This system cools one gallon of chemical solution to 40°F below ambient with 850 watts of input power. Load capability 450 watts to 0 △T.



The principles, applications, and design possibilities of thermoelectric cooling are discussed in this booklet.

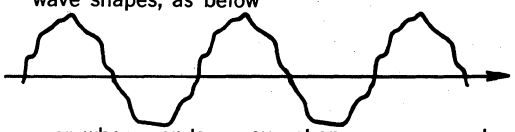
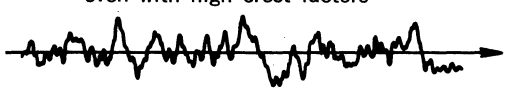
Guide to types, models and applications of BEST vacuo-junction THERMOCOUPLES as used by leading instrument manufacturers for:

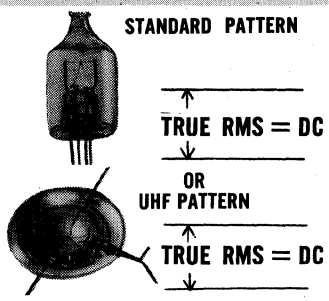
TRUE RMS MEASUREMENT

—where the signal is periodic with distorted wave shapes, as below



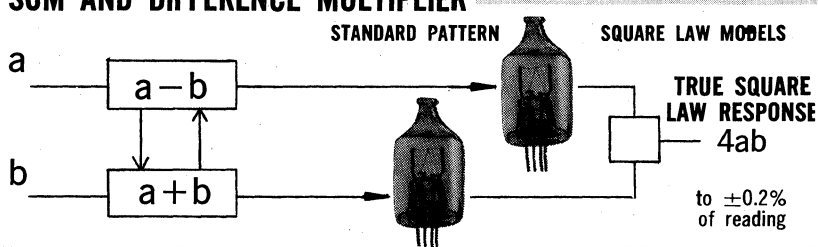
—or where random wave shapes are present, even with high crest factors





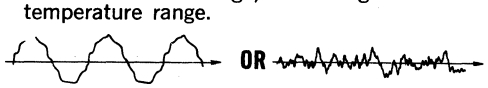
(Use either standard or UHF pattern, depending upon frequency)

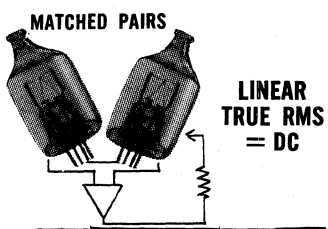
SUM AND DIFFERENCE MULTIPLIER



LINEAR TRUE RMS MEASUREMENT

Tracking errors are in percent of reading over a 10:1 current range, including a ±20°C temperature range.





Matched pairs available from stock:

	MODEL MP1S7	MODEL MP219	MODEL MP219-1
Tracking accuracy	0.5%	0.5%	0.2%
Response time (0-90%)	3 sec.	200ms	200ms
Nominal current	5mA	6.67mA	6.67mA

Fast response models minimize flicker in last digit

Standard patterns for 5mA and higher, usable to −65 Mc/s; for less than 5mA, usable to 10 Mc/s
U.H.F. types usable to 500 Mc/s
Temperature coefficient of output available from −0.2% per °C down to 0.005% per °C in some models
Reversal error, standard, 0.2%. All models available with R/E down to 0.01%, some models to 0.005%

Special features available: short time constants to 50 ms; double heater devices, ultra miniature sizes

Under development for early introduction are
— compatible amplifiers,
— true RMS to DC linear converters,
— high output models.

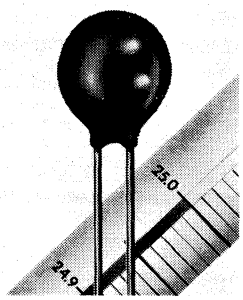
CAL-R, INC.

thermonetics THERMISTOR DIVISION

Thermistors produced by the **CAL–R** Thermonetics Division provide circuit designers with a significant advance in thermal sensing devices. By employing proprietary metallurgical engineering concepts . . . a new thermal sensing material has resulted, with the name of THERMOCERAM.[T.M.] Performance characteristics provided by this new material not only permit improved design flexibility . . . but make possible closer tolerances in applications for MILITARY–AEROSPACE and INDUSTRIAL ELECTRONIC systems.

pt 100 series

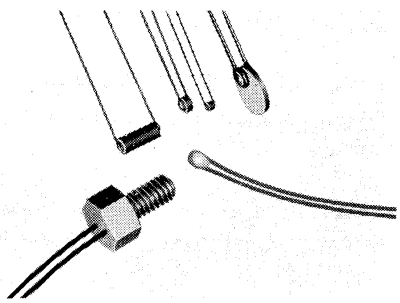


The PT–100 series thermistors are precision matched to 1% (0.2°C) resistance tolerance over the temperature range of 0° C to 80° C. These thermal sensors are designed especially for precision and semi-precision measurement and control applications.

Being preaged, the PT–100 Series demonstrates exceptional stability and repeatability. They are coated with thermal conductive epoxy to insure fast time response. Additionally, they display uniform operating characteristics because of rigid quality control procedures during each manufacturing process.

All PT–100 Series thermistors conform to AQL and confidence levels as specified in MIL-T-23648 as outlined by tables V & VI.

b series

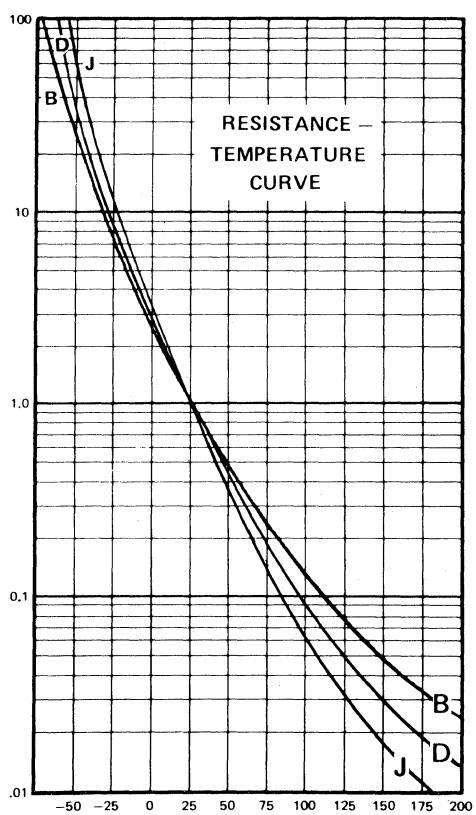


The "B" composition offers a broad range of resistance values. This permits the design engineer to select values of 2.5 thru 500 Ω from the same basic type of thermistor. In addition to this wide range of values, the "B" Series is an excellent, highly stable, broad application thermal sensor that finds use in innumerable heat sensing designs.

All "B" Series thermistors conform to AQL and confidence levels as specified in MIL-T-23648 as outlined by tables V & VI.

Coatings, encapsulation markings, probes and resistor/thermistor networks . . . are also available to meet specific requirements by contacting our application engineering department.

Resistance tolerances of ± 1% thru ± 20% are available and may be specified at 25° C, or any temperature within the operating range.



d series

Composition "D" Thermistors are part of a family of thermal sensors representing a new breakthrough in materials engineering. Resistance values from 25 to 5,000 Ω with tolerances of ± 1% thru ± 20% are available and may be specified at 25° C or any temperature within the operating range. The highly stable "D" Series thermistors conform to the AQL and confidence levels specified in MIL-T-23648 as do all **CAL–R** Thermonetics thermal sensing devices.

j series

Composition "J" Disc Thermistors have been designed utilizing a new thermal sensing material called THERMOCERAM.[T.M.] This composition offers a wide range of resistance values (200 to 30,000 Ω) allowing the design engineer condiserable latitude in selecting the specific device required to solve his heat sensing problem.

High stability and a wide range of tolerances to choose from are just two of the many outstanding features of this thermal sensing device.

For additional information please contact factory . . .

CAL-R, INC.
a subsidiary of **CapTech Inc.**
thermonetics *DIVISION*

SPECIAL APPLICATIONS –
CAL–R thermonetics delivers special thermistors to solve unique packaging problems. For more information about special thermistor designs contact your local representative or **CAL–R** thermonetics directly.

CARBORUNDUM® THERMISTORS

MEDIUM SENSITIVITY, NTC RODS

Carborundum thermistors are non-linear (pos. or neg. temperature coefficient) resistors which offer a wide range of temperature-coefficient characteristics. The coefficients available are approximately .3% per degree C to 10% per degree C at 25°C. Carborundum thermistors are bonded ceramically through a high-temperature firing process into disc and rod-shaped bodies in a wide range of sizes to provide the desired resistance values, thermal time and dissipation constants, and temperature coefficients for a wide variety of electrical and electronic circuits.

Our long experience in the design of special resistance devices, together with wide experience in the field of ceramic technology, assures a stable and uniform product to meet your thermistor requirements. All materials used in the manufacture of Carborundum thermistors are of the highest quality. Strict quality control is maintained over all stages of manufacture and a minimum of two calibrations at the specified reference temperature and/or load current is standard.

CARBORUNDUM® THERMISTORS

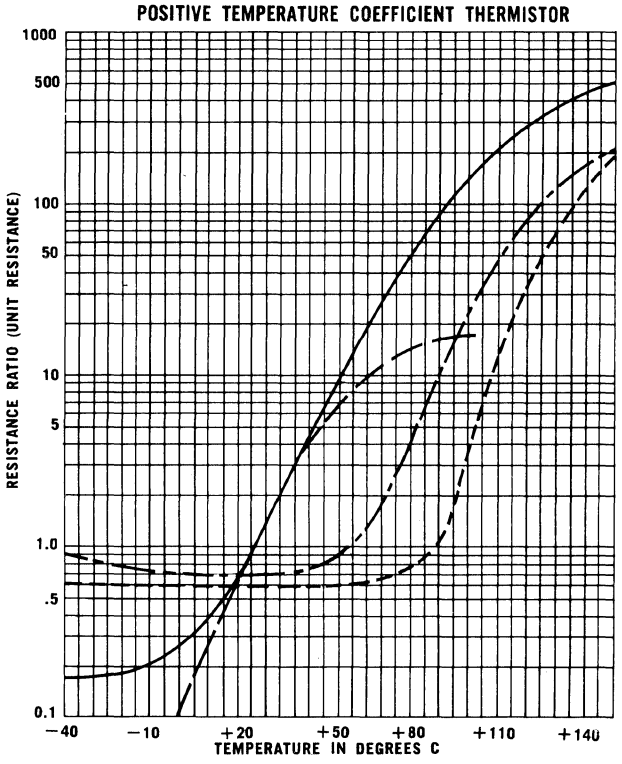
POSITIVE TEMPERATURE COEFFICIENT UNITS

Carborundum's "PTC's" permit simplification of circuit designs, cost reductions or improved systems reliability in applications involving: temperature compensation, time delay, current limiting, over heat protection, temperature control, or level/flow control for industrial, entertainment or military electronics and for industrial or appliance controls.

GENERAL SPECIFICATIONS

Type	Resistances Ohms	Calibration Temperature	Tolerances	RATIO	Temperature Coefficient
A	190-250-325-330-450-600-625-850-1150-1450-2000-2650	25°C	±10% to ±20%	R60°C/R25°C = 14 ±6	8%/°C @ 37.8°C
B	12-20-28-38	90°C	±2.5 ohms to ±13 ohms	R125°C/R90°C = 45 ±15	10%/°C @ 125°C
D	5.9-8K-10.7K 17.5K-24K-32K-36.5K-50K-66.5K-100K-125K	25°C	±10% to ±20%	R25°C/R0°C = 7.2 ±2.5	8%°C @ 25°C
E	28-38-53-80-115-160	60°C	±12.5 ohms to ±40 ohms	R90°C/R60°C + 14 ±6	8.5%/°C @ 90°C



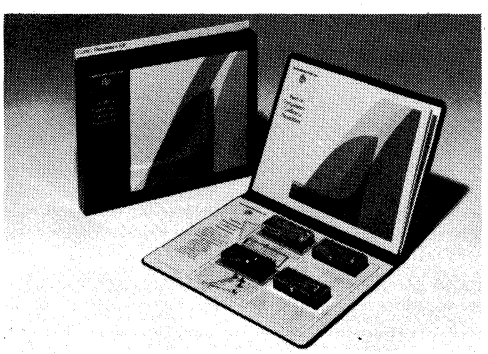
SELF LIMITING HEATERS

PTC Thermistors maintain optimum operational temperatures in communications equipment, operational amplifiers, airborne computers, and similar temperature critical devices. PTC Thermistors are available from Carborundum in a variety of configurations for self-regulating heater applications. In areas where small amounts of heating, fast-response, and noise-less operation are required, these solid-state heaters may be used. Due to the resistance-temperature characteristic of the PTC, additional circuitry is not required to maintain a constant temperature or compensate for ambient changes.

ENGINEERING DATA:

Diameter	.375 to .750 inches
Thickness	.90 to .250 inches
Power Ratings	.25 to 5 watts
Temperature	to 125°C

THERMISTOR SAMPLE ASSORTMENT



Convenient file folder kit contains 16 PTC Thermistors, complete specifications and suggested circuits. The kit includes the most popular PTC characteristics and resistance ranges.

Complete Designer's Kit — $20. Money back if not completely satisfied. Order today from The Carborundum Company Electronics Plant, Niagara Falls, N. Y. 14302.

THERMOCOUPLE SELECTION GUIDE

QC Thermocouples can be ordered quickly and easily by using the step by step procedure outlined on the following pages. If a component is not required, omit that step and proceed to the next. Material selection tables along with technical data should be used when making specific selections. If requirements are known, only the corresponding QC part number needs to be determined.

Our QC application engineers will be happy to select a thermocouple for you based on a complete description of your requirements.

A JUNCTION

When choosing a thermocouple junction, the required response time, compatibility with measured environment and electrical circuits must be considered.

B THERMOCOUPLE WIRE (SENSOR CONDUCTOR MATERIAL)

The thermocouple wire for a specific application is determined by the temperature to be sensed, compatibility of T/C wires with readout equipment, electrical resistance of probe and type of environment. When response time is not critical, larger diameter wires ensure longer life. (See table)

C INSULATION MATERIAL

Standard QC Thermocouples are manufactured with Magnesium Oxide (MgO) which should be used unless special conditions are present. Other insulations available include Aluminum Oxide ($A1_2O_3$) Beryllium Oxide (BeO) and Thorium Oxide (ThO). Insulation resistance and operating temperature are of major importance in choosing the correct insulation material. Other factors include thermal conductivity, compactability and melting point. (See table)

D SHEATH MATERIAL

The maximum operating temperature of a thermocouple, and the environment surrounding it, must be considered when choosing the sheath material. The mechanical requirements and structural rigidity are important aspects of design requirements.

CONTROL PRODUCTS CORPORATION stocks numerous stainless steel alloys, inconel, precious and exotic metal tubing. (See table) Any material that can be made into tubing can be used for sheath material.

E PHYSICAL DIMENSIONS OF SHEATH & WIRE

E1 Standard physical dimensions are listed in table. Other wire sizes and sheath conductor diameters are available upon request.

E2 Required length. Specify inches or feet.

F MOUNTING FITTINGS

F1 The use of any specific mounting fitting depends on application. Stock mounting fittings are listed in table.

F2 Immersion depth. Specify inches or feet.

G TRANSITION OR TERMINATION

Standard terminations are listed. Other terminations are available upon request. The application dictates which is used. Temperature, environment and mechanics are considerations.

H LEAD OR EXTENSION WIRE

H1 The choice of wire depends on ambient temperature, calibration, environmental conditions and the degree of mechanical protection required. Thermocouple LEAD wire is supplied with ISA Standard Limits of Error, the same accuracy as the thermocouple conductors. It should be used whenever lead ambient is in excess of 400°F. Thermocouple EXTENSION wire is supplied with ISA tolerances. It is recommended for low ambient temperatures and in the case of precious metal thermocouples its use substantially reduces the cost of extension cable. Stock lead wires are listed in table. Other lead wires are available on request.

H2 Required length. Specify inches or feet.

J WIRE TERMINATION

Standard terminations available for the thermocouple extension/lead wire are listed on following pages of this catalog. Other terminations are available upon request.

K EXTENSION WIRE

K1 The choice of wire depends on ambient temperature, calibration, environmental conditions and the degree of mechanical protection required. Thermocouple LEAD wire is supplied with ISA Standard Limits of Error, the same accuracy as the thermocouple conductors. It should be used whenever lead ambient is in excess of 400°F. Thermocouple EXTENSION wire is supplied with ISA tolerances. It is recommended for low ambient temperatures and in the case of precious metal thermocouples its use substantially reduces the cost of extension cable. Stock lead wires are listed in table. Other lead wires are available on request.

K2 Required length. Specify inches or feet.

A JUNCTIONS

CODE A1 UNGROUNDED JUNCTION

Comparatively long response time. Measuring circuit electrically isolated from measured medium. Allows maximum life under conditions of vibration, shock and corrosive conditions.

CODE A2 GROUNDED JUNCTION

Faster response time. Long life in corrosive gas, liquids and solids. Good for high pressure application.

CODE A3 EXPOSED JUNCTION

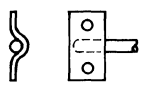
Fastest response time. Recommended for gas or for solid surface measurement in non-corrosive atmosphere.

CODE A4 NECKDOWN THERMOCOUPLE

Fast response with physical strength. Available with above junctions; code becomes A-41, A-42 or A-43. Allows seating for accurate location; specify "L" in inches.

CODE A5 FLAT END THERMOCOUPLE

Tip machined to reduce mass and improve response time. Available with types A-1 and A-2 above; code becomes A-51 or A-52.

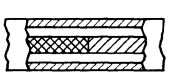


CODE A6 PAD THERMOCOUPLE

For surface attachment. Intimate contact with measured medium. Normally supplied with grounded junction.

CODE A7 MECHANICAL AND FUSED JUNCTION

Recommended for use with high temperature (4600 F.) refractory metal thermocouples. Available with types A-1 and A-2 above; code becomes A-71 or A-72.



CODE A8 SINGLE CONDUCTOR

Designed for extreme temperature, pressure, corrosion and physical stress. Allows maximum thermocouple wire diameter.

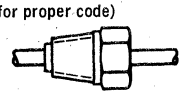
F MOUNTING FITTINGS

(See chart for proper code)

FIXED FITTING



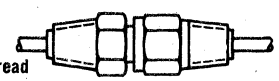
Used for mounting thermocouple assembly for fixed immersion. Fitting brazed to sheath.

Available in brass and stainless steel.

ADJUSTABLE FITTINGS

Single Thread

Double Thread



ONE-TIME ADJUSTABLE COMPRESSION FITTING BRASS

Used where resistance to high temperature and corrosion are not required. Can be used to mount a thermocouple assembly at a given depth or mount a thermocouple head on a thermocouple assembly.

STAINLESS STEEL

Pressure rated to 10,000 PSI. Single or double thread. Single thread can be used for mounting a thermocouple assembly at a given depth, or to connect a thermocouple head to a thermocouple assembly. The double thread can be used for both purposes.

RE-ADJUSTABLE COMPRESSION FITTING

Pressure rated to 10,000 PSI.

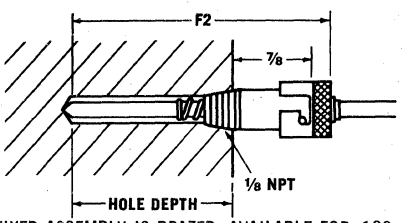
Single or double thread.

Can be reset at different positions along sheath. Neoprene is furnished as standard gland, lava and teflon furnished when specified.

BAYONET FITTING

Includes lockcap, spring and 7/8" long, 1/8" NPT adaptor. Holds thermocouple hot junction firmly against surface to be measured and permits thermal expansion of probe without damage to measuring junction.

Fixed assembly is brazed; available for .188 sheath only.



FIXED ASSEMBLY IS BRAZED; AVAILABLE FOR .188 SHEATH ONLY.

ADJUSTABLE ASSEMBLY USES COMPRESSION FITTINGS — AVAILABLE FOR .125 SHEATH ONLY.

F2 SPECIFY IMMERSION LENGTH IN FEET OR INCHES

G TRANSITIONS OR TERMINATIONS

CODE G1 GLOB WELD TERMINATION

TIG welded seal allows long storage life. Weld can be removed easily and conductor stripped for use with any standard termination.

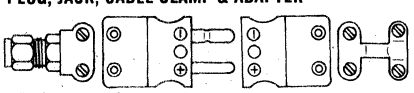
CODE G2 PLAIN STRIP

Standard strip on QC thermocouples will accommodate any type of termination. 1" long for diameters larger than .040. 5/8" long for diameters .040 and smaller. End sealed with silicone compound.

CODE G3 POTTING ADAPTER TRANSITION

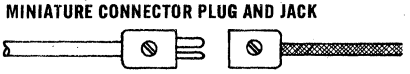
Provides protected transition and strain relief. Thermocouple wires are attached to leads. Available for all probe diameters up to 3/8". Epoxy potting used for temperatures to 400°F. Ceramic cement used for temperatures from 400°F. to 1000°F.

CODE G4—P, J, C & A PLUG, JACK, CABLE CLAMP & ADAPTER



Plug (G4P) and Jack (G4J) constructed of phenolic. Suitable for temperatures to 350°F. ISA color coded and calibration identified. Adapter (G4A) used with sheath conductor and Clamp (G4C) used with lead wire.

CODE G5P, G5J MINIATURE CONNECTOR PLUG AND JACK

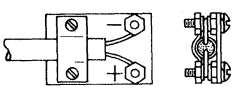


Designed for small diameter thermocouples up to .125 Dia.

Use where space is limited.

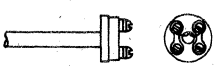
ISA color and polarity coded.

CODE G6 OPEN CONNECTOR BOARD



Phenolic block with hardware for mechanical connection. Polarity identified. For ambient temperatures to 250°F. Inexpensive for lab, test and OEM applications.

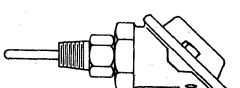
CODE G7 CERAMIC CONNECTOR



Ambient temperatures to 1000°F.

Available for 1/16, 1/8 and 1/4 diameter sheath.

CODE G8, G9, G10, G11 INDUSTRIAL THERMOCOUPLE HEADS

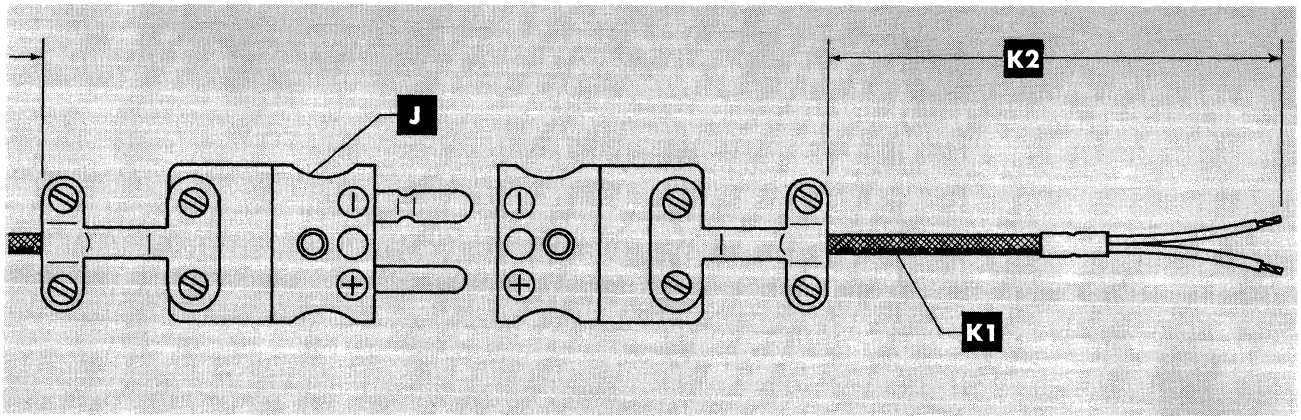


Aluminum or Cast Iron base with gasketed cover. Gasket is heat and moisture resistant.

SCREW COVER TYPE

Recommended for refineries, chemical plants, power generating stations and applications where protection is required against weather or high-temperature corrosive effects. Aluminum or Cast Iron.

	Screw Cover Head	General Purpose Head
Aluminum	G8	G10
Cast Iron	G9	G11



H1 and K1 LEAD AND EXTENSION WIRE

WIRE CONDUCTOR

The most accurate results are obtained when using the same type of lead wire as in the thermocouple. In many applications, as well as in precious metal thermocouples, extension wire may be used.

The most commonly used insulated solid wire is listed in the table below. Stock wire is indicated. Other wire can be furnished upon request.

INSULATIONS PVC/PVC

Polyvinyl is extruded on each bare conductor. A polyvinyl jacket is extruded over the insulated conductors. Offers good resistance to abrasion and moisture absorption. Can be used in temperatures from −20°F to +221°F. Used for outdoor and underground installation.

FELTED ASBESTOS/ASBESTOS BRAID (Asbestos/Asbestos)

Asbestos is woven over parallel insulated conductors. Bare conductors are covered with felted asbestos and asbestos braid jacket. Good for temperatures to 300°F.

SILICONE IMPREGNATED GLASS BRAID/SILICONE IMPREGNATED GLASS BRAID (Glass/Glass)

Each conductor is covered with glass yarn braid then impregnated with modified silicone resin. A silicone impregnated glass braid is applied overall. Moisture absorption resistance is retained to 400°F. Will withstand temperatures to 1000°F.

VITREOUS SILICA FIBER/VITREOUS SILICA FIBER (H-T Glass/H-T Glass)

A braid of vitreous silica fiber is applied to each conductor and overall. For use up to 1600°F. depending upon temperature limit of the wire. Will withstand temperature to 1800°F. if not subjected to flexing and abrasion.

OVERBRAID OR WRAP

Additional physical protection can be supplied by applying an overbraid or spiral metal wrap. Common materials used for this metallic shielding are stainless steel overbraid and stainless steel spiral wrap. Other available insulations include: Polyvinyl-Weatherproof Braid, Teflon-Teflon, Nylon-Nylon and Polyvinyl-Rip Cord construction.

QC SHEATH CONDUCTOR FOR THERMOCOUPLES AND LEAD WIRES

QC SHEATH CONDUCTOR consists of metal conductors surrounded by mineral insulation and covered by a metal sheath. QC is drawn to size and annealed producing an assembly with circular cross-section wires, hard packed high resistance insulation with maximum di-electric strength, high thermal conductivity and an outer metal sheath with the heaviest wall thickness available. Only the finest quality materials are used in making QC SHEATH CONDUCTOR to ensure long service life.

EASILY USED

- QC can be formed about a minimum radius twice its sheath diameter without changing the electrical characteristics of the conductor.
- QC can be brazed or welded.
- QC can be used with standard tube or compression fittings.
- QC conductors can be held to specific wire diameters or resistance.
- QC can be flattened without impairing electrical qualities.
- QC can be spliced for longer lengths.

ADVANTAGES

QC SHEATH CONDUCTOR is available in an almost infinite number of combinations of materials and conductor configurations. Many of the more common are shown in Table. A list of common sheath material, insulation material and conductors is shown in Tables.

QC SHEATH CONDUCTOR offers the following outstanding advantages:

- A heavier wall resulting in increased life of sheath in corrosive or high temperature applications.
- Can be used at temperatures above 1000°F.
- Can be used without additional protection.

These tables contain standard materials and configurations. QC is available in any diameter from .010 to .437. Any sheath and wire material that is malleable can be used in constructing QC. Configurations including square and rectangular cross sections can be provided. QC has been fabricated with as many as 24 conductors. QC can be made with the number of conductors and configurations to meet any requirement.

TABLE I

QC HEATING ELEMENTS

QC HOTWATT heaters are manufactured with the highest quality material and techniques producing elements that have long, dependable operating life with more heat in less space. The densely compacted assembly offers the most efficient heat transfer with the lowest possible temperature gradient between wire and sheath. QC heaters are available in virtually unlimited lengths, in a variety of diameters from .040 up to .430 and in any watt-density required.

SINGLE CONDUCTOR ELEMENTS

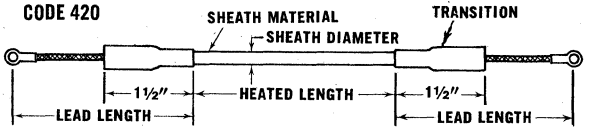
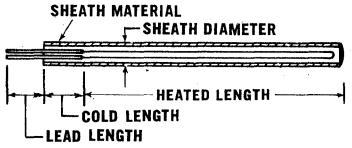
CODE 420

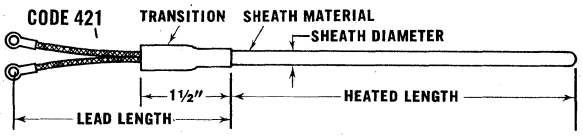


TWO CONDUCTOR ELEMENTS

CODE 411



CODE 421



APPLICATIONS

Typical applications for QC HOTWATT heaters include:

- Heat tracing of pipe lines
- Heating valve mechanisms and other flow controls
- Heating vessels—interior and exterior
- Heating extrusion molding nozzles
- Heating plastic forming machinery
- De-icing of weather instruments
- De-icing of weather-exposed surfaces including sidewalks, roadways and bridges

MATERIALS

Stainless Steel or Inconel sheath, Magnesium Oxide insulation and Resistance wires are the choice materials for most QC heater applications. However, the basic construction is available in whatever materials suit your application. Our engineers will suggest appropriate materials to solve any specific application.

WORKABILITY

- QC HOTWATT Elements can be brazed, welded, clamped or staked in place.
- QC HOTWATT Elements can be formed, coiled and flattened when attached to irregular shaped objects for improved heat transfer.
- QC HOTWATT Elements can be cast, molded and imbedded in machined assemblies, concrete and plastics.

QC REPLACEMENT THERMOCOUPLE ELEMENTS

CONTROL PRODUCTS CORP. supplies all types of General Purpose replacement thermocouple elements and also special purpose assemblies built to exacting customer specifications. QC base metal thermocouples have a junction that is twisted and welded for mechanical strength and long life. QC precious metal thermocouples have butt-welded hot junctions. Standard limits of error will apply to all assemblies unless otherwise specified.

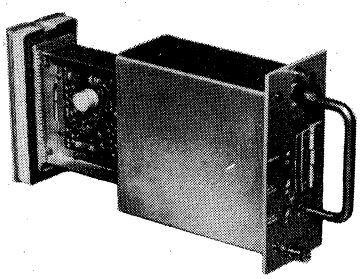
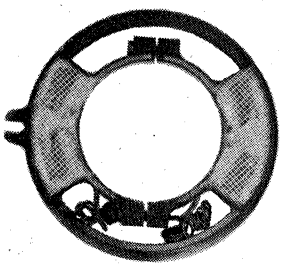
CHICAGO, ILLINOIS 60651
(312) 235-2340

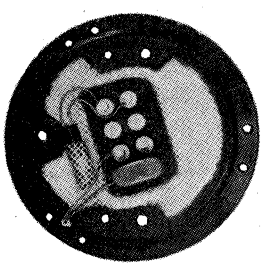
THERMAL ENGINEERING FOR MILITARY AND AEROSPACE REQUIREMENTS

COX & COMPANY, INC. is the largest manufacturer of custom made heating elements and temperature control systems for the aerospace industry. Whatever your problem in temperature control of instruments, electronic equipment, devices, and components, for aerospace and military usage, Cox has probably already solved a similar one. Over 8,500 different designs have been produced, ranging from tiny thermostat anticipator heaters to large fiber glass air inlets for jet engines with integral anti-icing heaters and temperature sensors.

Special oven to hold 60° ±2°C in any ambient from -5 +55°C. Warm-up time 20 minutes max. Designed for plug-in service and immediate access to circuit board for repairs.





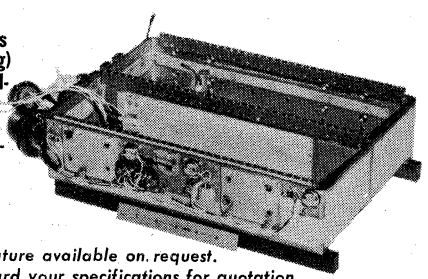


Gyro supports, mass produced for a critical missile program. The metalwork is also supplied by Cox & Company, Inc.

Heater resistance tolerance ±3%

Temperature sensor; resistance tolerance ±.064% at 133°F.

Missile telemetering system chassis (less outer-housing) for 22 plug-in modules maintains temperature stability despite accidental spillage of liquid oxygen.



Literature available on request. Forward your specifications for quotation.

HEATING ELEMENTS

Thermowire(P) and **Thermopatch**(P) heaters afford the maximum reliability for lowest cost and weight.

Over a million heaters have been put in military usage with no reported failures in normal service. These elements are usually cemented on components with Cox Heating Element Adhesive No. 28 (a special epoxy formulation). Designs can be made to fit any shape including compound curvatures and any desired wattage distribution.

Thermolastic heaters are made from a wide variety of special formulations of silicone, neoprene, urethane, and other elastomers, each developed to meet special requirements. For example, Cox Spec. 4500 is specially formulated for use in sealed systems where silicones would be detrimental to slip rings and electrical contacts. They are vulcanized to customers' parts, or furnished flat, or molded-to-shape as required for installation by customers. Under suitable conditions, wattages can be as high as 50/sq. in.

(P) Patented

TEMPERATURE SENSORS

Cox & Company, Inc. produces custom resistance-type sensors of the highest accuracy and stability. They are designed to be cemented in place and can be integrally combined with a heating element, if desired.

TEMPERATURE CONTROL SYSTEMS

Cox & Company, Inc. has the most experienced personnel and the finest facilities for the evaluation of special heating problems. The wealth of accumulated knowledge (over 8,000 designs) enables Cox to meet the most difficult specifications quickly and economically.

OVENS FOR CRYSTALS AND COMPONENTS

Cox & Company, Inc. is a major source of special ovens, custom designed to meet otherwise unobtainable performance requirements. Fast warm-ups, down to 2 minutes from any ambient, and stability within ±.003°C over an ambient range of -65°C to +140°C are examples of performance Cox has designed and produced in large volume.

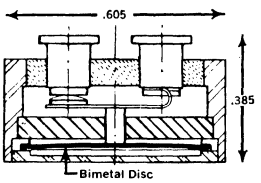
ELMWOOD® SUB-MINIATURE SNAP-ACTION THERMOSTATS

Elmwood thermostats are engineered for quick thermal response. Their heart is the bimetallic snap-acting disc which has proven highly reliable and serviceable over hundreds of thousands of cycles. Elmwood precision thermostats are manufactured and tested to conform to military specifications MIL-E-5272. Nickel plating is standard; other plating available. A variety of brackets and studs, as shown, are standard.

- Many mounting arrangements
- Thermal Range from —65° to +550°F
- Proven Military and Civilian Performance Record
- Narrow or Wide Differential
- Rated to 15 Amps.
- Immediate Delivery
- Custom Packaging

When contacts are closed, current passes from terminal to terminal through the stationary contact to the movable contact, which is actuated by the snap movement of bimetal disc. This disc, which is fully insulated from the switch chamber by the pin and disc retainer, is affected by surface or ambient temperature changes only. Upon reaching the opening temperature, the disc snaps from a concave to a convex shape, releasing the pin which opens the contacts. The open circuit allows the temperature to drop and causes the disc to snap to its original position, closing the contacts. A thermostat which closes on a rise in temperature operates in a similar manner, but in reverse action.



ELMWOOD #3100

DESCRIPTION		ELECTRICAL RESISTIVE VOLTS	AMPS	THERMAL EXPOSURE	DIFF.	TOL.
3001  **Terminal T-123**	Precise, reliable unit for electronic communications, missile and aircraft controls, heater blanket controls and crystal ovens. This inexpensive unit is factory-calibrated, has the highest quality operating parts, a phenolic base and metal closure. These assure maximum dust protection and high thermal and electrical dependability. It is available with a variety of mountings and terminals.	30 AC/DC	6	−65°F to +350°F	Wide 12°F or more STD	Wide ±5°F STD
		125 AC	6		Narrow 6°F Max.	Narrow ±3°F Min.
		250 AC	3		Avail. 80 to 200°F	
3100   **Terminal T-116**	This thermostat is hermetically sealed with high compression glass and heliarc welded steel case. It is so constructed as to withstand the severest environmental conditions such as altitude, shock, vibration and corrosive atmosphere. It has been extensively tested by government agencies, and has been used for many government and civilian purposes, such as aircraft warning controls, de-icing equipment, etc. Ideal for packaging in special enclosures.	30 AC/DC	6	−65°F to +550°F	Wide 12°F or more STD	Wide ±5°F STD
		125 AC	6		Narrow 6°F Max.	Narrow ±3°F Min.
		250 AC	3		Avail. 80 to 200°F	
3150  **Terminal T-109**	Low silhouette SPST switch, hermetically sealed, available narrow or wide differential as standard. Temperature calibrations pre-set at factory, 100% inspected. Open or close on temperature rise. Heliarc welded in steel housing, glass-to-metal seal at terminal junction. Maximum resistance to shock and vibration. Ideal for use in heater blankets, computers, crystal ovens, electronic and radar equipment, gyros, airborne de-icers, etc.	30 AC/DC	4	−65°F to +350°F	Narrow 6°F Max. Avail. 50 to 225°F	Narrow ±3°F STD
		125 AC	4		Wide 12°F or more STD	Wide ±5°F STD
3450  **Terminal T-101**	This inexpensive control unit is designed with either phenolic (up to 300°F) or ceramic base, and has a tight-fitting dust-proof metal closure. It is recommended for applications where its heavy electric construction makes it ideal to control high amperage uses.	30 AC/DC	15	−65°F to +350°F	10°F Min.	±5°F STD
		125 AC	15			
		250 AC	8			
3700   **Terminal T-130**	A precision, single-pole double-throw, hermetically glass sealed, heliarc welded thermostat that is engineered to instantaneously reverse a signal from one circuit to another. Airborne and ground control equipment are ideal uses for this highly reliable thermal switch.	30 AC/DC	2	−65°F to +350°F	12°F Min.	±5°F Min.
		125 AC	3			
		250 AC	2

EXAMPLES OF CUSTOM PACKAGING

Write or phone for individual consultation with Elmwood's thermal engineers for special applications.

SAMPLES AND ORDERING In order to facilitate furnishing of proper samples, the following information will be required:

APPLICATION
Description — military, electronic, commercial
Function — limit, control
Environmental conditions — moisture, shock, vibration, etc.

TEMPERATURE EXPOSURE
Maximum, minimum

LOADS, MOUNTING
Resistive or inductive
Amperage and voltage
Mounting — see diagrams above

CALIBRATION
Normal operating temperature
Opening tolerance
Differential
Closing tolerance

Elmwood also features a U.L. approved line of low-cost thermostats for Commercial Applications. Ask for Folder.

THERMISTORS from FENWAL ELECTRONICS

Broadest Thermistor Line Available Anywhere

1. GLASS COATED BEADS — used where small size, fast response, high precision, stability, and temperatures to 600°F are required.

2. GLASS PROBES — medium-small in size. Many of the advantages of beads but rugged, more easily mounted, useful in liquid media.

3. ISO-CURVE* INTERCHANGEABLE THERMISTORS—these units available in bead or glass probe configuration, follow standard curves over wide temperature range, and are completely interchangeable. Units match standard curves as close as ±½% of resistance or as required.

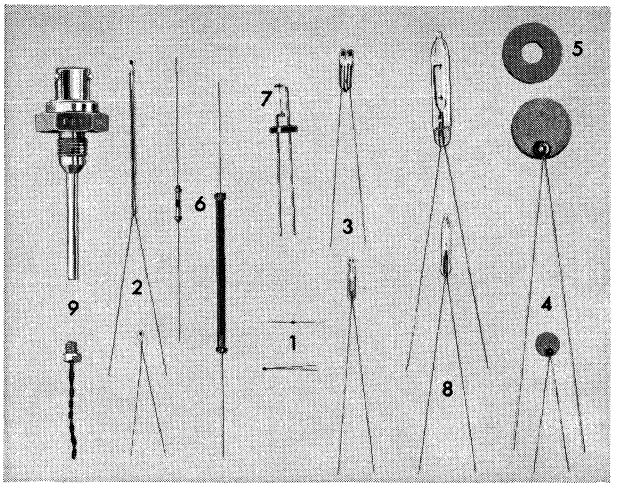
4. DISCS — used where medium power dissipation is a requirement and space not a problem. Useful to 300°F.

5. WASHERS — used where high power dissipation is a prime requirement.

6. RODS — these units have power dissipation intermediate between discs and washers and are also used where their physical shape is an asset.

7. MOUNTED BEADS — provide ease in using glass beads in such applications as gas chromatography, flow and vacuum measurement, etc.

8. VACUUM AND GAS FILLED ASSEMBLIES — high power sensitivity for specialized circuit applications.



9. PROBE ASSEMBLIES — standard catalog types or built to specific military or commercial requirements. We are experienced in design of probe assemblies for all fields of application including industrial control and indication, aerospace — specializing in telemetry applications, and oceanographic — featuring fast response, very high pressure, and interchangeability using our Iso-curve Thermistors.

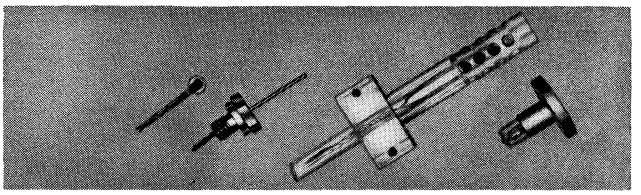
ISO-CURVE® Interchangeable Thermistors

F.E.I. Iso-curve* thermistors are special bead and glass probe thermistors that have been precision matched at the factory to standardized resistance-temperature curves. They have the unique and valuable characteristic of complete electrical interchangeability. In addition they offer all of the functional advantages associated with standard thermistors, including large resistance change per degree of temperature change which provides high accuracy and resolution.

Thermistors are normally rated by the value of their resistance at 77°F Standard units having the same rated resistance, however, will not exhibit identical resistance-versus-temperature characteristics over their full temperature range. Iso-curve thermistors, on the other hand, will match a specified R-T curve over full temperature range required. Iso-curve thermistors are available at the present time in five standardized R-T curve values, 370, 2K, 4K, 15K, and 100K. These standard curves represent permanent specifications and an F.E.I. Iso-curve thermistor purchased five years from now will be perfectly interchangeable with one of the same value purchased today.

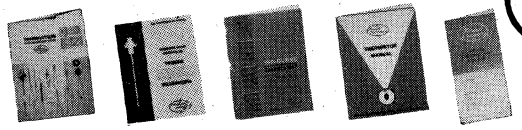
*MADE UNDER PAT. 3109227 AND OTHERS. ISO-CURVE IS A TRADEMARK OF F.E.I.

Thermistor Probe Assemblies



Standardized thermistor assemblies, provided in complete, ready-to-mount housings, enable you to take advantage of the precision and interchangeability of Fenwal Electronics thermistors. A complete line of thermistor probes is available for a variety of missile, aircraft, and industrial applications, including liquid level indication and control, temperature measurement and control of fluids and gases and many other applications. Precise calibration can be supplied with individual probes at all desired temperatures. Completely interchangeable probes with identical resistance-temperature curves are available to any desired tolerance down to 0.1°C over the full temperature range. Most of these housings can be made to meet military specifications if required.

Here's help in applying F.E.I. Thermistors . . .



"Thermistors: Their Characteristics and Uses." Detailed bulletin gives basic information and many applications. Bulletin L-1.

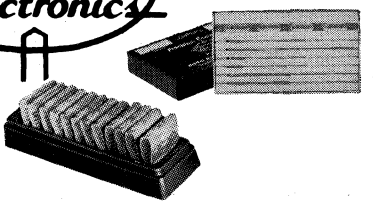
Thermistor Housing Manual (L-5). Detailed information on how Fenwal Electronics, Inc. can build thermistor sensor assemblies to fit your requirements.

Iso-Curve Thermistors (L-2). Complete data on patented interchangeable units with identical resistance/temperature curves.

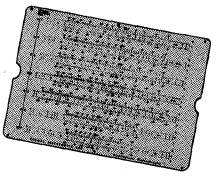
Thermistor Manual (EMC-5). Most complete up-to-date listing of thermistors available. Theory, engineering data, complete specifications.

New 24-page Capsule Thermistor Course Book. A complete primer on thermistors, their characteristics and uses.

Fenwal Electronics



Thermistor Experimental Kits — to help you expedite operations at the breadboard stage. Left: G-200 kit containing 12 different thermistors with complete specs. PRICE $19.95. Right: G-700 containing four. PRICE $4.95.



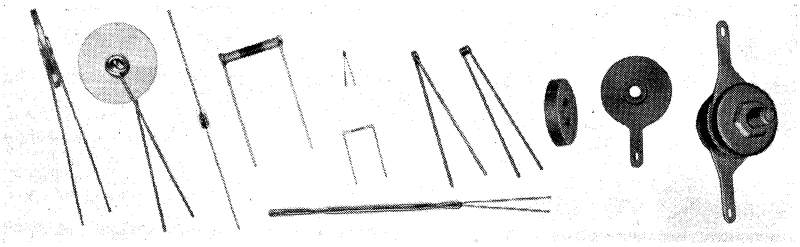
Thermistor Data & Curve Computer — (G300A) Provides resistance temperature characteristics for all F.E.I. Thermistors. Simplifies selection of the right thermistor for every application. PRICE $1.50.

FENWAL ELECTRONICS, INC. 63 FOUNTAIN STREET, FRAMINGHAM, MASS. 01701 • (617) 872-8841

THERMISTORS

- *For Temprature Measurement*
- *For Temperature Compensation*
- *For Temperature Control*
- *For Time Delay*

Thermistors are thermally sensitive resistors for the automatic detection, measurement, and control of physical energy. They are electronic semiconductors whose electrical resistance varies with temperature, and lies between that of conductors and insulators. An important distinction between Thermistors and other variable resistance materials is their extreme sensitivity to relatively minute temperature changes. Catalog standard grades are available in sensitivities from 3.37% per degree C to 5.06% per degree C at 25 C.



TYPICAL THERMISTOR UNITS

Type	Diameter in Inches	Resistance Ohms at 25 C	Resistance Ratio R25/R125	Max Operating Temp. Degrees C
Disks	0.050—1.0	1—200,000	12.95—48.78	150
Rods—Standard	.050—.173	200—1,000,000	12.95—48.78	150
Washers	.75	1—4,150	12.95—48.78	150
Washer Assemblies	.75	1—4,150	12.95—48.78	150
Beads	.043	2,000—1 megohm	29.85—51.5	275
"H"-Series (Hermetic Seal)	.070	2,000—1 megohm	19.80—48.78	275
Probes—Bead	.1	2,000—1 megohm	29.85—51.5	275
"H" Series	.150	2,000—1 megohm	19.80—48.78	275
PTC	.070	47—470	0.5	150
Diamond Thermistor	.070	3,685-40, 150 at 125°C	2.35 at 125°C/200°C	450/650

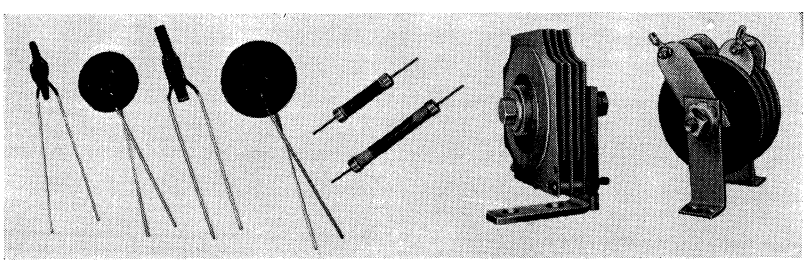
THYRITE® VARISTORS

- *For protection against voltage surges.*
- *As a stabilizing influence on circuits supplied by rectifiers.*
- *As a potentiometer (the division of voltage can be made substantially independent of load current).*
- *For the control of voltage-selective circuits, either independent of, or in combination with, electronic devices.*

Thyrite is a nonlinear resistance material in which the current varies as a power of the applied voltage. Because of this notable electrical property, Thyrite has found important applications in the electric-power, communications, and electronic industries.



TYPICAL THYRITE VARISTOR UNITS

Type	Diameter in Inches	Continuous D-C Voltage	Continuous Power Rating, Watts	Discharge Capacity, Watt-Seconds
Disks	0.5—1.125	15—300	0.250—1.5	30—275
Rods	.250	150—3,300	.25—.4	—
Washers	3—6	7—1,500	3—10	1100— 22,500
Washer Assemblies	3—6	6—600	3—240	1100—540,000
Medium Voltage Assemblies	3	1,500—10,500	3.5—24.5	9250— 64,750

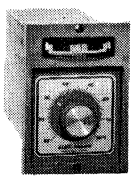
HARREL PRECISION TEMPERATURE CONTROLS

PROPORTIONAL TEMPERATURE CONTROLLERS

★ **RELIABLE: Completely solid state. No tubes, moving parts, or relays to wear out.**
★ **TRUE PROPORTIONAL CONTROL: Steady flow of power to heater. True stepless control.**
★ **HIGH EFFICIENCY: Efficiency in excess of 96% at full load.**
★ **THERMAL LOOP COMPENSATION: High sensitivity and proportional-plus-automatic-reset, or proportional-plus-rate-plus-reset action eliminates "droop" and permits closer temperature control.**
★ **HIGH POWER: From a few watts to 300 KW; single phase or three phase; 115, 230, or 480 volts.**
★ **ANY TEMPERATURE RANGE: Control either heaters or coolers from −200° to +1100°C.**

PANEL MOUNT CONTROLLERS

General purpose controllers arranged for easy front panel mounting in packaging machinery, plastics machinery, test fixtures, etc.



SINGLE TURN DIAL: Convenient direct reading dial for general purpose use.

TEN-TURN, DIRECT READING DIAL: Higher sensitivity than above plus 10-turn setting potentiometer for even closer temperature control. Direct read-out of temperature on large, 4½" dial.

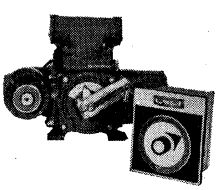
DIGITAL DIAL: Ten-turn potentiometer plus digital dial with 15/32" high numerals readable from 30 ft. away! Includes front panel on-off switch, pilot light and power output meter.

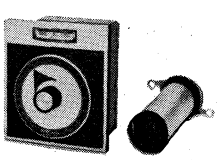
HEAVY DUTY PROCESS CONTROLLERS

Heavy duty, three mode controllers offering proportional-plus-rate-plus-reset action. For chemical processing, large furnaces, etc., where long time lags are involved.

PROPORTIONAL VALVE CONTROLS

For process control applications where temperature is varied by means of motor-driven proportional valves. Three mode, heavy duty construction.



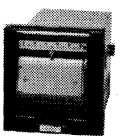


INFRARED SENSING

Where temperature must be controlled without touching the controlled body. Temperature ranges 25°C to 3000°C.

RECORDING CONTROLLERS

Provide permanent record of controlled temperature.



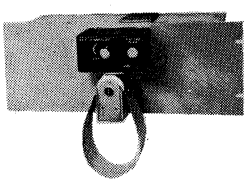
PROGRAMMABLE TEMPERATURE CONTROLLERS

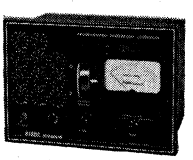
COMPUTER PROGRAMMED CONTROLLERS

Temperature set and monitored by a digital Computer.

TAPE PROGRAMMED CONTROLLERS

Temperature stored on punched tape. May follow any arbitrary program.





ARBITRARY FUNCTION PROGRAMMER

Program set on front panel dials.

Plus Cam Programmers, Switching Type Programmers, and Slope Generator Type Programmers.

FIXED TEMPERATURE CONTROLLERS HIGH RELIABILITY MILITARY TYPES

A-C OPERATED: Precision temperature control to a single selected temperature. Ideal for close temperature control of floated gyros, delay lines, or other military or industrial applications.

D-C OPERATED: For aircraft or missile operation, where the primary power source is d-c.

D-C OUTPUT: Output is pure d-c for applications such as gyro test tables where noise output of relay or standard proportional controller is objectionable.

RFI-FREE CONTROLLERS

Entirely solid state. Unique circuitry ensures freedom from radio frequency interference.

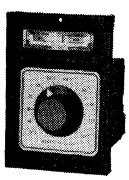
ADJUSTABLE, INDICATING: For use wherever nearby communications and low-level measuring equipment makes elimination of conducted and radiated interference essential.

FIXED TEMPERATURE: For military applications where elimination of RFI is required.

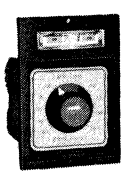
SPECIAL PURPOSE CONTROLLERS

HEATING AND COOLING CONTROLLERS: Bidirectional, time proportioning for control of both heating and cooling by use of solenoid valves or mechanical refrigeration. Entirely solid state.

CONTROLLERS FOR THERMOELECTRIC COOLING: Bidirectional controllers for control of heating and cooling using thermoelectric elements.

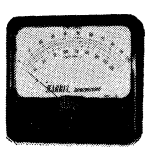


HUMIDITY CONTROLS: Precision control of humidity in test chambers, environmental equipment, etc.

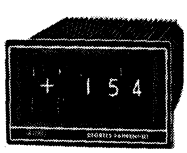


RELAY STYLE CONTROLLERS: Completely solid state except for output relay. Off-on or time proportioning. For minimum initial cost.

TEMPERATURE INDICATORS



PANEL STYLE INDICATORS: Available either as temperature indicator or temperature deviation indicator.

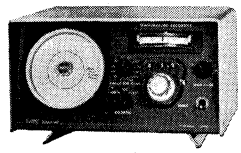


DIGITAL STYLE: Direct digital read-out of temperature in large, 5/16" numerals. Automatic polarity change. BCD electrical output optional.

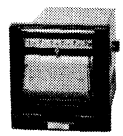
TEMPERATURE ALARMS

Continuous monitoring of temperature at a remote point. Initiates high or low alarm whenever temperature deviates more than a prescribed amount.

TEMPERATURE RECORDERS



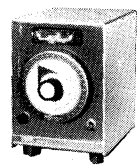
LABORATORY TYPE: Expanded scale readout spreads ranges as small as 2/3°C over entire scale. Eleven ranges give 0.02% accuracy.



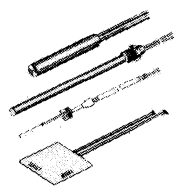
PANEL MOUNT, STRIP CHART TYPE: For continuous indication and recording of temperature at remote points.

CABINET STYLE CONTROLLERS

All Harrel controllers are available in an attractive, two-tone gray cabinet, complete with pilot light, on-off switch, & fuse. Convenient tilting bail for easy bench viewing.

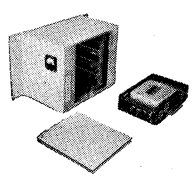


TEMPERATURE SENSORS



Wire type resistance sensors provide maximum sensitivity, linearity, & long term stability. Available in patch type for surface measurement, tubular styles, bayonet mount styles, or for air sensing.

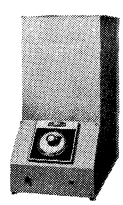
TEMPERATURE CONTROLLED ENCLOSURES



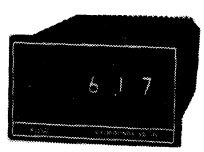
Complete oven systems including controller, sensor, heaters, and enclosure. Ideal for maintaining constant temperature of filters, crystals, delay lines, transistor amplifiers, or other critical electronic equipment.

OIL BATHS

Highest precision, reference grade oil baths for calibration or for maintaining temperature of standard cells, zener references, etc.



PRESSURE INSTRUMENTATION



A complete line of pressure indicators, pressure recorders, pressure alarms, and pressure sensors.

PLUS . . . complete temperature control systems and consoles. SEND US YOUR REQUIREMENTS.

Keystone CARBON COMPANY THERMISTORS

DISC, ROD & BEAD TYPES

THERMISTOR DIVISION • ST. MARYS, PA.

Keystone manufactures thermistors in a wide range of resistance values, temperature coefficients and physical sizes. Over 400 standard types are described on the following pages. Ranging from small beads to large discs, these thermistors provide a broad selection for every application.

In addition to the units shown on these pages, Keystone can help you in your special requirements. Stainless steel, silver, nickel or ceramic probes can be designed to fit your specifications.

Keystone can work with you to provide a wide variety of lead configurations.

Thermistors may be mounted on plates, clips, mounting tabs or heat sinks.

Glazes, silicone varnishes, enamels or durez may be applied when a particular situation calls for a coating.

If the maximum operating temperature in your application exceeds the limit of the units shown, call Keystone. Many of the units shown here are available in versions capable of higher operating temperatures.

If your requirements cannot be met by a unit on the following five pages, call us. We have over 2,000 more types from which to choose and make a recommendation.

Keystone CARBON COMPANY

KEYSTONE LOW-COEFFICIENT THERMISTORS

For applications such as coil compensation which require a low temperature coefficient thermistor Keystone offers the low coefficient, series 2 group of thermistors listed below. To specify a unit on this list, specify the code number followed by the resistance at 25°C. For example, a 1RS1-100 is a disc, .2" diameter, and .1" thick having a resistance of 100 ohms ±10% at 25°C. Various coatings, tolerance patterns and lead configurations are available on request.

CODE NUMBER		1RS1	2RS1	3RS1
TYPE		DISC	DISC	RECT. ROD
STANDARD LEAD CONFIGURATION				Leads		AWG 20 (.032 Dia.)	AWG 20 (.032 Dia.)	AWG 24 (.020 Dia.)

1800	1.88	650	100	2900
1900	1.98	1000	150	4200
2000	2.07	1400	220	6000
2100	2.17	2000	330	9000

*BETA is calculated between the temperatures of 37.8 and 104.4°C. Tolerance on Beta is ±15% for Betas of 1000°K to 1100°K and ±10% for Betas of 1600°K to 2100°K.

Standard Resistance Tolerance is ±10% @ 25°C. Other Tolerances are available upon request.

Standard Thermistors are supplied without coating.

Maximum Operating Temperature: 150°C.

Lead Lengths conforming to printed circuit requirements are available on request.

Units on this list are available in the three lead configurations shown above. Standard tolerance is ±10% at 37.8°C, with ±10% @ 25°C also available. Tolerance on resistance ratio is ±.3. Maximum operation temperature is 150°C. To specify a unit on this list, first indicate RL, OL or AL for lead configuration. Next list the row number, the column number and the number 1 for series "1". If the tolerance is to be at 25 rather than 37.8, add a "T". For example, an RL23SIT is a unit having radial leads and a resistance of 54000 ohms ±10% at 25°C.

Keystone CARBON COMPANY

MOLDED-IN-LEAD BEAD AND ROD THERMISTORS

Using a technique developed at Keystone, these units feature leads which are molded directly into the body of the thermistor. This technique yields a more reliable thermistor and by eliminating several operations permits lower prices. These units are particularly intended for applications where small size and fast response are major requirements.

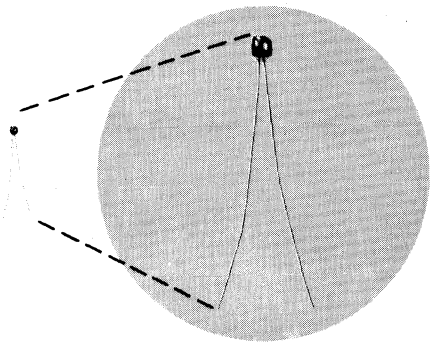
* These units processed for operation to 150°C maximum; All others, to 260°C Max.



Physical size: .055″ dia. max., .075″ long max.
Leads: .004″platinum, ½″ long
Dissipation Constant: 0.6 MW/°C Approx.
Time Constant: 7.5 seconds Approx.
All units are coated with a protective green glaze.

Dissipation Constant: 2.8 MW/°C Approx.
Time Constant: 35 seconds Approx.
Maximum Operating Temperature: 260°C.
All units are coated with a protective green glaze.

CRYOGENIC THERMISTORS

TYPE	For Operation In Liquids	Resistance	Temperature Coefficient
RL10X04-10K-315-S5	Oxygen	10K	− 8.4%/°C
	Nitrogen	31.5K	−10.4%/°C
RL06X0628-31.7K-315-S5	Oxygen	31.7K	− 8.4%/°C
	Nitrogen	100K	−10.4%/°C
L0904-6.6K-H-T2	Hydrogen	6.6K	−13.0%/°C
L0904-125K-H-T2	Hydrogen	125K	−17.0%/°C
L0904-180K-H-T2	Hydrogen	180K	−18.0%/°C
L0904-100K-HE-T2	Helium	100K	−275 %/°C
L0904-3meg-HE-T2	Helium	3 meg.	−300 %/°C

Physical size of these units is approximately .1″ diameter, and .04″ thick, except the RL06X0628, which is a rod, .06″ square and .28″ long.

Low Temperature Types — Designed for operation in various cryogenic liquids these units are especially useful for liquid level detection. In this type of application the thermistor is slightly self heated by passing a small current through the unit. The heat developed in the unit is dissipated more rapidly in the liquid than when the thermistor is above the liquid. The resulting change in body temperature results in a change in resistance which is easily detected because of the high temperature coefficient of the thermistor. The units listed in the table are standard low temperature thermistors.

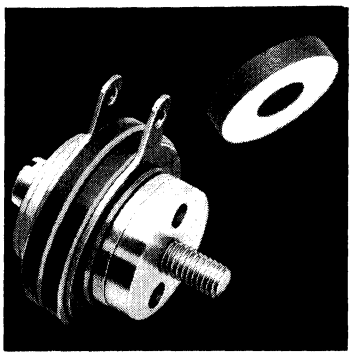
CARBON COMPANY



WASHER THERMISTORS

In situations where a thermistor is required to handle a relatively large amount of power, Keystone washer type thermistors provide a means of obtaining high power handling capability in a small, economical package. In addition, washer type thermistors are also very useful where mounting conditions do not permit the use of conventional component mounting methods.

Maximum operating temperature 150°C.
Standard units are supplied without leads.
Units are uninsulated.

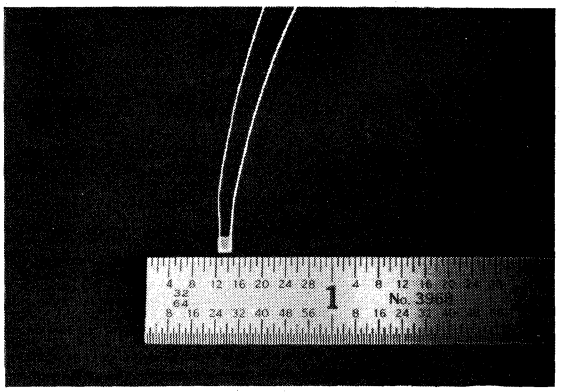
Gulton THERMISTORS

3 good reasons to look to Gulton for Thermistors

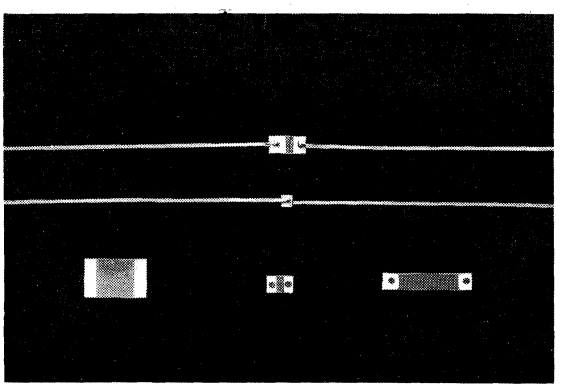
The broadest line of Interchangeable Thermistors

- Values from 1 through 100 K yield precision tracking from -55°C to +150°C



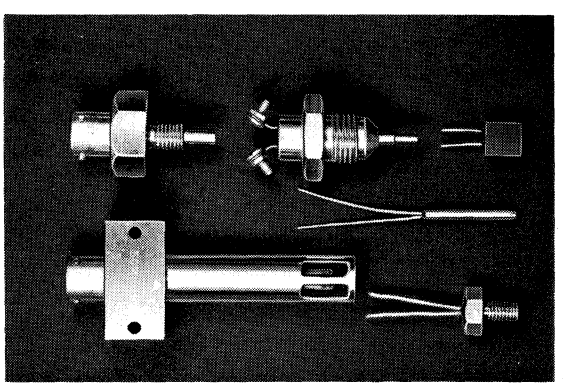
The only manufacturer of Chip Thermistors

- Small in size . . . ideal for tomorrow's microcircuits
- Values from 10 ohms to 10 megohms
- Terminations. . . Kovar tabs, gold plated nickel ribbon or silver



The greatest variety of Thermistor Probe Assemblies

- Standard or custom designed to your specifications
- For aerospace to medical applications
- From oceanography to lunar landings



Gulton manufactures a complete line of thermistors. . . beads, beads-in-bulbs, beads-in-probes, discs, rods and wafers. For information on Gulton thermistors, write to the Thermistor Department at the address below. In addition, Gulton engineers are available to discuss your thermistor requirements, and when necessary, to custom design thermistors and probes for your unique application.

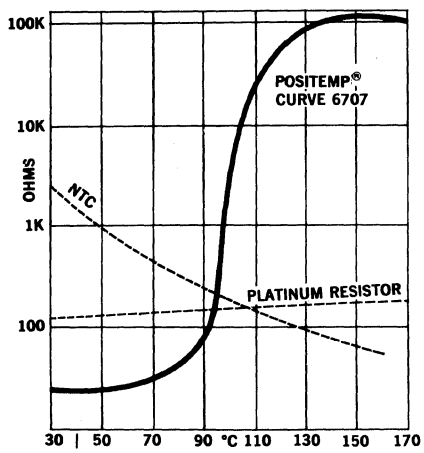
SOLID STATE Temperature Control Elements, Temperature Sensors, Current Limiting Devices and Self-Regulating Heaters

POSITEMP® THERMISTORS



Curve 6707 compares the functional behavior of three basic types of temperature sensors. The "switch" point – point at which resistance rapidly increases – of *POSITEMP® thermistors* gives circuit designers *more accurate control* in simplified circuitry with high reliability.

Designers may select their own switch point in 10°C increments throughout the temperature range of −15°C through +195°C.

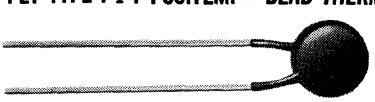
Simple to use and reliable for the most critical design applications, *POSITEMP devices* are finding increasing use as *self-regulating heaters*. THERMOFUZE *current limiters* and *automatically recoverable fuses* also utilize this same novel materials phenomena.

Special for Designers

You can try three of any standard type PET devices for our minimum order charge of $10.00. Pick your operating temperature 10°C increments from −15°C to +195°C.

PET TYPE 81-T POSITEMP® HEATER

PET TYPE 71-T POSITEMP® BEAD THERMISTOR



PET TYPE 1-T POSITEMP® CIRCUIT ELEMENT

PET TYPE TP-01 POSITEMP® PROBE

APPLICATIONS FOR POSITEMP® AND THERMOFUZE DEVICES

Solid State Heaters – Self-regulating heaters for a wide variety of applications. May be attached directly to electronic components. Ratings ½W, 1W, to as much as 10 Watts.

Temperature Measurement and Control – Built-in over temperature protection with excellent stability and extremely good accuracy and reliability.

Flow Detection – Unique properties of PET devices makes them ideally suited for air flow or liquid flow detectors.

Current Limiting – THERMOFUZE and POSITEMP® devices may be used to limit current, or may be used as automatically recoverable fuses, in electronic circuits. Voltages to 250 volts. Switching times of 100ms to 30 seconds.

Liquid Level or Temperature Control – POSITEMP® sensors enclosed in metal sheaths or probes are used for liquid level detection and control, and for temperature control of liquid systems.

Join the growing body of designers who are looking to PET devices for simpler and more reliable solutions to their design problems. **Call our representative in your area, or call the factory for design assistance.**

American Beauty

SOLDERING IRONS AND SOLDERING ACCESSORIES

Specify voltage, wattage and other options on each order. If your plug needs differ from standard — plug cap on 2-wire cords, NEMA-type plugs on 3-wire cords — specify plug manufacturer's name and catalog number.

LITTLE DANDY

The economy-priced miniature iron that stands up to production line conditions. Steel cored heating element with non-ceramic insulator. Molded handle, aerated finger grip (impervious to oil, perspiration). Balanced, non-roll design. Plug type tips.

Cat. No.	Wattage Std.	Wattage Spec.	Tip Dia.	Shpg. Wt.	Net
3108	20	25/30	1/8"	1/2 lb.	$4.70
3110	25	30/35	3/16"	1/2 lb.	4.70
3112	40	50/60	1/4"	1/2 lb.	6.25

NOTES: Three wattage options each model (3108: 20, 25, 30. 3110: 25, 30, 35. 3112: 40, 50, 60.) For 3-wire cord with NEMA plug, add "S3" to catalog number and $0.70 to price.

BANTAMS

Small irons of traditional American Beauty quality in various inputs and tip diameters.

Cat. No.	Wattage	Tip Dia.	Shpg. Wt.	Net
3114	60	1/4"	1 lb.	$8.00
3118	30	1/8"	3/4 lb.	6.35
3118-X	50	1/8"	3/4 lb.	7.15
3118-XP	50	1/8"	3/4 lb.	7.15
3118-SC	30	1/8"	3/4 lb.	6.35
3118-SCP	30	1/8"	3/4 lb.	6.35
3120	30	3/16"	3/4 lb.	6.35
3120-X	50	3/16"	3/4 lb.	7.15
3120-XP	50	3/16"	3/4 lb.	7.15
3120-SC	30	3/16"	3/4 lb.	6.35
3120-SCP	30	3/16"	3/4 lb.	6.35

NOTES: In above catalog numbers, "X" means "extra heat for continuous duty only; "SC" means "short casing"; "P" means "pencil type handle". For 3-wire cord with NEMA plug, add "S3" to catalog number and $1.40 to price.

B-SERIES IRONS

Best miniature at any price. Advanced design. Precise balance, floating element for fast heat recovery. Boxed with 3 assorted tips.

Cat. No.	Wattage	Tip Point Diameter	Shpg. Wt.	Net
B-2000L	22.5	*	1/2 lb.	$10.25
B-2000P	22.5	1/8"	1/2 lb.	10.25

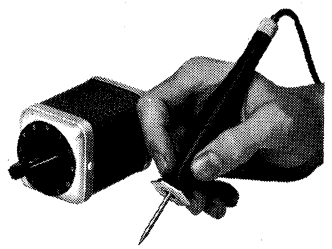
3128-A	60	75	1/4"	1 lb.	8.00
3138-A	100	130/150	3/8"	1 1/4 lb.	11.20

NOTES: "X" in catalog number means "extra hot, for continuous duty only." For 3-wire cord with NEMA plug, add "S3" to catalog number and $1.40 to price.

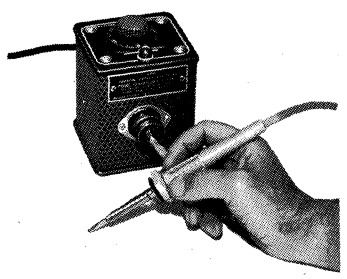
TRANSFORMER TYPE IRONS



Use these American Beauties where isolation from line voltage is necessary. Heating elements in tips for quick tip heat changes. T-6 has variable heat dial. T-12 and T-30, non-variable.

Cat. No.	Wattage Std.	Wattage Spec.	Tip Dia.	Shpg. Wt.	Net
T-6	Variable		9/64"	1 1/2 lbs.	$22.75
T-12E/W T-1216	17	20.	1/16"	1 1/2 lbs.	15.50
T-12E/W T-1218	17	20	1/8"	1 1/2 lbs.	15.50
T-12E/W T-1225	17	20	1/4"	1 1/2 lbs.	15.50
T-12E/W T-1232	12	—	3/32"	1 1/2 lbs.	15.50
T-30E/W T-3016	30	25	1/16"	2 lbs.	17.40
T-30E/W T-3018	30	25	1/8"	2 lbs.	17.40
T-30E/W T-3025	30	25	1/4"	2 lbs.	17.40
T-30E/W T-3032	12	—	3/32"	2 lbs.	17.40

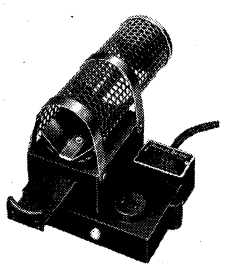
V-3000 SYSTEM



New type system dependably dials and maintains any tip temperature from 350° to 750°. High reserve for fast recovery. Iron is 40-watt, uses any 3/16" plug type tip.

Cat. No.	Wattage	Shpg. Wt.	Net
V-3000	Variable	5 lbs.	$42.00

TEMPERATURE REGULATING STANDS



Maintain soldering iron at preset temperature during idle and intermittent use. Minimizes warmup, prevents over-

American Beauty

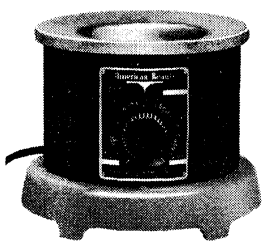
SOLDERING IRONS AND SOLDERING ACCESSORIES

heating, saves current. Pilot light. Adjustable to length of iron.

Cat. No.	Use	Shpg. Wt.	Net
475	For 100W-600W irons	3¼ lbs.	$10.35
476	For 30W-85W irons	3¼ lbs.	10.35

NOTES: For perforated guard (as shown) add "SG" to catalog number and $1.40 to price. Standard cord is HPD; if you want either 2-wire or 3-wire SJO cord specify on order.

GENERAL PURPOSE SOLDER POTS

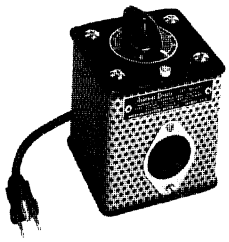


Crucibles of cast iron, chemically stable to keep solder pure. Center tapped for dross skimmer or extra fixturing. Wide lipped for extra fixture mounting. Shallow; 1½" deep. Heat solder to 400° in 15 minutes — 750° in 25 minutes. Adjustable, direct reading thermostat.

Cat. No.	Solder Capacity	Shpg. Wt.	Net
300	1 lb.	6½ lbs.	$30.40
301	(Same as NO. 300, with dross skimmer)	6½ lbs.	33.40
600	2½ lbs.	9 lbs.	31.90
601	(Same as NO. 600, with dross skimmer)	9 lbs.	34.90

NOTES: Standard cords are 2-wire SJO; for 3-wire cord, add "S3" to catalog number and $1.40 to price.

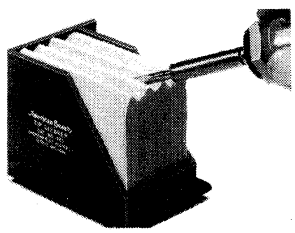
INFINITELY VARIABLE POWER CONTROL UNIT



Dials and accurately controls soldering iron tip heat. (Also reliably controls small motor speeds.) Wattage: zero to 125W; infinitely variable, stepless. Fused. Pilot lighted.

Cat. No.	Shpg. Wt.	Net
477	3¾ lbs.	$17.00

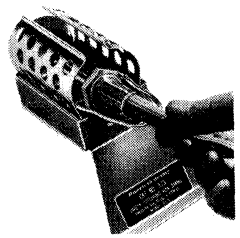
ONE-PASS TIP CLEANERS



Cleans all sides of tip in one motion. Eliminates tip damage, linting, stray solder pellets. Rubberized base, bored for mounting.

Cat. No.	Descrip.	Shpg. Wt.	Net
480	Complete set	½ lb.	$2.25
480-S	Sponges only (ea.)	3 oz.	.16

SAFETY SOLDERING IRON STAND



Gravity controlled. Opens, closes automatically. Operator doesn't look up from work. Accommodates all miniature irons.

Cat. No.	Descrip.	Shpg. Wt.	Net
575	Soldering Stand	1 lb.	$3.00

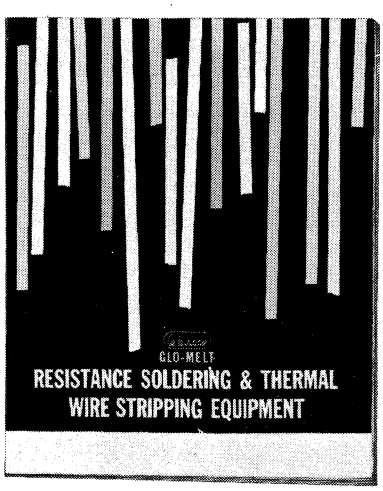
PARAGON QUALITY SOLDERING TIPS

Iron clad tips. Outlast unclad tips many times. Pretinned; point retins self as it works. Clad shank does away with pitting, scaling. Overall chromecoat and minute tapering make tip drip-proof, freeze-free.

ORDERING: Use American Beauty Catalog No. TC-2. Or order tips by carefully specifying shank diameter, overall length, and style of point (diamond, chisel, screwdriver, cone).

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

RESISTANCE-TYPE SOLDERING & THERMAL WIRE STRIPPING EQUIPMENT



Complete, single source for newest equipment from simplest to most sophisticated

RESISTANCE-TYPE SOLDERING

Power units, control consoles, handpieces, accessories . . . Basic building blocks for your automated soldering systems

THERMAL WIRE STRIPPING

Combinations of power and control units, handpieces and accessories for fast, nick free stripping of thermoplastics and other heat strippable insulations

AMERICAN ELECTRICAL HEATER COMPANY

BURNDY

INSTALLATION TOOLING

Tooling is a final and very important consideration in the selection of a connection or termination method. So that the user may utilize the full quality designed into a Burndy connector or terminal, Burndy has designed tools to accomplish a connection or termination to the optimum degree.

Dependent upon his needs, a customer may order a hand tool, a semiautomatic tool, or a high-speed automatic tool. Burndy installation tooling is designed for utmost versatility. Hand tools as well as semiautomatic tools with removable dies permit work on a variety of contacts. Our automatic tools permit the same flexibility with a minimum amount of down-time required for changeover.

In the course of the last thirty years, Burndy has developed tools and dies to connect everything from #32 to 3,000,000 circular mil wire in production quantities from the occasional to well into the millions. The result: a tooling diversity which can satisfy the requirements of any customer.

Hand Tools

Some hand tools are designed with fixed dies and some with removable dies which increase the wire range accommodated by the tool. Installation rates up to 750 crimps per hour are possible with Burndy hand tools.

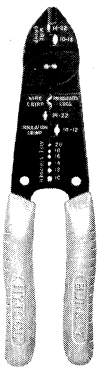
Semiautomatic Tools

All Burndy semiautomatic tools are designed with removable dies. Many types of compression terminations, therefore, can be made with the same basic tool. Installation rates up to 1500 crimps per hour are possible with Burndy semiautomatic tools.

Automatic Tools

Burndy automatic tools also are designed with removable dies to permit them to accommodate a variety of contacts. These tools provide high-speed, reliable installations and require little maintenance. Installation rates exceeding 3000 crimps per hour are possible with Burndy automatic tools.

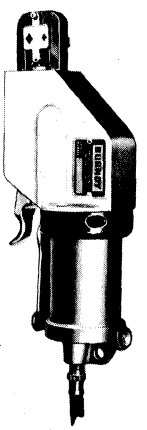
Hand Tools



HYTOOL® Y10ME-4
Lightweight, plier-type tool. Two clearly marked crimp grooves: 22-14; 12-10.

HYTOOL Y-MRE
Lightweight, manual, rachet-controlled. Color-coded handle. Y16MRE crimps wire range 22-16; Y14MRE crimps wire range 16-14.

Semiautomatic Tools

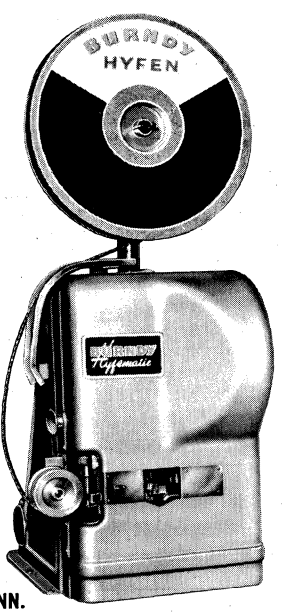


HYPRESS® Y8ND
Lightweight, pneumatic tool with full-cycling control. Removable dies interchangeable with **HYTOOL** M8ND.

Automatic Tools

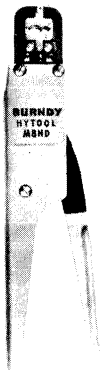
AVM
Automatically installs strip-form **VINYLUG** terminals. High production rates equal reduced installed cost.

HYFEMATIC™
machine — automatically installs strip-fed contacts. Installation rates exceed 3000 contacts per hour.



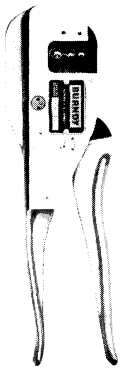
BURNDY, NORWALK, CONN.

BURNDY

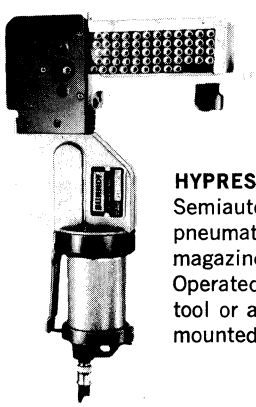


HYTOOL M8ND
Lightweight, manual, rachet-controlled. Removable dies interchangeable with **HYPRESS** Y8ND.

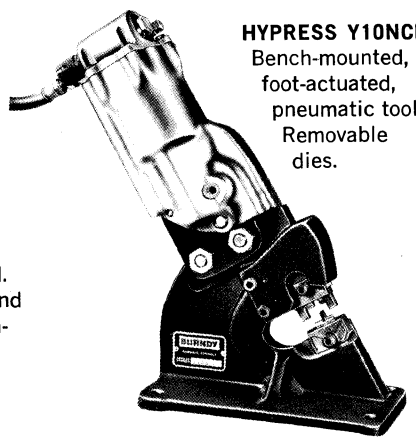
HYTOOL M10S
Lightweight, manual, rachet-controlled. Removable dies conform to requirements of **MIL-T-22520.**



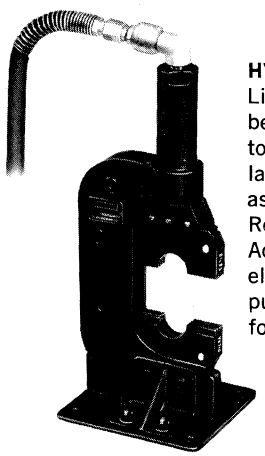
HYTOOL MR8
Lightweight, manual, rachet-controlled. Designed with grooved jaw.



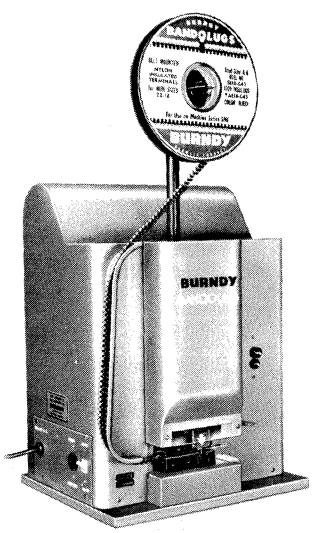
HYPRESS YD
Semiautomatic, pneumatic, magazine-loaded. Operated as hand tool or as bench-mounted tool.



HYPRESS Y10NCP
Bench-mounted, foot-actuated, pneumatic tool. Removable dies.

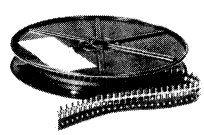


HYPRESS Y40LH
Lightweight, bench-mounted tool to install large **HYRING** assemblies. Removable dies. Actuated by electric hydraulic pump or by foot pump.



BANDOLUG®
machine — automatically installs insulated terminals for wire sizes #26 - #10.

BANDOMATIC™
machine — semiautomatically installs wide variety of contacts. Installation rates average 1500 contacts per hour.



BURNDY, NORWALK, CONN.

Shape up your brazing operation.

. . . with technical assistance from Engelhard. Let us show you how Engelhard Pre-Forms can make your brazing operation faster, more efficient and more economical. Experienced brazing experts will give you the engineering assistance you need to determine the best materials and methods for your brazing. They'll show you how Engelhard Pre-Forms will help minimize your inventory. How, by pre-packaging, we can supply brazing materials adjusted to your product sizes and requirements.

At Engelhard the latest in precision, high-speed production equipment enables us to produce pre-forms quickly and to the most exacting standards. This, plus our modern quality control system, assure you of brazing materials that meet your specifications precisely.

This combination of engineering know-how and long experience with a variety of customers enables us not only to offer better brazing materials, but also excellent delivery schedules as well.

For further information on this and the complete Silver Products line, write Silver Products Technical Service Department.

HANDLES—are color coded of translucent Tenite II, hex and won't roll off the work bench. Shock-proof and will stand rough use on production lines.

METAL ENDS—(separated from each other) non-magnetic stainless steel, to which solder won't adhere. Are firmly seated in handles and are twist-proof.

FORKED END—straddles the wire and with a slight twist, grips it for easy unwinding and removal, or guides it into another lug for soldering. Since handles act as insulation, there is no danger of shock when working on units in operation. 1/8" forks are made especially for use on printed cidcuits and transistors.

SPADE END—is a reamer to clean lug holes of solder.

CURVED END—can be used as a scriber for marking chassis. As a circuit tracer when looking for loose connections. As a dial cord stringer. Hook can be bent to a 90 degree angle if desired.

WIRE BRUSH—has approx. 200 bristles of stainless steel wire .0035 in dia. For use in cleaning connections before soldering, brushing out splattered solder and in repairing printed circuits. *Separate wire brushes available on 2" shafts, .35 net.

KNIFE & SCRAPER—for cutting and repairing printed circuits.

NOTE—all four **TN** aids also made with unbreakable aluminum alloy handles for use on industrial production lines. (AL-22, AL-33, AL-44, AL-55)

STAINLESS STEEL WIRE BRUSHES

on steel shaft approximately 2" long overall. Can be used in a regular pin vise. .35 net

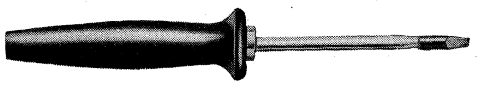
LIGHTWEIGHT SOLDERING IRONS — 120 VOLTS; 40 AND 60 WATTS



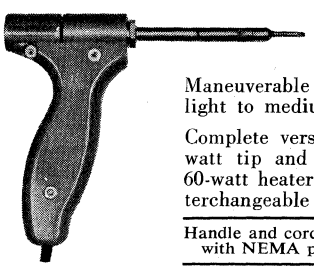
Ideal for light and medium production-line soldering and maintenance and repair operations in electronics and communications industries. Tip and heater assemblies can be changed in seconds.

* U.L. listed.

Complete Iron - Includes handle and 6-foot cordset, and 60-watt tip and heater assembly	
7/32" Ironclad Chisel Tip*	6A273
3/16" Ironclad Pyramid Tip*	6A283
3/16" Ironclad Chisel Tip	6A283G23
Handle and Cordset	
Two conductor	6A273G62
Three-conductor with NEMA standard plug	6A273G63

Tip and Heater Assemblies - 60 watts	
7/32" Ironclad Chisel Tip	6A300
3/16" Ironclad Pyramid Tip	6A301
7/16" Ironclad Chisel Tip	6A301G4
Heater Assemblies for Threaded Tips (Use Interchangeable Tips listed above)	
40 watts	6A304
60 watts	6A301G7

PISTOL-GRIP SOLDERING IRONS - 120V; 40, 60W



Maneuverable and comfortable, excellent for light to medium production.

Complete versatility with choice of three 60-watt tip and heater assemblies; or 40- and 60-watt heater assemblies with 20 different interchangeable ironclad or copper threaded tips.

Handle and cordset, three-wire with NEMA plug	6A303

Can be used with Lightweight tip and heater assemblies or with Lightweight heater assemblies and interchangeable tips.

MIGHTY MIDGET SOLDERING IRON - 12V; 100W

A lightweight iron with high heat capacity for heavy soldering where larger irons, up to 200 watts, prove unwieldly for rapid repetitive soldering.

Tip and Heater Assembly	Handle and Cordset	
1/2" Ironclad Chisel Tip — for 60 w, 6A211G54; 80 w, 6A211G50; 100 w, 6A211G33.	Two-conductor	6A210G61
	Transformer - 115-volt primary	
	Four Tap — for 55/70/85/100 watts	6A364G7

MIDGET SOLDERING IRONS — 6 VOLTS; 25 and 45 WATTS (Also tapped transformers)

A versatile iron for light production in electronics, and communication industries — handles like a pencil, weighs but 1¾ oz. Tip renewal is easy and fast — complete tip and heater assembly can be changed in a few seconds.

Handle and Cord Set			
For single-and 4-tap transformers	6A203	For transformer with 3-heat switch	6A203G2

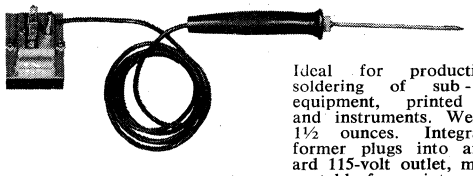
Tip and Heater Assemblies - All ironclad tips		
5/32" Chisel Tip	25 watts	6A211
1/8" Cone Tip	25 watts	6A213
3/16" Pyramid Tip	25 watts	6A215
1/8" Chisel Tip	25 watts	6A217
3/16" Chisel Tip	45 watts	6A211G31

Heater Assembly for Threaded Tips (Use Interchangeable Tips)	
25 watts	6A221
Transformers - 115-volt Primary¶	
Single Tap 35 watts	6A362G2
Four Tap —for 26/29/32/35 watts	6A364G2
With Three-heat Switch† —18 to 35 watts	6A434

¶Single- and four-tap transformers are available with 240-volt primary in quantities of 36 or more.

†Suitable for use only with Handle and Cordset 6A203G2.

MINIATURE SOLDERING IRONS — 6 VOLTS; 12 VOLTS



Ideal for production line soldering of sub-miniature equipment, printed circuits, and instruments. Weighs only 1½ ounces. Integral transformer plugs into any standard 115-volt outlet, makes iron portable for maintenance work.

Complete Iron - Includes handle and 6-foot cordset, tip and heater assembly, and transformer		
1/8" Chisel Tip	3" Shank	6A428G3
1/8" Chisel Tip	6" Shank	6A428G4
1/8" Pyramid Tip	3" Shank	6A428G7
1/8" Pyramid Tip	6" Shank	6A428G8

GENERAL ELECTRIC

ERSIN

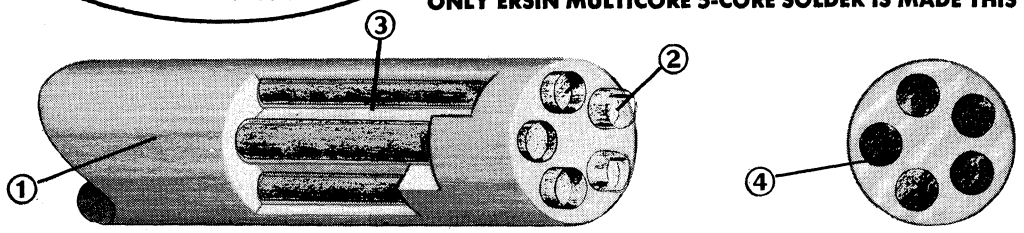
Multicore

5-core wire rosin solder

Available in 1-lb. and 7-lb. reels

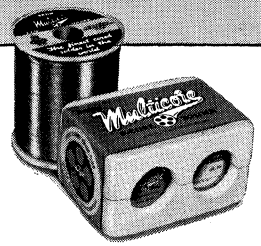
This is no ordinary solder!

ONLY ERSIN MULTICORE 5-CORE SOLDER IS MADE THIS WAY



These illustrations show the construction of ERSIN Multicore 5-Core Solder. Multicore solder is made only from pure virgin metals (1) with 5 cores of exclusive extra-active, non-corrosive ERSIN Flux (2). Multicore's special manufacturing process locates the 5 cores of ERSIN Flux close to each other and at the perimeter, so that there is only an ultra-thin wall of solder between the cores of flux and the work (3). This unique core configuration (4) also keeps the flux near the heat source, to melt faster—wet the metal more effectively. This enables ERSIN Multicore solder to produce the consistently reliable joints for which it is known.

Conforms to Federal Specification QQ-S-571



EXCLUSIVE PACKAGING IN POLYSTYRENE AND SKIN-WRAP FOR UTMOST PROTECTION IN SHIPPING AND STORAGE

STANDARD TIN/LEAD ALLOYS AND GAUGES

Available from stock: 63/37; 60/40; 50/50; 40/60; Savbit; Special Alloys—H.M.P. (High Melting Point, 565° F.); L.M.P. (Low Melting Point, 354° F.). Other alloys upon request.

Gauges: 14 s.w.g. (.080") through 24 s.w.g. (.022"). NOTE: Soldering iron tips should always be 108° F. above melting point of alloy.

NEEDLE FINE GAUGES

For microminiaturization, integrated circuits and other similar requirements. Off-the-shelf delivery in alloys 63/37 and 60/40, in even gauges from 28 s.w.g. (.014") through 34 s.w.g. (.009").

COPPER LOADED SAVBIT ALLOY

Copper-loaded SAVBIT stops the wear and erosion of copper soldering iron tips...increases tip life by 1,000%.

Characteristics and specifications: Savbit Alloy is available in Ersin Multicore 5-core solder containing non-corrosive extra-fast Ersin Flux in 14, 16, 18, 20, 22 and 24 gauge. Melting point: Virtually the same as standard tin/lead alloys. Excellent conductivity, tensile and shear strength.

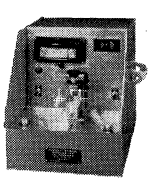
HIGH PURITY EXTRUDED BAR SOLDER

The same superior quality solder as in Multicore 5-Core Wire Rosin solder. Highest purity is achieved by advanced quality control, possible only with the Extrusion process. Extreme uniformity and smooth texture, without the cross-graining of cast bars. Virgin metals. Conforms to Federal Specification QQ-S-571d with respect to alloy composition in Sn60 (60/40), Sn63 (63/37), and Sn50 (50/50). Skin wrapped for distributors; bulk-packed for manufacturers. Also, low antimony "EXTRUSOL" Commercial Bar Solder—bulk packed.

ERSIN LIQUID FLUXES

Made to the high quality standards of Ersin Multicore. Three formulas. No. 5380 meets Military Specification MIL-F-14256C, Type A (Activated). No. 0360 meets Military Specification MIL-F-14256C, Type W (Non-activated). Other commercial liquid fluxes available such as: No. 4370 highly activated commercial flux. Foam, water soluble, protective coatings and cleaners upon request.

NEW SOLDERABILITY TEST MACHINE



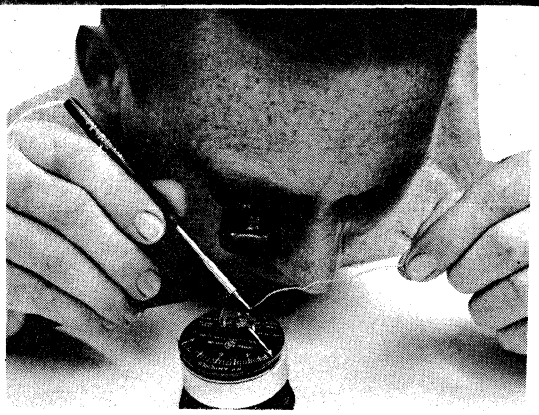
A precision instrument to determine the solderability of component termination wires that operates on a principle entirely different from, and superior to, the immersion method—electronic digital timing. Accurate, positive, totally reliable, yet economical because no technician is needed to operate it, and tests are run with great rapidity. Developed in association with I.E.C. Built in England by Multicore Solders, Ltd. Complies with I.E.C. Publication 68-2 Test T. Descriptive literature available on request.

FREE evaluation test samples, "Modern Solders" technical booklet, and fully detailed information on any of these products will be sent promptly. Address request, on company letterhead, to: Multicore Sales Corp., Dept. RY399, Westbury, N.Y. 11590.

MULTICORE SALES CORP., WESTBURY, N.Y. 11590, Div. British Industries Co.

ORYX

PRECISION SOLDERING EQUIPMENT



WHY PRODUCTION MANAGERS CHOOSE ORYX SOLDERING IRONS

1. MINIATURE SIZE

ORYX soldering irons are small and easy to handle as pencils. Their miniature size helps to speed any precision soldering operation. Damage to adjacent components is eliminated. If you can see it, you can solder it with ORYX!

2. FEATHER WEIGHT

A standard, utility-type 100 watt soldering iron weighs about 2 lbs. The so-called pencil-type irons typically weigh between 2 and 6 ounces. ORYX soldering irons, by contrast, weigh as little as ¼ ounce. This true feather weight virtually eliminates hand fatigue. Workers can turn out many more joints per hour with fewer rejects.

3. HIGH EFFICIENCY

All ORYX soldering irons utilize a unique element-in-the-tip design principle. By generating the heat **within** the tip, far fewer watts are needed to achieve results comparable to much larger irons. This principle also provides quicker heat recovery because the heat path between element and joint is so very short. The need for large insulating handles is eliminated.

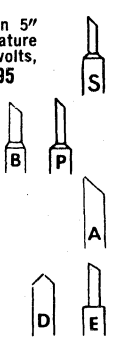
LOW-VOLTAGE SOLDERING IRONS

MODEL 5-S—(As shown in photograph). Eyepiece model less than 5" long, for precise finger control. Weighs 7 grams. Nominal temperature 575°F. Furnished with 1/16" S tip. Also takes T and U tips. 4.5-volts, 4.5-watts (Use 54204-T tapped transformer for 4.5 volts)....Net **$5.95**

MODEL 6A—The most popular Oryx soldering iron. Designed for printed circuit soldering. Weighs only ¼ oz. Nominal temperature 690°F. Furnished with 3/32" removable B tip. Also takes 1/16" P tip and new long-life V tip. 6-volts, 6-watts... Net **5.95**

MODEL 9-6—Similar to model 6A, but greater heat capacity. Weighs ¼ ounce. Nominal temperature 750°F. Furnished with 5/32" A tip. Also takes B tip. 6-volts, 8.3 watts. **5.95**

MODEL 11-6—Special model for high-temperature solders. Temperature 835° F. Weighs ¼ oz. Furnished with 3/32" solid nickel E tip. Also takes the 5/32" D tip. Nickel tips provide long life at high temperatures. 6-volts, 10-watts ..... Net **7.45**

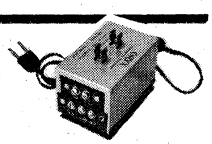


REPLACEMENT TIPS for low-voltage soldering irons.

Type	Material	Plating	Diameter	For Model	Net Ea.
A	Copper alloy	Nickel	5/32"	9-6	$ .54
B	Copper alloy	Nickel	3/32"	6A, 9-6	.54
D	Solid nickel	—	5/32"	11-6	1.80
E	Solid nickel	—	3/32"	11-6	1.80
P	Copper alloy	Nickel	1/16"	6A	.60
S	Copper alloy	Nickel	1/16" (short)	5-S	.60
T	Gold end, copper body	Nickel	1/25"	6A	2.35
U	Gold end, nickel body	—	1/25"	6A	2.35
V-PL	Copper alloy	Iron	3/32"	6A, 9-6	1.50

TRANSFORMER

for low-voltage soldering irons.



TAPPED TRANSFORMER—Output 4½ to 6-volts in ½ v. steps. For exact temperature control on all ORYX 6-volt tools. Operates on 115 V. AC—ready to plug in. Model 54204-T.....Net **$6.50** ea.

TELVAC

LABORATORY TOOLS / APPARATUS

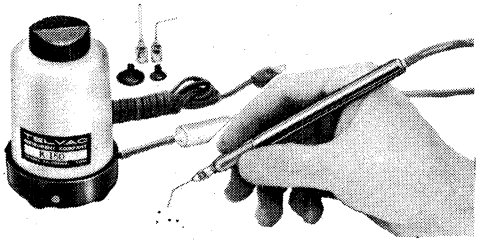
VACUUM TWEEZER SYSTEM

This new parts-handling system positively and precisely lifts parts varying in size from microscopic to those weighing several ounces. Parts are handled without damage or contamination. Defects caused by pinching, scratching, or marring are eliminated. Critical surfaces are protected. Vacuum is turned on and off with forefinger. For 115 V. A.C. Complete system, ready to plug in.

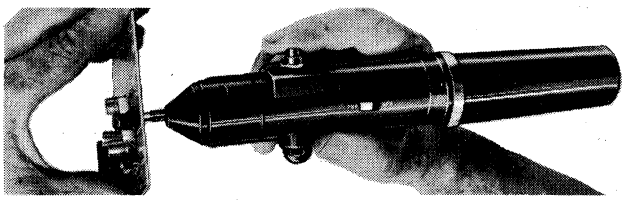
Complete System K-150

Net ea.

$34.50



"IN-CIRCUIT" TRANSISTOR TESTER



A new test instrument for the circuit designer or test technician. Makes rapid "go-no go" evaluations of semiconductors while they are still in the circuit. Checks cut-off and conduction on PNP and NPN transistors and diodes without the need for costly unsoldering. To use, the operator sets the selector switch to NPN or PNP. He then presses the tester's sharp spring-loaded pins (arranged in TO-5 configuration) against the transistor's printed circuit connections. Open and shorted transistors are readily identified by noting the condition of the tester's pilot light. Diodes and unmounted transistors are similarly tested using a set of extruding leads and clips. An optional 7-position diode adapter may be used to test diodes in the circuit. Furnished complete with extending leads and alkaline battery, ready to operate.

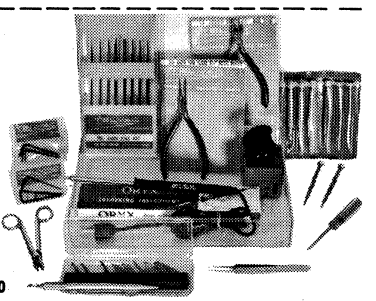
MODEL SC-4 TESTER .....Net **$72.50** ea.

MODEL 1330 DIODE ADAPTER .....Net **16.50** ea.

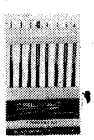
INSTRUMENT REPAIR KIT

A 35-piece kit of fine precision tools for the instrument shop or laboratory. Includes miniature soldering iron, taper-jaw diagonal cutter, needle-nose plier, precision screwdriver kit, tiny stub-nose scrissors, eye loupe, needle-file set, 11-piece knife set, hex wrench set, spline-key set, soldering aid set, and a precision Dumont-type tweezer.

MODEL K-50.....Net **$49.50**



NEEDLE FILES



Precision Swiss needle files with vinyl cushion finger grips.

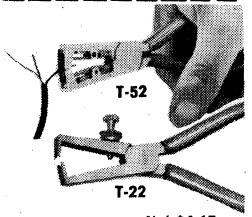
Set of 8 precision Telvac files in plastic case. No. 3 cut.

Cat. No. 2000 (4" styles) .....Net **$5.75** ea.

Cat. No. 2100 (6¼" styles) .....Net **6.95** ea.

WIRE STRIPPERS

Unique wire-stripping pliers for wires #8 through #24. Just squeeze and pull! T-52 has 11 narrow cutting blades that close in around the wire to automatically provide the correct stripper opening and cutting tension. No operator adjustments required when changing from one wire size to another! T-22 is set to required wire size by operator. Tool steel heads have razor-sharp edges. Both models have red vinyl cushion handle grips.



T-52 .....Net **$6.95** ea. **T-22** .....Net **$4.15** ea.

ORYX-TELVAC tools available from distributors everywhere. Write for complete catalog.

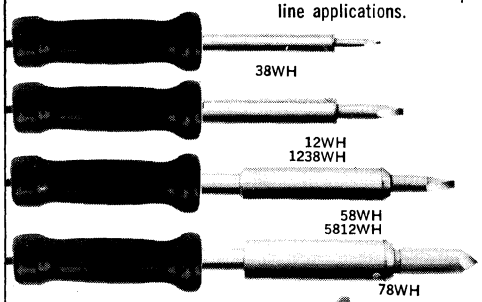
WALL BRAND

SOLDERING PENCILS, IRONS, GUNS AND HOLDERS

WallBrand pencils and irons are engineered for highest efficiency with handles designed to be cooler, lightweight and balanced perfectly. WH models have triple-life resistance wire wound on pure mica for continuous heavy duty soldering requirements; constant tip temperature with extra fast recovery. 120 volts AC-DC. Other voltages are available on request. Wall's own plating facilities produce long-life tips to meet the demanding applications of micro-circuitry, high density packaging, precision work on solid state devices, printed circuits and continuous precision soldering for production line applications.



Model	Watt Input	Tip Size	Length W/O Tip	Volts

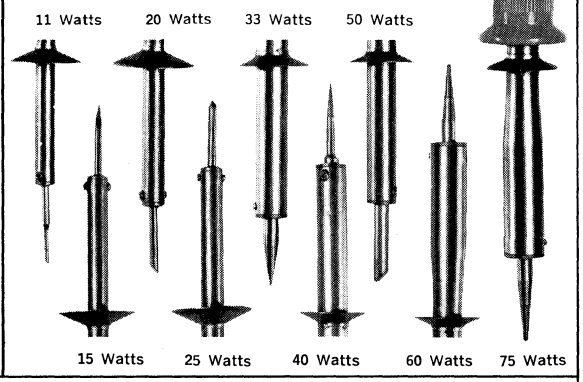
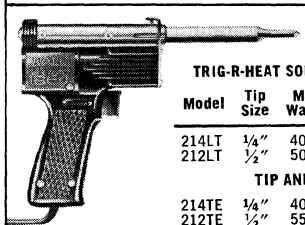
NEWEST!
XLS pencil iron — Versatile Molded Handle fits 9 elements

New pencil iron featuring element interchangeability and highest performance. Handle fits nine heating elements from 11 to 75 watts. Quickly and easily changed by operator. XLS molded handle is cool, lightweight and made of high impact, soft blue colored polycarbonate. Available with either 2 or 3 wire cord. Wall's full line of regular and long-life iron plated tips are available for the 9 easy-to-change heating elements.



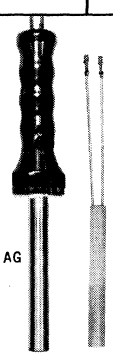


214LT

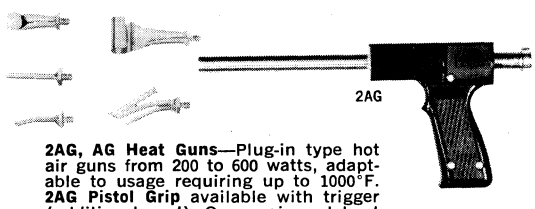
TRIG-R-HEAT SOLDERING GUN SPECIFICATIONS

Model	Tip Size	Max. Watts	Min. Watts	Voltage AC or DC	Weight W/O Cord
214LT	¼"	400	150	120	14 oz.
212LT	½"	500	300	120	24 oz.
TIP AND ELEMENT ASSEMBLY					
214TE	¼"	400	150	120	
212TE	½"	550	300	120	

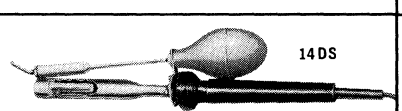
Trig-R-Heat Soldering Gun—Feather light, 14 oz., no heavy transformer. Reaches hard-to-get-at spots; tip will not deform. Heats and recovers instantly. Rugged, precision-built. Easily changed tip and element assemblies.



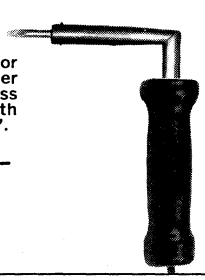
AG



2AG, AG Heat Guns—Plug-in type hot air guns from 200 to 600 watts, adaptable to usage requiring up to 1000°F. **2AG Pistol Grip** available with trigger (additional cost). Opens air and heat at the same time. **AG Handle Grip.** One heating element fits both guns. All five tip styles interchangeable. Special tips on request. Three-wire cord assembly. Hundreds of uses — shape, form, weld and seal thermoplastics. Gun includes neoprene air hose, hose fittings, pressure regulator and gauge.

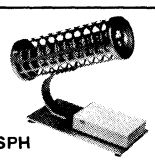


14DS Desoldering Tool—Keeps solder in a molten state in reservoir, operated with one hand, fits existing Wall 14HD Iron. Replaceable tip, .080 opening. Other sizes by special request.



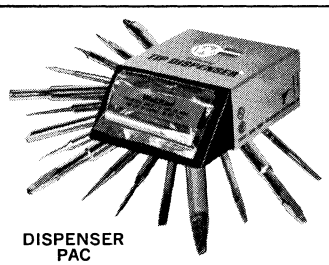
Hatchet Irons—New high reserve models that enable user to make more solder connections faster. Reduces operator fatigue, with better quality control and higher production. ¼" and ⅜" tips available. Unless otherwise specified, irons are equipped with 2-wire HPN cords and Wallbrand Tip Style "C".

Model	Tip Size	Watts	Volts
714-60	¼ in.	60	120
714-75	¼ in.	75	120
738-80	⅜ in.	80	120
738-100	⅜ in.	100	120



SPH

SPH Soldering Pencil Holder for units up to 5/8" diameter shaft — **SIH Soldering Iron Holder** for units up to 1" diameter shaft. Can be mounted on top, in front or below bench. Adjusts to any angle. Bench models include tip cleaning sponge.



DISPENSER PAC

Soldering Tip Dispenser Pac—Iron-plated or copper tips, ⅛" through ⅜", are available in handy tip dispenser pac. Keeps tips individually sealed in color-coded, continuous belting, plastic envelope. Ideally suited for production line station or stock distribution.

Soldering Tips for Pencils and Irons—Three grades: **Anniversary:** Industrial, highest quality. Copper core, special iron coating. Anti-seize life for rigorous production line demand. **WallKlad**—Industrial, copper core, iron coating chrome plated. Production line and critical laboratory use. **WallBrand**—Commercial, copper, nickel plated. All commercial applications. Tip sizes from ⅛" through ⅞". Special tips to specifications designed on request.

Send for illustrated catalog I-1265 about Wall's tips, irons, pencils, and holders.

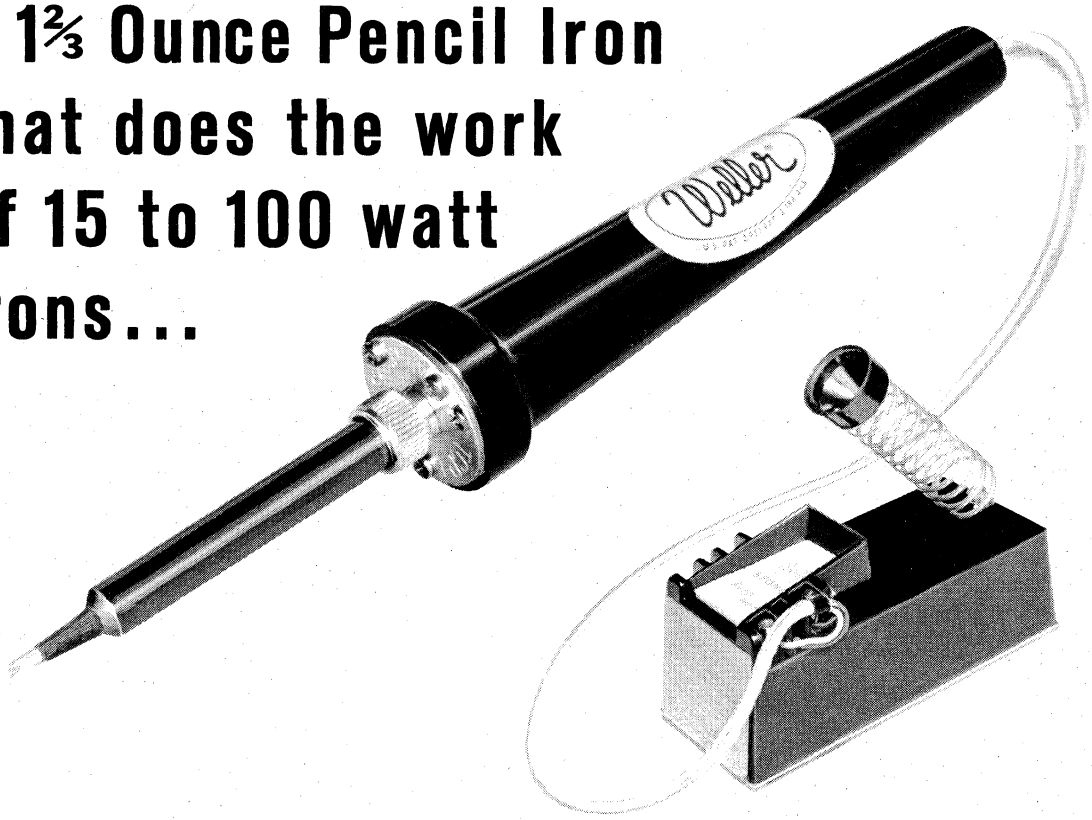
Send to Dept. EEM-69

WALL MANUFACTURING CO., BOX 3349, KINSTON, N. C., 28501 TEL(919)527-4186

Industrial Soldering Pencils are built to exceed federal specification W-S-570a as amended. WallBrand soldering products are UL and CSA listed.

Weller INDUSTRIAL SOLDERING TOOLS

A 1⅔ Ounce Pencil Iron that does the work of 15 to 100 watt irons...



and does it faster and better!

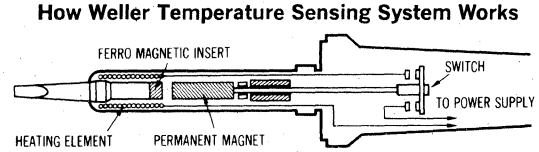
The new low voltage W-TCP Soldering Pencil automatically adjusts to every soldering job in the range usually covered by 15 watt to 100 watt irons. Operators can go from delicate component soldering to heavy ground lugs, and never switch irons! Weller's controlled energy reserve delivers the extra heat as it is needed.

Despite its phenomenal capacity range, the Weller W-TCP never overheats. A foolproof, magnetic control accurately senses tip temperature moment-by-moment, and regulates power input, virtually eliminating cold solder joints or excess heat.

The Weller Soldering Pencil and Power Unit are an unbeatable production team. Low voltage design means a more rugged heating element and much longer tip life. Premium plated tips are available in a wide range of shapes and temperatures.

Write or phone for the new Weller Catalog of production soldering equipment and name of your nearest Weller technical representative.

How Weller Temperature Sensing System Works



Magnet is attracted to ferromagnetic tip insert when iron is cold, holding switch contacts closed. As tip heats, approaching selected Curie point of insert, attraction is reduced causing magnet to retract and open switch. As tip cools slightly, magnet is again attracted to tip insert sensor, maintaining tip temperature within close limits.

Model W-TCP — Temperature controlled Low Voltage Soldering Pencil with 3/16" 700°F tip and power unit. Weight with tip, less power unit and cord, 1⅔ oz., overall length 7½". Supplied with burn-proof silicone rubber cord and 120 V., 50/60 cycle transformer with pencil holder and cleaning sponge. Secondary isolated for operator's protection. Tips available for 500°, 600°, 700°, 800° idling temperature.

Model TCP-1 — Soldering Pencil only, with silicone covered cord, 3/16" 700°F Tip. May be operated from any 24 volt power source.

Model PU-1 — Power Unit only, as described under W-TCP. 120 V., 50/60 cycles. (Also available for 230-250 V.)

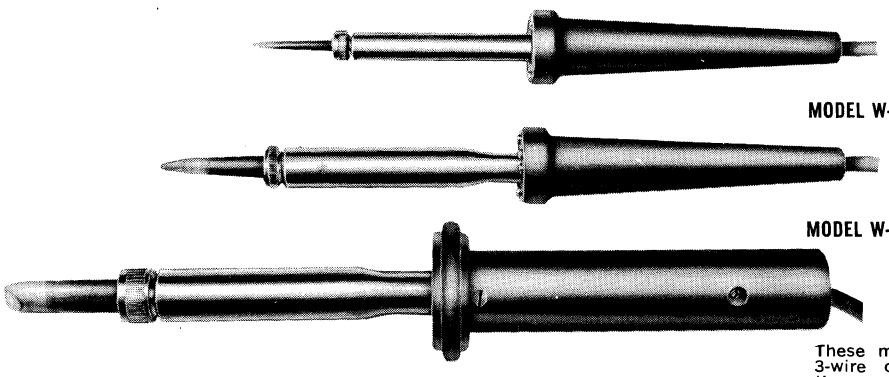
WELLER OFFERS A COMPLETE LINE OF SOLDERING TOOLS FOR PRODUCTION, MAINTENANCE AND SERVICING.

with Energy Reserve and Temperature Control

9320

TEMPERATURE-CONTROLLED INDUSTRIAL SOLDERING TOOLS

. . . with Energy Reserve



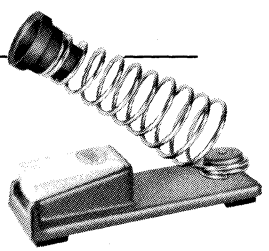
MODEL W-60 Covers 15 Watt to 100 Watt spectrum with one tool. 60 Watts, 120 V., Wgt. 2½ ozs., 7¼" long. With 800°F. ⅛" screwdriver tip.

MODEL W-100 Covers 50 Watt to 150 Watt spectrum with one tool. 100 Watts, 120 V., Wgt. 3½ ozs., 8¼" long. With 800°F. ¼" screwdriver tip.

MODEL W-200 Covers 150 Watt to 300 Watt spectrum with one tool. 200 Watts, 120 V., Wgt. 10 ozs., 9½" long. With 800°F. 7/16" chisel tip.

These models can be supplied with 2-wire or 3-wire cords. (Weller "Temperature Sensing" tips are available in standard industrial configurations at 500°, 600°, 700° and 800°F. for the model W60; and in 600°, 700° and 800°F. for models W100, W200's).

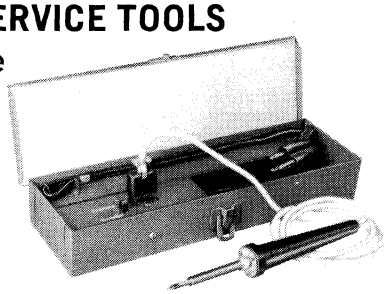
SOLDERING TOOL STAND



Model PH-60—Stand will accommodate W-60 and W-100 tools, with interchangeable funnels. Includes tip cleaning sponge. Heavy cast base. Spring guard protects operator from contact with heated tip.

TEMPERATURE-CONTROLLED FIELD SERVICE TOOLS

. . . with Energy Reserve

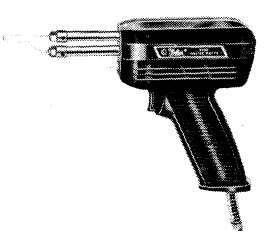


We invite inquiries concerning your field service soldering equipment needs. We offer to develop soldering kits adapted to meet your special requirements.

TCP-12 12-14 volt operation PB-6 Self contained,
TCP-24 24-28 volt operation battery powered

Weller "Temperature Sensing" tips available in standard industrial configurations at 500°, 600°, 700° and 800°F.

WORLD FAMOUS *Weller* DUAL-HEAT GUNS



The original soldering gun. Available in three dual-heat models.

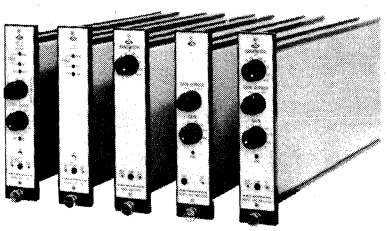
SERIES 889 SIGNAL CONDITIONERS

A Family of Interchangeable Signal Conditioning Modules

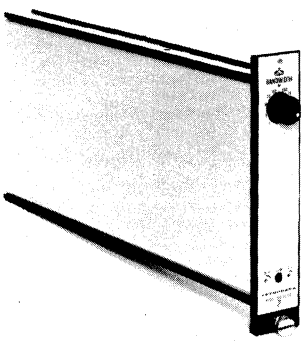
ASTRODATA



The Astrodata 889 family includes DC differential data amplifiers, biophysical amplifiers, strain gage power supplies and input signal conditioners, active filters, and hi-lo level VCOs. This family of products has the unique trait of being compatible modules which can be interchanged to provide a total solution to the requirements of system instrumentation.

The 889 DC differential data amplifier is a chopperless, high-performance unit with single or dual outputs. It is available in 32 different configurations starting at $330. The 889 amplifier is very compact. 12 amplifiers can be housed in 7-inches of rack space.

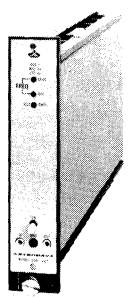
The 889 amplifier is described in detail in section 1100 of EEM. The balance of the 889 instruments are described below.



ELECTRONIC FILTER

Model 889-900 is an active 3-pole (18 db/octave) linear phase low-pass filter having a response to dc. 3 db point frequency steps are 1Hz, 3Hz, 10Hz, 30 Hz, 100Hz, 300Hz, 1KHz, 3KHz, 10KHz and wideband selectable by a front panel control. The 889-900 features a high input impedance, obtained through the use of an input buffer amplifier, an isolated wide band output and a filtered output. The bandwidth of the wideband output is greater than 150 KHz at 10 volts peak-to-peak A wideband position is also provided on the filter switch which places only a non-inverting isolating amplifier in the signal path to the filter amplifier output.

Twelve 889-900 filters can be packaged in a standard 19-inch rack. Dimensions are 7 inches high by 21 inches deep including fuses and mating connectors for filters.

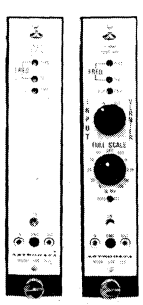


SIGNAL CONDITIONERS

Model 889-600 DC Bridge Signal Conditioner offers the ultimate in stability and isolation when used with strain gages and other resistive type transducers. It combines in a single integral package, a precision isolated constant current-constant voltage power supply for transducer excitation plus a signal conditioner designed for use with 1,2, or 4-active arm bridges.

Bridge completion and calibration resistors are changed by simply removing the small printed circuit cards which plug into the main signal conditioning card. ±4 point remote calibration as well as electrical zero calibration is provided.

Twelve channels can be mounted in a standard 19-inch rack, requiring just 7-inches of rack height.

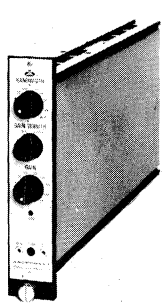


HI/LO VOLTAGE CONTROLLED OSCILLATOR

Model 506 High/Low Voltage Controlled Oscillator is a high-performance, all solid state unit designed for applications involving thermocouples, resistance bridges, potentiometers, and other low-level signal sources as well as medium-level and high-level signal sources. A plug-in channel selector enables the center frequency and deviation sensitivity of the 506 to be readily changed. Channel selectors are available for all IRIG, and AIA FM subcarrier channels.

The low-level version of the 506 provides full scale input ranges of ±5, 10, 25, 50, 100, 250, 500, 1000, 2500, 5000 and 10,000 millivolts. The high level version has an input voltage range of ±2.5 volts full scale. An optional internal switch permits operation of 2 full scale inputs from ±0.5 to ±5 volts.

Twelve Model 506 VCOs require only 7-inches of rack space.



BIOPHYSICAL AMPLIFIER

Model 890-500 Biophysical Amplifier was designed specifically to fill the needs for an amplifier that will accept signals from living active elements with a high source impedance. The 889-500 Amplifier will work with source impedances up to 10 megohms without degradation in specifications. The amplifier features both a low pass and a high pass filter.

The 889-500 will recover from overloads instantaneously when a front-panel RESTORE button is depressed. Usable gain range between 50 and 5000 is provided in gain steps of 50, 100, 200, 500, 1,000 and 2,000. Input circuitry is balanced, differential, isolated from ground and outputs.

Twelve amplifiers require only 7-inches of 19-inch rack space.

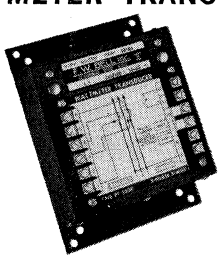
Note 2: In a free field of 100 gauss the open circuit Hall voltage is 9 mV min. In a closed magnetic circuit, minimum sensitivity is 3.2 mV/ampere-turn.

WATTMETER TRANSDUCERS PT-2000 Series



A choice of five (5) fundamental types is available for measurement of 50-60 Hz power in single phase, 3 phase-3 wire, and 3 phase-4 wire systems. The series includes models which can accept 240, 380 or 480 V input permitting direct hook-up to motor power lines, without need for external transformers. All models offer ±0.25% FS linearity as well as ±0.25% FS power factor influence at 50% PF, leading or lagging. Coupled with a response time of 100μs, these performance characteristics make this series suitable for accurate measurement on SCR controlled circuits. The series is packaged in a ruggedized industrial steel case with 20A barrier blocks. All units are designed for direct mounting in standard NEMA and JIC enclosures, permitting complete protection in a plant environment. Each wattmeter transducer is furnished with wiring diagram attached to facilitate installation. Rating of each model is shown on the nameplate.

Power System	Standard 50-60 Hz Models And Ratings*		Calibrated Output At Nominal Power Rating	Price (Qty. 1-9)

ELECTRO MAGNETIC PICKUPS

a new approach to TACHOMETRY, POSITIONING, CONTROL, COUNTING, TRIGGERING, TELEMETERING, SYNCHRONIZATION and other actuation.

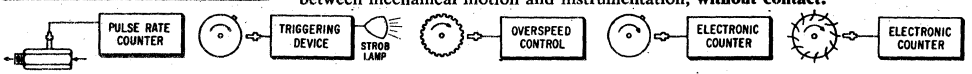
Model 3080 Magnetic Pickup
World's smallest—weighs only .05 oz. 10 volt output is higher than many larger models.

MAGNETIC PICKUPS SOLVE SPEED MEASUREMENT AND CONTROL PROBLEMS

What They Do . . . generate voltage/frequency from mechanical motion (without contact) in proportion to speed of ferrous metal objects interrupting their magnetic fields. They require no external power supplies, and additional amplification is usually not required.

When a gear tooth, blade or any other magnetic metal projection interrupts the external magnetic field surrounding the sensing head, a voltage and frequency are generated that may be used to: indicate, actuate instruments, synchronize, control, provide accurate data for telemetering.

What They Are . . . a self-generating input device providing the connecting link between mechanical motion and instrumentation, **without contact.**



Measuring rate of flow | For motion study | Safety device | Counting revolutions | Measuring turbine speed

Note 1—Tested at 1,000 inches/sec. with 8-pitch, 12-tooth gear at 0.005 inch clearance and a load of 100,000 ohms.

Note 2—Tested at 1,000 inches/sec. with 20-pitch, 30-tooth gear at 0.005 inch clearance and a load of 100,000 ohms shunted by 250 mmf cable capacity.

Note 3—Tested at 1,000 inches/sec. with 8-pitch, 12-tooth gear at 0.005 inch clearance and a load of 1250 ohms shunted by 250 mmf cable capacity.

Note 4—Tested at 1,000 inches/sec. with 20-pitch, 30-tooth gear at 0.005 inch clearance and a load of 100,000 ohms.

Note 5—Tested at 1,000 inches/sec. with 20-pitch, 30-tooth gear at 0.005 inch clearance and a load of 100,000 ohms shunted by 290 mmf cable capacity.

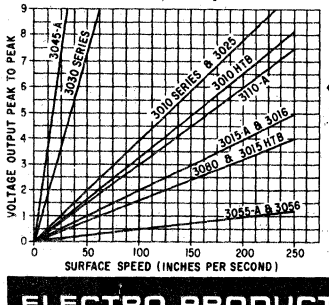
GENERAL NOTES:

Material of shell and pole piece, type 416 stainless steel, except for shell material of models 3040-A, 3045-A and 3070 which are 303 stainless steel.

Insulation resistance to shell 100 megohms minimum, dielectric strength to shell 500 volts rms minimum for 1 minute. These specifications reflect design at revision date and may be changed to incorporate improvements without prior notice.

*Listed with Underwriters' Laboratories.

† Indicates chisel-type pole to provide high resolution sensing for high speed, small toothed gear detection.



TYPICAL VOLTAGE OUTPUT CURVES

Typical voltage output curves of standard magnetic pickups show relative outputs under identical conditions. All pickups connected by 10′ Belden #8401 cable to a 100,000 ohm load with clearance between pole-piece and a 20-pitch, 30-tooth ferro-magnetic gear. Changes in load, clearance, cable length, gear teeth size, or gear material will produce different results. Measurements are in peak-to-peak volts rather than rms.

METRIX

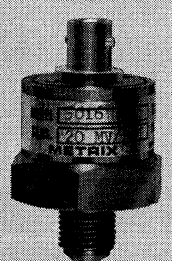
VIBRATION / PRESSURE INSTRUMENTATION

SENSORS

Series 500 Accelerometer

Utilizes unique piezoelectric cantilever sensing element mounted in lightweight (6 gms.), low silhouette case to provide unusually high out-put for driving an oscilloscope or VTVM directly in many applications. Containing an integral MICRODOT low noise cable, Series 500 Units may be mounted with cement, adhesive transfer tape or with optional magnetic or threaded adapters.

Model	502	512
Voltage Sensitivity (mv/g)	25	6
Charge Sensitivity (pcmb/g)	150	20
Capacitance (pf)	6,000	3,300
Resonance (Hz)	>3,000	>10,000

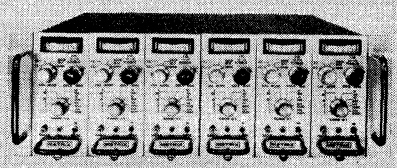


Model 5016 Dynamic Pressure Transducer

A high output piezoelectric transducer, this unit is ideal for measuring dynamic pressures in liquids and gases. Stainless steel pressure chamber, entirely sealed from the sensing element, allows use with corrosive fluids. Signal is taken out through a standard BNC coax connector.

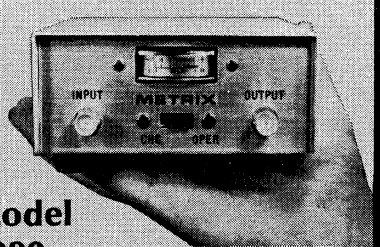
Voltage Sens .....20 mv/psi
Charge Sens .....120 pcmb/psi
Pressure Range ..... 0-3000 psi
First Resonance .....>3,000 Hz
Temp. Range .....−40°F to +300°F.

SIGNAL CONDITIONERS



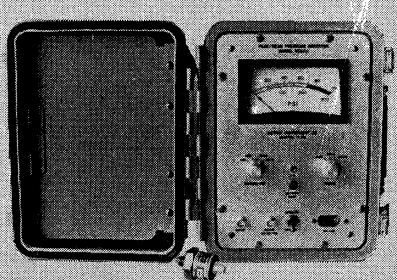
Model 5072 Charge Amplifier

Conditions signals from piezoelectric transducers and provides direct meter readout of forcing function (g's, psi, etc.). Stable high gain circuit accepts full scale inputs from 1 to 50,000 pcmb over bandwidth 2Hz to 20 KHz. Front panel control normalizes gain to match transducer. Plug in filters. Internal oscillator for calibration. Operates from 115 VAC. Rack accommodates six channels.



Model 5080 Charge Amplifier

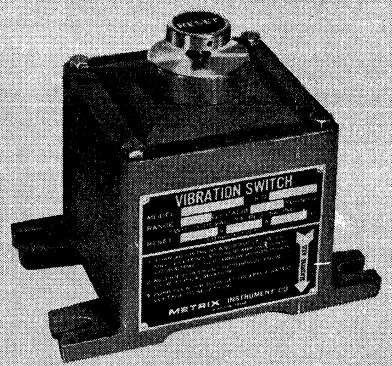
Portable rechargeable battery operated unit accepts full scale inputs from 100 to 10^6 pcmb in four ranges. Bandwidth: 0.1Hz to 10 KHz. Calibration input allows precise gain adjustment. Full scale output is 1 volt from 20 ohms.



Model 5065 Peak/Mean Pressure Indicator

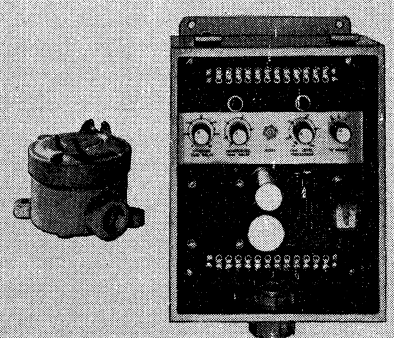
Portable rechargeable battery operated unit operates with Model 5016 Pressure Transducer to provide peak to peak or mean readings of dynamic pressure variations. Full scale pressures selectable from 100 to 3000 psi. Scope output provided for waveform analysis.

CONTROLS



Model 5078 Vibration Switch

Provides reliable vibration and shock protection for rotating and reciprocating equipment by actuating and latching a switch if vibration or shock exceeds a predetermined set point. A knurled calibrated knob allows precise set point adjustment. When tripped, the unit can be reset manually with the reset button, or electrically by applying a voltage to the reset coil. Available in weatherproof or explosion proof housing.



Model 007 Vibration Sentinel

Protects costly equipment against severe damage when excessive vibrations occur. The unit consists of explosion proof Pickup and solid state Monitor Unit, which can be mounted 1000 feet from the pickup. An adjustable starting time delay prevents high starting vibration from tripping the shut-down relay. An adjustable monitoring time delay prevents non-recurring shocks from causing a shut-down. Scope and DC Recorder outputs provided. Meter readout available.

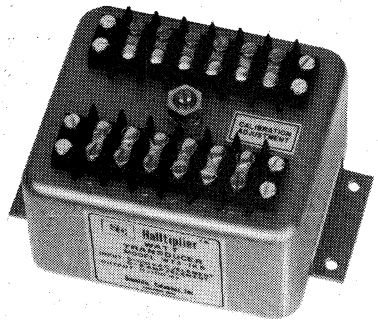
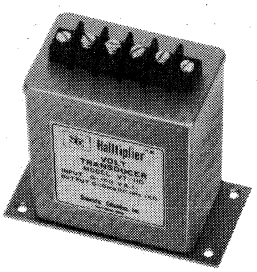
Instrumentation to Measure All Electric Power Parameters





Halltiplier (TM) Watt Transducers

- Utility Tested and Approved
- Voltage or Current Outputs
- Minimal Space Requirements
- Calibrated Output

Scientific Columbus Halltiplier (TM) Transducers are the most complete selection of Hall Effect Watt Transducers available. Known for sturdiness and high reliability, Halltiplier (TM) transducers also feature such advantages as calibration adjustment, choice of filtered or unfiltered outputs and measurement of forward or reverse power flow.

(Calibration instructions, typical characteristic curves and application assistance are available on request).

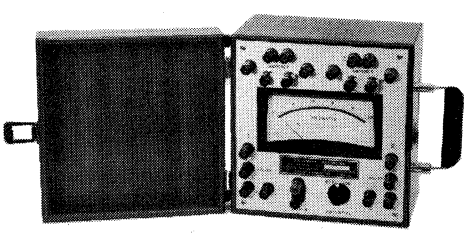
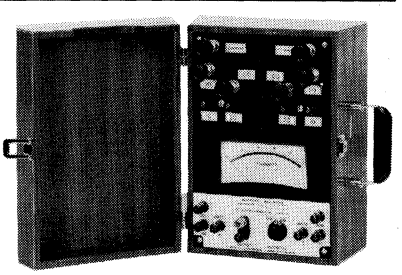
Power Instruments





GENERAL DESCRIPTION OF WATTMETERS

Wattmeters with ANALOG OUTPUT to feed:

- Digital voltmeters or printer
- Oscilloscopes
- Strip chart or tape recorders
- X-Y plotters
- Data Acquisition systems

The wattmeters with intelligence have a brain consisting of two Halltiplier (TM) solid state watt transducers. These instruments compute real power ($EI\cos\Theta$) and furnish a 0-50 mv d-c analog output signal (intelligence) with simultaneous display of watts on the meter. The wattmeter is ±0.5% accurate and, the output signal features ±0.25% accuracy, except for model 325K605-P.

— NO EXTERNAL POWER SOURCE REQUIRED —

- STANDARD MODIFICATIONS (CONSULT FACTORY)
  RELAY RACK PANEL MOUNT
  DIGITAL READOUT
  400 HZ MODELS AND OTHER FREQUENCIES
  WIDE POWER FACTOR RANGE

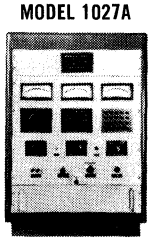
POWER TEST CONSOLES / TRANSDUCER CALIBRATOR

POWER TEST CONSOLE MODEL 1027A



Power test consoles are used to measure watts, volts, and amperes simultaneously during tests of single and three phase 3 wire loads such as motors, transformers, appliances, etc.

These units feature range switching of current voltage. The resultant wattmeter ranges are automatically displayed on an annunciator. The instrument and the load being measured are protected from overload damage by an automatic built-in current overload circuit.

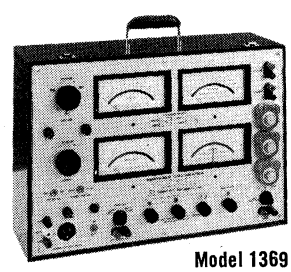
All parameters are displayed on taut band meters with linear scales. The unit is available with digital meters. A d.c. analog output signal for each parameter can be supplied for auxiliary or control circuits.

TYPICAL SPECIFICATIONS

Function	Power test console to measure watts, volts and amperes simultaneously during electric motor tests.
Full Scale Power	25 watts to 40 kilowatts
Full Scale Potential	50/100/200/400 volts RMS nominal 75/150/300/600 volts RMS maximum
Full Scale Current	0.5/1/2/5/10/20/50 amperes RMS
Analog Output Signals Watts, Volts and Amperes	0-50 mv d.c. for full scale on each range, into 10K ohms. Termination on rear panel.
Accuracy	±1% of full scale for meters. ±0.5% of full scale for analog output signals.

This instrument is designed for easy field checking of calibration of watt, volt and amp transducers. It may also be used for incoming inspection. The Model 1369 is completely self contained and requires no external loads. It requires only 120 v 60 Hz power.

The calibrator compares the output signal from the transducer being tested with the output from a standard in the instrument. The percent deviation from the standard output is read directly on a % error meter. Independent current and voltage linearities can be determined. The calibrator will test transducers with full scale outputs ranging from 25 mv to 10 v d.c. and specified load resistance up to 100 K ohms.



Model 1369

SPECIFICATIONS

Ranges	0-150 volts 0-5 amperes 0-500 watts/element 0-500 vars/element
Power Factor	Unity and 0.5 lag
Metering and Accuracy	Volt and amp indicator ±0.75% of f.s. Percent of full scale output ±0.5% of f.s. Percent of full scale error ±0.25% of f.s.
Transducer Load Resistance	0 to 100 K ohm
Transducer Output Level	25 mv d.c. to 10 v d.c.

Monitoring, measuring and control materials devices and equipment utilizing Hall effect-magnetic structures and thermoelectric modules . . .

WIDEBAND — d.c. TO MEGAHERTZ — CURRENT TRANSDUCERS

The CT-series current transducers provide an output voltage which is independent of frequency from d.c. to the megahertz range. Source to output isolation is provided since no physical or electrical connection is necessary to the conductor threaded through the window. Monitoring, sampling, or analysis of d.c., steady-state, or transient currents, having rise times of 1 microsecond or less, is now feasible using the CT units.

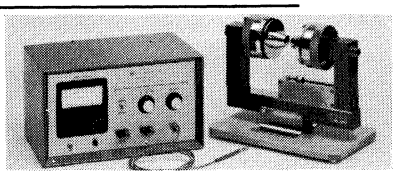
CT-1000W	1000	100	60

HALL EFFECT TEST SET MODEL 1000



The Model 1000 Hall effect test set is a versatile instrument for accurate determination of the properties of semiconducting materials or magnetic devices. Magnetic fields from a few hundred to over 10,000 gauss may be accurately set through the use of the high linearity calibrated Halltron probe furnished with the test set. The regulated power supply provides current to the material or device in a continuous range, adjustable from less than 1 milliampere to over 1 ampere.

HALLTRON, MAGNETIC FIELD SENSORS

Stocks are maintained of a wide variety of Hall effect probes capable of fitting most known gaussmeter and magnetic sensing requirements as well as for exploratory studies. Units are designed to provide the high-linearity, low-noise and stable operation essential in applications.

MODEL	TYPE	CONTROL CURRENT MILLI-AMPERES	OUTPUT IN 10 Kg, MILLIVOLTS	DIMENSIONS INCHES

HS 84	Low Temperature*	350	30,000	.500/.375/.015

* The HS-84 is designed for high sensitivity at −196°C.

THERMOELECTRIC DEVICES FOR COOLING AND TEMPERATURE CONTROL

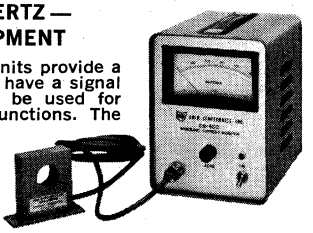
The controllable, reversible heat pumping properties of thermoelectric cooling devices make them ideal for many environmental control, precise temperature control, and heat-pumping applications. O.S.I. offers a variety of units ranging from the TC series, which can provide a temperature depression of 115 degrees Centigrade in a vacuum, to the TA series which can remove 85 watts from a heat source.

MODEL	△T DEG. C.	HEAT PUMP WATTS	INPUT CURRENT AMPERES
TM-12	65	3	30
TM-20	65	20	30
TM-20M	65	20	30
TC-44	90	6	30
TC-1851	115	3	25
TA-6F	55*	85	30

* Specified as cold plate temperature depression from ambient air temperature.

WIDEBAND — d.c. TO MEGAHERTZ — CURRENT MEASURING EQUIPMENT

The CM-series current measuring units provide a meter display of direct current and have a signal output of 0 to 1 volt which can be used for monitoring, analysis, or control functions. The output signal waveform is a replica of the current through the window with faithful reproduction of microsecond transient characteristics. Operation is from 110 volt, 60 cycle source.



MODEL	PEAK CURRENT AMPERES	METER RANGE AMPERES	OUTPUT - VOLTS
CM-30	30	0 - 30	0 - 1

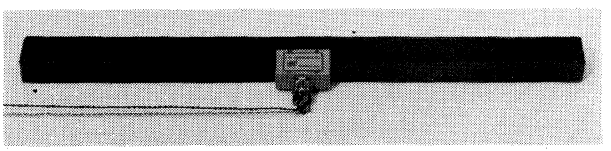
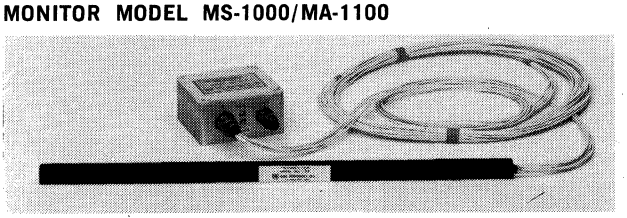
WIDEBAND HALLTRON MAGNETIC ANTENNA MS-1000



BROADBAND R.F.I AND E.M.C MAGNETIC ANTENNAS AND MAGNETOMETERS

O.S.I. has designed the MS-1000 magnetic antenna for application in interference reduction, testing and measurement of magnetic fields in the d.c to Megahertz range. Sensitivities of 100 millivolts per gauss, unamplified, from the basic antenna with output independent of frequency, illustrates performance. Vector Magnetometer units, providing an output of 10 volts in the earth's field, can be provided for particular applicational requirements.

MAGNETIC DISPLACEMENT AND PROXIMITY MONITOR MODEL MS-1000/MA-1100



MS-1100/MA-1100 Magnetic Displacement and Proximity monitor provide non-contacting measurement of displacement over a 20 inch range. The amplifier-power supply unit (MA-1100) can be remotely located and provides a 0-5 volt output for telemetry on control applications.

ENERGY CONVERSION MATERIALS

Optimized energy conversion materials of the following and elements are available.

TYPES:

Indium arsenide and indium antimonide for magnetic sensors and infrared filters.

Bismuth telluride alloys; N & P type, for thermoelectric cooling and specialized power generation modules.

Lead telluride for high quality optical infrared coatings.

High purity arsenic trichloride for exceptional growth of intermetallic arsenides.

Research grade bismuth, indium, arsenic, tellurium and antimony.

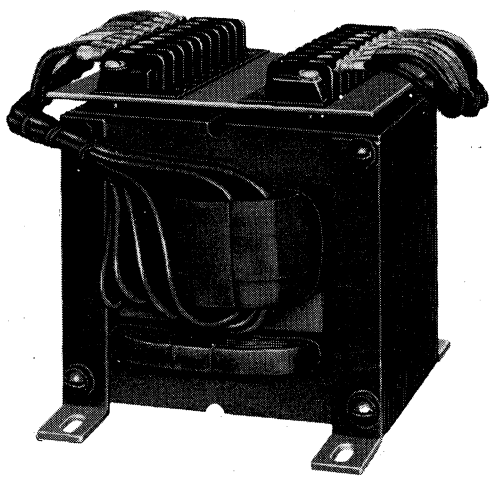
PIONEER IN SOLID STATE ENERGY CONVERSION MATERIALS, DEVICES and SYSTEMS

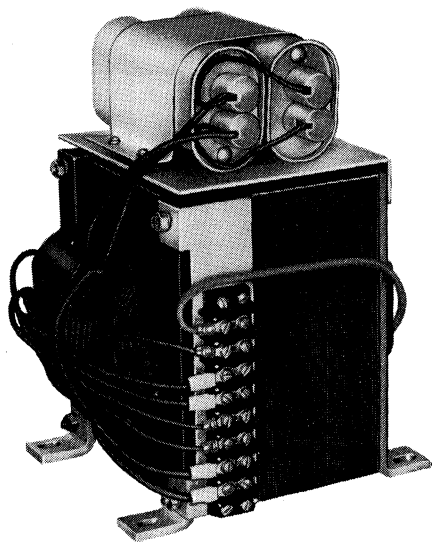
Need custom constant voltage transformers? Acme Electric can design and build to your specs.

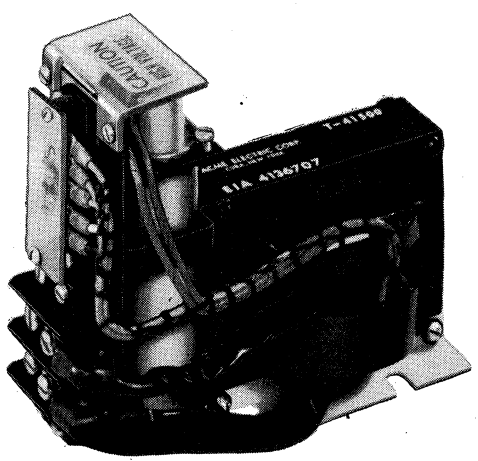
Acme Electric's engineering and experience have developed thousands of custom-designed constant voltage transformers for a variety of industrial markets. These areas of production and development include such industries as: data processing, communications, automation, instrumentation, office copying equipment, medicine, photography, to name but a few. And, each unit has been designed to meet the customer's exact requirements.

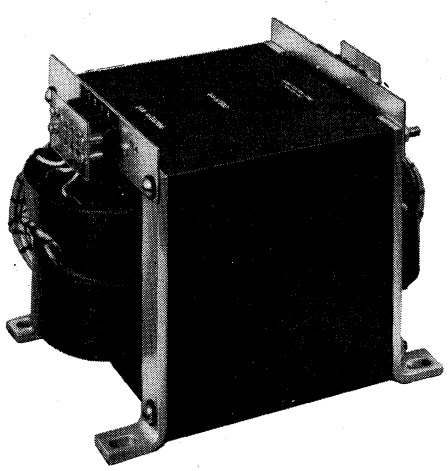
Does your equipment or system require a regulated AC voltage for maximum performance? If so, draw on the engineering know-how of Acme Electric Corporation to solve your problem. Our business is to satisfy the functions of power control, conversion and/or regulation, whatever the industry or application.

Acme Electric
Acme Electric Corporation Cuba, New York

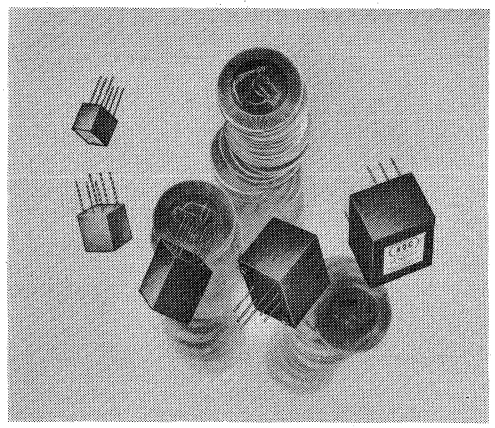








ADC Blue Chip Transformers



81 TYPES — 7 DIFFERENT SIZES

Tiny, plastic cased, Blue Chip transformers for printed circuit applications, are available for a wide choice of power ratings.

Seven different sizes, from .0156 to 1.2 cubic inches with a total of 81 ratings are listed below to indicate the available power levels for both voice frequency range and extended frequency operation. These ratings take into account not only power handling capacities at minimum frequencies, but also total harmonic distortion under stated conditions. Within the limits shown on the rating charts, variations in both power and distortion levels are possible depending upon the minimum operating frequency.

Blue Chip transformers meet Mil-T-27, Grade 5, Class S requirements. Unique design and construction features give ultra-reliability.

Special versions of these standard types are available upon request. For critical shielding applications, these units are supplied with a mu metal case over the standard plastic case providing the magnetic shielding specified.

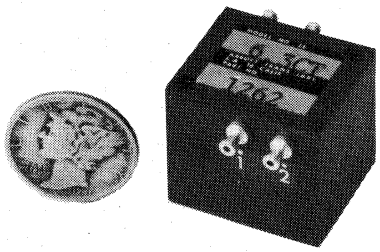
abbott 400 transformers



specifications

Input Primary
115V, 400 Hz ±20 Hz, 1 phase

Regulation
10% no load to full load

Secondary Voltage Tolerance
Within 5% when measured at full load and 115 VAC input

Insulation Test
2500 VDC or 150% of secondary voltage (whichever is higher)

Construction
To MIL-T-27B, grades: 2and 5, class: "S", life: "X" (10,000 hrs.) case: smaller (see drawing)

Environment
Encapsulated to meet MIL-E-5272C, including vibration to Proc. XII, temperature to 105°C, shock, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion, and altitude (to a vacuum)

Output Secondary
See voltage and current of specific models listed

features

- Hermetically sealed
- 105°C operation
- To meet MIL-T-27B
- Designed exclusiverly for 400 Hz
- For aerospace application
- Molded diallyl phthalate

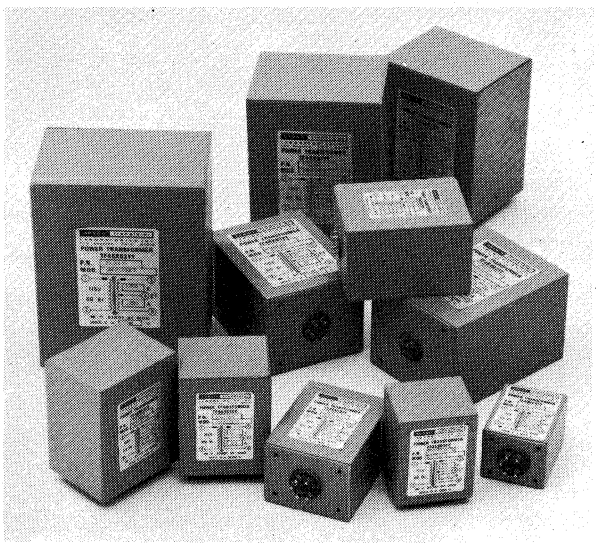
abbott transistor 5200 W. Jefferson Blvd. / Los Angeles 90016
LABORATORIES, INCORPORATED (213) WEbster 6-8185 Cable: ABTLABS

abbott 60 ~ transformers



DELIVERY IS NORMALLY FROM STOCK

features

- Quality MIL-spec 60 Hz power transformers
- Hermetically sealed
- to meet MIL-T-27B
- 105°C ambient operation
- 5 to 5000 volts
- 5 to 300 watts

specifications

INPUT PRIMARY: 115 VRMS, 60 Hz ±5 Hz, 1 phase

INSULATION TEST: 1750 VRMS or 150% of secondary voltage (whichever is higher)

CONSTRUCTION: To MIL-T-27B, grades: 4 and 5, class: "S", life: "X" (10,000 hrs.) case: (see drawing)

ENVIRONMENT: 105°C maximum ambient temperature. Encapsulated to meet MIL-E-5272C and MIL-E-5400H for vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion and altitude (to a vacuum)

WORKING VOLTAGE: 1000 VAC for all transformers with secondary voltages up to and including 1200 VAC; 80% of rated secondary voltage for all others

SECONDARY VOLTAGE TOLERANCE: Within 3% of listed output voltage when measured at full load and 115 VAC input

OUTPUT SECONDARY: See voltage and current of specific models listed in the following pages.

Output Volt (at F.L.)	Output Current (Amps)	Size (See Dwg.)	Wt. lbs.	Model Number	Price 1 pc.	Price 2-4 pcs.

abbott transistor
5200 W. Jefferson Blvd. / Los Angeles 90016
(213) WEbster 6-8185 Cable: ABTLABS
LABORATORIES, INCORPORATED

A. Industrial Control Transformer — Machine Tool and Industrial Control applications. 50 VA thru 15 KVA, 50 and 60 or 50/60 Hz. All NEMA primary and secondary voltages or special voltages.

B. Linear Reactor Load Bank—Load Bank for testing industrial electrical equipment. Up to 1000 KW . . . single and multi-phase. Voltages to 10 KV . . . hi-pot to 50 KV.

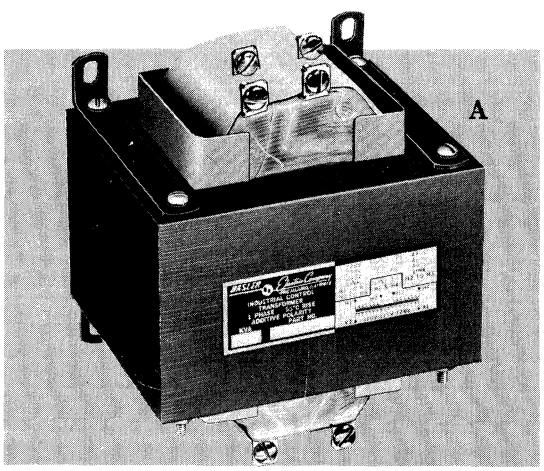
C. Encapsulated Magnetic Amplifier — To MIL-T-27 for military guidance systems . . . toroidal and laminated core types.

D. Saturable Reactor—Used in Control of industrial electrical equipment. Basler capability range to 1000 KVA, to 8.6 KV class, Hi-Potted to 19 KV.

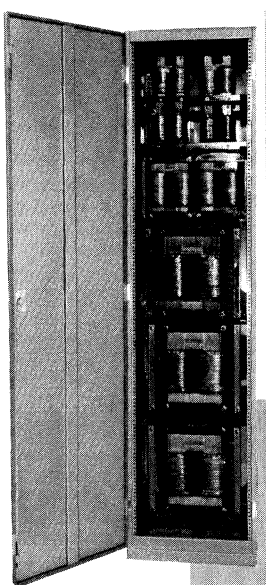
E. Power Transformer — Transformer for use on submarines . . . withstands high shock and vibration. We build step-up, step-down and Auto Transformers in power ranges from milliwatts to 1000KVA . . . millivolts to 15KV. Hi-Pot to 31 KV.

BASLER Electric Company
HIGHLAND, ILLINOIS
Box 269 Zip 62249—Phone 618-654-2341

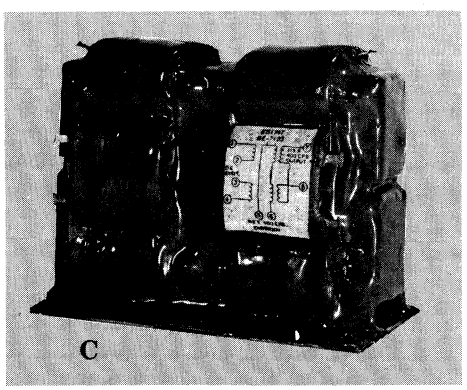
Manufacturers of Magnetic Components, Power Control Equipment and Systems.



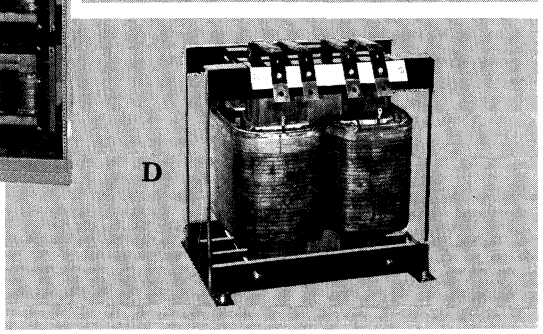
A



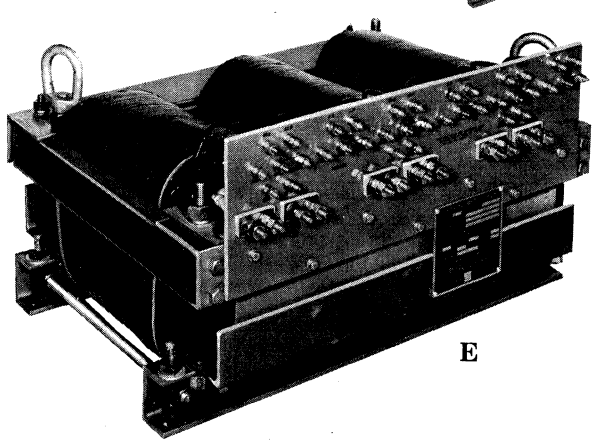
B



C



D



E

At Basler Electric, product capabilities are more than a mere possibility . . . they're a reality.

Quality "input" from engineering, design and manufacturing experience make Basler your obvious supplier of Magnetic Components, Power Control Equipment and Electronic Systems.

The units illustrated here are only representative of the broad range of electric and electronic products "on line" at Basler Electric.

For detailed information on these and other products by Basler, write for bulletins.

BASLER ELECTRIC TRANSFORMERS

PULSE TRANSFORMERS

OPEN FRAME PACKAGING

A Contemporary Exclusive! Open coils in a mechanically secure mounting. Inexpensive and small in size.

DIP PACKAGES

As many as four transformers may be enclosed in an integrated circuit dual-in-line package 0.125 inches high. Over 50,000 coils per week are being produced in the package at present.

STRONG CAPABILITIES— TOP FACILITIES

Contemporary is currently producing over 200,000 pulse transformers per month in *three* modern, climate-controlled plants...in Minneapolis and Marshall, Minnesota; and in Juncos, Puerto Rico. Fast delivery, highest quality and extra grade service are Contemporary standards—not just extras.

You're assured of wide selection of package styles, because Contemporary maintains its own moulding facilities for the production of pulse transformer packages. Currently, tooling is available for 19 popular case styles. Custom packages are delivered quickly and at low tooling charges. Write for data sheet 202 for complete details on available packages. *219 standard designs!*

Want engineering help? Contemporary Electronics' applications engineers are always available to assist you with pulse transformer selection and specification problems. Write for the following application notes:

AN 602 Pulse Transformer Parameters—their definition, measurement, specification.

If you don't see what you need in the standard line remember—

CONTEMPORARY ELECTRONICS PRODUCES OVER 300 CUSTOM PULSE TRANSFORMERS!

Call us for custom design, fast service . . .

DESIGN INFORMATION

NOMINAL INPUT VOLTAGE—115 Volts.
FREQUENCY—60 to 400 cycles.
CIRCUIT—Voltages shown are D.C. outputs with a condenser input.
CENTER TAP—All units are center tapped. The ratings, therefore, are for a full-wave circuit. Models I-10 to I-13, S-9 to S-13 and H-9 to H-20 are designed for a bridge circuit.
TEST VOLTAGE—1000 V., D.C. between primary and secondary, and between secondary windings.
INSULATION—Nylon bobbin; insulating paper between each layer; Mylar outer wrap between primary and secondary.
LEADS—Flexible leads rated for 105°C.
DUAL SECONDARIES — Transformers shown with two output units give indicated current from each tap.

220 VOLT A.C. INPUT TRANSFORMERS

All transformers listed may be wound for 220 v.a.c. input.

CHANNEL FRAME DIMENSIONS

Type	Distance Bet. Cent. Mtg. Holes	Overall Lgth. of Base	Hole Size
SM	1¾"	2 1/16"	3/16"
R	2 1/16"	2⅜"	3/16"
I	2⅜"	2 13/16"	3/16"
S	2 13/16"	3¼"	3/16"
H	3 1/16"	4"	3/16"

ENCASED TRANSFORMERS

All listed transformers are available fully encapsulated in a MIL-T-27 can, designed to withstand shock, vibration and temperature extremes.

The cost of such units is an additional $11.00 for single secondary transformers and $13.00 additional for dual secondary units.

Standard connectors are of the hooked solder pin type (0.900" in dia.), mounted dead center on the stud side of the case.

FERROTRAN ELECTRONICS COMPANY, INC.

683 BROADWAY • NEW YORK, N.Y. 10012 • PHONE: (212) AL 4-5810

FREED TRANSFORMER CO., INC.

STANDARD MILITARY TRANSFORMERS

The group comprises audio and power units designed to meet MIL-T-27 A specifications.
The functional characteristics of these transformers were established by the Armed Service Standardization Program. These units are supplied in standard MIL cases.

Transformers meeting MIL-T-27A specifications Grade 1 through 6 with temperature characteristics of Class S, T, or U can be supplied on special order.
Encapsulated units using either Epoxy-Resins or Fosterite can be supplied for Grade 2 and 5.
Class U components can be supplied molded in special high temperature Freed resin.

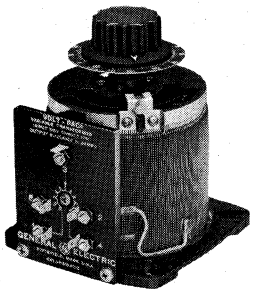
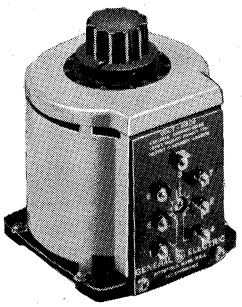
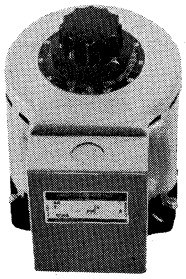
volt-pac® VARIABLE TRANSFORMERS



Manual uncased unit—exposed terminals



Manual cased unit—exposed terminals



Manual cased unit—enclosed terminals

The Volt-Pac variable transformer is a control device which provides continuously adjustable output voltage from a fixed line input to vary the voltage applied to a particular electrical load. With Volt-Pac units, output voltage is changed by flux transformation . . . in the unsaturated range of the magnetic core. The results . . . low cost, versatility, reliability, simplicity, and no wave form distortion.

Volt-Pac units, for surface or back-of-panel mounting, are designed for operation in ambients of —20C to +40C at full rated load, and under all load conditions have low electrical losses.

* When Overvoltage Connection is used, rated current should not be exceeded. Output kva for Overvoltage Connection is maximum output voltage times rated current.

† When using extended tap connections, operation is for 60 hertz per second only.

‡ Output at Overvoltage Connection is 0-132 volts.

§ When operated on lower input-voltage tap, rated current must be reduced when output voltage exceeds 140 percent of input voltage.

¶ For Line-voltage Connection only — No Overvoltage Connection provided.

■ For 240-volt input, 0-240-volt output, application only.

• For 480-volt input, 0-480-volt output, application only.

ϕ 60 hertz only.

△ Time to change output from 0 to 100%. Other times, from 2.5 to 60 sec, are available.

○ When operated on 120-volt input taps, rated current must be reduced when output voltage exceeds 168 volts.

For other footnotes, see opposite page.

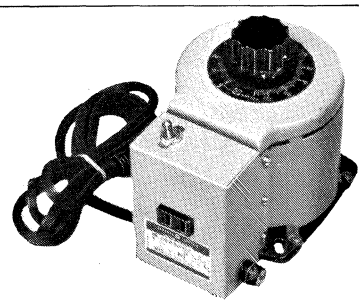
PLUG-IN SETS

For laboratory or shop source of adjustable a-c voltage. Provides output voltage of 0-117% of input voltage. Equipped with a line switch and a fuse for overload protection.



Cord is 6 feet long.

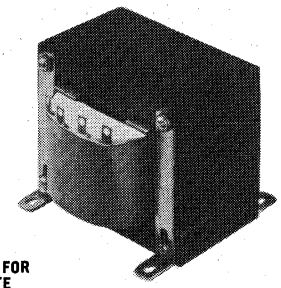
POWER TRANSFORMERS AND HIGH CURRENT CHOKES



STOCKED FOR IMMEDIATE DELIVERY

- Available Immediately From Stock
- Secondary Voltages Between The Standard Units Available At No Additional Cost
- Primary Voltage = 115V RMS, 60 HZ (Will Operate To 400 HZ)
- Capacitance and Inductance Values Shown For E_{ripple} (P-P) ≤ 3% of E_{dc}.
- Allow Two Weeks For Non-Standard Voltage Transformers
- Nomenclature of Part Number 1000 - 56 Secondary Power Rating in VA RMS Voltage
- Transformer Regulation is 5% No Load to Full Load

1. Transformers Rated For 45°C Temperature Rise. Rated For Class B Performance Per MIL-T-27B.
2. All Transformers Have Two Secondary Windings. They Can Be Connected For Parallel or Series Operation

- Bleeder Current = 10% of I_{dc}.
- V_f of Rectifiers Will Affect D.C. Output Voltage
- Choke Connections: P - Parallel S - Series

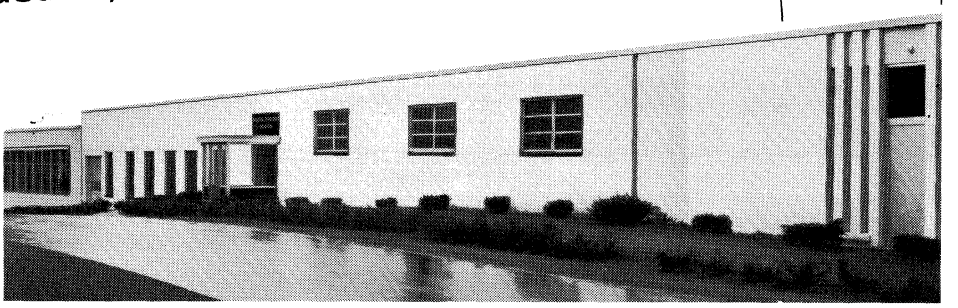
NEWS

MELVILLE, NEW YORK
FEBRUARY 20, 1969

Lambda acquires 44,000 square foot manufacturing facility for the production of five-year guaranteed transformers and magnetic components for industrial, military and commercial use.



Lambda's new 44,000 square foot Industrial Transformer Division at Gouldsboro, Pa.

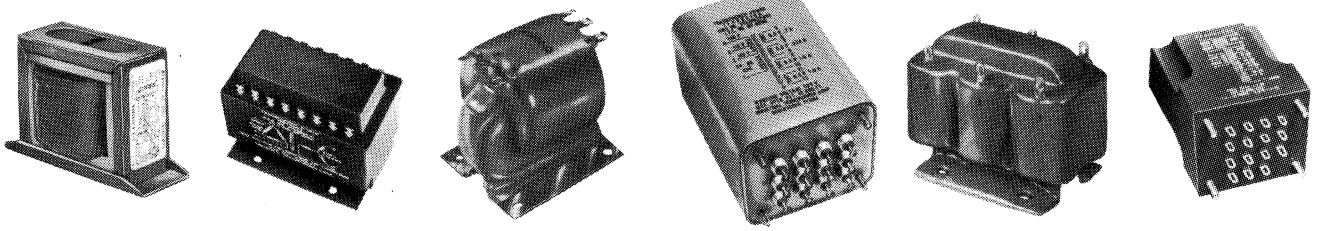
Lambda announces its entry into the transformer business with the acquisition of Industrial Transformer Corp., an established manufacturer of custom-made, commercial, industrial and military transformers.

Now, for the first time, Lambda is able to offer customers:

- Highest quality transformers *fully guaranteed for 5 years* for both materials and labor.
- Custom-engineered transformers to meet military, commercial and industrial applications.
- An in-house QPL capability.
- A total of 180,000 square feet of modern manufacturing facilities offering a single source of supply for high reliability Power Components, Power Instruments and Power Systems.

Lambda's experienced, nationally-based field sales and service organization is able to offer immediate assistance to customers in meeting their specific transformer requirements.

TYPICAL LAMBDA TRANSFORMERS



OPEN-FRAME | POWER | HIGH TEMPERATURE | HERMETICALLY CASED | ENCAPSULATED | MOLDED

MILITARY PERFORMANCE SPECIFICATIONS

Military grade transformers are designed and qualified to meet all parameters of MIL-T-27C, all grades, all classes, all groups.

Lambda is a qualified QPL vendor of MIL-T-27C Transformers

ORDERING TRANSFORMERS

Direct all transformer inquiries to Sales Department, Lambda Electronics Corp., 515 Broad Hollow Road, Melville, New York 11746. Telephone: 516/694-4200. TWX: 510-224-6484. CABLE: VEECOVAC PLAINVIEW, N. Y.

MCE MINIATURE TRANSFORMERS

400 CYCLE • 60 CYCLE • MULTI-PURPOSE

Forwards they're for isolation and stepdown — backwards they're for converters and inverters. This built-in bi-directional capability is only one of the many values designed into MCE's miniature standard transformer line. These unique parts are listed below in our easy to find "by size" sequence. As is the case with all MCE standard lines, any component can be ordered in a variety of packaging, mounting, and termination configurations.

In addition to a wide selection of electrical specifications and packaging options, MCE standard components offer high value (quality/price). Request Catalogue for more information.

115V - 400 CYCLE RT SERIES

This RT line of miniature transformers has been designed for use in 400 cycle power supply and control applications. They are also useful for inverter and converter applications in the popular 400 cycle to 2Kc frequency range. Each part has a nominal 115 Volt RMS center-tapped primary and two equal and separate step-down secondaries. Total power ratings are from 2.4 to 215 VA. This is based upon a regulation of 10% or a temperature rise of 25°C above ambient of 25°C. Power ratings and secondary voltage ratings are for both secondaries carrying rated current. The secondary voltages given in the tables are for **each** separate secondary. The two secondaries may be connected in series to give twice the rated voltage (V) at rated current with a center tap available.

MINIATURE LINE

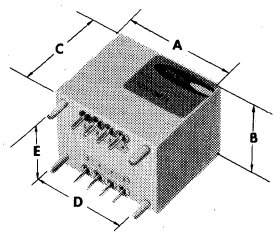
DIMENSIONS AND PACKAGING

MCE miniature standard parts are available in the 7 packages listed below. The 2 letter alpha code of the desired package must be added as a prefix to the Electrical Part Number to completely identify the part.

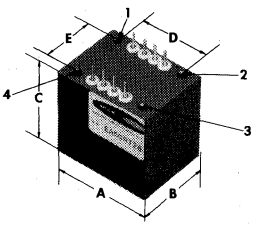
CA (Canned) Studs with terminals on same surface
CB (Canned) Inserts with terminals on same surface
CC (Canned) Studs with terminals on opposite surface
CD (Canned) Inserts with terminals on opposite surface

OA (Open) Terminals, strap bracket and hard epoxy coating
OB (Open) Flex leads, strap bracket, moisture resistant coating.

EA (Encapsulated) Terminals with thru holes at corners.



LOW PROFILE HERMETIC SEALED CAN (CA EXAMPLE)



ENCAPSULATED WITH THRU-HOLE MOUNTING (EA EXAMPLE)

115V - 60 CYCLE CT SERIES

These miniature 60 cycle transformers are especially designed for small DC power supply and other control applications, where a voltage step down and/or isolation from the standard 115 volts is required at relatively low power levels. All secondary windings have center taps and are Bi-Filar wound for balanced resistance and voltage. Rated secondary current (I) is based upon regulation of 15%. Maximum secondary current (I Max.) is determined by a temperature rise of 100°C from an ambient of 25°C or the short circuit current indicated by (*). Secondary load voltage (V) is at rated current (I).

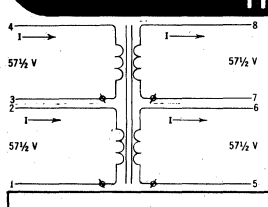
115V 400 CYCLE/20KC MULTI-PURPOSE TRANSFORMERS - MT1 SERIES



This line of utility transformers offers the design engineer a valuable tool for proving design concepts at minimum cost. Because they are lightweight and built to Mil-Spec they can be used equally as well as final design components. Primaries and secondaries both have two 57½ Volt windings. Built for a basic 400CPS operation, they will operate effectively—and with small phase shift-up to 20KC. Specifications are at 25°C at rated voltage, 400 cycle. For suggested circuit applications, write for product bulletin MT-1.

MCE MINIATURE FILTER INDUCTORS

mce

APPLICATION FEATURES

Miniature inductors, primarily for use in DC power-supply smoothing-filter applications, are offered in two series (1) the linear FL SERIES and (2) the "swinging" NL SERIES.

The FL SERIES inductors are especially suited for requirements where the DC will be 50 to 100% of I-DC rated. They will provide the most inductance in this range.

The NL SERIES inductors are generally more suitable where the DC will vary between 10 to 100% of I-DC rated. The inductance at rated I-DC is approximately ¼ of the value at I-DC = 0.

Both SERIES are listed by size in the tables of specifications. The V, I-DC, and R are the same for similar part numbers, only the inductance values and characteristics are different.

All parts are available in any of the MCE Miniature Line package options (OA, OB, EA, CA, etc.).

NOTES:

1. *The inductance values given are at the corresponding V-RMS 60 CPS voltages and I-DC = 0. For test purposes, it is recommended that inductance measurements be made by impedance, or E-I method. This is preferable to bridge type instruments because of the relatively high AC voltage levels and low Q values at 60 CPS.*
2. *For canned parts (CA, etc.) with very small resistance values (R≦1.0), the total resistance at the terminals is slightly higher than the table values. If required, request this data giving complete part number.*
3. *Dielectric withstanding voltage: 500 V-RMS 60 CPS.*
4. *Insulation resistance ≧1000 megohms @ 500 V-DC.*
5. *All electrical data is @ 25 ±5°C.*
6. *For complete packaging information refer to appropriate Package Bulletins (OA, OB, EA, & CA).*
7. *Sizes 25 and 37 encapsulated parts (EA) have only 2 thru holes.*
8. *All OB type parts with part numbers ending with 15, 16, or 17 have self leads (solid) with sleeving.*
9. *Specify complete part number, e.g. OA25FL20, OB37NL18, EA50FL17.*

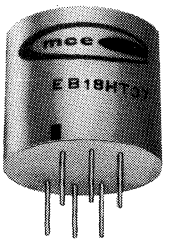
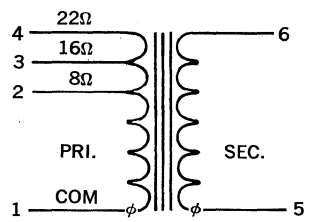
INTEGRATED CIRCUIT AUDIO OUTPUT TRANSFORMERS

APPLICATION FEATURES

MATCH INTEGRATED CIRCUITS — Specifically designed to provide isolation and impedance matching for popular power integrated circuits in ½ to 1 watt power output range.
CHOICE OF SINGLE-ENDED and PUSH-PULL INPUTS
PACKAGING FOR P.C. BOARDS — Epoxy Encapsulated unit at moderate cost for plug in on Standard 0.1 inch grid spacing.



HT SERIES — SINGLE ENDED INPUT



SCHEMATIC

SPECIFICATIONS & FEATURES
1. Primary impedance — matching taps for 8, 16 or 22 ohms.
2. Insertion loss — less than 1 db under matched conditions.
3. Input power capability — 1 watt.
4. Primary unbalance DC — 10 milliampere capability.
5. Primary DCR — 1.78 ohms ±20%.

PART NUMBER	SECONDARY IMPEDANCE OHMS	TURNS RATIO PRI (1-4) :SEC (5-6)	SECONDARY DCR ± 20% OHMS

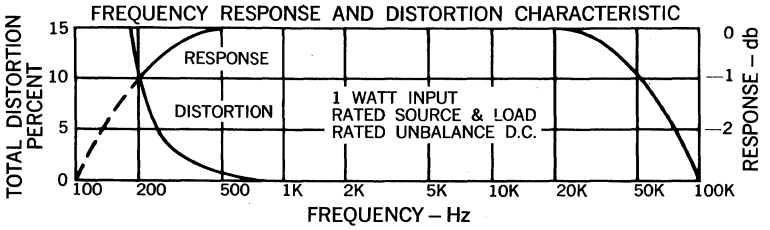
FREQUENCY RESPONSE AND DISTORTION CHARACTERISTIC



Note: When driven from a 'stiff" source or at reduced power, both low frequency response and distortion characteristics are considerably improved. The degree of improvement is dependent upon the characteristics of the driving amplifier employed.

ADDITIONAL SPECIFICATIONS
1. Maximum Temperature Rating = 130°C.
2. Dielectric withstanding voltage = 500V-RMS 60 Hz.
3. Insulation resistance ≧ 1000 megohms @ 500 V-DC.
4. All electrical data is at 20 ±5°C.

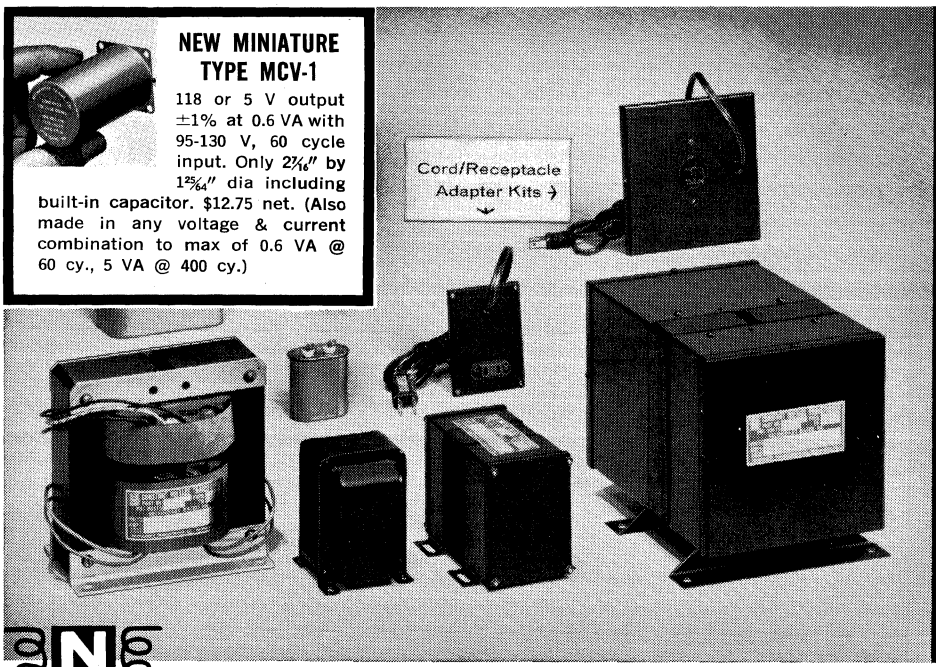
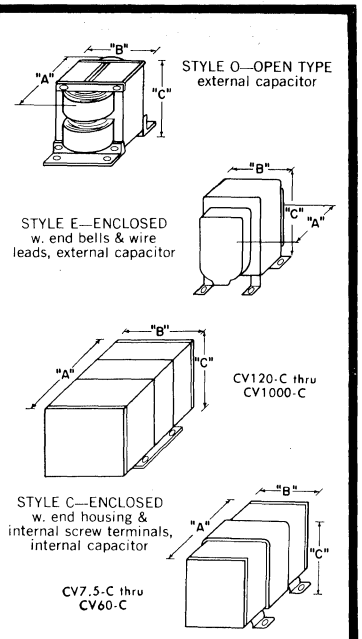
NEW MINIATURE TYPE MCV-1

118 or 5 V output ±1% at 0.6 VA with 95-130 V, 60 cycle input. Only 2 7/16" by 1 25/64" dia including built-in capacitor. $12.75 net. (Also made in any voltage & current combination to max of 0.6 VA @ 60 cy., 5 VA @ 400 cy.)





NTC CONSTANT VOLTAGE TRANSFORMERS

STATIC-MAGNETIC VOLTAGE REGULATING TRANSFORMERS

NORMAL HARMONIC TYPES

- Output capacity from 0.5 to 3,000 VA
- Instantaneous, continuous voltage regulation
- No tubes or manual adjustments
- Ratings made to order at low cost
- Compact, single-unit design
- Low-cost open types for component applications
- Heavy-duty, enclosed types for accessory uses
- Single or multiple secondaries

NTC constant voltage transformers maintain output voltages within one percent with input voltage fluctuations up to 15 percent. Regulation is instantaneous, continuous and completely automatic. Operating on principles of ferroresonance, the transformers have no tubes, moving parts or separate saturable reactors.

Most important, the design of NTC constant voltage transformers enables their outputs to be made exactly to your specifications — and at decidedly low cost even in small quantities. With only a few basic lamination configurations and windings, virtually any output voltage/current combination can be obtained. *Since the transformers are designed to your specific requirements they often eliminate costly circuitry and expensive components.*

POWER SUPPLIES, too . . . Neshaminy's engineering skills are at your service for the design and quantity production of complete, regulated power supplies in any capacity and rating. Let us discuss your next requirement.

TYPICAL STANDARD MODELS

1% output regulation. Closer regulation to order. Output contains approx 14% total rms harmonic content. SPECIAL MODELS can be made quickly to exact requirements in any step-up or step-down ratio of voltage to current within the desired VA rating and with single or multiple secondaries, with or without centertaps. CV models also available for 50 cycles, and MCV models for 50 or 400 cycles.

NOTES

1. Cord/Receptacle kits, similar to that shown in illustration are available on all "C" style transformers of 118 VAC output rating.
2. Specify required input voltage range on CV transformers from 250 to 1000 VA.
3. To specify output voltage required (6.3 or 118 VAC) add voltage to model number (Example — 15 VA cased transformer with 118 VAC output would be model #CV15-118).
4. "C" style units have built-in capacitors. Styles "E" and "O" have external capacitors.

Send us your requirements for a prompt quotation.

NESHAMINY TRANSFORMER COMPANY

Furlong, Penna. (215) 794-7411

NTC is a division of the Neshaminy Electronic Corporation, manufacturers of JansZen Electrostatic high fidelity speaker systems and components. NTC input and power transformers are used in the high voltage bias supply of the JansZen Electrostatic.

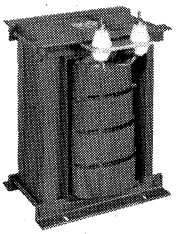
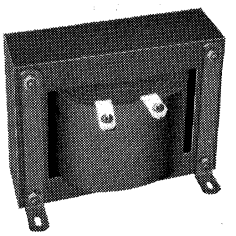
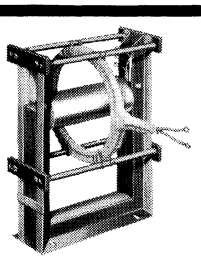
Instrument transformers, current and potential, 1-10,000 amperes, 1-50,000 volts. High accuracy, through type, bus bar, indoor and outdoor.



Plate, audio and modulation transformers in sizes from 50 VA to 100 KVA and up to 100,000 volts.

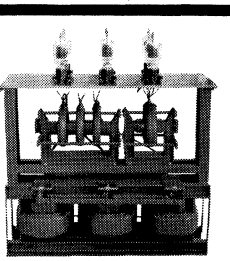


Chokes, linear and swinging. 0.1 millihenry to 10 henry.

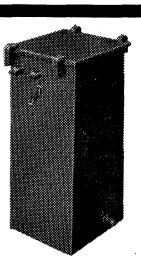


Filament transformers, single and multiple. Up to 100,000 volts, dry and oil types.

Saturable Core Reactors, from 50 VA to 500 KVA. Single and 3 phase.

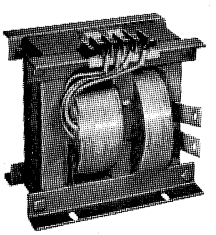


Rectifying transformers and supplies, 1, 2 or 3 phase. 1 to 3,000 amperes, up to 500 KVA.

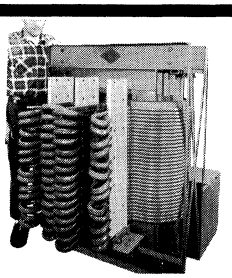


Oil filled specialty and high voltage transformers up to 300 KVA.

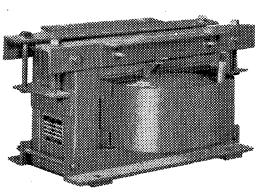
Heating transformers for resistance and induction furnaces. All types. Up to 1200 KVA.



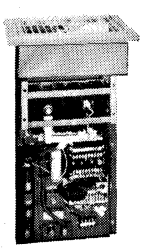
High impedance type transformers, from 50 VA to 50 KVA and up to 10,000 volts.



High power and high current water-cooled transformers.



Reactors, 50 VA to 500 KVA. AC and DC. Linear and swinging.



Solid State SCR Power Controllers.

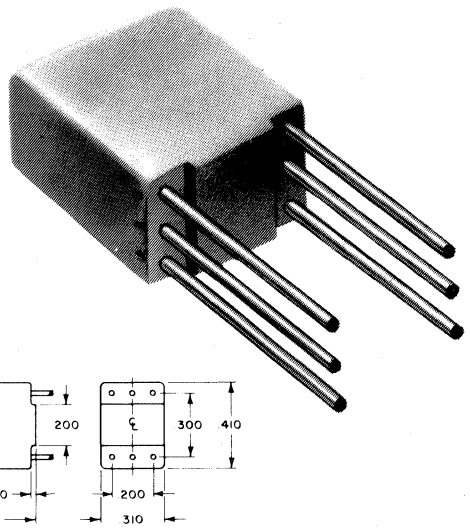
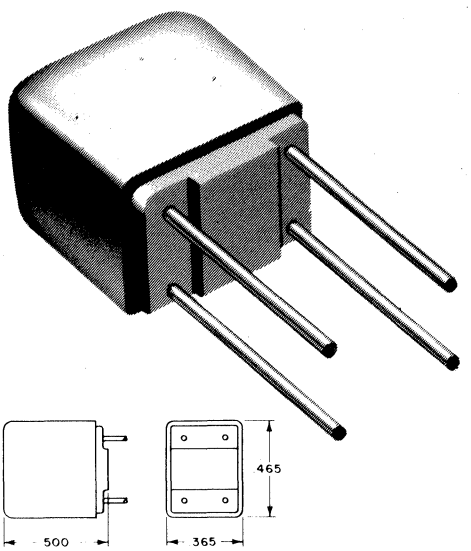
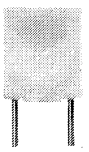
NYTRAN — Miniature Transformers for Printed Circuit Board Applications

Designed to Meet MIL-T-27, Grade 5, Class R, Life X.







ACTUAL SIZE

- **Small size ■ Inexpensive ■ High Performance**
- **Excellent Response ■ Stands Off PC Board**
- **Epoxy-Sealed ■ Magnetic Shielding Optional**

Nytran miniature transformers are designed specifically for PC board and transistor applications. With impedances from 200,000 ohms to 3.2 ohms, these standard transformers match almost every circuit requirement. Encapsulated into tiny .310 x .410 x 465" high epoxy cases, Nytran transformers include gold plated leads for ease in soldering. A small step holds the lead exit above the circuit board for inspection, cleaning and ease of soldering. An optional mu metal cover is also offered to protect the Nytran from stray magnetic fields.

ELECTRICAL CHARACTERISTICS:

Power:	50 milliwatts (300 Hz), 750 mw at 1000 Hz
Frequency Response:	±2 db from 300 Hz to 100 KHz
Useful Frequency Range:	To 100 Hz at reduced power
Operating Voltage:	100 vdc to ground
Test Voltage:	500 vac, rms

PHYSICAL & ENVIRONMENTAL CHARACTERISTICS:

Case Dimensions:	.310" x .410" x .465"
With Mu Metal Shield:	.365 x .465 x .500"
Lead Wire Diameter:	.020" (nominal)
Lead Wire Length:	¾" standard
Weight:	0.1 oz. (approx.)
Environmental:	Designed to meet MIL-T-27, Grade 5, Class R, Life X.

OHMITE has the answer in variable transformers

Seven basic physical types meet most industrial requirements with long, maintenance-free life. Excellent regulation at any point within rated load; free from wave-form distortion. Direct-reading 2-scale (1 per side) dial supplied; CCW also available. New space-saving low power types VT1, VT02 and VT3 have adjustable shaft independent of brush assembly, 3-way terminals, instantly replaceable brush contacts and improved heat dissipation. **Mounting:** Easily replace other brands: VT2LN, VT1, VT02 and VT3 have 3/8-32 thd. bushing; VT8 and VT20, 4-hole bolt mount; VT4, 3-hole bolt mount convertible to 4-hole with adapter plate. **Enclosed Types:** Gray hammertone-finish cases. Units with suffix **B** have exposed terminal panel and mounting base; **E**, fixed type for table or panel mounting; **F**, portable with cord, outlet socket and fuse; **G**, deluxe portable with handle, circuit breaker and switch for overvoltage selection. Final suffix: **V** indicates with voltmeter; **VA**, voltammeter; **VW**, volt/wattmeter; all come with handle except VT8NF series. **Other Options:** All types except VT2LN offer shafts, extendable from brush or base side; ganged versions have thru-shaft with same flexibility. Final suffix **C** types come with 3-cond. input and output with one grounded to case. **UL Listing:** Most single and tandem VT4, VT8 and VT20 units for 120 volt operation are U/L Listed. Consult factory.

VT20HN-3	480‡	11.0	0-480	Same, no overvoltage	7½‡* x 15 1/16 x 8 1/16	173.50

*Minimum; max. up to 1000 cps for all models. †Use also at 50 cps if connected at no overvoltage output. ‡With 120V input tap at which the max. current output rating applies up to 120 volts, but reduces approx. 50% at max. output voltage shown. In tandem units, the use of low voltage inputs would halve the rated input and output voltages. §User wires for desired output; dial normally calibrated for overvoltage. #Factory-connected for overvoltage output; easily re-connected by user for no overvoltage. •Switch selects overvoltage or no overvoltage. ¶5¾" including handle. ■Case height only, excluding handle. ↓Depth behind panel: add 1" for knob thickness for VT8 types; ⅞", VT02 or VT4 types; 1¼" for VT20 types. θ9" including handle. ††Includes knob, dial and hardware. **Must not be connected for overvoltage. ‡ For mounting bracket, add 1¼" w. x 7/16" d.

TRANSFORMER ACCESSORIES

Extra Dials, Extra Knobs for Uncased Units, Adjustable Stops, Brush Contact Assemblies, and Special Mounting Adapters are available for Ohmite Variable Transformers. See Radio Master for Complete Details.

PEERLESS ELECTRICAL PRODUCTS

CUSTOM TRANSFORMERS

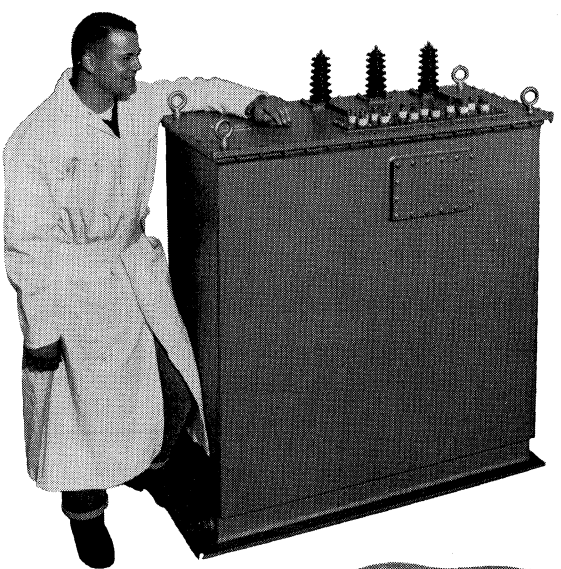
Designed to any specification; manufactured in any quantity

SINCE 1935, Peerless has designed and manufactured transformers of highest reliability to meet exacting specifications in electronic applications. Peerless is a leader in size reduction, rugged packaging, and in establishing industry standards for performance of broadband transformers.

Today, Peerless offers design and production capabilities that are virtually unlimited. Peerless experience covers a remarkably wide spectrum of types and functions. For example, transformers engineered and built by Peerless include sizes from 1/10th of a cubic inch to more than 20 cubic feet; from fractional voltages to 30,000; from less than one cycle to approximately ½ megacycle; and in one-two-three-phase and phase-changing configurations. Construction categories cover the entire range from open-frame to potted, hermetically sealed and vacuum impregnated units. Peerless transformers can be varnished, fosterited, epoxy or silastic impregnated, and encapsulated. Hermetically sealed units can be compound, resin, mineral or silicone oil filled.

Whatever your transformer needs, Peerless can design to any grade, class, or temperature range of military specifications or to commercial specifications and manufacture in any quantity. Your inquiries are invited.

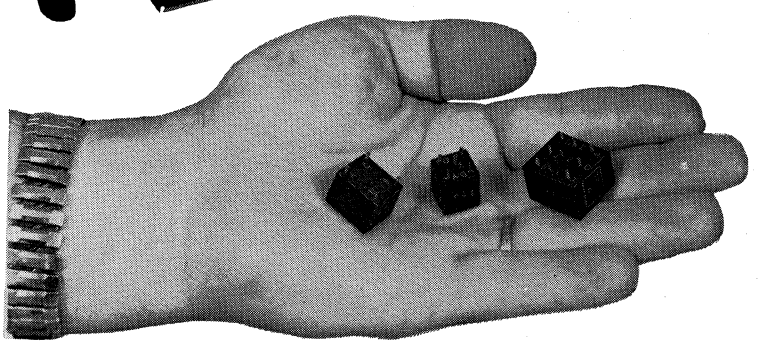
Typical examples of Peerless solutions to unique transformer requirements:



EXAMPLE 1

PLATE TRANSFORMER, 3-PHASE 60 CYCLE, OIL IMMERSED

- **Continuous Rating:** 250 KVA
- **Primary:** 2400/4160 v, Wye connected
- **Hipot Test:** 10 KV, RMS
- **Secondary:** 11,100 v, Delta connected
- **Hipot Test:** 45 KV, RMS
- **Dimensions:** 47" H x 20" W x 47" L

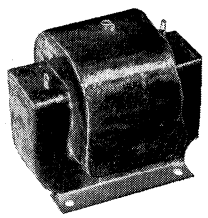


EXAMPLE 2

MINIATURIZED 400 CYCLE TRANSFORMERS

- **Primary:** 26 v, RMS, 400 cps
- **Secondary #1:** 16 v, RMS, C.T. @ 3 ma
- **Secondary #2:** 16 v, RMS, C.T. @ 3 ma
- **Primary O.C.L.:** 2 H
- **MIL-T-27A,** Grade 5, Class R
- **Dimensions** (largest shown): .75" H x .875" W x .47" L

PEERLESS ELECTRICAL PRODUCTS

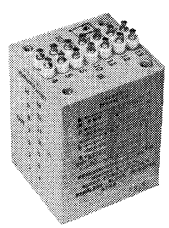


*EXAMPLE 4 (Peerless 17101)

MINIATURIZED CHARGING REACTOR

- **Inductance:** 4.85 henrys ± 5% @ 150 ma, DC
- **Linearity:** 10%
- **Operating Voltage:** DC = 8000
- **Test Voltage RMS:** 22,000
- **Usable at F up to:** 2,000 cps
- **Maximum Temp. Rise:** 85°C
- **Ambient Temperature:** 85°C
- **Max. Effective Cap.:** 51 micromicrofarads (measured at 20-25 megacycles)
- **Weight:** 2¾ lbs.
- **Dimensions, nominal:** 3½" H + ⅜" terminal, 2⅞" W, 3 13/16" L

Conforms to requirements of MIL-T-27B, Grade 5, Class T, Life Y

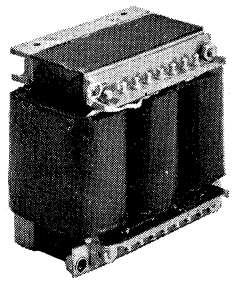


*EXAMPLE 16 (Peerless 4755)

MULTI-UNIT AUDIO TRANSFORMER
(consists of an input and output transformer in one case)

- **Input Transformer—Frequency Response:** 100 cps-5,000 cps, ± 1 db
- **Primary, Longitudinal Balance:** 35 db min., 20 cps-3,500 cps
- **Primary Impedance:** 1,800 ohms, C.T.
- **Secondary Impedance:** 248,000 ohms (total of two windings)
- **Secondary Resonant Frequency:** 75 KC min.
- **Output Transformer—Frequency Response:** 100 cps-5,000 cps, ± 1 db
- **Primary Impedance:** 5,300 ohms, C.T.
- **Secondary Impedance:** 1,000 ohms, C.T.
- **Secondary, Longitudinal Balance:** 35 db min., 20 cps-3,500 cps
- **Primary Resonant Frequency:** 75 KC min.
- **Weight:** 1 lb., max.
- **Dimensions:** 2 1/16" H x 1 15/16" W x 1 13/16" D

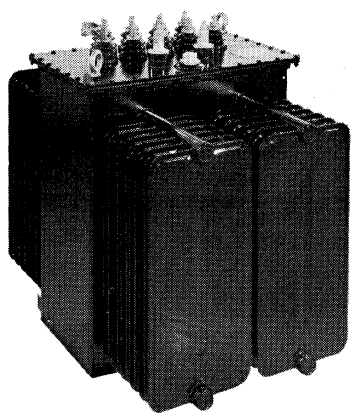
Conforms to requirements of MIL-T-27B, Grade 4, Class R, Life X
Environmental test data on file.



EXAMPLE 19

POWER TRANSFORMER
3-PHASE, MIL-T-27, GRADE 5, CLASS U

- **Primary:** 3-phase "Y" connected, 380-420 cps, tapped for 110, 112.5, 115, 117.5, and 120 v
- **Secondary:** "Y" connected to deliver 4,541 v, DC (full-wave rectification) at 165 ma
- **Ambient Temp.:** 100°C
- **Temperature Rise:** 70°C
- **Dimensions:** 3 13/16" H x 2 23/32" W x 4 17/32" L



EXAMPLE 18

IMPEDANCE MATCHING TRANSFORMER

- **Primary Impedance:** 4 ohms
- **Sec. Imped. Terms:** 16 ohms C.T. 6-7-8, 32 ohms C.T. 5-7-9, 64 ohms C.T. 4-7-10, 128 ohms C.T. 3-7-11
- **Frequency Response:** ± 0.5 db, 300-2,000 cps
- **Power Level:** 175 KVA continuous
- **Ambient Temperature:** 90°F
- **Askarel Filled**
- **Dimensions:** 41" Max. H (over spark gap) x 25¾" Max. W x 42" Max. L (over radiators)
- **Approx. Weight:** 1800 lbs. including askarel
- **Percent Regulation:** Approx. 0.5% no load to full load

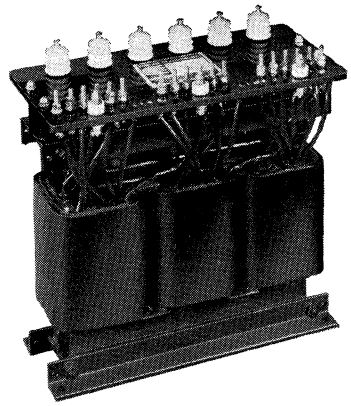


PLATE SUPPLY TRANSFORMERS
3-PHASE, 60 CYCLE, DRY TYPE

EXAMPLE 9

- **Rating:** 7.5 KVA
- **Primary:** 480 volts Delta, tapped at 460 v, 440 v, 420 v
- **Secondary:** 85 volts Delta
- **Dimensions:** 14" H x 7½" W x 15" L
- **Weight:** 170 lbs.

EXAMPLE 10

- **Rating:** 10 KVA
- **Primary:** 500 volts Delta, tapped at 480 v, 460 v, 420 v
- **Secondary:** 2570 volts Delta, or 4450 volts "Y"
- **Dimensions:** 18" H x 8" W x 17½" L
- **Weight:** 200 lbs.

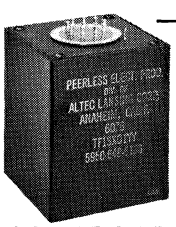
EXAMPLE 11

- **Rating:** 30 KVA
- **Primary:** 500 volts Delta, tapped at 480 v, 460 v, 440 v, 420 v
- **Secondary:** "Y", 3850 to ground or 6660 v between lines
- **Dimensions:** 27½" H x 11" W x 30" L
- **Weight:** 550 lbs.

EXAMPLE 12

- **Rating:** 45 KVA
- **Primary:** 480 volts "Y", tapped at 460 v, 440 v, 420 v
- **Secondary:** 165 volts Delta
- **Dimensions:** 21" H x 10½" W x 22½" L
- **Weight:** 625 lbs.

Complete environmental test results are on file. Information will be furnished on request.

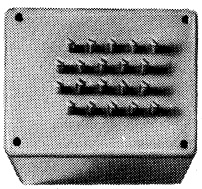


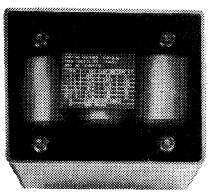
*EXAMPLE 22 (Peerless 6076) **400 CYCLE POWER TRANSFORMER**

- **Secondary:**
  - **Section 1:** 480 V./C.T. ± 3% @ 0.05A
  - **Section 2:** 6.3 V. ± 3% @ 3.0A
  - **Section 3:** 6.3 V. ± 3% @ 2.0A
- **Primary:** 115 Volts, 400 CPS
- **Weight:** 1.5 lbs.
- **Dimensions:** 2.75" H plus 0.6" for terminal x 2.25 W x 2.25 L

Conforms to requirements of MIL-T-27B, Grade 4, Class S, Life X

PEERLESS ELECTRICAL PRODUCTS



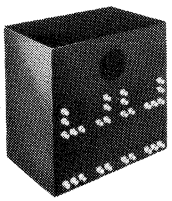


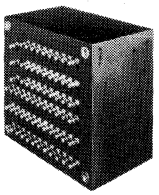
EXAMPLE 101

POWER TRANSFORMER

3-PHASE, MIL-T-27, GRADE 5, CLASS R

- **Rating:** 177 VA
- **Primary:** 3-phase "Y" connected 380-420 cps, 208 V, L to L.
- **Secondary 1:** Delta connected, 177 V, L to L, 0.023 A, RMS, per phase.
- **Secondary 2:** Delta connected, 177 V, L to L, 0.130 A, RMS, per phase.
- **Secondary 3:** Delta connected, 44 V, L to L, 0.87 A, RMS, per phase.
- **Secondary 4:** Delta connected, 11.2 V, L to L, 1.25 A, RMS, per phase.
- **Secondary 5:** Delta connected, 21.7 V, L to L, 1.05 A, RMS, per phase.
- Electrostatic shields between each secondary and between secondary and primary.
- Designed to operate over temperature range of −40°C to +58°C.
- **Dimensions:** 3-13/16" x 3" x 2¼" H approx.
- **Weight:** 3¼ lbs. approx.



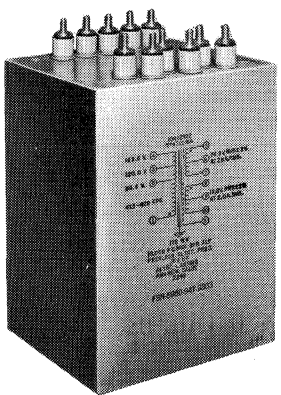


EXAMPLE 102

POWER TRANSFORMER

3-PHASE, MIL-T-27, GRADE 5, CLASS S

- **Rating:** 493 VA
- **Primary:** 3-phase, Delta connected, 380-420 cps, 200 V, L to L.
- **Secondary 1:** "Y" connected. 18.2 V, L to L, 0.021 A, RMS, per phase.
- **Secondary 2:** "Y" connected. 18.2 V, L to L, 0.021 A, RMS, per phase.
- **Secondary 3:** "Y" connected. 9.6 V, L to L, 2.53 A, RMS, per phase.
- **Secondary 4:** "Y" connected, 9.6 V, L to L, 4.22 A, RMS, per phase.
- **Secondary 5:** "Y" connected, 15.6 V, L to L, 2.80 A, RMS, per phase.
- **Secondary 6:** "Y" connected, 26.6 V, L to L, 3.48 A, RMS, per phase.
- **Secondary 7:** "Y" connected, 26.6 V, L to L, 3.70 A, RMS, per phase.
- **Maximum ambient temperature:** 65°C.
- **Dimensions:** 4½" x 4¾" x 2-13/16" H approx.
- **Weight:** 6½ lbs. approx.

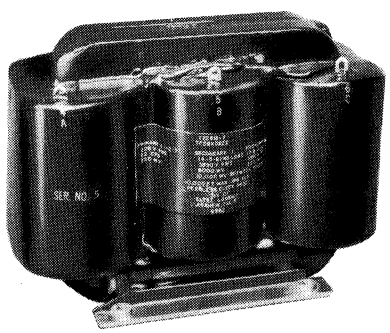


EXAMPLE 103

POWER TRANSFORMER

MIL-T-27, GRADE 4, CLASS S

- **Primary:** Single phase, 123.6 V, tapped at 120.0 V and 116.4 V, RMS, 47.5 cps to 420 cps.
- **Secondary 1:** 28.0 V, RMS at 7.8 A.
- **Secondary 2:** 12.6 V, RMS, 2.0 A.
- **Ambient Temperature:** 65°C.
- **Temperature Rise:** 65°C max.
- **Dimensions:** 3⅜" x 3-15/16" x 5¼" H approx.
- **Weight:** 7 lbs. approx.



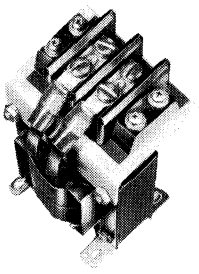
EXAMPLE 104

POWER TRANSFORMER

3-PHASE, MIL-T-27, GRADE 5, CLASS S

- **Primary:** 3-phase, delta connected, 60 cps, 208 V, RMS, L to L.
- **Secondary 1:** "Y" connected, 3850 V, RMS, L to L @ 0.5 ma.
- **Secondary 2:** "Y" connected, 3850 V, RMS, L to L @ 2.0 ma.
- **Ambient Temperature:** 75°C.
- **Temperature Rise:** 50°C max.
- **Dimensions:** 6" x 2⅞" x 4-13/16" H approx.
- **Weight:** 6½ lbs. aprox.

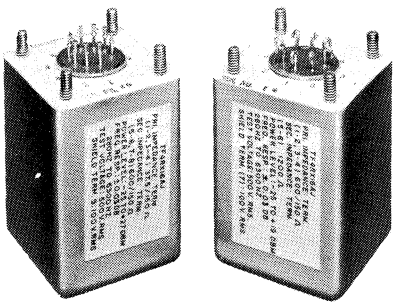
PEERLESS ELECTRICAL PRODUCTS



EXAMPLE 105

FILTER REACTOR

- **Inductance:** 0.1 MHY ±10%
- **Rated DC:** 26.5 A
- **Test Condition:** 0.1 MHY ±10% at 1V 60 cps superimposed on 26.5 A, DC.
- **Ambient Temperature:** 50°C.
- **Temperature Rise:** 45°C. max.
- **Dimensions:** 3⅛" x 3-3/16" x 4⅛" H approx. (over terminal block).
- **Weight:** 2¾ lbs. approx.



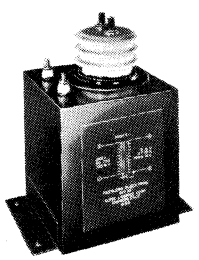
EXAMPLES 106 and 107

AUDIO TRANSFORMERS OUTPUT AND INPUT MIL-T-27, GRADE 4, CLASS R.

	EXAMPLE 106 Output Trans.	EXAMPLE 107 Input Trans.
Primary	150 ohms (two windings)	600 ohms (two windings)
Secondary	600 ohms (two windings)	1200 ohms
Insertion Loss:	0.85 db. max.	1.5 db. max.

This pair of transformers is designed to send into and receive from a 600 ohm transmission line. The following characteristics are common to both transformers.

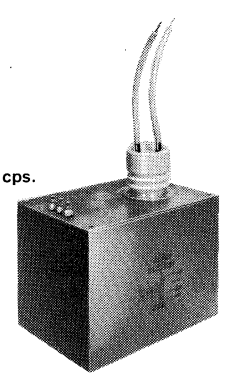
- **Power level:** +14 dbm max.
- **Frequency Response:** ±0.03 db from 280 cps to 6300 cps.
- **Longitudinal Balance, Line Side:** 55 db min.
- **Return Loss, Line Side:** 37 db min.
- **Harmonic Distortion:** 70 db below 0 dbm.
- **Intermodulation Products:** 65 db below +14 dbm.
- **Envelope Delay Distortion:** 7 μ sec. max.
- **Dimensions:** 1⅝" x 1⅝" x 2⅜" approx.
- **Weight:** 12 oz. approx.



EXAMPLE 108

FILAMENT TRANSFORMER MIL-T-27, GRADE 4, CLASS R

- **Primary:** Single phase 208 V, 60 cps.
- **Secondary:** 3.5 V @ 10 A RMS, insulated for a working voltage of 15,000 above ground.
- **Ambient Temperature:** 60°C.
- **Temperature Rise:** 15°C.
- **Dimensions:** 5-1/16" plus mounting flanges, x 5¼" x 5⅝" H plus terminals.



EXAMPLE 109

FILAMENT TRANSFORMER, HERMETICALLY SEALED

- **Primary:** 120 V, tapped at 115 V, 60 cps.
- **Secondary:** 13 V, RMS, at 36A, operating at 22,000 V, RMS, above ground.
- **Ambient Temperature:** 75°C.
- **Temperature Rise:** 30°C.
- **Dimensions:** 7¼" x 10-7/16" x 8" H (plus terminals) approx.
- **Weight:** 70 lbs. approx.

EXAMPLE 110

MINIATURIZED PULSE TRANSFORMER MADE TO CUSTOMER SPECIFICATIONS

1:1 Ratio 8 V transformer for operation in the 5 mc region.

BASIC GUIDE TO CUSTOM TRANSFORMER ESTIMATES

For prompt estimates on design and construction of custom transformers to meet your specifications, please submit the following information, as applicable. This information is intended only as a guide, and appears in abridged version. Convenient estimating specification forms will be mailed to you on request.

GENERAL

1. If military, show applicable specification. For MIL-T-27 show Grade, Class, Life, Family.
2. If commercial, state whether fully potted, exposed core with end shells, or open with brackets.
3. Ambient temp. °C. min, °C. max. Temp. rise °C. max.
4. Duty cycle. If intermittent, indicate time on, time off.
5. Mounting; terminal end, opposite end; inserts, studs, flanges.
6. Terminals, stand-off, feed-through, lugs, flex leads, other.
7. Size limit. Weight limit. Mounting centers.

BROADBAND, AUDIO AND LOW R.F. TRANSFORMERS

1. Input.
2. Interstage or Driver. Class A, AB, or B.
3. Output. Class A, AB, or B.
4. Modulation. Class A, AB, or B.
5. Impedance matching.
6. Other.
7. Frequency response ___Hz to ___Hz within ± ___dB.
8. Power rating watts in midrange, or at Hz. Watts at Hz (low frequency), Watts at Hz (high frequency).
9. Magnetic shielding dB min.
10. Primary OCL hys. min. at volts RMS and Hz, with MA of DC in winding.
11. Insertion loss, midrange dB, or midrange efficiency %.
12. Electrostatic shielding dB min. If other than nominal or conventional electrostatic shielding is required, list details.
13. Leakage inductance in mhys. max. referred to high imp. winding. Other windings short circuited.
14. Short circuited resonant frequency, referred to high imp. winding. Hz min.
15. Other.
16. Tabulation: Source impedance, ohms/Load impedance, ohms/Operating volts above ground (show AC or DC)/Max. DC in winding, MA/Unbalance DC in winding, MA/Polarity, referred to primary/Check windings which are loaded simultaneously/Longitudinal balance desired, dB, @ Hz. Taps as wanted.

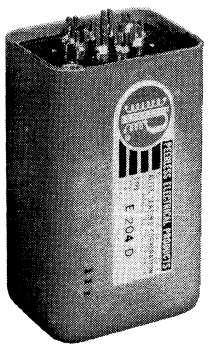
EXAMPLE 23

E-204-D IMPEDANCE MATCHING TRANSFORMER (20-20 PLUS)

It will attenuate longitudinal currents 80 db in a balanced circuit up to 20 Kc, and 70 db up to 80 Kc.



- **Primary Impedances (ohms):** 500 C.T.-125 C.T. or 600 C.T.-150 C.T.
- **Secondary Impedances (ohms):** 500 C.T.-125 C.T. or 600 C.T.-150 C.T.
- **Frequency Response:** ± 1 db 5 to 80,000 CPS
- **Power Level Primary DC:** + 23 dbm, maximum 100 ma, maximum 0 ma, unbalanced

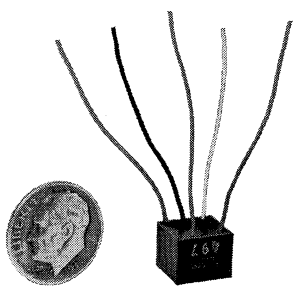
(As Hybrid)

- **Total Primary Impedance (ohms):** 500 or 600 Primary 1: 250 or 300 Primary 2: 250 or 300 Secondary: 500-125 or 600-150
- **Power Level:** + 23 dbm, maximum
- **Weight:** 1¼ lbs.
- **Dimensions:** 3¼" H x 1½" D x 2" W

EXAMPLE 24

K-241-D INPUT TRANSFORMER (20-20 PLUS)

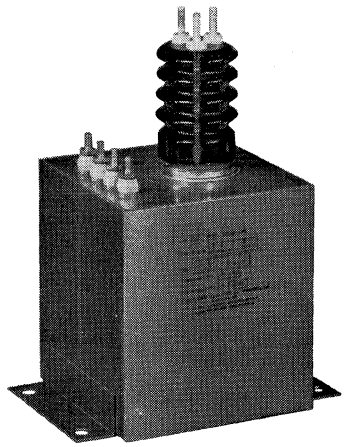
- **Primary Impedance (ohms):** 500-280-125-31 or 600-240-150-37.5
- **Secondary Impedance (ohms):** 70,000 or 84,000
- **Frequency Response:** ± 1 db, 10 to 25,000 CPS
- **Insertion Loss:** 1.25 dbm
- **Maximum Level:** + 8 dbm
- **Primary DC Max.:** 0
- **Weight:** 1 lb.
- **Dimensions:** 2¾" H x 1½" D x 2" W



EXAMPLE 25

400 CYCLE INTERSTAGE TRANSFORMER

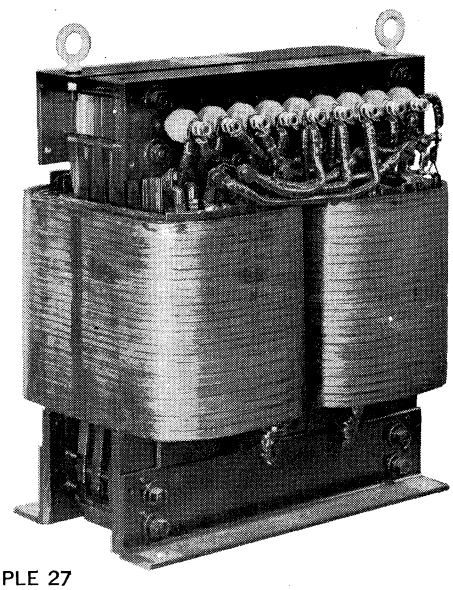
- **Primary Impedance:** 10,000 ohms
- **Secondary Impedance:** 1,200 ohms C.T.
- **Frequency:** 400 cycles
- **Primary Voltage:** 19.5V
- **Secondary Voltage:** 6.1V ± 5% at full load
- **Dimensions:** .385 max. H x .43 max. W x .46 max. L



EXAMPLE 26

HERMETICALLY SEALED 50-60 CYCLE FILAMENT TRANSFORMER

- **Primary:** 440, 460, 480 volts
- **Secondary:** 5 volts C.T. @ 10 amp.
- **Secondary Test Voltage:** 30,000 volts R.M.S.
- **Dimensions:** 10" H over terminal x 5" max. W x 7 1/16" max. L over flanges



EXAMPLE 27

AUDIO STEPDOWN MATCHING TRANSFORMER

- **Primary Impedances (ohms):** 0.52, 0.76, 1.07, 1.4, 1.7, 2.0, 2.7, 3.4
- **Secondary Impedance:** 0.1 ohm
- **Frequency Response:** ½ DB 40-5000 CPS
- **Rating Power Level:** 76.5 KVA
- **Weight:** Approx. 1,650
- **Dimensions:** 29 max. H x 17 max. W x 25 max. L

Peschel Components, Inc.

HIGH VOLTAGE SPECIALISTS

Peschel Components, Inc., division of Peschel Instruments, Inc., who for 20 years have specialized in High Voltage equipment, offers their modern production and test facilities to fill your custom high voltage transformer needs. You will find our optimized, yet conservative designs, offer enhanced efficiency, reliability and economy.

Efficient utilization of modern insulation materials permits drastic size reduction, yet we can provide corona free operation in air or oil for extreme life. Write for a R.F.Q. form, facilities report and catalog of stock transformers, bushings, corona balls and related HV components. Special electro-static shielding available.

SOLA ELECTRIC SB

DIVISION OF SOLA BASIC INDUSTRIES

CV Transformers

Constant-voltage Sola transformers provide a stabilized output voltage even though the input voltage varies over a considerable range. Their applications are numerous and varied. CV's are especially ideal for high-accuracy requirements such as in computers and data-processing equipment.

Another advantage in CV transformers is their ability to prolong the life of electronic components by eliminating injurious over- and under-voltages. The Sola transformer's current-limiting factor protects semi-conductors and other components from excessive inrush and fault currents.

Write for catalog CV-100 for complete listings including 50 and 400 Hz models.

Electronic-Power Types ±1% REGULATION FOR FILAMENT TYPE, ±3% FOR PLATE-FILAMENT TYPE

The electronic-power type of Sola transformer is designed as a component for simple assembly into many kinds of electronic equipment. The filament type (CVF) provides 6.0 or 6.3 volts of output regulated within ± 1% over line variations of ± 15%; the combination plate-and-filament type (CVE) regulates within ± 3%.

D — Drawn case; integral capacitor unit; flex leads.

E — Exposed core; end bells; separate capacitor; flex leads.

for filament service (Type CVF)

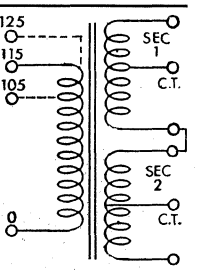
PARALLEL CONNECTED SECONDARIES

SERIES CONNECTED SECONDARIES



All transformers are designed conservatively for a max of 45°C rise above ambient, for use on 115V power line from 50-500 cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers and chokes are rugged in construction, well-insulated, and have a consistently uniform appearance. All ratings are at full load current continuous operation.

Electrical ratings have been chosen to cover a wide range of applications. All transformers have two center-tapped secondary windings.

SIGNAL TRANSFORMER CO., INC

FACTORY: 1 JUNIUS STREET, BROOKLYN, NEW YORK 11212 — (212) 498-5111

HIGH & LOW CURRENT TRANSFORMERS

OPEN FRAME • EPOXY ENCAPSULATED (GRADE 5) • HERMETICALLY SEALED (GRADE 4)

0.1 to 200 Amps
2.5 to 300 Volts

IDEAL FOR USE IN SINGLE OR DUAL DC POWER SUPPLIES

HIGH & LOW CURRENT CHOKES 0.1 to 1000 AMPS

OPEN FRAME • EPOXY ENCAPSULATED (GRADE 5) • HERMETICALLY SEALED (GRADE 4)

Signal's line of High and Low Current Chokes is the most extensive available. It is designed to complement the selection of High and Low Current Transformers so that a set may be specified for power supplies using inductive filters.

The inductance ratings given are minimum values guaranteed at full DC current. All resistance ratings are maximum values.

Special variations or intermediate values of inductance, current, or resistance can be supplied promptly and accurately.

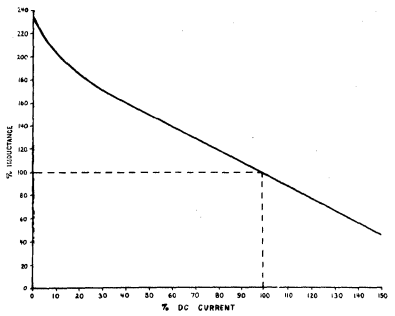
INDUCTANCE VARIATION WITH DC CURRENT



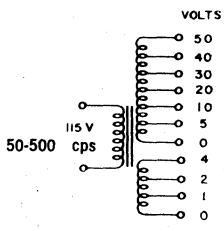
The curve shown applies to the whole line of chokes. It allows the user to determine the value of inductance which will be obtained at intermediate and overload values of DC current. The values on the curve are stated in generalized coordinates of % inductance versus % DC current.

For example, the CH-100 at 50 amperes (50% DC Current) will have an inductance of 0.75 MHY (150% of rating, the CH-25 at 31 amperes (125% DC current) will have an inductance of 3.5 MHY (70% of rating).

It is not recommended that chokes be used at over 100% of rated current since temperature rise will then be excessive. However, if load current is intermittent, and RMS current is less than maximum rated current, it is permissible.

Special "swinging chokes" can be supplied where the slope of this characteristic is emphasized. Specify minimum inductance required at two current values (usually maximum and minimum current) and we will furnish prompt quotations.

MULTI-VOLT 1 to 54 VOLTS in 1 VOLT STEPS



"MV" LINE

MV (multi-voltage) secondaries may be series connected for any output from 1 to 54 volts, in 1 volt steps, at rated current. This is accomplished by using the small buck-boost secondary.

Part No.	Secondary Amps.	DIMENSIONS L	W	H	ML	MW	Appr. Wt.
MV-1	1	3⅜	2¾	2 13/16	2 13/16	2⅛	3.2

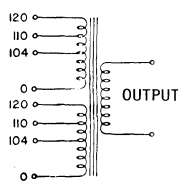
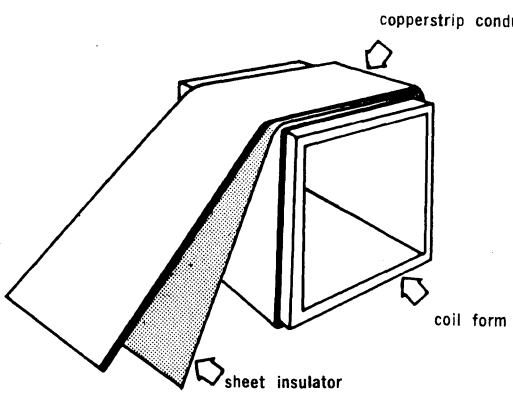
As shown on the schematic diagram dual primaries are provided. This permits parallel connection for 104, 110, or 120 volts or series connection for 208, 214, 220, 230, and 240 volts. Frequency range is 50 to 500 cps.

It is important to note that primary taps may be used to adjust the secondary voltages. Line voltages up to 125V (parallel) or 250V (series) may be used on the lowest primary tap. Nickel plated screw terminals are provided on a heavy phenolic board for easy primary connections.



WINDINGS OF HEAVY COPPER STRIP



STRIP-WOUND SECONDARIES

At the heavy current used in this line it becomes practical and desirable to use wide copper strip (as wide as the coil itself) for windings. Besides the obvious advantages of excellent winding space factor, the heat dissipation of the coil is improved. This improvement is due to the fact that the heat generated in the windings has a pure copper path to the coil ends, where it can be dissipated. In conventional windings of many turns per layer this heat flow is impeded by wire insulation and air spaces between turns. Therefore, the use of copper strip windings yields a dramatic reduction in size and weight.

GRAIN-ORIENTED STEEL CORE

These cores permit the use of higher peak flux densities for the same core loss. This results in a lower number of turns required and therefore, a smaller, more compact transformer.

CLASS F INSULATION USED THROUGHOUT

Class F insulation is rated for unlimited life at a total temperature of 155°C (ambient plus temperature rise).

Class A insulation has a maximum temperature rating of 105°C. The "nominal" current ratings given to this series are for a temperature rise of 45°C above 55°C ambient (Class A). Since Class F insulation is used it is permissible to increase these ratings by 40% (700 and 1400 amperes) without reducing the reliability of the transformer. The temperature rise will be 100°C over a 55°C ambient. The only limitation is not the transformer, but the temperature rating of surrounding components which may be affected by the additional heat radiated by the transformer.

At higher power loads (above 2-3 KVA) it becomes inefficient to use single phase 115 or 230 volt standard lines. With this in mind, our engineering staff has developed a line of 3 phase transformers for use off 208 or 220V 3 phase power lines. These offer the significantly higher conversion efficiency and lighter power line drain of 3 phase systems.

Since the principal application of these items is in high power dc power supplies, output ratings are given in dc voltage and current assuming the use of a 3 phase full wave rectifier.

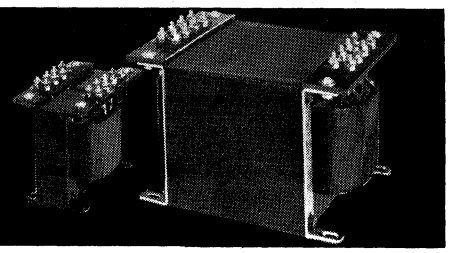
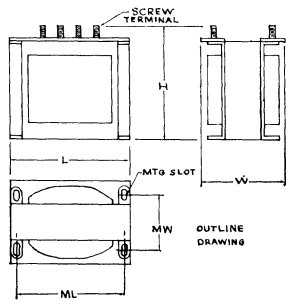
INDUSTRIAL GRADE
STEP-UP OR STEP-DOWN
POWER ISOLATION OR AUTO-TRANSFORMERS
HIGH DEGREE OF VERSATILITY OFFERS MANY POSSIBLE VOLTAGE RATINGS



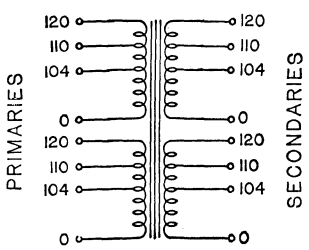
AVAILABLE FROM STOCK FOR IMMEDIATE SHIPMENT

The "DU" and "UP" lines are designed for a maximum of 55°C rise above ambient, for use on standard power lines from 50 to 500 Cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers are rugged in construction, well-insulated, and have a consistently uniform appearance. All ratings are at full load current, continuous operation.

Heavy ¼ inch phenolic terminal boards are provided with plated brass screws and flat washers. Connections can be easily made with a nut driver. It is also simple to alter the inter-connections to change transformer ratings.



"DU SERIES" 110/220 Dual Primary To 110/220 Dual Sec.



As shown on the schematic diagram the "DU" line is designed with dual primaries and secondaries. All four windings are identically rated at 0/104/110/120 volts. This permits series or parallel connections on either primary or secondary. Therefore, a nominal 110 to 110 volt, 220 to 220 volt, 110 to 220 volt, or 220 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as 208, 214, or 230 volts.

It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings as 440 to 220 volts or 220 to 440 volts can be set-up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is **doubled.**

Part No.	KVA	Series Secondaries Volts	Max. Amps	Parallel Secondaries Volts	Max. Amps	Mechanical Dimensions L (Max.)	W (Max.)	H (Max.)	ML ± 1/32	MW ± 1/16	Mtg. Screw	Appr. Lbs.

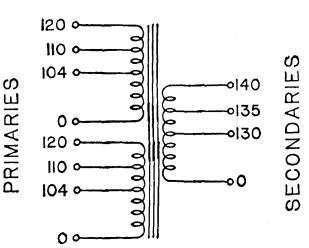
DU-7.5	7.5	0/208/220/240	31	0/104/110/120	62	9	9	8	7½	6½	¼	105
DU-10	10	0/208/220/240	41	0/104/110/120	83	9	12	8	7½	9	¼	150

"UP SERIES" 110/220 Dual Primary To 0/130/135/140 V. Sec.



The "UP" line utilizes the same dual primary as the "DU" line. It has, however, a single secondary rated at 0/130/135/140 volts.

This type is quite useful to boost low line voltages or raise line voltages to compensate for drops in series elements. It also finds application in bridge rectifiers for DC voltage outputs of approximately 115 to 130 volts.

Part No.	KVA	Secondary Volts	Max. Secondary Amps	L (Max.)	W (Max.)	H (Max.)	ML ± 1/32	MW ± 1/16	Mtg. Screw	Appr. Lbs.

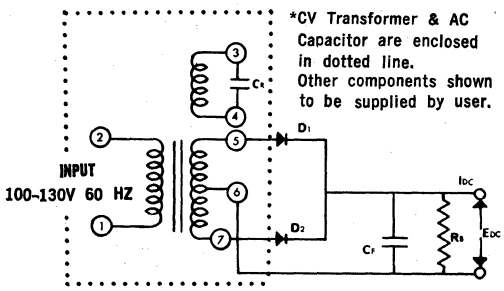
CONSTANT VOLTAGE TRANSFORMERS

FOR USE IN DC POWER SUPPLIES (TYPE CDC)



SCHEMATIC DIAGRAM *

CDC CONSTANT VOLTAGE TRANSFORMERS

Signal's CDC Regulating Transformers are specifically manufactured for use in DC Power Supplies. They are designed and rated for use with a full wave center-tapped silicon rectifier. CDC transformers are operated in ferro-resonance and are used in conjunction with an AC **tuning capacitor** (Cr in schematic diagram), which is supplied with the transformer.

In order to construct a regulated power supply the only other parts necessary are two diodes (D_1 and D_2), an electrolytic computer grade capacitor (C_f) and a bleeder resistor (R_b). These are standard shelf items.

The specification chart lists specific outputs available and the recommended auxiliary components. Part numbers are coded in terms of DC outputs, e.g., CDC-15-2 will give an output of 15V DC at 2 amps DC.

Electrical performance is completely specified. The DC voltage is constant to ±1% over the line voltage range of 100 to 130V at 60 HZ. The nominal output is held to ±2%. Closer tolerance on nominal output (±1%) can be obtained on special order at slightly higher cost.

Load regulation is specified as the rise in dc voltage output (increase in E_{dc}) from full load to the no load, ¼ load, and ½ load points. The filter capacitor (C_f) specified should be used and will yield the values of ripple voltage shown.

A significant protection feature is the fact that the DC short circuit current is limited to a maximum of 2 times rated current (3 times in size "C-6" units). This protects the entire circuit against shorts.

CONSTANT VOLTAGE TRANSFORMERS

FOR USE IN AC APPLICATIONS (TYPE ACV)

Signal ACV transformers are manufactured for use with AC loads. They are simple and rugged designs and will regulate to within plus or minus 1% for input variations from 95-130V at 60 cps. If regulation of plus or minus ½% or better is desired, special units can be made to your order. ACV transformers will regulate with loads that are not unity power factor.

Full regulation is maintained at any load from about 20% to 100%. Overload current is limited to a maximum of 200% of rated current at short circuit. The 6.4 and 12.8V ratings are ideal for use with tube or lamp loads since the short circuit current rating limits the inrush current to cold filaments. Stabilization of the voltage results in longer filament life.

ACV transformers are "normal" harmonic type with approximately a square wave output.

PART NO.	VOLTS AC	AMPS AC	STYLE & SIZE

ADVANTAGES OF CONSTANT VOLTAGE TRANSFORMERS

REGULATION — output regulated to plus or minus 1% for line voltage variations of 95 to 130V at 60 cps.

SELF-PROTECTION — against output short circuit. Current limited to a maximum of 2 times rated current.

MECHANICALLY RUGGED — as resistant to mechanical shock as conventional power transformers.

NO MOVING PARTS — no adjustment or maintenance necessary.

SQUARE WAVE OUTPUT — ideal for use in rectifier circuits — little filtering needed.

HIGH DEGREE OF ISOLATION — between input and output circuits — both physical and electrical isolation, electro-static shields not necessary.

RESONATING CAPACITOR — supplied with transformers.

EPOXY IMPREGNATION — minimizes acoustic noise.

MECHANICAL OUTLINE

Signal's PC Transformers are constructed of prime raw materials using Class S insulation and nylon bobbins with PC pins molded directly in the bobbin wall. They are vacuum varnish impregnated and 100% tested for all parameters before shipment.

Primaries are rated at 115 V. 50 to 500 Hz. Dual secondaries provide two outputs, or secondaries may be series or parallel connected. This results in a wide variety of output combinations. Load regulation is limited to a maximum of 20%.

AVAILABLE ON SPECIAL ORDER

- Special output voltages and/or currents
- PC filter Chokes
- Encapsulated versions

SPECIAL PC TRANSFORMERS OR CHOKES — PROMPT QUOTATIONS

SIGNAL TRANSFORMER CO., INC

FACTORY: 1 JUNIUS ST., BROOKLYN, N. Y. 11212 • (212) 498-5111

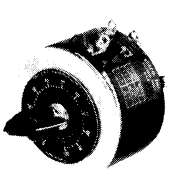
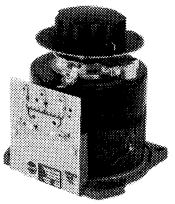
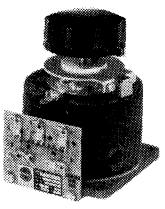
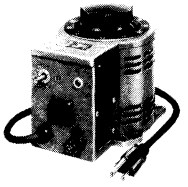
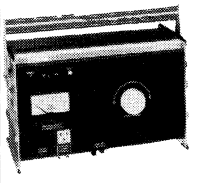
STACO® Variable Autotransformers

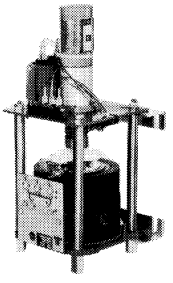












STACO Variable Autotransformers are precision built to exacting tolerances from the finest materials available.

Staco's new improved design provides long life with negligible maintenance, high efficiency and regulation, greater power to size ratio. Staco designs permit replacement of competitive equipment or previous Staco models without modification.

Models are available in various configurations from 1.75 to 300 amperes output. Choose from panel mounted units, cord and plug types or deluxe fully enclosed portable models, with or without metering. Staco products represent 25 years experience in providing safe and dependable control of power.

Contact your local representative for full details or write the factory for our new Product Guide.

**60 cycle operation only.

240 VOLT SINGLE PHASE MODELS WITH CORD & RECEPTACLE

STACO isolated variable autotransformers provide a means for smooth control of an electrically isolated AC voltage output. Uncased models offer isolated, non-isolated voltage doubler, and series connections with proper external hook-up. Cased models feature circuit breaker, switch pilot light, output voltmeter 3-wire grounded cord, plug, and matching receptacles. Cased models available in isolated connection only. Ratings shown are for isolated connections.

Mfr's Type No.	Volts	Output Amps	KVA	Size	Weight (Lbs.)	Price
J201	0-140	2.0	.28	$4½ \times 4½ \times 4^{7}/_{16}$	17.0	34.00
J401	0-140	4.0	.56	$6^{1}/_{8} \times 6^{5}/_{8} \times 4^{7}/_{8}$	13.0	46.00
J901	0-140	9.0	1.26	$8^{9}/_{32} \times 7¾ \times 5^{1}/_{8}$	25.0	65.00
EJ201V	0-140	2.0	.28	$7^{3}/_{8} \times 15^{7}/_{16} \times 5^{7}/_{8}$	13.0	79.00
EJ401V	0-140	4.0	.56	$9½ \times 12^{15}/_{16} \times 6^{3}/_{8}$	26.0	89.00
EJ901V	0-140	9.0	1.26	$11¼ \times 14^{9}/_{16} \times 6^{5}/_{8}$	36.0	105.00

EJ201V, EJ401V, EJ901V have a 0-140 VAC and 0-120 VDC at full rated current available at isolated banana receptacles.

DELUXE VARIABLE AUTOTRANSFORMERS

STACO offers a selected group of variable autotransformers with new style, broad applications, and a unique combination of practical features. Suitable for use in any industrial application, classroom or laboratory. All units provide continuous voltage control over a wide range, and all are protected against short circuit. Convenient controls provide error-free operation and distortionless adjustment of AC voltage.

Mfr's Type No.	Input Volts	Output Volts	Output Amps	KVA	Size	Weight (Lbs.)	Price
E171	120	0-132	1.75	.23	$5^{7}/_{8} \times 9^{9}/_{16} \times 3^{5}/_{8}$	8.0	25.50
E371	120	0-140	3.75	.52	$7^{3}/_{8} \times 11^{3}/_{16} \times 4^{7}/_{8}$	11.0	27.00
E501	120	0-140	5.0	.7	$7^{3}/_{8} \times 11^{3}/_{16} \times 4^{7}/_{8}$	12.0	32.00
E501V	120	0-140	5.0	.7	$7^{3}/_{8} \times 15^{7}/_{16} \times 5^{7}/_{8}$	13.0	58.00

E1010VAW	120	0-140	10.0	1.4	$11¼ \times 14^{9}/_{16} \times 5^{7}/_{8}$	23.0	184.00
E1210	120	0-120	12.0	1.44	$7^{3}/_{8} \times 11^{15}/_{16} \times 5^{7}/_{8}$	18.0	48.00
E1020	240	0-280	3.5	.98	$7^{3}/_{8} \times 11^{15}/_{16} \times 5^{7}/_{8}$	18.0	48.50
E1710	120	0-140	17.0	2.38	$11¼ \times 14^{9}/_{16} \times 5^{7}/_{8}$	31.0	84.00
E1720	240	0-280	10.0	2.8	$11¼ \times 14^{9}/_{16} \times 5^{7}/_{8}$	30.0	86.00

E501V, E501VA, E501VAW, E1010V, E1010VA, E1010VAW have isolated AC and DC outputs of 10% of the output current rating of the unit. Outputs are available at isolated banana receptacles.
V = Voltmeter A = Ammeter W = Wattmeter

POWERSTAT® Variable Transformers now

New epoxy-coated POWERKOTE Coils make the POWERSTAT line the most outstanding value in variable transformers today. *Without increase in price, size or weight,* only POWERSTAT Variable Transformers give an average of 20% higher current ratings, 10:1 greater overload capability, longer life, greater resistance to fungus, salt spray and other contaminating atmospheres. POWERKOTE Coil commutator bars are embedded in place preventing steady-state operating temperature and severe overloads from distorting the commutator.

POWERSTAT Variable Transformers are designed to deliver continuously adjustable voltage from a-c power lines. They introduce no waveform distortion and feature rugged construction, precious metal plated commutators, excellent regulation, high efficiency and conservative ratings. All manually operated types listed in the charts except the 10B-12, EN116B-EN216B and EN117B-EN217B Series are available with motor drives if desired. Motor-driven speeds are 5, 15, 30 or 60 seconds for full range travel on all except types having -4, -5, or -6 suffixes which do not offer the 5-second speed. Single types in the 116B-216B, 117B-217B, 126-226 and 136B-236B Series are also offered with 2- or 3-wire cord-plug sets. 1156D-1256D Series types are available in ratings to 244 kva.

ADJUSTABLE SPEED DRIVES

All motor-driven units in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 Series are available with adjustable speed drives which permit the output voltage of the transformer to be controlled over the full range of zero to maximum output voltage at speeds ranging from 5 seconds to 200 seconds. All control circuitry is solid-state and adaptable for present speed systems. The Adjustable Speed Control Potentiometer BHP65455-G1 can be remotely located from the variable transformer.

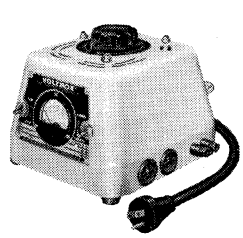
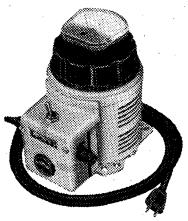
VOLTBOX® A-C POWER SUPPLY

Contains POWERSTAT Variable Transformer, voltmeter, three output receptacles, two 5-WAY Binding Posts, "on-off" switch, line-load meter switch, fuse and six-foot cord-plug. Type UC1MB ratings are 120 volt, single phase 50/60 hertz input and 0-140 volt 10 ampere, 1.4 kva output.

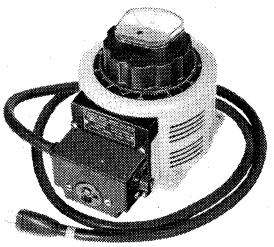


IN SECTIONS 2100, 3500 AND 4000

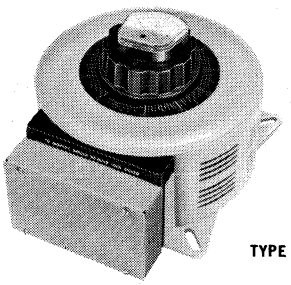
STATIONARY METERED KNOB POWERSTAT® Variable Transformers

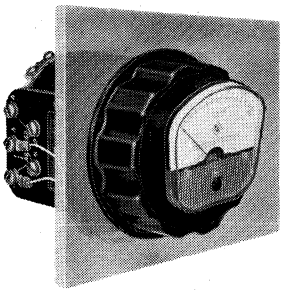


TYPE VS116B



TYPE VS3PN126





TYPE VS146T

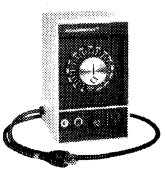
GENERAL UTILITY MOUNTING – Single units (those listed in charts without -2 or -3 suffixes) in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 series are also available with knobs incorporating direct-reading voltmeters. Voltmeters remain stationary as the knob rim is turned, have an accuracy of ±3% of full scale and are insensitive to stray magnetic fields. When ordering, add VS prefix to the type number given in the charts.

BACK-OF-PANEL MOUNTING – Standard cataloged POWERSTAT Variable Transformers in the 21-22 through the 146-246 series designed or adaptable for back-of-panel mounting can be combined with Metered Knob Assemblies. Models for 120 volt service require Metered Knob Assembly VS150 having a 0-150 volt scale and units for 240 volt use require Metered Knob Assembly VS300 having a 0-300 volt scale. Existing models can be retrofitted also.

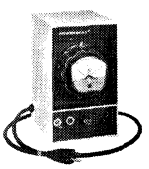
ENCLOSED LABORATORY POWERSTAT® Variable Transformers

TYPE N10B

TYPE N21



TYPE N116B



TYPE N116BK

Portable, single phase units having grounded NEMA cord-plug assembly, on-off switch, output receptacle, pilot light and fuse. The handle is integrally designed and the panel controls are recessed. A slot is provided at the rear of each unit to accept wall hanger brackets supplied with the assembly. Types N21, N116B, N116BK, N116BL and N116BLK have POWERKOTE Coils.

METERED KNOB types N116BK and N116BLK have metered knobs to conveniently measure load voltage without the necessity of providing a separate voltmeter. The knob is designed so that the voltmeter remains stationary as the knob is turned to vary the voltage, assuring accurate readings and maximum meter visibility.

FLEXIFORMER® Packaged Transformer Primaries

TYPE TP150

When used as a source of a-c voltage, the center opening permits hand-threading the correct number of secondary winding turns to obtain the desired output voltage. When used as a current transformer, the unit winding is shuted by an ammeter which indicates the current flow in a conductor hand-threaded through the center opening. For 50/60 hertz duty.

RATINGS AS A SOURCE OF A-C VOLTAGE

TYPE	NORMAL PRIMARY VOLTS	Hertz	MAXIMUM VA	VOLTS PER SECONDARY TURN	REGULATION AT MAXIMUM OUTPUT

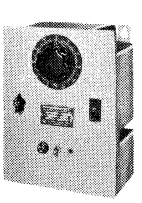
TP1020	320/1	800	2.5	1%

POWERSTAT DC Motor Speed Controllers

Continuously adjustable speed control of d-c shunt-wound motors from a-c power lines. Full rated torque available at any speed. Instantaneous start, stop and reverse, tubeless transient-protected circuitry. Rated for 120 volt, 60 hertz single phase input. Type MSC16 for motors to 1/8 hp, type MSC33 to 1/3 hp and type MSC75 to 3/4 hp. NEMA frame 1725 rpm, dc motors in 1/6, 1/3 and 3/4 hp also available.



TYPE MSC33

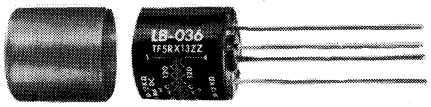
MINIATURE AUDIO TRANSFORMERS — L.B. SERIES



Torotel "LB" Transformers are Manufactured to MIL-T-27B, Grade 5, Class S Specifications. This Series of "LB" Transformers have 0.1 Grid Spacing for Printed Circuit Applications and .030 Mounting Surface to Avoid a Moisture Trap. Leads are made of 20AWG Tinned Hard Drawn Copper. Units Utilizing Dumet Wire are Available on Special Request.

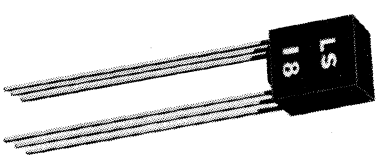
SUB-MINIATURE AUDIO TRANSFORMERS — L.S. SERIES



The LS series has successfully met and passed the rigid requirements of MIL-T-27B, class R, grade 5.

Subminiature in size and weighing less than 0.1 ounce, these transformers have grid spacing and are ideally suited for transistor application which utilizes printed circuit board design.

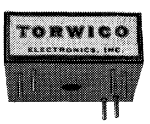
TINYMAX Power Transformers are hermetically sealed in drawn steel cases and shall meet all requirements of MIL-T-27; Military Designation: TF4S01YY.

24 hour delivery for prototype quantities. Don't settle for less — Prices on these custom-engineered transformers equal those of competitive shelf items — Phone today for your comprehensive TINYMAX catalog.

TINYMAX

POWER TRANSFORMERS FOR PRINTED CIRCUIT APPLICATIONS



VA Rating	Secondary Voltage—VRMS* (Choose any one voltage within limits listed)	Dimensions ±1/32"	Nominal Weight	Nominal Regulation	Nominal Temp. Rise
1.5	6.0 to 300	1 1/16" square x 7/16" tall	0.75 oz.	20%	13°C
3	6.0 to 300	1 1/16" square x 9/16" tall	1.0 oz.	15%	15°C
6	6.0 to 300	1 1/16" square x 3/4" tall	1.25 oz.	10%	18°C
9	6.0 to 300	1 1/16" square x 1" tall	1.63 oz.	8%	23°C

*with primary 115V, 400 cps

TINYMAX Power Transformers for printed circuit applications are hermetically sealed in thermoset plastic and shall meet all requirements of MIL-T-27; Military Designation: TF5SX01ZZ.

ELECTRONICS INC. LAKEWOOD, N.J.

UTC®
PIONEERS IN MINIATURIZATION

SPECIALS (CUSTOM BUILT) and STOCK

FOR EVERY APPLICATION

IMMEDIATE DELIVERY ON ALL STOCK ITEMS

TRANSFORMERS

Concerted attention, for almost forty years, to engineering, quality and reliabilty has made UTC a pioneer in the design and manufacture of iron core components. Physical constructions include metal cased, molded, encapsulated, potted, or open type units as required. Special and stock units for both transistor and tube applications are available for industrial requirements and military requirements to MIL-T-27C specifications. In addition, these units are unprecedented for ham, hi-fi, broadcast and replacement purposes. Ranges are: power transformers, milliwatts to 100 KVA; audio units, 0.1 Hz to 400 MHz . . . microwatts to 50 KW; pulse transformers, microwatts to 10 megawatts.

INDUCTORS

UTC's capabilities in range run from fractions of microhenries to many thousands of henries, limited only by the physical size of the unit. Almost forty years of specialization in the design and production of iron core components have resulted in UTC being a first source of supply for difficult units. Military to (MIL-T-27C) and commercial types are available in all standard UTC case configurations, plus units to your specifications. Metal cased, molded, encapsulated, open, and potted units of the highest quality and reliability are available. The largest engineering staff of its kind is supported by the most modern, fully equipped materials and test laboratories. In addition, extensive life testing and rigid quality control measures assure the advanced designing and high reliability associated with UTC products.

FILTER-AUDIO • CHARGING

MAGNETIC AMPLIFIERS

UTC has manufactured virtually thousands of special types of magamps, saturable reactors and reference transformers tailored to a variety of unique applications. Included are units both hermetically sealed to MIL-T-27C specifications, and of the commercial type. Power gains of over 400,000 are not unusual. Physical construction including metal cased, molded, encapsulated, potted, or open type units are designed and produced to your specifications. A new stock line of magamps include compact, exceptionally stable, magnetically shielded units with an amplification of 40:1. These stock components, specifically designed for transistor application, are hermetically sealed to MIL-T-27C; one application is for control of 2 phase, 115 V., 400 Hz servo motors. Another new stock line, the "MAS" magamps operate on an input of 115 V 400 Hz with an output of ± 7.5 V DC, 1000 ohm load and have 2 isolated control inputs. These magnetic amplifiers afford a power gain of approximately 30,000.

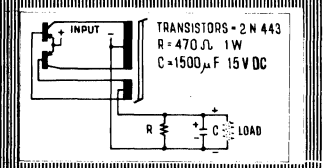
DC TO DC CONVERTER TRANSFORMERS

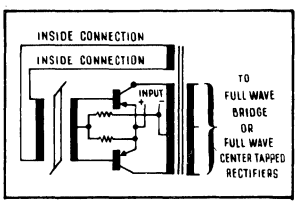
Permits conversion of low voltage direct current to high voltage for operating mobile electronic equipment.

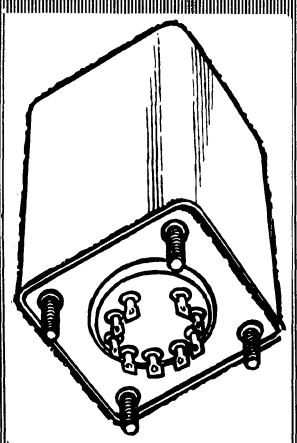


CATALOG NO.	DC INPUT VOLTS	DC OUTPUT VOLTS	DC LOAD AMPS
DD01001	6	12	4
DD01002	9	12	4
DD01003	6	9	4

These transformers are used in an efficient circuit using minimum components as it can be seen from the circuit diagram. Transformer used with this circuit gives a safe operation within −60° C to +70° C. The circuit remains highly efficient in either full load or fractional full load operation.

CATALOG NO.	DC INPUT VOLTS	TOTAL VA OUTPUT	TRANSISTORS	OUTPUT Bridge Volt	Bridge mA	CT Volt	CT mA	CONSTRUCTION
DD02004	28	125	Delco 2N174	500	250	250	420	GA
DD02005	12	125	Delco 2N442	500	250	250	420	GA
DD02006	12	40	Delco 2N442	450	90	225	155	FA





These transformers are used with relatively high load currents. With a low power saturating transformer the high power transformer can be linear so the circuit will prevent high collector current spikes. Recommended transistors are listed in the table. Feed back and starting resistor values will be supplied with every transformer.

These transformers are hermetically sealed and meet MIL-T-27B TF4RX09, electrical schematic diagram is legible on gray finished cans.

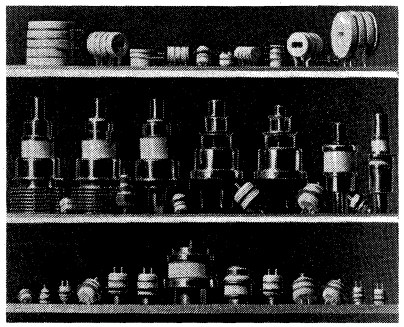
ELECTRON TUBES AND DEVICES

METAL-CERAMIC PLANAR TUBES

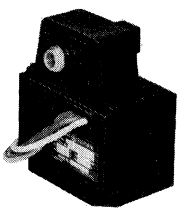


General Electric offers an extensive line of planar tubes in diode and triode designs for oscillators, amplifiers, mixers, detectors, and many other high-reliability applications from d-c to 10 gc. Unsurpassed tolerance to environment as adverse as 3000 G's impact at 3-5 ms, 30,000 G's centrifuge, up to 48 G's RMS vibration (100-2000 cps, 3 min each plane) and −55 C to +400 C temperature. Have also withstood 10^{18} NVT and 10^{7} R/sec nuclear radiation. Minimum noise, in fractions of a db. Power outputs from low mw to 8kw peak. Tailored for CW, plate-pulsed, and grid-pulsed applications. Highest available ratio of power, efficiency, and gain-bandwidth to size and weight.

VTM's

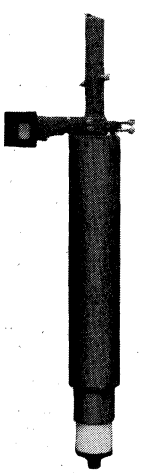
Miniaturized shielded

Magnetic and RFI shielded



Magnetic shielding and integral isolator

Voltage Tunable Magnetrons (VTM's) are high frequency, continuous wave oscillators operating in the microwave region. GE VTM's cover a wide range of frequencies — from 700 to over 5600 megacycles, with feasibility existing in X-band and down to 100 mc. Low power (up to 1 watt) for low-noise local oscillators, signal generators. Medium power (1-10 watts) for altimetry, telemetry. High power (over 10 watts up to 100's of watts) for broadband transmitters, barrage jamming, airborne applications. Also magnetically shielded VTM's at 1000-2000 mc and 2000 to 4000 mc (1 watt) for driver applications.

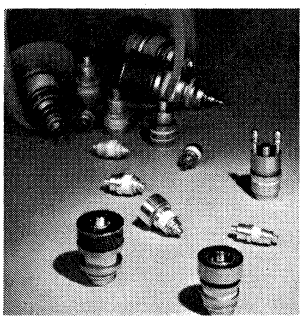


KLYSTRONS

GE has over 10 years experience in custom design, manufacture and repair of high-power, multiple resonator, amplifier klystrons and capability to produce klystrons for **specific** applications. The units, constructed of metal and ceramic, use ion pumps to maintain excellent vacuum conditions. Tunable types are designed so each cavity tunes at the same rate for perfect gang-tune tracking across frequency band. Broadband types are tunerless; flat freqency responses are rigidly, permanently determined during manufacture. Tunable and broadband pulsed ampilfier klystrons available in L, S bands. GE has the competence for expeditious and economic extrapolation of all frequencies from UHF-X band over a wide range of power levels.

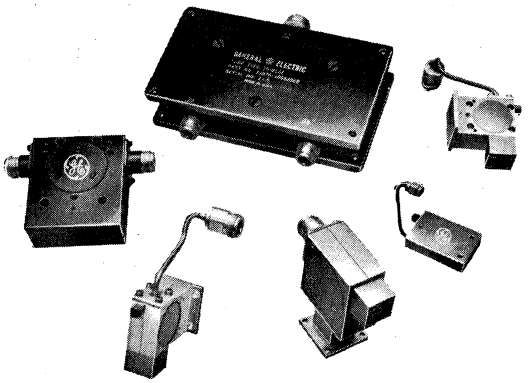
This L-band klystron is just one of a complete family that includes MBK's and TWK's.

METAL-CERAMIC COAXIAL TUBES



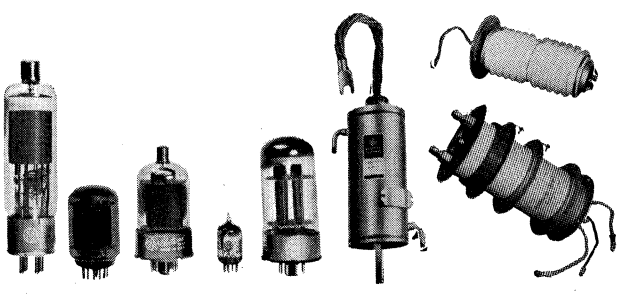
GE has the exact coaxial triodes and tetrodes for advanced VHF-UHF, RF power amplifiers, oscillators, or broad varieties of transmitter equipments to meet your most demanding application requirements. Advantages: high power gain, efficiency, voltage hold-off, duty factor; broad electronic bandwidth; long pulse-width life; reliable grid-pulsed amplifier or oscillator service.

CIRCULATORS AND ISOLATORS



GE coaxial, stripline circulators and isolators offer the systems manufacturer maximum design flexibility and assurance of systems-component compatibility and performance . . . in radar, electronic countermeasures, communications, aircraft control, fusing systems, signal generators, test equipment, and many other modern microwave systems. They can handle 100 to 500 watts CW and more in small-size units capable of operating under severe environmental conditions. And continuing developments have produced units that will operate at peak powers of 5 kw in L and S Band. All frequencies from 0.3 to 5.5 GHz are covered, and typical bandwidth in these frequency ranges is approximately 20 percent with greater bandwidth available. Magnetically shielded and miniaturized units are available, with unique terminations and connections a specialty.

INDUSTRIAL AND SPECIAL-PURPOSE TUBES



General Electric offers an extensive line of reliability-proven industrial and special-purpose tubes including the following popular types: camera, ceramic, industrial and military cathode ray, communication, Five-Star, glow tubes, ignitrons, industrial receiving, rectifier, thyratrons, transmitting tubes and triggered vacuum gaps.

For complete information contact nearest GE Sales Office listed on inside front cover, or write to General Electric Co., Section 998-50, Schenectady, N. Y. 12305.

The quality of 10M electron tubes can be attributed to their design and manufacture . . . for built into each tube, at the very outset, are basic components and features which will insure long life and performance . . . engineering achievements such as coiled heaters, unique grid designs, and special cathode materials.

Each 10M tube is guaranteed for 10,000 hours within two years from date of purchase, and subjected, individually, to a comprehensive laboratory test procedure based on extremely tight and stringent parameters to assure long life tube-to-tube and section-to-section uniformity.

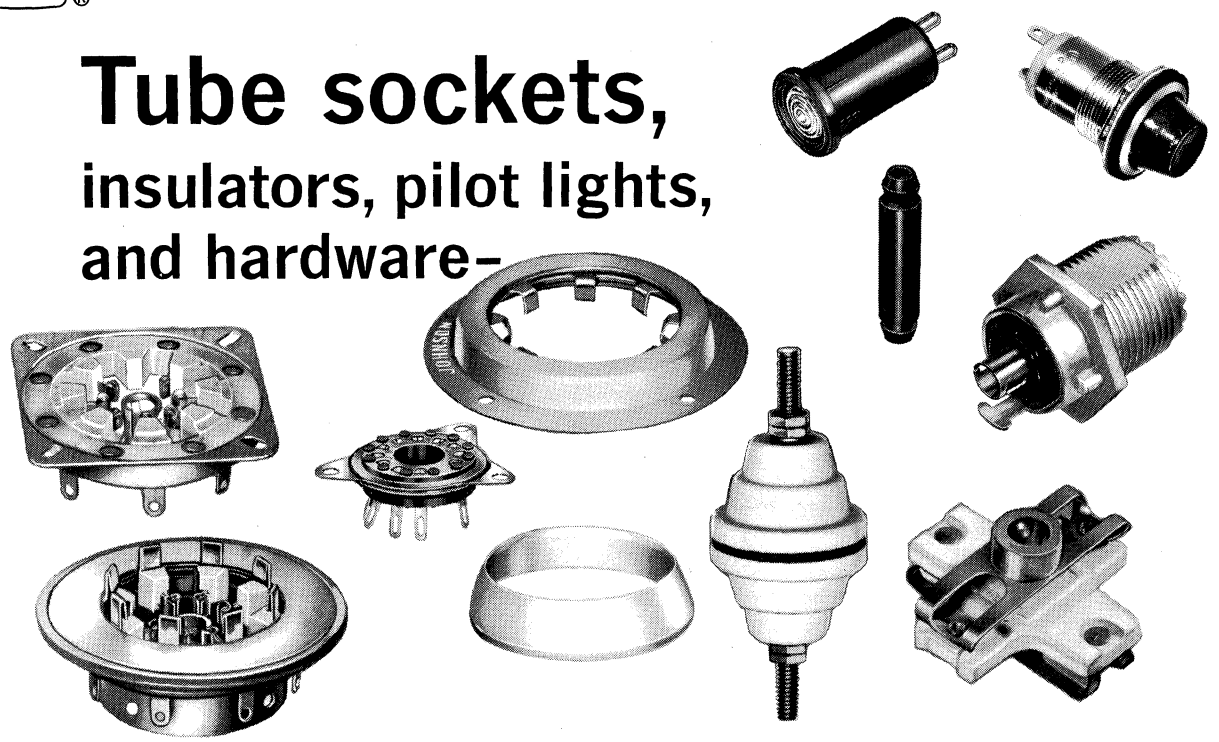
Tube sockets,

insulators, pilot lights, and hardware–



Standard, industrial, military

Whatever the choice . . . steatite wafer, bayonet or low-loss Kel-F sockets for high power transmitting tubes . . . time and time again design and development engineers specify Johnson tube sockets! Sockets have been categorized under a socket standardization program, reducing the number of variations in each socket type. Standardization and immediately available stock shortens delivery cycles—permits fast selection of a Johnson socket for almost any application!

ULTRA HIGH FREQUENCY TYPES—Continuous heat resistance to 500° F. with low loss, glass filled silicone base and heat treated beryllium copper contacts. Low inductance screen by-pass capacitor available for VHF and UHF operation. For RCA 8072, 8121, 8122, 8462 and similar tubes.

KEL-F SERIES—Molded of low dielectric loss-factor Kel-F plastic—designed for use with a wide selection of high power transmitting tubes such as: 4X150A; 4X150D; 4X250B; 4CX250B; 4X250F,7034; 7035. Basic sockets are available in several designs—with or without screen grid by-pass capacitors, mounting saddles, or steatite chimney to direct air flow through tube cooling fins. Control grid contact "guide" is machined for greater alignment accuracy, and tapped for 6-32 machine screw. All contacts are low resistance silver-plated beryllium copper. Tube pin contacts are heat treated to provide positive contact pressure as well as extended life. Annealed soldering tabs may be easily bent or formed.

STEATITE WAFER TYPES—Available in 4, 5, 6, 7, and 8-pin standard socket types, as well as Super Jumbo 4-pin for tubes with E.I.A. Base Nos. A4-15, A4-16, and A4-18. Giant 5 and 7-pin models for tubes with E.I.A. Base Nos. A5-19 and A7-17. Septar Sockets for tubes such as the 7094 with E.I.A. Base No. E7-2; and VHF Septar Sockets for tubes such as 5894, 6524, 6252, with E.I.A. Base No. E7-20; and 826, 832, 4D32 and E.I.A. Base No. E7-2.

SPECIAL PURPOSE TYPES—Includes sockets for special purpose tubes such as the: 204A and 849; the 833 and 833A; 152TL; 304TL; 750TL; 1500T; 2-2000A; 5D21; 705A and others.

Note: For detailed specifications, request Socket Standardization Booklet 536 on your company letterhead.

Manufacturer of more than 5,000 items for all segments of the electronic industry, in addition to a wide line of connectors, tube sockets, and air variable capacitors, Johnson offers the hardware items described below: In addition, a complete line of heavy-duty RF components is available for broadcast transmitting, RF heating, antenna phasing, and other commercial applications.

Equipment in this line includes: fixed and variable inductors; antenna phase sampling loops, isolation filter inductors; feed-thru bowl insulators; static drain chokes; RF contactors; and heavy-duty make-before-break switches. For information on the Johnson RF component line, write for Catalog 560a.

INSULATORS—Low loss, high-voltage breakdown in either steatite or porcelain. High quality with heavy nickel-plated brass hardware—suitable for exposed applications. A complete line for immediate delivery from stock includes: Thru-panel Bushings and Insulators; Antenna Strain and Feeder Types; Cone and Stand-off Insulators; Lead-in Bushings; and Feed-Thru Bowl Assemblies.

PILOT LIGHTS—Over 47 separate assemblies immediately available from parts distributors throughout the country for original equipment or in-the-field replacement. Continuous indication neon types; models for high and low voltage incandescent bulbs; standard or wide angle glass; and lucite jewels. New RIB-LOC pilot light offers convenient press-in mounting. Specials, including types meeting military specifications, also available in production quantities. Detailed specifications listed in Pilot Light catalog 751—write today for your copy.

PC SPACERS—Snap-in polyamide spacers provide rapid mounting of PC boards with choice of stand-off height. **COAXIAL RECEPTACLES**—Convenient panel mounting. **PANEL BEARINGS**—For use on ¼" shafts and panels up to ⅜" thick. **CRYSTAL SOCKETS**—For low capacity, high voltage and high temperature operation. Glazed steatite. Grade L-423 or better. DC-200 impregnated. **RF CHOKES**—High quality construction. For 1.7 to 30 mc range and VHF.

E. F. JOHNSON COMPANY
1923 Tenth Ave. S.W., Waseca, Minnesota 56093

JAN HARDWARE MANUFACTURING COMPANY, INC.

47-27 36th St., Long Island City, N.Y. 11101 • (212) 361-0800

JAN's Bezels enhance the appearance of the instruments on which they are used. These units are functionally designed to provide OPTIMUM UTILIZATION OF THE CRT SCREEN, as well as safety against tube breakage and danger to operating personnel.

JAN Bezel Assemblies are supplied with a bezel, calibrated graticule, (where applicable) **light filter** and **CRT cushion. Bezels are finished in a smooth dull black** non-reflecting surface. **These units fit JAN Mu-Metal Shields.**

Edge-lit Bezels (E.L.B.A.)** These Bezels are designed to provide edge lighting of the engraved scale-calibrated graticule by means of pilot lights.

Camera Mount Bezel These units provide an integral cast mounting flange that fits all standard 3", 5" and 7" CRT cameras.

MAGNETIC SHIELDS

JAN'S MAGNETIC SHIELDS are made of MU-Metal or equal and are hydrogen annealed by a special process to assure optimum orientation of the molecular structure of the alloy for best magnetic shielding. JAN'S MAGNETIC SHIELDS prevent distortion and intensity modulation of the electron beam due to stray magnetic fields.

In addition, the use of these shields protect personnel against the dangers of accidental tube breakage. Mounting holes are tapped for No. 6-32 screws as shown. These shields are designed to fit JAN'S standard bezels as listed below. See preceding pages for specifications on JAN'S BEZEL ASSEMBLIES.

JAN HARDWARE
MANUFACTURING COMPANY, INC.
47-27 36th St., Long Island City, N.Y. 11101 • (212) 361-0800

U.S. PATENT NO. 2,681,378

HI-VOLTAGE INSULATED COUPLINGS

MEETS MIL SPECS: TEMPERATURE - HUMIDITY - SHOCK - VIBRATION - FUNGUS

HI-VOLTAGE INSULATED COUPLINGS

15 KV Breakdown 10 inch pounds torque

Series No. AK-5079 & No. AK-5164

Engineered with stainless steel shaft and precision, screw-driver tip molded-integrally with Diallyl Phthalate Material in accordance with Military Specifications. Completely shock, vibration and fungus proof, they operate with ease over an ambient temperature range of —75 to +175° C. Supplied complete with nickel plated mounting hardware.

Stainless steel screw driver tip fits all standard slotted shafts (potentiometer, etc.) without need for further machining. Ideally suited to adjust high voltage controls thus protecting operating personnel against danger. They are also used to reduce ground capacitance on other types of sensitive instrument controls.

For Commercial Instrument Applications . . .
These couplings are available in general Purpose Black Bakelite.
Cat. No. 6164-(X or B)-( ) For Standard Type
Cat. No. 6079-(X or B)-( ) with Locking Type Bushing.
Dimensions are identical with 5000 series, in chart above.

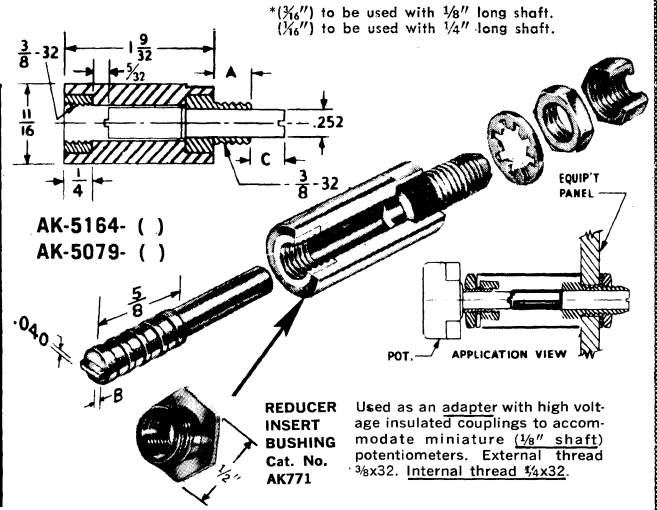
	AK-5079-B-2	9/16"	1/16"	Slotted	9/32"

*(3/16") to be used with 1/8" long shaft.
(1/16") to be used with 1/4" long shaft.

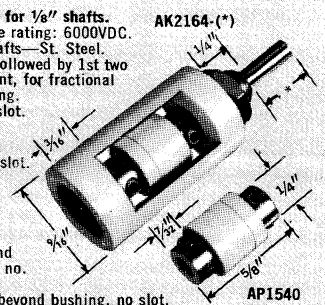


REDUCER INSERT BUSHING Cat. No. AK771

Used as an adapter with high voltage insulated couplings to accommodate miniature (1/8" shaft) potentiometers. External thread 3/8x32. Internal thread 1/4x32.

Hi-Voltage Insulated Couplings for 1/8" shafts.
White Cycalac material. Voltage rating: 6000VDC.
Hubs—Brass, Nickel Plted.; Shafts—St. Steel.
*Insert letter "S" or "N" followed by 1st two numbers of decimal equivalent, for fractional length of shaft beyond bushing.
"S" = with slot. "N" = no slot.

Typical part number:
AK2164-N31 = 5/16" long shaft beyond bushing (standard), no slot.
If length is 1" use "X"
Typical part numbers:
AK2164-SX = 1" long shaft beyond bushing, slotted.
If length exceeds 1", use "X" and decimal equivalent for balance of no.
Typical part numbers:
AK2164-NX31 = 1 5/16" long shaft beyond bushing, no slot.



SLIP-CLUTCH SAFETY KNOBS

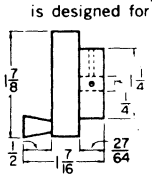
With Fixed or Retractable Spinners

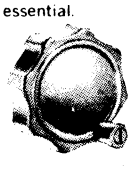
Cat. Nos. K-1375 & K-1376 (For 1/4" shafts)

Designed for driving devices such as variable capacitors, inductors, potentiometers, etc., these knobs are based upon the principle of the "slip-clutch";* automatically disengaging and slipping when a pre-determined torque has been exceeded. JAN'S SLIP-CLUTCH SAFETY KNOBS are fluted to aid in sensitive adjustments and are equipped with either a fixed or retractable spinner for fast turning. Insert-molded-to-Bakelite construction provide durable, backlash-free units to safeguard delicate and costly instruments against careless or inadvertent cranking beyond their normal stops.

Normally set for 3-6" lbs. Can be modified for other requirements.

Model No. K-1376 is identical with No. K-1375 but has the additional feature of a retractable spinner. Spring loading provides positive, toggle-type action to lock spinner in either open or closed position. Model No. K-1376 is designed for use where economy of space is essential.





SPINNER KNOBS

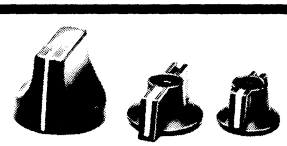
With Fixed or Retractable Spinners | **Standard: glossy finish. (Matte finish available on special order).**

Cat. Nos. K-1275 & K-1276 (For 1/4" shafts)

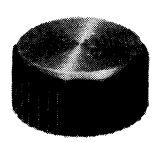
In appearance, these knobs are identical with No. K-1375 and No. K-1376 but without JAN'S Slip-Clutch mechanism. Made with single-unit, molded Bakelite-to-metal-insert construction, with two set screws for firm attachment to shafts.

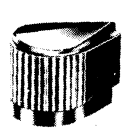
. . . and

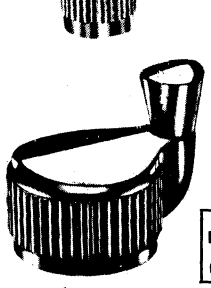
Die Cast and Plastic Knobs to Commercial and Military Specifications

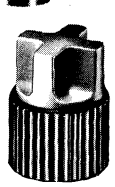


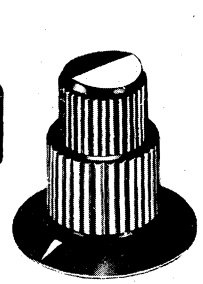
Die cast aluminum and zinc alloy knobs manufactured in accordance with applicable military specifications.











See The RADIO-MASTER for Our Complete Line

MACHLETT Electron tubes for broadcasting, communications, navigation, radar, industry. Standard and special-purpose types.

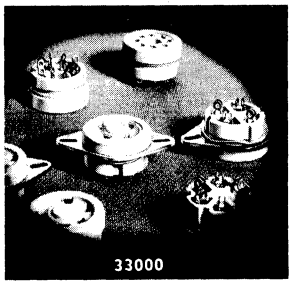
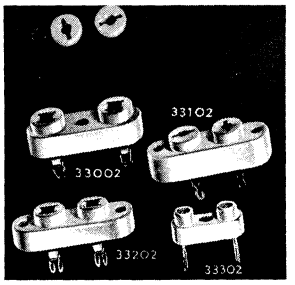
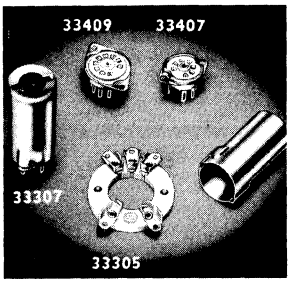
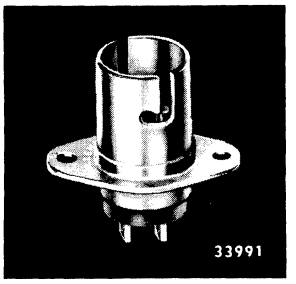
MILLEN TUBE SOCKETS DESIGNED FOR APPLICATION









Long Flashover path to chassis permits use with transmitting tubes, 866 rectifiers, etc. Long leakage path between contacts. Contacts are type proven by hundreds of millions already in government, commercial and broadcast service, to be extremely dependable. Sockets may be mounted either with or without metal flange. Mounts in standard size chassis hole. All types have barrier between contacts and chassis. All but octal and crystal sockets also have barriers between individual contacts in addition.

Voltage regulator dual contact bayonet socket, 33991 black phenolic insulation and 33992 with low loss mica filled phenolic insulation.

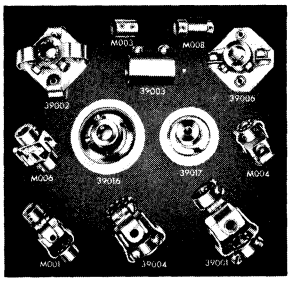
MILLEN TUBE SOCKETS

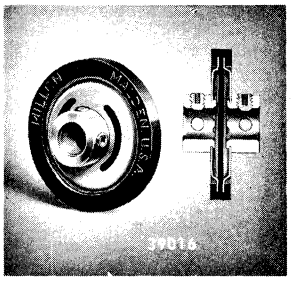
No.	Description	No.	Description
33002	Crystal Socket ¾" x .125"	33004	4 Pin Tube Socket
33102	Crystal Socket .487" x .095"	33005	5 Pin Tube Socket
33202	Crystal Socket ½" x .125"		
33302	Crystal Socket .487" x .050"	33008	8 Pin Tube Socket
33407	Miniature Socket only, ceramic	33991	Socket for 991
33409	Noval Socket only, ceramic	33992	Socket for 991
33307	Miniature Socket, Shield, ceramic	33207	829 Socket
33309	Noval Socket, Shield, ceramic	33305	Acorn Socket

FLEXIBLE COUPLINGS — The No. 39000 series of Millen "Designed for Application" flexible coupling units include, in addition to improved versions of the conventional types, also such exclusive original designs as the No. 39001 insulated universal joint and the No. 39006 "slide-action" coupling (in both steatite and bakelite insulation). The No. 39006 "slide-action" coupling permits longitudinal shaft motion, eccentric shaft motion and out-of-line operation, as well as angular drive.

The No. 39005 and 39005-B (high torque) are similar to the No. 39001, but are not insulated. The steatite insulated No. 39001 has a special anti-backlash pivot and socket grip feature. All of the above illustrated units are for ¼" shaft and are standard production type units.

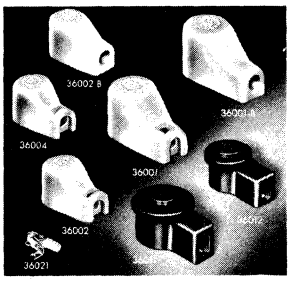
The No. 39016 incorporates features which have long been desired in a flexible coupling. No Backlash — High Flexibility — Higher Breakdown Voltage — Smaller Diameter — Shorter Length —

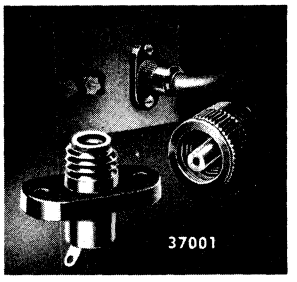




CERAMIC PLATE OR GRID CAPS — Soldering lugs and contact one-piece. Lug ears annealed and solder dipped to facilitate "mechanical plus soldered" connection of cable.

No. 36001—$\frac{9}{16}$" ..... No. 36002—⅜" ..... No. 36004—¼" .....

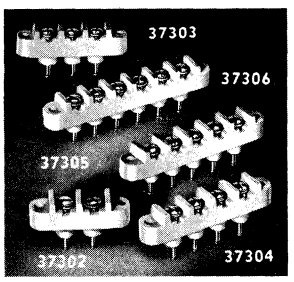


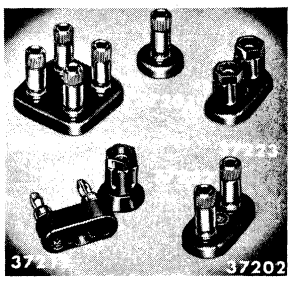


SAFETY TERMINAL — Combination high voltage terminal and thru-bushing. Tapered contact pin fits firmly into conical socket providing large area, low resistance connection. Pin is swivel mounted in cap to prevent twisting of lead wire.

No. 37001, Black or Red ..... No. 37501, Low loss .....

STEATITE TERMINAL STRIPS — Terminal and lug are one piece. Lugs are turret type and are free floating so as not to strain L522 ceramic on wide temperature variations. Easy to mount with series of round holes. 1400 volt and 3500 volt series.



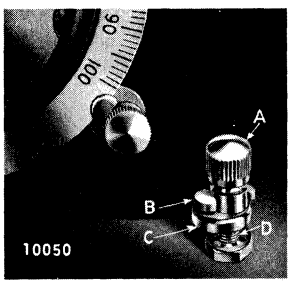


POSTS, PLATES, AND PLUGS — The No. 37200 series, including both insulated and non-insulated binding posts with associated plates and plugs, provide various combinations to meet most requirements. The posts have captive heads and keyed mounting. The No. 37291 on No. 37223 are standard in black or red with other colors on special order. No. 37201, No. 37202, and No. 37204 are available in black, red, or low loss. The No. 37202 is also available in steatite.

No.	Description	No.	Description
37201	Single plates, pr.	37204	Double dual plates, pr.
37291	Single plates (tapered), pr.	37212	Dual plug
37202	Dual plates, pr.	37222	Non-insulated binding post
		37223	Insulated binding post

DIAL LOCK — Compact, easy to mount, positive in action, does not alter dial setting in operation! Rotation of knob "A" depresses finger "B" and "C" without imparting any rotary motion to Dial. Single hole mounted.

No. 10050 .....



TUBE CLAMP — No. 33087 is easy to use, easy to install, effective in function. Available in special sizes for all types of tubes. Single hole mounting. Spring steel, cadmium plated.

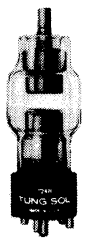
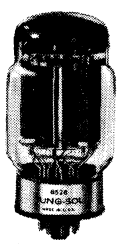
TUNG-SOL ELECTRON TUBES
Industrial-Military

The performance characteristics of Tung-Sol tubes provide a wide safety margin over the most stringent specifications. Let us supply complete technical information about Tung-Sol tubes for your military or industrial application.

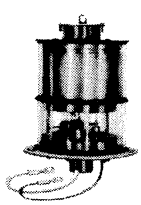


VACUUM PULSE TUBES
Partial list of types available: 3D21WB, 6889, 7248, 7403.

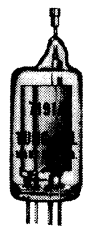
RECTIFIERS
Partial list of types available: 1Z2, 6H6WGT, 6X4WA, 25Z6WGT, 26Z5W.



POWER TRIODES
Partial list of types available: 5998, 6080, 6080WA, 6080WB, 6082, 6082WA, 6082WB, 6336A, 6528, 6877, 7236, 7241, 7242, 6336B, 6528A.



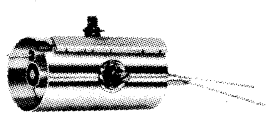
HYDROGEN DIODES
Partial list of types available: 7789, 7790, 7791, 7792, 7793, 8434, 8435. Ceramic: 8275, 8376, 8377.



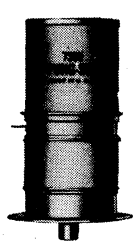
HYDROGEN THYRATRONS
Partial list of types available: 1257, 1257A, 1258, 5948A, 5949A, 6587, 7190, 7191, 7191A, 7192, 7240, 7871, 7872, 8253.

VOLTAGE REGULATORS
Partial list of types available: OC3W, OD3W, 5787, 5787WA.

PENTODES
Partial list of types available: 5636, 6AH6WA, 6AU6WB, 5702WB, 5749, 5784WB, 6AJ5, 6AK5WB, 6AS6, 6028, 6136, 8517, 8522.



PENCIL TUBES
Partial list of types available: 6263A, 6562, 7533, 5675, 5876, 5876A, 6264A.

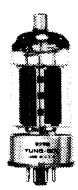


CLIPPER TUBES
Partial list of types available: 8191, 8036, 7390, 8326, 7890, 8301, 8492.

INDICATOR TUBES
Partial list of types available: 8569.

TELEPHONE TUBES
Partial list of types available: 408A, 426A, 6028.

TWIN TRIODES
Partial list of types available: 6SU7GTY, 5687, 5744WB, 6188/6SU7WGT.



TRANSMITTING TUBES
Partial list of types available: 2E22, 8150, 8236.

VOLTAGE REFERENCE TUBES
Partial list of types available: 5651, 5651WA, 5783, 5783WA.

POWER PENTODES
Partial list of types available: 2E22, 26E6WG, 5A6, 5881, 6AR6, 6098/6AR6WA, 6L6WGB, 6384, 6550, 6889, 6094.

ELECTRON MULTIPLIER TUBES

Multi-stage secondary emission tubes supply peak power pulses with negligible input power. Extremely fast rise time, low delay time with positive or negative going output pulse. Excellent for modulating traveling wave tubes and hydrogen thyratrons.

5 STAGE

8428—600v. peak pulse output at 4 amps. Load—150 ohms.

8455—1000v. peak pulse output at 4 amps. Load—250 ohms.

2 STAGE

DT1527A—50v. peak pulse output at 1 amp. Load—50 ohms.

If you're working in the dark,

Varo can help you see the light.

If you work in the dark or in areas requiring low light levels, Varo can literally help you see the light.

In less than ten years, our Electron Devices Division has become one of the world's major suppliers of image conversion and image intensification components for night vision equipment.

We got started in night vision when we foresaw the tremendous potential for image devices in both scientific and technological applications.

Our capability in the design and production techniques necessary for volume production of image tubes has grown rapidly. Currently, Varo produces both active and passive image tubes and modules for use in a variety of military, scientific, and industrial applications.

This includes production of standard lines of 18 MM and 25 MM image converter tubes for active devices, and 18 MM, 25 MM and 40 MM image intensification assemblies and modules for passive viewing systems.

In addition to producing standard tube types in volume, the design and development engineers of the Electron Devices Division are involved in a continuous program of advanced generation devices and are, of course, improving current generation types to include a complete line of zoom and gated intensifiers.

This program is backed up by Varo's fully integrated production capability in the manufacturing of complete night vision systems. That includes viewing devices, illumination systems, optics, and power supplies.

The aggregate experience of our image intensification and conversion assembly design group is unexcelled in the industry. In fact, many members of the group have been with the program since image intensification was first seen as a practical approach to night vision applications. Many of them were responsible for the design and production of the original units. Research, design and production of Varo devices is conducted in Electron Devices Division's 60,000 square foot facility under rigid temperature, humidity and contamination controls. The division is headquartered in Garland, Texas.

If you have any questions about image conversion or intensification devices, call or write.

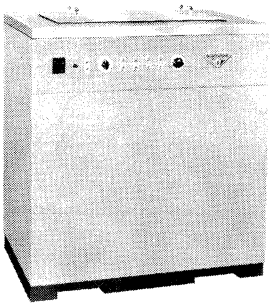
BLACKSTONE has the ULTRASONIC ANSWERS

ULTRASONIC VAPOR DEGREASER



MODEL VE 6.5-2
300 Series stainless steel tanks. 6.5 gal. cap.

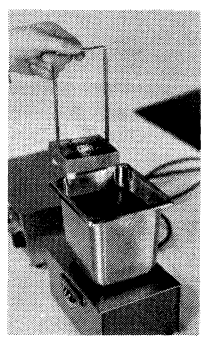
Automatically tuned, solid state generator.
Frequency: 23 KHz
0-100% power control optional

Ultrasonic Scrubbing and Vapor Rinsing Insures Thorough, Fast and Economical Cleaning of Complete Assemblies or Individual Components.

Model VE 6.5-2 is ideal for intermittent cleaning of miniaturized items as well as continuous cleaning of production parts. Power and temperature can be controlled to provide for a wide range of cleaning applications in a single unit.

Blackstone cleaners are available singly with tank capacities of 1.9, 6.5 and 30 gallons. Other sizes available on special order.

ULTRASONIC KIT



The BPO Probe is ideally suited for cell disruption of small biological samples, dispersal of steroids, degassing and de-aeration of oils and other viscous fluids, emulsification of liquids and acceleration of chemical reactions.

The CT.5 Cleaning Tank enables precision ultrasonic scrubbing for contaminated small parts and instruments in aqueous solutions.

Individual units may be purchased separately or together as a complete system.

ULTRASONIC CLEANER

MODEL SP-100
Stainless steel
1-5/8 quart tank
100 watt output
34 ± 2 KHz frequency

ALL PURPOSE CLEANER FOR INDUSTRIAL APPLICATIONS, R&D, SCIENTIFIC, MEDICAL AND DENTAL LABS

Model SP-100 is a self contained unit producing high intensity ultrasonic action for rapid and efficient cleaning in continuous duty cycle.

The Blackstone line of Ultrasonic Equipment includes:

- Vapor Degreasers, 1.9 to 30 gal. capacity
- Heated Tanks, 1.9 to 30 gal. capacity
- Immersible Transducers
- Biological and Industrial Probes
- Specialized Units

As a pioneer in Ultrasonics, Blackstone is happy to supply recommendations and engineering assistance to help solve your specific cleaning problem.

The services of our complete Research and Development facility are available. As a first step we invite you to take advantage of the following FREE OFFER!

Send a sample of your work and describe your cleaning process. We will precision clean it and show you how to lower your cleaning cost.

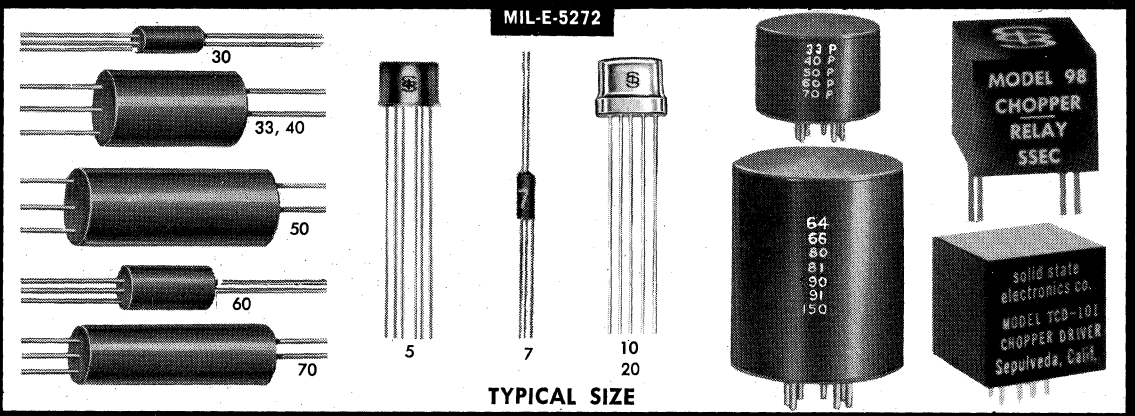
THE MOST COMPREHENSIVE LINE OF SOLID STATE CHOPPERS, RELAYS & ANALOG SWITCHES

MIL-E-5272



TYPICAL SIZE

microminiature	lightweight	low power	high speed	rugged	indefinitely long life
non-mechanical	inertialess	low level	high efficiency	linear	temperature stable

The transistor chopper (or modulator) is a solidly encapsulated unit designed to alternately connect and disconnect a load from a signal source. It may also be used as a demodulator to convert an a.c. signal to d.c It is capable of linearly switching or chopping voltages over a wide dynamic range which extends down to a fraction of a millivolt and up to 150 volts or more. Unlike mechanical choppers which can only be designed to operate over a narrow and comparatively low frequency range due to mechanical limitations, the transistorized chopper is an inertialess device that can be driven from d.c. to hundreds of kilocycles.

The switching circuitry used operates the transistors in a manner which provides stability and freedom from drift over a wide temperature range. Only carefully selected and matched transistors are utilized.

The Models 5, 6, 10, 20, 30, 33, 33P, 40, 40P, 50, 50P, 60, 60P, 70 and 70P are direct-coupled so as to provide the circuit designer with the most basic chopper from which to synthesize solutions to special circuit problems. The Models 33 and 33P are basic field-effect chopper-relays providing exceptional linearity, stability, low noise and offset. The Models 64, 65, 66, 75 and 150 are transformer-coupled for isolation purposes. The Model 150 is for high-level signals. The Models 64 and 66 are for operation from 400 cps and 60 cps sine wave drive at 115 volts a.c. The Models 80, 81, 90 and 91 VIBRACHOPPERS are unique since they require d.c. rather than a.c. contacts, even with d.c. drive. The Model TCD-101 Transistor Chopper Drive drive. The Model 98 has complete isolation and insulation between drive and provides suitable square wave drive voltages for transistorized choppers and synchronous demodulators.

These units are immune to the effects of shock and vibration making them ideal for military, space vehicle and portable applications; or where power conservation, miniaturization and elimination of maintenance are a necessity. Shipments can be same day if you call early.

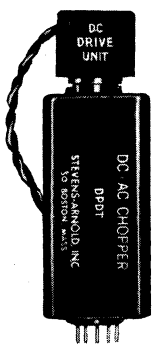
DC-AC CHOPPERS For 50/60/94/120 CPS

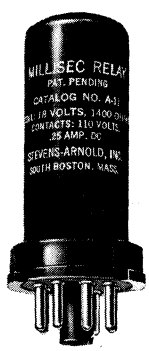
These miniature Choppers are outstanding. Long life is assured by our exclusive twin-contact construction. Noise level is less than 1 microvolt into 100,000 ohms with circuit capabilities of .01 microvolt. Packaged two ways, as shown. Built to rigid commercial specifications, there is a selection of types for all applications. Single pole, double pole, make-before-break, break-before-make, AC or DC drive.

DC DRIVEN CHOPPERS

For portable and transistorized instruments. A modification of our service proven AC driven type, these have a 94 cycle chopping rate to eliminate offsets in DC amplifiers and null-seeking equipment. Drive Unit operates from 12 volts DC.

Please write for Catalog 554.





MILLISEC RELAYS

Amazingly fast, from 200 microseconds to 1 millisecond. Available in both commercial and military models, single-pole and double-pole, with shielded or unshielded coils. They are factory sealed and may be mounted in any position.

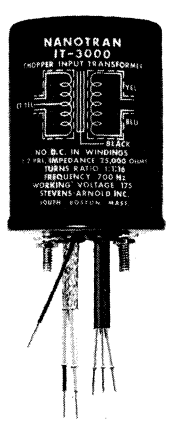
Please write for Catalog 337

NEW

TONE REEDS

Miniature components for frequency stabilizing and frequency sensing. Used to construct lifetime encoders and decoders. Frequencies from 300-3000 Hz.

Please write for Catalog 590.



NANOTRAN ISOLATION TRANSFORMERS

Have −190 dB common mode rejection capabilities plus all other special features needed to minimize thermal noise and microphonics. Highest levels of magnetic shielding supplied. For less exacting applications, less expensive types are available.

Please write for Catalog 589.

Alpha Wire a division of Loral Corporation

The Complete Line of WIRE, CABLE & TUBING FOR ELECTRONIC APPLICATIONS

- HOOKUP WIRE TO MIL-W-16878D, MIL-W-76B
- TEFLON® WIRE AND CABLE
- AIRCRAFT WIRE TO MIL-W-5086A
- COMPLETE LINE OF RG COAXIAL CABLES
- CONTROL & INSTRUMENTATION CABLE
- TELEMETERING CABLES
- MICROPHONE CABLES
- AUDIO CABLES
- SERVICE & POWER CORDS
- RETRACTILE COIL CORDS
- SHIELDING & BRAIDING
- HOOKUP WIRE TO U.L. & C.S.A. SPECIFICATIONS
- TV, AND ROTOR CABLE
- PLASTIC TUBING
- TEFLON® TUBING
- ZIPPER TUBING
- LACING CORD & TAPES
- FIT® SHRINKABLE TUBING

Belden has it...

Every electronic and electrical wire you need—from the finest drawn magnet wire to the most complex multi-conductor cables.

There is a Belden wire or cable in every insulation and shielding to meet your application and design needs. Here is just part of this complete line. Available from stock. Ask your Belden electronics distributor for complete line information or write for catalog. Request also a copy of A Buyers' Guide to Specifying Electrical Wire and Cable.

3 REASONS WHY Belden is the most specified line

1. **Basic Manufacturer**—Belden draws its own wire—compounds its own insulations for complete quality control.
2. **Research and Testing**—All Belden wire and cable are laboratory tested to guarantee insulation and conductor efficiency. Lab test data available.
3. **Design and Engineering Service**—Belden has a completely staffed design and engineering department to help customers meet unusual wire application or design requirements.

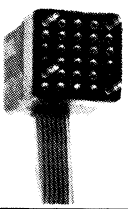
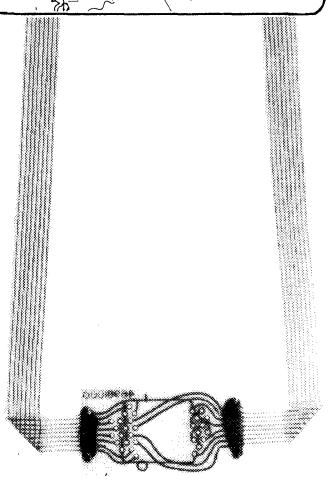
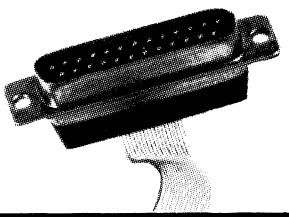
CICOIL super-flex harness assemblies



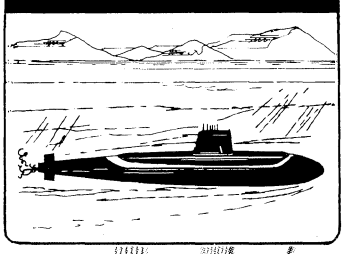
flexible



Cicoil Harness Assemblies allow the combination of various types of conductors (24AWG to 50AWG) in a single, flat cable, which utilizes the finest translucent silicone-rubber insulation. Highly capable for a wide variety of critical applications, such as astronaut space suit instrumentation and electronic computers.

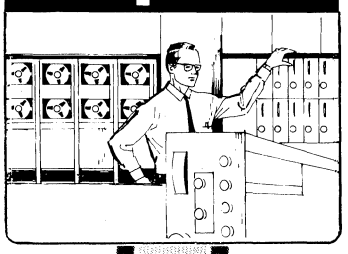


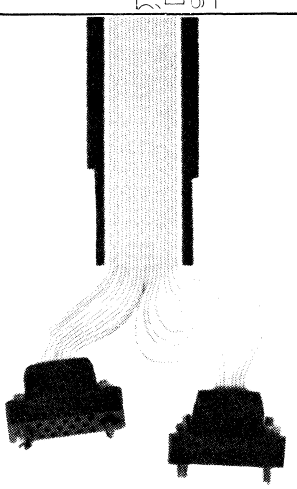
reliable



Tested to 70 million flexes without damage, Super-Flex Harnesses are ideal for applications under extreme temperatures −300°F to +500°F, and rigid environmental conditions. They have proven far superior to slip ring assemblies on guidance and navigation platforms, also low torque gyro applications for missiles.

adaptable





Cicoil offers a single resource from connector-to-connector, with up to 75% size and weight reduction. Our engineering department will assist you with your special problems. Take advantage of this complete design service, tailored to your exact requirements on military, commercial and medical electronic applications.

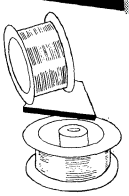
Products Manufactured by SIGMUND COHN CORP.

Metallurgists and Manufacturers... Since 1901

PRECIOUS METALS



Potentiometer Wire . . . A series of precious metal alloys resistance range 29 to 550 ohms per circular mil foot. High **corrosion resistance,** assuring potentiometers of great reliability, and freedom from noise. Bare or enameled.

Platinum, Platinum-Rhodium Thermocouple Wires . . . Calibrated to match the emf values given in National Bureau of Standards circular #561 of April 27, 1955. In two qualities, Standard Grade matching NBS values within limits of ±0.25% and Reference Grade ±0.1%.

Iridium, Iridium-Rhodium Thermocouple Wires . . . Temperatures as high as 2000°C. may be measured, even in an oxidizing atmosphere. Also available in strips and foil.

Platinum Wire for Resistance Thermometers . . . Platinum wire having a temperature coefficient of resistance — (when fully annealed) — at .003926 per degree C. (0-100°C.).

Galvanometer Suspension Ribbon . . . Gold alloy strip for conventional construction.

Taut-Band Ribbon . . . An alloy of **Nickel-Platinum** for rugged, bearing-free electrical measuring instruments.

Alloys for Semiconductors . . . Gold Semiconductor Wire for Wedge, Ball and Ultrasonic Bonding. Sheet fabricated into discs, squares, etc. . . Gallium-Gold and Antimony-Gold for evaporation.

Bridge Wires for Electro Explosive Devices . . . Made from Noble metals, Noble metal alloys, and base metals to very fine sizes. Resistance and degree of hardness closely controlled. In MIL standards and commercial requirements.

PLATING SOLUTIONS

Rhodium . . . Rhodium produces a hard, thin, white and highly reflective electrodeposit, with excellent corrosion resistance. Used for wave guides, electrical contacts, other applications.

Gold Potassium Cyanide is supplied either as a **dry salt** or in **aqueous solution,** for various plating baths.

Write for comprehensive bulletins containing detailed information on each specific product.

SPECIAL WIRES

Enameled Aluminum Wire . . . Very small sizes to .0006"; for light-weight galvanometer coils and similar applications. Also available bare.

Electroplated Wire and Ribbon . . . We specialize in continuous electroplating of wire. Regularly electroplate Gold, Silver Platinum, Indium, and Tin onto base wire or ribbon, such as, Molybdenum, Nickel, Copper and Clad Wires. Gold Plating to MIL-G-45204.

Enameled Wire . . . Our enameling process consists in applying multiple coats of a baked thermosetting resin, either Class A, B or H. It is thinner than most commercial enamel coating; smooth, uniform, free from beads. Excellent for **potentiometers.**

Aluminum Alloy Bonding Wires . . . for ultrasonic bonding of new hybrid and monolithic semiconductor devices . . . Popular alloys: Aluminum 1% Silicon; Aluminum 1% Magnesium; #1100 Aluminum; also pure Aluminum (99.999%). In ribbon as well as wire.

PYROFUZE® PRODUCTS

Pyrofuze . . . A bimetallic composition, the elements of which at 650°C. alloy violently and exothermically resulting in deflagration without support of oxygen. Available in a variety of physical forms, this material has found great application in the aerospace, ordnance, and electronic industries. In ignition, fire transferral, separation and current interrupting devices.

MEDWIRE PRODUCTS

Teflon-coated, Iridium-Platinum alloy wires — also Silver and Stainless Steel wires — for microelectrode probes . . . Rigid, strong, corrosion-resistant . . . Wide range of diameters . . . Send for data.

CUSTOM WIRE & CABLE — COPPER OR ALUMINUM CONDUCTOR

Our unique position in the wire and cable industry enables us to offer a *complete service* to our customers. Available to you, for immediate delivery from the nation's largest inventory, is virtually every conceivable type of electronic and communication wire and cable to meet an infinite variety of military, commercial and industrial needs.
In addition, our proven engineering and manufacturing capability is at your service for the production of the most exacting custom wire and cable, as well as your special wire products such as Cable Assemblies,Wiring Harnesses, Cut Leads (stripped, tinned) and Cord Sets. Staffed by experienced personnel and utilizing the industry's most modern equipment, Coleman can promptly and economically produce the wire, cable and wire products you need — no matter how large the run.

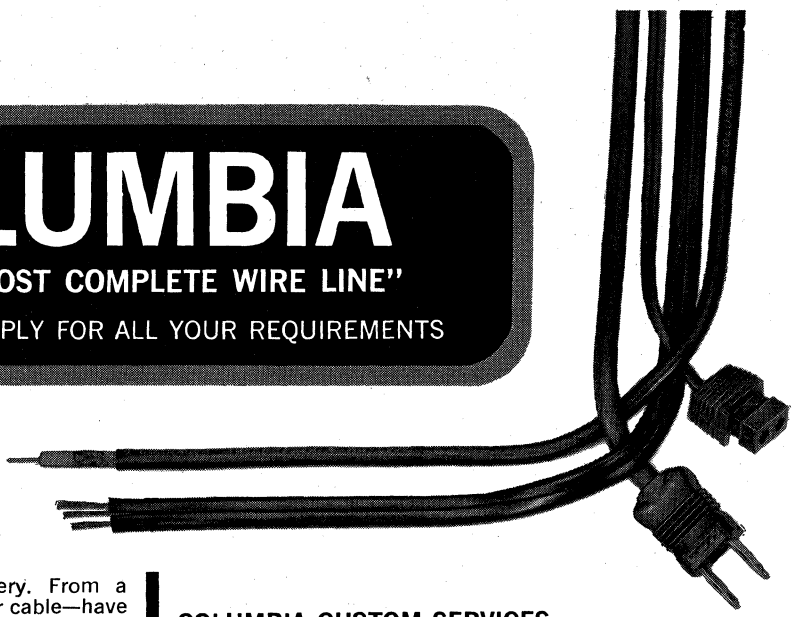
COLUMBIA

"AMERICA'S MOST COMPLETE WIRE LINE"

ONE SOURCE OF SUPPLY FOR ALL YOUR REQUIREMENTS



Consistent quality, prompt delivery. From a miniature wire to a multi-conductor cable—have established Columbia's leadership.

Regardless of your electrical or electronic need, for automated systems, instrumentation, communications or aerospace, military or consumer oriented, there is a Columbia wire, cable or power supply cord.

Columbia can ship from a normal inventory of over 100 million feet of electronic wire, cords and cable.

COLUMBIA CUSTOM SERVICES

For special cords or cables, count on Columbia for the finest service possible. To your specifications—any combination of conductors up to 2" in diameter, and the largest variety of molds.

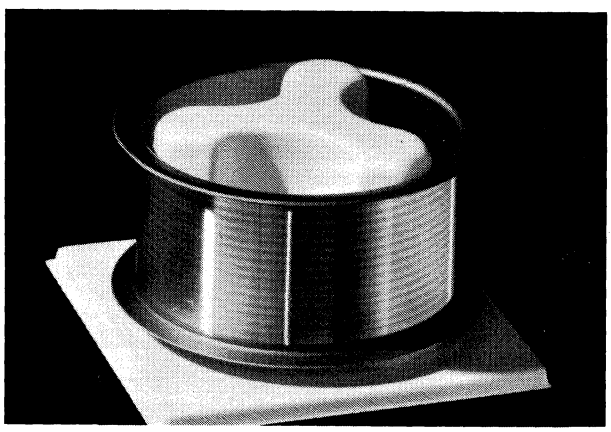
CRM a single source for electronic grade preforms and fine wire of pure metals and special alloys

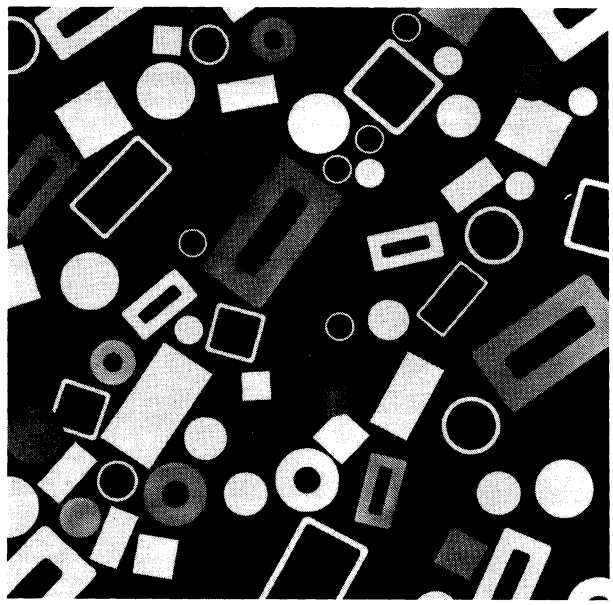
CRM specializes in the manufacture of precision wire and preforms for use in electronic components and semiconductor devices. In order to assure conformance to the most rigid specifications, even metals purification and alloying are done within CRM's own plant. Hundred of stock dies supplement extensive tool-making facilities, permitting fast and inexpensive fabrication of custom sizes and shapes. Appropriate physical, chemical, and performance tests are used at all stages of production to assess and certify both the quality and usability of CRM products. CRM preforms and wire are available from stock or are custom fabricated to meet all your specifications.



WIRE from CRM is available in all varieties required for electronics, semiconductors, and electrical instruments to any specification. Thus, pure Gold may be obtained in 5-9's purity for vapor deposition or lower purity for bonding. Tensile strength and other physical properties can also be varied, even to match particular wire bonding machines. Various doped Gold wires are also available. Similarly, standard and custom wire of pure metals and special alloys are produced by CRM for other semiconductor applications, resistance thermometers, potentiometers, strain gauges, galvanometers, thermocouples, and for experimental applications. All wire can be supplied with any type of enamel or plated, or bare.

Gold bonding wire • silicon-aluminum bonding wire • pure vapor deposition wire • potentiometer wire • platinum resistance thermometer wire • fuse wire • strain gauge wire • enameled wire • plated wire

CRM WIRE CAN HELP YOU MAKE A BETTER PRODUCT.



PREFORMS from CRM range from simple solder washers to precisely sized perfect spheres of high purity gold for semiconductor mounting and special frames for flatpack assembly. Quality is controlled at every processing step to meet customer specifications. For example, Gold spheres are available in either 4-9's or 5-9's purity in sizes from .008″ to .040″ with sphericity controlled to ±.001″. All spheres are checked optically to assure perfect surface finish; they are weighed to assure uniform density, and they are rolled down an inclined plane which automatically rejects all spheres which are out of round. CRM makes preforms from precious metals and alloys, Aluminum and Aluminum alloys, brazing alloys, and soft solders. Over 300 stock dies are on hand to permit custom fabrication without tooling charges.

Discs • rectangles • washers • frames • solder • braze • eutectic gold alloys

CRM PREFORMS CAN HELP YOU MAKE A BETTER PRODUCT.

Call or Write for a useful Data Book and Catalog of CRM Fine Wire and Precision Preforms, and for a quotation on your special requirements.

D-200-50	50	110.	1.61	24	.910	PVC

Dynatronic Cable Engineering Corp. offers a series of multi-pair cables specifically designed for fast-rise digital-data signals. Surge impedance is carefully controlled. All pairs in a cable have a Z_0 within 5% of specified impedance. Anti-crosstalk techniques such as contra-rotation of adjacent layers, and different lay lengths for adjacent pairs and layers are used in all cables. Pairs are not individually shielded. Designed for either balanced (110. ohm) or unbalanced (77. ohm) transmission, with very low crosstalk. Suitable for use up to several thousand feet. Impedances of 95, 100, 105, 110 & 120 ohms available. Detailed application notes on request, or contact our Engineering Dept. for information.

LOW NOISE CABLES

Suitable for μ-Volt Signal Levels

STANDARD LOW FLEXURE-NOISE CABLES. ALL CONDUCTORS ARE POLYETHYLENE INSULATED.

PART NO.	NO. OF CONDUCTORS	AWG	CAPACITANCE W-S	CAPACITANCE W-W	JACKET	O.D.
D-100	1	26 Solid T.C.	22.5	—	105°C PVC	.142
D-101	1 Triaxial	26 Solid T.C.	22.5	120. Shld-Shld	105°C PVC	.195
D-102	2	22 Solid T.C.	42.	21.	105°C PVC	.210

Dynatronic Cable Engineering Corp. has developed a flexible conductive surface coating for these insulations which reduces self-generated noise voltage from 20 to 200 times* that of untreated constructions. Additionally the electrostatic shielding provided by this treatment approaches the performance of a solid metal tube. Excellent for microvolt level signals, high impedance circuits, high vibration environments. Suitable for use with BNC-type connectors.

*Dependent on load impedance and cable type.

DYNATRONIC ALSO OFFERS:

Foil and conductive plastic shielded cable.
Low-C, Instrumentation cable
Special Impedance Coax & triax
Bio-Medical Cables.
Strain Gauge Cables.
Ultra-Flexible Cables.

2360 HOFFMAN STREET, BRONX, N. Y. 10458, TEL. 212-295-0050

NEW

HI-VOLT CORONA RESISTANT TEFLON* CABLE

Voltage Rating at Sea Level • Voltage Rating at 80,000 feet, approximately 1/3 lower
• Minimum life expectancy: 10,000 hours.

SMALL SIZE:
You do not need bulky, thick, insulation jacketing as used wtih silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878D. insulation used conforms and surpasses MIL-SPEC-W-16878D

AVOID CORONA PROBLEMS:
Corona resistant Teflon construction is specifically designed to retard and prevent corona penetration.
Temperature variations from −60° to +300°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

DESCRIPTION:
Single Conductor, Stranded Silver Plated Copper, Corona Resistant Teflon* Insulation.

TEMPERATURE RATING:
−90°C to +250°C.

VOLTAGE RATING:
Based on insulation thickness.

AVAILABLE COLORS:
White, Black, Red, Green, Yellow, Lt. Blue, Brown, Orange, Gray, Violet. (Also available in tracer colors)

PUT-UP: 250′, 500′, 1000′

WIRE CABLE AND TUBING

HOOK-UP WIRE

HI VOLTAGE TEFLON* WIRE

- Aircraft Wire to MIL-W-5086A and MIL-C-7078A
- Business Machine
- High Voltage — Polyethylene — Rulan
- High Voltage — Corona Resistant Teflon
- Plastic Wire to MIL-W-76B
- Plastic Wire to MIL-W-16878D
- H Film & Kapton*
- High Temperature
- Instrumentation Hook-Up Wire
- Military Wire
- Shielded Lead and Hook-Up Wire
- Teflon* Hook-Up Wire to MIL-16878D Types B, C, D, E, EE, ET, F, FF, K, KK
- Teflon* Hook-Up Wire to MIL-W-7139B
- Teflon* Multi Cables
- Test Lead Wire — Retractile
- Thermocouple

INDUSTRIAL WIRE PRODUCTS

- Bus Bar — Solid Tinned Copper to QQ-W-343 type S
- Braid — Bonding Strap — Shielding — Flat Tinned Copper
- Braid — Tubular Tinned Copper to QQ-B-575
- Coiled Cords — Retractile Cables
- Cord Sets (Special Constructions)
- Control Cables
- Copperweld Wire
- Industrial — Audio & Sound
- Magnet Wire to MIL-W-583B
- Lacing Cord Tape MIL-T-713A
- Shielding & Bonding
- Silicone Rubber Wire
- Silicone Bronze Wire
- Telephone — Burial
- Test Lead Wire to MIL-W-13169
- Teflon Wire
- UL Wire, Cable

WIRE • CABLE TUBING DIVISION

- Daflex & Daflon Insulated Tubing in Stock to UL-MIL-Industrial Specifications
- Polyvinylchloride-PVC-Polyethylene Plastic Tubing to UL and MIL-I-631D, MIL-I-18057A, MIL-21557A
- Vinyl Coated Fiberglass Tubing to MIL-I-3190B
- Plastic Tubing to MIL-I-7444B, MIL-I-22076B
- Fiberglass Sleeving
- Teflon* Tubing to MIL-I-221129C Thin Wall, Standard Wall, Industrial
- Shrinkable Tubing — Polyolefin, PVC, Teflon Tubing, MIL Specs To MIL-I-631C, MIL-I-22129C, MIL-I-23053A
- Also Wire Cable Cutting & Stripping

HEAT SHRINKABLE TUBING

TO MIL-INDUSTRIAL SPECIFICATIONS MIL-I-23053 POLYOLEFIN, PVC, TEFLON* TUBING

DEARBORN

MIL SPEC MIL-W-76B HOOKUP WIRE

Single conductor, stranded or solid tinned copper.

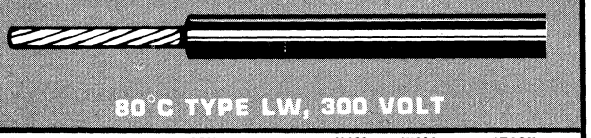
Insulation: PVC. **Temperature rating:** −40°C to +80°C (90°C with nylon jacket). Resistant to acids, alkalis, oils, flame, moisture, solvents and fungus.

TYPE LW
Insulation thickness .010". Voltage rating 300 volts.

TYPE MW
Insulation thickness .016". Voltage rating 1000 volts.

TYPE MW — NYLON JACKET
Insulation thickness .016". Nylon jacket .002" to .005" depending on conductor size. Voltage rating 1000 volts.

TYPE MW — SHIELDED
Insulation thickness .016". Braided shield overall, 90% coverage. Voltage rating 1000 volts.



80°C TYPE LW, 300 VOLT

DEARBORN

MIL SPEC MIL-W-76B HOOKUP WIRE

Single conductor stranded tinned copper.

Insulation: PVC with and without shield, with and without lacquered glass braid or nylon jacketing. **Temperature rating:** −40°C to +80°C (90°C with nylon jacket). Resistant to acids, alkalis, oils, flame, moisture, solvents and fungus.

TYPE MW — GLASS BRAID
Insulation thickness .016 with glass braid overall. Voltage rating 1000 volts.

TYPE MW — SHIELDED — NYLON
PVC insulation .016", braided shield 90% coverage, and clear nylon jacket overall.

TYPE MW — GLASS BRAID — SHIELD
Insulation thickness .016 with glass braid and shield overall. Voltage rating 1000 volts.

TYPE HW
Insulation thickness .031 on sizes No. 22 thru No. 16, .045 on sizes No. 14 thru No. 6. For voltage rating see chart.

TYPE HW — GLASS BRAID
Same as HW with addition of lacquered glass braid overall.

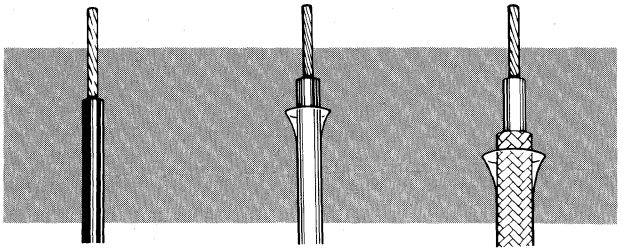
DEARBORN

MIL SPEC MIL-W-16878D HOOKUP WIRE-TYPES B & C

Single conductor, stranded tinned copper



TYPE B & C
TYPE B, PRE-BONDED

TYPE B, NYLON
TYPE C, NYLON

TYPE C, SHIELDED
& NYLON JACKET

TYPE B
Insulation PVC .010″ wall thickness, color coded. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 600 volts.

TYPE B — NYLON
Same as above but with clear nylon jacket (.003″ wall) over PVC insulation increasing temperature rating to +115°C.

TYPE B — PREBONDED
Double tinned strands are heated which fuses the individual strands together in order to prevent fraying.. Allows easy stripping and insertion in holes in lugs, circuit boards, etc. Color coded .010″ PVC insulation to MIL-W-16878D. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 600 volts.

TYPE C
Insulation PVC .017″ wall thickness. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 1000 volts.

TYPE C — NYLON
Same as above but with clear nylon jacket which increases temperature rating to +115°C.

TYPE C — SHIELD AND NYLON JACKET
Basic type C with 90% coverage braided tinned copper shield and clear nylon .005″ jacket overall.

105°C TYPE B, 600 VOLT

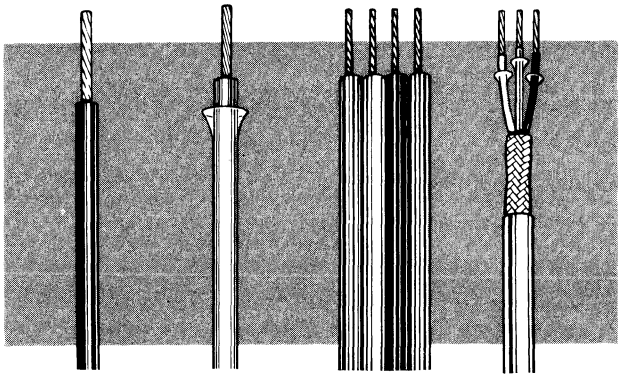
DEARBORN

MIL-SPEC MIL-W-16878D HOOKUP WIRE AND CABLE



TYPE D | TYPE D—NYLON | TYPE C—FLAT RIBBON | TYPE B, NYLON. SHIELDED, PVC JACKET

TYPE D AND D-NYLON

Stranded tinned copper with color coded PVC insulation. Temperature rating: −55°C to +105°C (+115°C with nylon type jacket). Voltage rating: 3000 volts.

MULTI-CONDUCTOR CABLES, TYPE C, FLAT RIBBON

Each conductor to MIL-W-16878D Type C. All conductors bonded together to form ribbon type cable. All conductors color coded and easily separated for ease in terminating.

MULTI-CONDUCTOR, TYPE B, NYLON, SHIELDED AND JACKETED WITH WHITE PVC JACKET

Stranded tinned copper conductors with .010 PVC insulation, color coded. .003″ nylon jacket on each conductor, 90% coverage braided tinned copper shield and white PVC jacket overall.

105°C TYPE D, 3000 VOLT

DEARBORN

TEFLON INSULATED AIRCRAFT, MISSILE AND ELECTRONIC WIRE AND CABLE

MIL-W-16878D, TYPE ET
Voltage rating: 250 volts. **Temperature rating:** −65°C to +200°C. Single conductor stranded silver plated copper, extruded TFE Teflon insulation.

MIL-W-7139B, CLASS I WIRE
Voltage rating: 600 volts. **Temperature rating:** −65°C to +200°C. Silver plated copper, insulated with layers of TFE Teflon, interspersed with layers of Teflon impregnated fiberglass. Color is white with blue tracer. Teflon impregnated fiberglass braid overall.

MIL-W-7139B, CLASS II, WIRE
Voltage rating: 600 volts. **Temperature rating:** −65°C to +260°C. Nickel coated copper, insulated with layers of TFE Teflon, interspersed with layers of Teflon impregnated fiberglass. Color is white with orange tracer. Teflon impregnated fiberglass braid overall.

- **All Teflon wire and cable listed here is resistant to acids, alkalis, oil, flame, moisture, solvents, fungus, aircraft fuels, hydraulic fluid, skydral, ethylene glycol and alcohol.**

TYPE E, 600 VOLT
Single conductor, stranded or solid silver plated copper, extruded TFE Teflon insulation. **Voltage rating:** 600 volts. **Temperature rating:** −65°C to +200°C.

TYPE EE, 1000 VOLT
Same as Type E, except for insulation thickness and voltage rating of 1000 volts.

TYPE E, SPIRAL WRAPPED FUSED TEFLON
Same as Type E — 600 volt but with spiral wrapped fused Teflon insulation.

TYPE EE, SPIRAL WRAPPED FUSED TEFLON
Same as Type EE, but with spiral wrapped fused Teflon insulation.

TYPE E, 600 VOLT

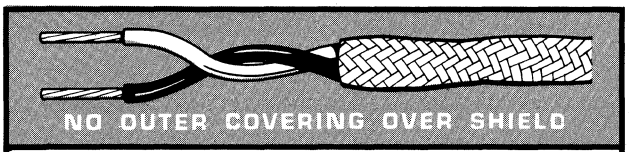
DEARBORN

Each conductor stranded silver plated copper, Type E extruded TFE Teflon .010" color coded insulation. Braided silver plated copper shield, 90% coverage. **Voltage rating:** 600 volts. **Temperature rating:** −65°C to +200°C. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus. *Dupont T.M.

- **NO OUTER COVERING OVER SHIELD.**
- **TEFLON IMPREGNATED BRAID OVER SHIELD**
  Braided natural or white Teflon impregnated fiberglass braid overall.
- **FEP EXTRUDED JACKET OVER SHIELD**
  Tough abrasion resistant extruded white FEP Teflon jacket overall.
- **TEFLON TAPE WRAP JACKET OVER SHIELD**
  Sintered wrapped white Teflon tape jacketed overall.



NO OUTER COVERING OVER SHIELD

MIL SPEC AIRCRAFT WIRE

MIL-W-8777B - MS 25471 SILICONE AIRCRAFT WIRE

These wires are intended for installation in aircraft electrical systems where potential does not exceed 600 volts (RMS). Temperature limits are −55°C to +150°C. Single conductor silver plated copper, silicone rubber insulation, glass and dacron braid impregnated with high temperature lacquer and a white dacron braid and high temperature lacquer overall. Resistant to aircraft fuels, hydraulic fluid, oils, water, skydral, ethyleneglycol, dilute acids, alcohol, alkalis, fungus and abrasion.

MIL-W-5086A UNSHIELDED AIRCRAFT WIRE

For use as airframe wire at temperatures within the range of −55°C to +105°C. Voltage rating is 600 volts. Both types are resistant to water, aircraft fuels, hydraulic fluid, oils, skydral, ethyleneglycol, dilute acids, alcohol, alkalis, fungus and abrasion.

TYPE I — AN-22 THRU AN-12
Single conductor stranded tinned copper with white PVC insulation and a clear (polyamide) nylon jacket overall.

TYPE II — AN-22 THRU AN-12
Single conductor stranded tinned copper with white PVC insulation, white glass braid and a clear nylon jacket overall.

TYPE II — AN-10 THRU AN-0000
Single conductor stranded tinned copper with white PVC insulation, white glass braid, flame retardant nylon lacquered nylon braid overall.

MIL-W-5086A-MIL-C-7078A SHIELDED AIRCRAFT WIRE FOR ELECTRICAL SYSTEMS

BASE WIRE, MIL-W-5086A, TYPE I, MIL-C-7078A, TYPE I
Stranded tinned copper conductors, with color coded Polyvinylchloride insulation and a clear Nylon jacket on each conductor; cabled, with a braided tinned copper shield (85% coverage) overall.

BASE WIRE, MIL-W-5086A, TYPE II, MIL-C-7078A, TYPE I
Stranded tinned copper conductors, insulated with white PVC, color coded glass braid on each conductor. Each conductor has clear Nylon jacket over glass braid insulation. Conductors are cabled and have braided tinned copper shield (85% coverage) overall.

BASE WIRE, MIL-W-5086A, TYPE I, MIL-C-7078A, TYPE II
Same as MIL-C-7078A, Type I, Base Wire, MIL-W-5086A, Type I, with addition of a clear Nylon jacket over the shield.

BASE WIRE, MIL-W-5086A, TYPE II, MIL-C-7078A, TYPE II
Same as MIL-C-7078A, Type I, Base Wire, MIL-W-5086A, Type II, with addition of clear Nylon jacket over the shield.

GENERAL CHARACTERISTICS—Temperature rating: 55°C to +105°C. **Voltage rating:** 600 Volts. Resistant to effects of oil, water, hydraulic fuel, skydrol, aircraft fuels, ethyleneglycol, alcohol, dilute acids, alkalis, fungus, and abrasion.

MIL-SPEC QQ-B-575
TINNED COPPER BRAID

TUBULAR BRAID

Tinned copper braid woven in completely round configuration as outlined in MIL-SPEC QQ-B-575. All strands soft drawn tinned copper. Shielding is 95% or more when placed over equivalent diameter mandrel to the inside diameter of the tubular braid.

Used as both shielding and protective covering. While the larger sizes shown in second table below are not listed in the spec, they are manufactured to the same standards.

FLAT BRAID

Tinned copper strands, woven and rolled flat to specific width depending on construction, number of strands, etc.

Used for bonding straps, grounding, or connecting moving parts. Recommeded for high current usage.

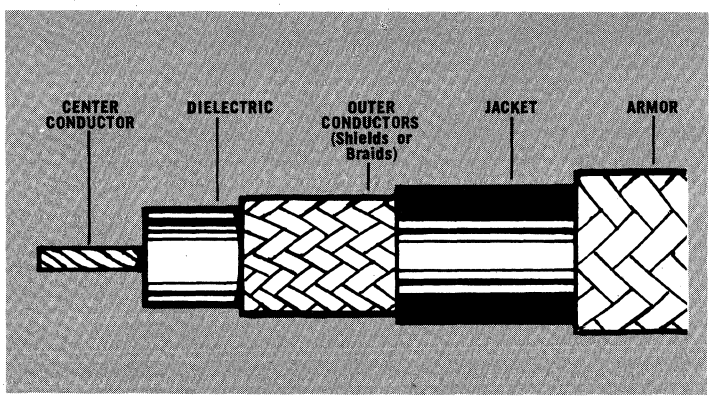
Nomenclature



Operating Temperature Limits for Cable Jackets

MILITARY DESIGNATION	JACKET TYPE	TEMPERATURE LIMITS
TYPE I	Black Polyvinylchloride	−40°C to +80°C
TYPE II	Grey Polyvinylchloride	−25°C to +80°C
TYPE IIa	Black or Grey Polyvinylchloride	Under ¼" O.D. −55°C to +90°C Over ¼" O.D. −40°C to +90°C
TYPE IIIa	Black Polyethylene	−55°C to +85°C
TYPE IV	Black Synthetic Rubber	Under ½" −55°C to +80°C Over ½" −40°C to +80°C
TYPE V	Fiberglas Braid	−55°C to +250°C
TYPE VI	Silicon-Rubber Dacron Braid	−55°C to +175°C
TYPE VII	Teflon (PTFE)	−55°C to +250°C
TYPE VIII	Synthetic Rubber	−55°C to +75°C
TYPE IX	Teflon (FEP)	−55°C to +200°C

EXPLANATION OF NOMENCLATURE

CENTER CABLE CONDUCTORS

Center cable conductors may be solid or stranded wires, or in some cases, a tube. Selection is made on the mechanical and electrical properties desired. Solid wires result in lowest cable attentuation. Stranding permits increased cable flexibility but also increases attenuation. Bare, tinned, or silver plated copper wire is usually used for center conductors. Other materials are Copperweld, Cadmium Bronze, Aluminum, Nichrome and Karma.

DIELECTRICS (CABLE)

EXTRUDED POLYETHYLENE

Low cost, flexibility, ease of application, high dielectric strength and low dielectric constant make it well suited for RF applications. It is the most commonly used low temperature cable dielectric.

FOAM CORE (CELLULAR POLYETHYLENE)

An excellent low temperature dielectric formed by expanding polyethylene with millions of bubbles of an inert gas. Its low dielectric constant of 1.5 for Foam Core compared to 2.26 for solid polyethylene permits the design of lower attenuation and low capacity cables.

TEFLON

Teflon will withstand high temperature applications. It has high dielectric strength and a very low dielectric constant. Its ability to withstand exposure to gases and liquids makes it the dielectric selected where other materials would be inadequate.

CABLE OUTER CONDUCTORS

SHIELDS† OR BRAID

The outer conductor is usually made of a metal braid but it can be a solid tube. The braid is used where flexibility is a vital factor; the tubular construction is used where a high degree of shielding is required. Tubular construction also provides lower cable attenuation. Two adjacent braids offer better shielding action than one braid. Generally speaking braids are either copper, tinned copper or silver plated copper.

† Armor

CABLE JACKET TYPES

TYPE I (MIL-C-17)—Decription: Black Polyvinylchloride. **Characteristics:** Excellent weathering and abrasion properties, but is of the contaminating type and will cause cable attenuation to increase with age. Can be used for direct burial.

TYPE II (JAN-C-17A)—Description: Grey Polyvinylchloride. **Characteristics:** A semi-noncontaminating jacket.

TYPE IIA (MIL-C-17)—Description: Black or Grey Polyvinylchloride. **Characteristics:** Noncontaminating. Good weathering and abrasion resistant properties. Can be used for direct burial.

TYPE IIIA (MIL-C-17)—Description: Black Polyethylene. **Characteristics:** Moisture resistant, abrasion resistant, defies ultra violet damage. Noncontaminating; recommended for direct burial.

TYPE IV (MIL-C-17)—Description: Black Synthetic Rubber. **Characteristics:** This jacket material is used only on high voltage pulse cables. The basic material is polymerized chloroprene.

TYPE V (MIL-C-17)—Description: Fiberglas Braid. **Characteristics:** Impregnated with silicone varnish to provide abrasion resistance and a moisture seal.

TYPE VI (MIL-C-17)—Description: Silicone Rubber Dacron Braid. **Characteristiscs:** Two wraps of silicone rubber impregnated fiberglass tape which is fused into a homogeneous layer. A dacron braid is applied, followed by a high temperature fluorocarbon lacquer.

TYPE VII (MIL-C-17)—Description: Teflon (Polytetrafluordethyene). **Characteristics:** Either extruded or tape wrapped. Withstands high temperatures; chemically inert; insoluble in liquids and gases.

TYPE VIII (MIL-C-17)—Description: Synthetic Rubber. **Characteristics:** This material is a polychloroprene compound and is used with only a few pulse cables. Its primary use is as a jacket material for multiconductor cables.

TYPE IX (MIL-C-17)—Description: Teflon (Fluorinated Ethylene Propylene). **Characteristics:** Excellent weathering properties and chemically inert. Maximum operating temperature of 200°C.

COAXIAL CABLE WITH (FOAM) CELLULAR POLYETHYLENE DIELECTRIC

LOW LOSS FOAM COAXIAL CABLE

Compared to ordinary RG/U cable of similar size, the attenuation of cellular polyethylene (Foam Core) dielectric cable is reduced by as much as 35%. These cables are well suited for CATV, Closed Circuit or MATV; ideal for use in amateur commercial or citizen band installations. All are made to adapt to unusual terrain problems and resist damage from weather extremes.

GARRETT YOUR NEWEST SOURCE FOR ALL WIRE AND CABLE

"WE SPECIALIZE IN SMALL OR LARGE QUANTITIES OF JACKETED AND/OR SHIELDED TEFLON CABLE"

MIL-W-16878D • SHIELDED TEFLON* CABLES

No Outer Covering Over Shield

DESCRIPTION

Each conductor stranded silver plated copper, Type E extruded TFE .010" insulation, braided silver plated copper shield over conductor(s), 90% coverage.

CHARACTERISTICS

Temperature rating −65°C to +200°C. Voltage rating 600 volts. Resistant to acid, alkalis, oil, flame, moisture, solvents and fungus.

MIL-W-16878D • SHIELDED TEFLON* CABLES

Teflon* Tape Wrap Jacket Over Shield

DESCRIPTION

Each conductor stranded silver plated copper, Type E extruded .010" TFE Teflon* insulation, color coded, cabled, braided silver plated copper shield 90% coverage, sintered wrapped white Teflon* tape jacketed overall.

CHARACTERISTICS

Temperature rating −65°C to +200°C. Voltage rating 600 volts. Resistant to acids, akalis, oil, flame, moisture, solvents and fungus.

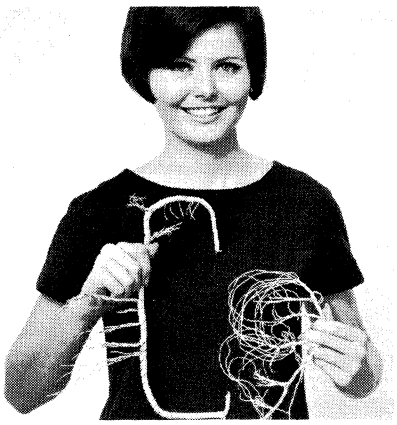
A DIVISION OF RALLY INDUSTRIES

INSULATE-HARNESS-PROTECT!

COMPLETE ELECTRO-PLASTIC MATERIALS AND WIRING DEVICES FROM A SINGLE SOURCE



SPIRAL WRAP—Spirally Cut Tubing

CAT. NO.		
	SWP	Polyethylene—general purpose—Sizes ⅛" to 1" for bundle sizes ½" to 8". Black for outdoor use.
	SWN	Nylon—top mechanical strength—Sizes ⅛" to 1".
	SWR	Flame Retardant (Rulan)—self extinguishing—Sizes ⅛" to ½".
	SWT	Teflon—High temperature—Sizes ⅛" to 1" for bundle sizes ½" to 6".

HEATRAX®—Heat Shrinkable Tubing

CAT. NO.		
	HIX	Irradiated Polyolefin—Shrink ratio 2 to 1—general purpose—Sizes 3/64" to 4"—Conforms to MIL-I-23053
	HRX	Semi-Rigid Irradiated Polyolefin—Shrink ratio 2 to 1—strain relief applications—Sizes 3/64" to ½"—Color coded by size. Conforms to MIL-I-23053
	HCX	Irradiated Flexible Vinyl—Shrink ratio 2 to 1—irradiation enhances flexibility and crack resistance—Sizes 3/64" to 2"—Conforms to MIL-I-23053
	HVX	Flexible Vinyl—low cost—Shrink ratio 2 to 1—Sizes 1/16" to 2". Available in color and clear. Conforms to MIL-I-23053
	HTX	Thin Wall Teflon—Shrink ratio 1½ to 1—Sizes AWG 30 to 0—Conforms to MIL-I-23053
	HSX	Standard Wall Teflon—Shrink ratio 1½ to 1—Sizes AWG 24 to 0—Conforms to MIL-I-23053
	HFX	Fractional Sizes Teflon—Shrink ratio 4 to 1—Sizes 5/64" to 1¼"—Conforms to MIL-I-23053
	HKX	Kynar—Shrink ratio 2 to 1—Sizes ⅛" to 1" clear. Extremely tough, cut-through and abrasion resistance.
	HCS	Vinyl—Shrinkable outside, sticky meltable inside. Adheres to form waterproof seal. Sizes ¼", ½", ¾". Color—black.
	HIM	Polyolefin—Sizes from ⅛" to 1"—Shrinkable outside, meltable inside. Does not adhere but forms tight mechanical seal. Color-coded by size.

VINYL, FIBERGLASS & TEFLON TUBING

CAT. NO.		
	SLV-105	Vinyl, Temperature to 105°C. Class A—Sizes AWG 24 to 2½"—Conforms to MIL-I-631D, Grade C, Class 1 & 2.
	SLV-40	Vinyl, Low Temperature down to —65°C—Sizes AWG 24 to 2½"—Conforms to MIL-I-7444B; MIL-I-22076.
	SLV-130	Fiberglass High Temperature to 130°C Class B, Grade B—Sizes AWG 24 to 1"—Conforms to MIL-I-3190B; NEMA-VS1.
	SLV-1200	Fiberglass High Temperature to 650°C, Class C—Sizes AWG 24 to 1"—Conforms to NEMA-VS1.
	STT	Teflon Thin Wall—Sizes AWG 30 to 0—Conforms to AMS 3651B, 3655; MIL-I-22129B.
	STS	Teflon Standard Wall—Sizes AWG 24 to 0—Conforms to AMS 3651B, 3653; MIL-I-22129B.
	STL	Teflon (Extra Thin) Lightweight—Sizes AWG 28 to 0—Conforms to AMS 3651B, 3654.
	TTF	Teflon (Heavy Wall) fractional sizes—Conforms to MIL-I-22129B, AMS-3651B.

ZIPPER TUBING

CAT. NO.		
	Z63	General Purpose Vinyl—Temperature to 105°C—Conforms to MIL-I-631D, Class C.
	Z74	Low Temperature, Flexible Vinyl for applications down to —70°C. Conforms to MIL-I-7444B.
	ZHN	Nylon with aluminum foil. Excellent RFI shielding—Conforms to MIL-C-20696, Type I, Class 2, MIL-A-148A.

LACING TAPE & CORD

CAT. NO.		
	LTN	Flat Braided Nylon—Widths, .250", .125", .090", .062", .045". Conforms to MIL-T-43435, Type I; MIL-T-713A, Type P.
	LTD	Flat Braided Dacron—Width .090"; Conforms to MIL-T-43435, Type II; MIL-T-713A, Type D.
	LTT	Flat Braided Teflon Tape—Width .090"—Conforms to MIL-T-43435, Type III; MIL-T-713A, Type PTFE.
	LCN	Round Twisted Nylon Cord—Diameter .050", .035", .030". Conforms to MIL-T-713C, Type P.
	LCL	Round Twisted Linen Cord—Diameter .035"—Conforms to MIL-T-713C, Type N.
	LCV	Round Vinyl Cord—Diameter .065"; material Virgin PVC, Type A.

CABLE CLAMPS

CAT. NO.		
	CLE	Ethyl Cellulose—General Purpose—Sizes ⅛" to 1½"—Conforms to 7-21-44 Army-Navy Aeronautical AN742.
	CLN	Nylon—Temperature to 135°C, Sizes ⅛" to 1½"—Conforms to.....
	CLT	Teflon—High temperature to 260°C, Sizes ⅛" to 1¼".

GROMSTRIP®—Continuous Extruded Grommet

CAT. NO.		
	GSP	Polyethylene for general application, sizes for thicknesses #24 gauge to ½".
	GSN	Nylon for excessive abrasion, sizes for thicknesses #24 gauge to ½".

GROMMETS

	GV	Vinyl for general application—Sizes for edge protection of holes from ⅛" to 1 1/16" diameter. Black and White.

CABLE TIES

CAT. NO.		
	CTN	Self-locking virgin Nylon, no metal parts. Conforms to MS-17821, MS-18034 and MIL-S-23190. Apply by hand or any standard assembly tool.

PLASTIC ROD, SHEET & TUBING

A wide selection of plastic materials available in standard cut lengths.

Phone, or write for the complete ICO/RALLY catalog!

ITT IRRAVIN™ Insulated Military and U/L Hook-up Wire and Cable

IRRAVIN, irradiation cross-linked insulation developed by ITT Wire and Cable, meets the tough requirements of today's electronic, aerospace, airframe and data processing industries. Through precisely controlled electronic bombardment a PVC compound becomes solder-iron resistant, abrasion resistant, cut-through and crush resistant IRRAVIN insulation. It has the desired characteristics of other high temperature wires with the **added** advantage of low cost, continuous long lengths, ease of handling and universal application.

IRRAVIN insulated wires can be used for internal circuit hook-up, harnesses bundles as well as being advantageously used with automatic wire wrapping machinery. For those applications, the tough IRRAVIN insulation possesses superior electrical, mechanical and thermal characteristics as compared to conventional PVC.

HEAT RESISTANCE — Withstands high ambient temperatures. Resists solder iron damage. Eliminates shrink-back, flowing and dripping of insulation.

ABRASION AND CUT-THROUGH RESISTANCE — IRRAVIN insulation has improved mechanical properties. Eliminates the need for outer jacketing. This results in superior space and weight savings advantages.

CRUSH RESISTANCE — IRRAVIN insulation has 50% more crush resistance than PVC insulation... 200% more than TFE insulation. This means extra reliability in wire bundles and harnesses, because ties and lacings will not cut through the insulation.

LONG LENGTHS — Long continuous lengths of IRRAVIN insulated wire are available at no extra cost... Fewer shipping spools, less storage space needed, and fewer automatic machine set-ups.

UNIVERSAL APPLICATIONS — IRRAVIN insulated wire conforms to military specification MIL-W-16878, types B, C and D, and is listed by Underwriters' Laboratories, Inc. for styles 1429, 1430 and 1431.

LOW COST — Saves you up to two-thirds the cost of other high temperature wire. Its universality reduces inventories especially if used with in-house striping machinery for color coding.

IRRAVIN WIRE CAN BE PRINTED, PAINTED, POTTED AND STRIPED USING CONVENTIONAL PROCESSING EQUIPMENT.

U/L STYLE 1429 80°C BUSINESS MACHINE WIRE

Description: Thin wall IRRAVIN B insulation on tinned copper or overcoated tinned copper stranded or solid conductor. Resistant to deformation and hot solder iron damage.

Application: Internal wiring of business machines, computers and maintenance of equipment.

Temperature: −55° to +80°C.

Rating: 300 Volts r.m.s.

Available: **Stranded:** Sizes AWG 28 through 16 in a selection of strandings. **Solid:** Sizes AWG 26 through 20.

See illustration Ⓐ *or* Ⓑ

U/L STYLE 1430 APPLIANCE WIRE

Description: 1/64 inch wall of IRRAVIN C insulation on tinned copper or overcoated tinned copper stranded or solid conductor. The only type 1430, 300 Volt appliance wire without a nylon jacket, yet resistant to abrasion, deformation and cut through.

Temperature: −55°C to +105°C. Can be used to 125°C for intermittent service.

Rating: 300 Volts r.m.s. for appliances 600 Volts for electronic equipment.

Available: **Stranded:** Sizes AWG 26 through 16 in a selection of strandings. **Solid:** Sizes AWG 24 through 16.

See illustration Ⓐ *or* Ⓑ

600 VOLT MIL-SPEC HOOK-UP WIRE

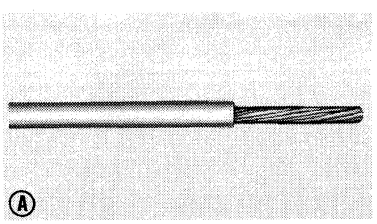
Description: Thin wall IRRAVIN B insulation on tinned copper conductor.

Certified to: MIL-W-16878 Type B.

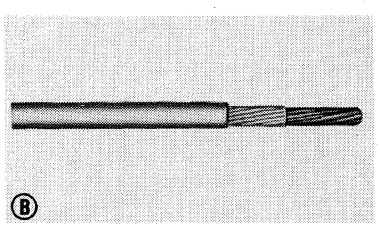
Temperature: −55°C to +105°C. Intermittent service at higher temperatures.

Available: 30 AWG through 14 AWG stranded.

See illustration Ⓐ.



IRRAVIN insulation over stranded tinned copper conductor



IRRAVIN insulation with overcoated tinned copper conductor

1000 VOLT MIL-SPEC HOOK-UP WIRE

Description: Medium wall IRRAVIN C insulation over tinned copper conductor. Has outstanding resistance to corona attack at high peak A.C. voltages.

Certified: MIL-W-16878 Type C.

Temperature: −55°C to +105°C. Intermittent service at higher temperatures.

Available: 26 through 12 AWG stranded.

See illustration Ⓐ

600 & 1000 VOLT MIL-SPEC HOOK-UP WIRE WITH OVERCOATED TINNED CONDUCTOR

Description: Insulated with IRRAVIN B for 1000 Volt application with overcoated tinned copper stranded conductors. Eliminates tinning operation after stripping away insulation. Prevents wire ends from fraying.

Certified: MIL-W-16878 Types B and C.

Temperature: −55°C to +105°C. Intermittent service at higher temperatures.

Available: 24, 22, and 16 AWG stranded.

See illustration Ⓑ

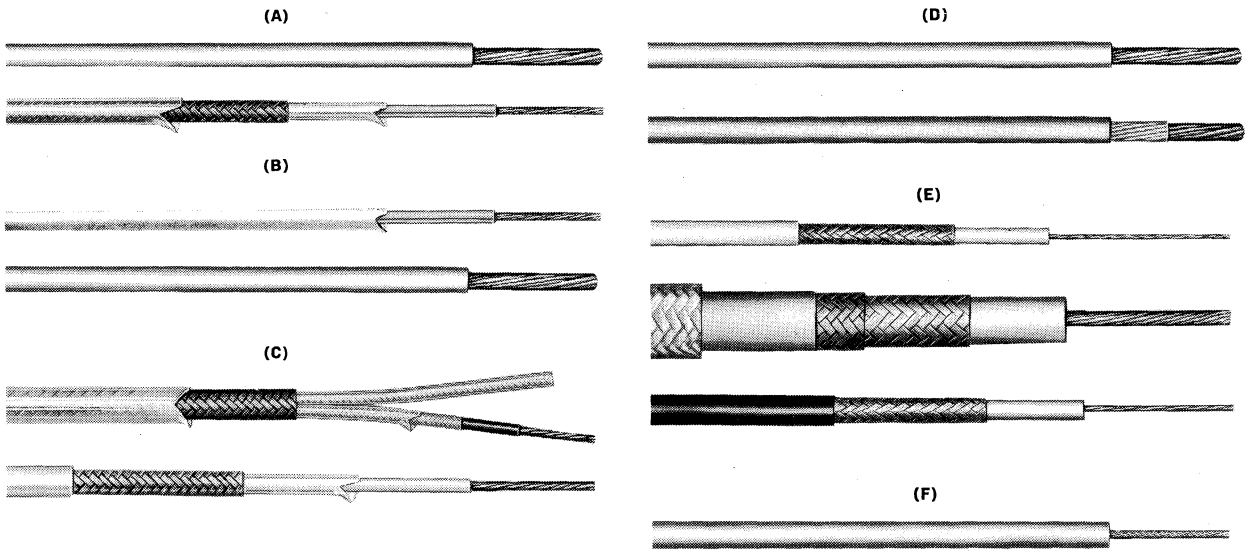
ITT Electronic Wire and Cable
. . . broadest wire and cable line available
. . . over 23,000 manufactured types
. . . more QPL listings than any other manufacturer



(A) MILITARY HOOK-UP WIRE

Military specification MIL-W-16878D is universally accepted for general purpose hook-up wire. It covers performance requirements for wires insulated with polyethylene, PVC, Silicone, TFE Teflon and FEP Teflon and IRRAVIN™ insulation. ITT Wire and Cable manufactures all of these constructions as listed in MIL-W-16878D. Polyethylene and PVC insulated wires can be ordered with nylon jacketing over the insulation.

Wires can also be manufactured to the following military specifications:

MIL-W-76B	MIL-W-81044	MIL-C-27500
MIL-W-22759	MIL-C-7078	

(B) UNDERWRITERS' LABORATORIES, INC. LISTED HOOK-UP WIRE

Hook-up wire, as listed by U.L. specifications and the Canadian Standards Association, requires a heavier wall thickness for equivalent voltage rating as compared to military specifications.

ITT Wire and Cable manufactures a broad line of U.L. wires and maintains a stock of the following U.L. styles:

1007	1015	1429
1010	1061	1430
1011		1431

(C) AIR FRAME WIRE

ITT Wire and Cable is a major producer of wire for the aviation and aerospace industries. Here are a few of the military specification wires manufactured for airframe and aerospace applications.

MIL-W-81044	MIL-W-22759
MIL-W-5086 All Types	MIL-W-8777

(D) AUTOMATIC WIRE WRAP WIRES

ITT Wire and Cable offers two types of wire insulation for automatic wire wrapping of computer back-panel assemblies.

SURFLENE B—A modified fluorocarbon insulation tough enough to resist cut through but flexible enough to prevent "pop-up" problems that often occur in wires used on automatic wire wrapping machines. It has outstanding thermal and chemical characteristics, and is rated at −40°C to +135°C. Manufactured in 24 through 30 AWG sizes.

IRRAVIN B — This irradiation cross-linked polyvinyl chloride compound provides increased mechanical toughness even when applied in a thin wall of 0.0065". It is extremely hard, slick, and crush resistant. Solder iron contact will not melt or deform this insulation. It is especially suitable for wire wrap machine applications because of low cost, stable electrical characteristics, small diameter, and longer lengths. Manufactured in 24 through 30 AWG sizes. (See IRRAVIN information)

Please contact the ITT Wire and Cable Division for specific technical assistance.

(E) COAXIAL CABLES

ITT Wire and Cable designs and manufactures coaxial cables with special alloys, solid or stranded conductors and uniquely compounded dielectric materials which possess low loss factors. There are endless varieties of conductors, dielectric materials, shieldings and jacketings available to the design engineer who requires a particular coaxial cable. RG/U tables of the ITT manufactured standard line coaxial cables are listed in catalog CP-1 available on request.

(F) SILICONE RUBBER HIGH VOLTAGE WIRE

ITT Silicone rubber insulated wire for high voltage applications has a superior resistance to high temperature and corona. Silicon rubber remains flexible at −65°C and can be subjected to 175°C temperature for short periods without detrimental effects. High voltage cables for 10-30 KV D.C. use are also offered. These cables are listed in catalog CP-3 available on request.

ITT electronic wire and cable distribution centers:
Clinton, Mass. • Chicago • Atlanta • Commerce, Calif.

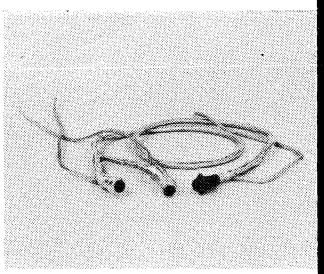
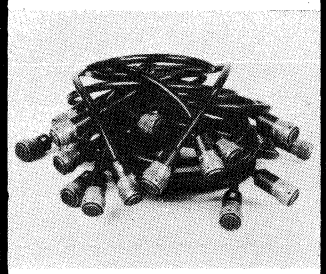
INTERCONTINENTAL

SPECIALIZES IN PRODUCING CABLES TO SPECIFIC REQUIREMENTS AND SPECIFICATIONS. ADVANCED CABLE TECHNOLOGY FACILITATES THE DELIVERY OF QUALITY PRODUCTS AT EQUITABLE COSTS.



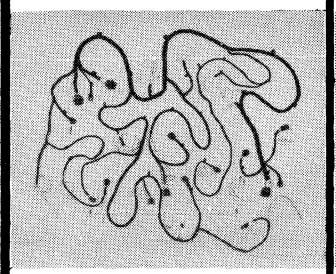
RFI BRAIDED SHIELDING

This unique process generates optimum abrasive resistance and reduces the size by 40% of the cable diameter. Braided shielding provides maximum coverage at minimum cost. The braided shielding technique conforms to all commercial, military and NASA requirements.



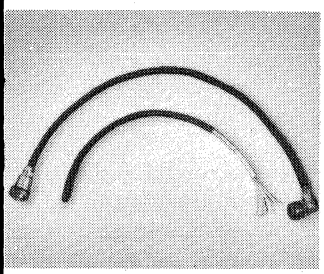
MOLDED CABLES

An advanced process developed to provide reliability in the performance of sophisticated applications. Cable ends and tee breakouts may be molded from various polyurethane, epoxy and rubber compounds.



BRAIDED CABLES

Braided cables are utilized by the aerospace telecommunication and associated industries. Owing to its superior ability to be economical in adhering to intricate and complex requirements, cables may be braided with dacron, nylon, glass or other braided materials.



JACKETED CABLES

A highly individualized form of cable assembly which allows customized selection of wire. An economical class of cable assembly when reduced quantities and varied applications are involved.

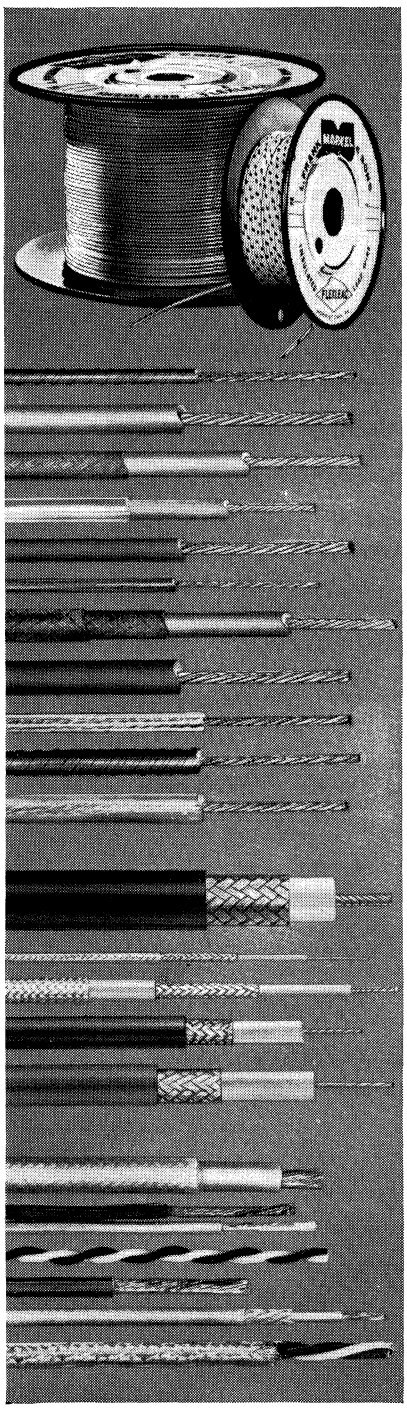
Insulating Tubings and Sleevings- High Temperature Wire and Cable



FLEXLEAD®

High temperature Wire and Cable insulated with Teflon (TFE or FEP) or silicone rubber. You can select a numbered FLEXLEAD type listed below, or let Markel quote, to your specifications, on a custom FLEXLEAD construction.

MIL-W-16878D

Type E—600 v. Stranded silver-plated copper insulated with extruded DuPont Teflon TFE
Type E—600 v. Stranded silver-plated copper insulated with wrapped and sintered Teflon TFE tape
Type EE—1000 v. Stranded silver-plated copper conductor insulated with extruded Teflon TFE
Type EE—1000 v. Stranded silver-plated copper insulated with wrapped and sintered TFE tape
Type ET—300 v. Stranded silver-plated copper conductor insulated with extruded Teflon TFE
Type ET—300 v. Stranded silver-plated copper insulated with wrapped and sintered TFE tape
Type K—600 v. Stranded silver-plated copper conductor insulated with extruded Teflon FEP
Type KK—1000 v. Stranded silver-plated copper conductor insulated with extruded Teflon FEP
Type KT—300 v. Stranded silver-plated copper conductor insulated with extruded Teflon FEP
Type F—600 v. Stranded tin-coated copper conductor insulated with extruded silicone rubber
Type F—600 v. Same as Type F above, jacketed with silicone resin-impregnated fiberglass braid
Type FF—1000 v. Stranded tin-coated copper conductor insulated with extruded silicone rubber
Type FF—1000 v. Same as Type FF above, jacketed with silicone resin-impregnated fiberglass braid

U/L APPROVED

Extruded Teflon Wires, sizes 10-28 AWG; 80°C to 200°C ratings; 300 and 600 volt ratings: U/L Style Nos. **1164, 1180, 1198, 1199, 1212, 1213.**

Extruded Silicone Rubber Wires, various constructions, with and without fiberglass jackets; sizes 10-32 AWG; 150°C and 200°C ratings; 300 and 600 volt ratings: U/L Style Nos. **3066, 3067, 3068, 3069, 3070, 3071, 3074, 3075, 3101, 3113, 3122, 3123, 3132, 3133, 3134, 3135, 3136, 3137, 3138, 3139, 3140,** 3141, 3142, 3143, 3144, **3145, 3180, SF-1, SF-2, SFF-1, SFF-2.**

Ask for data sheets, prices, and samples of these FLEXLEAD wire constructions

FLEXLEAD Coaxial Cables. Markel manufactures a complete line of both standard and special RG/U coaxial cables. In accordance with specifications, types are available with silver-plated copper, plated or unplated copper-covered steel, or bare copper center conductor; one or two braided shields; tape-wrapped Teflon shield guards; and outer jacketing of impregnated fiberglass braid or Teflon (extruded or tape-wrapped). For complete data, ask for a FLEXLEAD Coaxial Cable Specifications folder.

FLEXLEAD Special Constructions. Because wiring problems cannot always be solved with standard materials, Markel's capacity for engineering high temperature wire and cable constructions to meet particular needs has grown steadily with the demand. We can combine insulations—Teflon, silicone rubber, fiberglass, nylon-shielding, fillers, liners, and jacket materials—with single, twisted pair or multiple conductors—to provide a special cable construction for any temperature range from —90° to 260°C.

FLEXLEAD Fused Twisted Pair. This unique Teflon-insulated twisted pair construction finds wide application in computers and similar circuitry. The fusing, which will withstand predetermined pulls to separate the individual wires, keeps the wires evenly twisted for easier assembly and uniform capacitance and inductance. Ask for a test sample and prices.

FLEXLEAD MB Bondable Teflon. The Markel MB process can be factory-applied to any of the FLEXLEAD Teflon wires, extruded or tape-wrapped, and renders the surface bondable with commonly used elastomeric and epoxy-base potting and encapsulating compounds. Without affecting the color or electrical properties of the insulation, the MB treatment provides a bond with up to 150 psi pull-out strength, and a surface that is receptive to marking and printing.

Multiple Conductor Cables!

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cables. Conductors are of tinned copper strand with primary insulation for use up to 105°C per MIL-W-16878D Type C. Insulated for 1000 volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per MIL-STD. 122.

All conductors are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black Thermoplastic or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification.

SHIELDED CABLES

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A. STANDARD PUT-UPS: 500 ft. and 1000 ft. No-deposit reels.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 8000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on cable construction.
Insulation Leakage Res.:	200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Useable Temp. Range:	Suitable for continuous use from +105°C to −55°C.
Cold Bending Capability:	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C., or for continuous flexing service to −55°C, specify our neoprene sheath, in lieu of plastic sheath.

MULTI-CONDUCTOR STOCK CABLES

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

MINIATURE SIGNAL & CONTROL CABLES

National Wire & Cable Corp. manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010" wall of vinyl primary insulation for use of to 105°C. per MIL-W-16878 Type B. Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) all are coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. APPROVED STYLE 2343 COMPUTER CABLE; rated 300 volt, 80°C. (Higher temp. ratings apply for any non-U.L. service.)

Standard Putups: 500 & 1000. No-deposit reels.

*denotes UL Style 2344

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 5000 volts AC RMS, 60 cps.

Capacitance: Nominal capacitance from a wire to all else in a cable ranges from 45 to 70 pf/ft at 1 kc, depending on gauge and position.

Insulation Leakage: 200 megohms/1000 ft. min. @ 500 VDC from any conductor to all else in cable.

Sheath Linkage: 10 megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.

Temperature Range: Suitable for continuous use from −40°C to +105°C. (U.L. Service limited to +80°C.)

Bending Characteristics: All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.

MULTI-CONDUCTOR STOCK CABLES (Singles) Cond: 22, 24 are 7 strand; 20 AWG is 19 str.

Multiple Pair SIGNAL & CONTROL CABLES

Identical to National's NW-Series Cables except offered as twisted pairs.

National Wire & Cable Corporation manufactures a complete line of multiple pair control cables. Conductors are of tinned copper strand with 1/64" vinyl primary insulation for use up to 105° C per MIL-W-16878D Type C. Insulated for **1000** volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per table below.

All pairs are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black vinyl plastic per MIL-I-631; or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene at added cost).

SHIELDED CABLES

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A. STANDARD PUT-UPS: 500 ft. and 1000 ft. No-deposit reels.

For shielded pairs see pg. 37 or consult factory.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 8,000 volts AC RMS, 60 cps.

Capacitance: Nominal capacitance wire to wire for a pair ranges from 27. to 40. mmfd/ft. Capacitance from both wires tied together measured to all else in common ranges from 35. to 60. mmfd/ft. dependent on gauge and position. Overall shield has negligible effect on W-W capacitance.

Insulation Leakage Res.: 200. megohms / 1000 ft. min. at 500 VDC from any conductor to all else in cable.

Sheath Leakage Res.: 10. megohms / 1000 ft. min. at 500 VDC from overall shield through sheath to outside world.

Usable Temp. Range: Suitable for continuous use from +105°C to −55°C.

Cold Bending Capability: All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C., or for continuous flexing service to −55°C, specify our neoprene sheath, in lieu of plastic sheath.

NAVY SHIPBOARD CABLE
MIL-C-915C, MIL-C-2194D & MIL-C-24145A

ELECTRICAL SHIPBOARD CABLE
AIEE-45

REA TELEPHONE CABLE
SPEC PE-14, PE-15, PE-17, PE-27, PE-28

MULTI PAIR RURAL DISTRIBUTION WIRE TRAFFIC CONTROL CABLES
(Specs IMSA 19 & 20)

POWER CONTROL CABLES
(Specs IPCEA & IMSA)
(Thermoplastic Insulation & Jacket)

AIRPORT LIGHTING CABLE
COMMUNITY TV COAXIAL CABLE
(Wire Shield, Flat Ribbon Shield, Corrugated Copper Tape Shield, Aluminum Sheath.)

SILICONE RUBBER INSULATED WIRE & CABLE
MIL-W-16878D types "F", "FF", "FFW"
MIL-W-8777B
Underwriters Laboratory type SF-1, SF-2, SFF-1, SFF-2
High temperature, high voltage hook-up wire
Motor lead wire

HOOK-UP & AIRCRAFT WIRE

MIL-W-1687D, MIL-W-7139A, MIL-W-7139B (Extruded Teflon*)

MIL-W-7139B

Manufactured to conform to Dept. of Defense requirements.
600 Volts Temperature Rating +200°C & +260°C.
Class 1—Silver Coated Copper Conductor for +200°C Operation.
Class 2—Nickel Coated Copper Conductor for +260°C Operation.
*DuPont Trade Mark

SILICONE WIRE & CABLE

EXTRUDED SILICONE RUBBER

Outstanding performance, under difficult operating conditions rapidly expand applications for these constructions.

ADVANTAGES

1. Electrical properties remain constant from —130°F to +500°F.
2. Remains flexible even after long exposure to temperatures from —130°F to +500°F.
3. Resists ozone and corona.
4. Can be soldered without melting or destroying insulation.
5. Non-Flammable.
6. High Dielectric strength (450 to 550 volts/mil)
7. High Insulation resistance (1000 to 20,000 megohms-/1000 ft.)
8. Low dissipation factor (.001-.02)
9. Low Dielectric Constant (2.98-3.6)
10. Low water absorption (1 to 2%)
11. High Tensile Strength (750 to 1500 PSI)
12. High Elongation (100-550%)

The most prominent silicone rubber insulated wires and cables are detailed by the following specifications:

MIL-W-8777B	IGNITION WIRE
MIL-W-16878D (F, FF, FFW)	APPLIANCE WIRE
MIL-C-3162A	(SF-1, SF-2, SFF-1, SFF-2.)
MIL-C-8817 (ASG)	MOTOR LEAD WIRE

GLASS BRAID | SILICONE RUBBER | TINNED COPPER

MOTOR LEAD WIRE

(600 Volts Class "H" +200°C)

Lead wire failures can be ractically eliminated with the use of silicone rubber insulations. In many instances the equipment can be baked with lead wire in place.

MIL-W-8777B (ASG)

Dated 1 August 1960—Superseding MIL-W-8778A—10 July 1956. Voltage Rating 600 Volts. Temperature Rating —55°C +150°C.
Construction Details:
(a) Conductor—Concentric stranded or rope—lay stranded silver copper conductors as required by specification. (b) Primary Insulation—Silicone Rubber. (c) Protective Cover—Fiberglas Braid impregnated with heat-resistant lacquer. (d) Outer Protective Coating—1. Polyester Jacket, impregnated with heat resistant lacquer. 2. Extruded FEP Jacket. (e) Print—Outer surface printed as required by specification.

Per Military Standards—
MS 25471 (ASG) Polyester Jacket Impregnated with High Temperature Finisher MS 27110 (USAF) Extruded Clear FEP Jacket.

HIGH TEMPERATURE — HIGH VOLTAGE HOOK-UP WIRE

Class "H" Insulation for —65°C to +200°C Max.
Silicone Rubber and extruded Teflon* 100 (FEP).

Description:
a. Conductor — Copper stranded, silver plated — 40 micro-inches min.
b. Primary Insulation — High strength silicone rubber.
c. Jacket — Teflon* (Perfluorocarbon resin 100) extruded.
For operation between —65°C and +175°C at 2000 Volts RMS (sea-level).

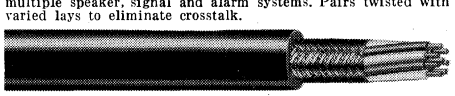
TYPES SF-1, SF-2, SFF-1, SFF-2
For appliances where high temperature wiring is mandatory.
*DuPONT TRADE MARK

MULTI-CONDUCTOR, UNSHIELDED, JACKETED CABLES

These cables can be supplied in various AWG sizes, insulation types, number of conductors and jacket types. Used for unbalanced intercom systems, low voltage control systems, public address systems, electronic computers, indoor and outdoor sound and signal systems.

MULTI-PAIR, UNSHIELDED, JACKETED CABLES

This cable type can be supplied in a variety of sizes, insulations and jackets to meet individual needs and requirements. For use in balanced intercom systems, annunciators, telephones, nurses call systems, control circuits, electronic computers, multiple speaker, signal and alarm systems. Pairs twisted with varied lays to eliminate crosstalk.



MULTI-CONDUCTOR, SHIELDED JACKETED CABLES

Cables of this type are used for indoor and outdoor public address and sound systems, installations in schools, hospitals, and institutions, recording studios, transmitters, paging and call systems, and wherever required to prevent interference pickup. Can be supplied in various AWG sizes, insulation types, braided, spiral wrapped or foil wrapped shields and PVC or Polyethylene jackets.

MULTI-PAIR, SHIELDED JACKETED CABLES

These cables are designed to provide maximum performance in eliminating interference and crosstalk in public address and sound systems, broadcast studios and indoor and outdoor telephone and intercom systems. Can be supplied in various AWG sizes. Insulations, shield types and jackets.

AIRCRAFT WIRE

MIL-W-5086B — Type 1

(Dated March 19, 1968)

600 Volts Temp. Rat. —55°C +105°C Synkote insulated electrical aircraft wire manufactured to conform to Military Specification MIL-W-5086-A
1. Construction Details:
   (a) Concentric stranded tinned copper conductor
   (b) Synthetic resin insula. (105°C)
   (c) Extruded clear nylon jacket
2. This construction available with tinned copper shield and/or with extruded nylon jacket over shield. Identified as Type 1 or Type 2 per specification MIL-C-7078B.
3. Standard Color: White.
4. May be furnished in multiple conductor combinations—color coded as required.

MIL-W-5086B — Type 2

(Dated March 19, 1968)

600 Volts Temp. Rat. —55°C +105°C
1. Construction Details:
   (a) Concentric stranded or rope-lay stranded tinned copper conductors as required by specification
   (b) Synthetic resin insula. (105°C)
   (c) Glass braid — saturated.
   (d) Extruded clear nylon jacket sizes AN-22 thru AN-12; braided nylon, impregnated with nylon lacquer sizes AN-10 thru AN-4/0.
2. This construction available with tinned copper shield in all sizes. Also with extruded nylon jacket over shield in sizes AN-22 thru AN-12 per specification MIL-C-7078A — Type 1 or 2.
3. Standard Color: White.
4. May be furnished in multiple conductor combinations—color coded as required.

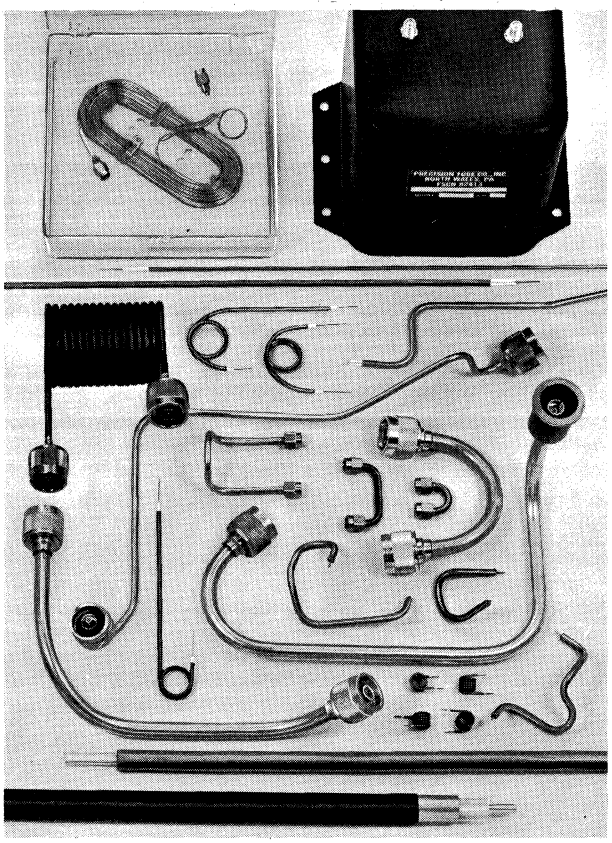
MIL-W-5086B — Type 3

(Dated March 19, 1968)

600 Volts Temp. Rat. —55°C +105°C
1. Construction Details:
   (a) Concentric stranded or rope-lay stranded tinned copper conductors as required by specification
   (b) Synthetic resin insula. (105°C)
   (c) Glass braid — saturated.
   (d) Secondary synthetic resin insulation.
   (e) Extruded clear nylon Jacket sizes AN-22 thru AN-12; braided nylon, impregnated with nylon lacquer sizes AN-10 thru AN-4/0.
2. This construction available with tinned copper shield in all sizes. Also with extruded nylon jacket over shield in sizes AN-22 thru AN-12 per specification MIL-C-7078A — Type 1 or 2.
3. Standard Color: White.
4. May be furnished in multiple conductor combinations—color coded as required.

PRECISION TUBE COAXITUBE

Semi-Rigid Coaxial Cable



To meet the demand for fast delivery of 50-ohm semi-rigid coaxial cables, Precision now stocks the most commonly used types, listed below, for immediate off-the-shelf shipment. Fifty-foot coils of these constructions can be shipped within two working days; cut straight lengths, to your specification, take only a little longer. All of these standard cables employ dielectric of solid polytetrafluoroethylene, with seamless copper or aluminum outer conductors. All exhibit nominal electrical characteristics as follows: $Z_0 = 50$ ohms; propagation velocity = 69.5%; and capacitance = 29.3 pf/ft.

In addition to these standard cables, Precision manufactures more than 40 special Coaxitube constructions with impedances ranging from 12 to 125 ohms, and outer diameters from .020 to .500 inches. Custom outer finishes, including plating on aluminum and plastic jacketing, are available to order. Precision's Pre-Fab Department can provide complete cable assemblies, coaxial delay lines, and other custom Coaxitube constructions to your exact specifications, including testing where required. Call or write for prompt attention and quotations.

Standard sizes in 50-foot coils for immediate delivery!

Part Number	O.D.	Outer Conductor Material & Finish	Safe Bend Radius
MA50056	.056 ± .002	Copper	.125
AA50085	.085 ± .001	Copper	.125
BA50085	.085 ± .001	Copper	.125
BC50085	.085 ± .001	Silvered Copper	.125
AA50141	.141 ± .001	Copper	.125
AC50141	.141 ± .001	Silvered Copper	.125
AD50141	.141 ± .001	Cadmium Plated Copper	.125
AE50141	.141 ± .001	Tinned Copper	.125
CA50215	.215 ± .003	Copper	.375
CH50215	.215 ± .003	Aluminum	.375
BA50250	.250 ± .002	Copper	.375
NA50325	.325 ± .005	Copper	.500
NH50325	.325 ± .005	Aluminum	.500

NOTES: (1) All dimensions are in inches. (2) Silverplating on outer conductor is Type II, Grade B, QQ-J-365, .0003 inch minimum thick. (3) Tinplating on outer conductor is Type I, MIL-T-10727, .001 to .00025 inch thick. (4) Cadmium plating on outer conductor is Class 2, Type I, QQ-P-416.

For breadboarding or prototype production, small quantities of Coaxitube Cable are available in these four Coax-i-kits, priced at $20 each, FOB destination, with next-day shipment. Select the kits which fit your needs, then call in your order.

Kit	Contents	Ship Via
A	One 10-foot coil each of MA50056, DA50085 and CA50141	1st Class Mail
B	Two 4-foot straight lengths each of CA50215 and NA50325	Parcel Post
C	One 10-foot coil each of BA50085 and AA50141	1st Class Mail
D	Two 4-foot straight lengths each of CH50215 and NH50325	Parcel Post

DA50085 and CA50141 are identical to BA50085 and AA50141, respectively, except for OD tolerance of ± .003 inches and a greater impedance tolerance.

WIRE & CABLE

FROM STOCK OR FABRICATED TO ORDER

WE INSULATE WITH — Polyethylene - Polypropylene - PVC (Polyvinyl Chloride) - Silicone - Rubber - Nylon - Polyethylene Foam and Teflon.

WE FABRICATE — Single or Multi-Conductor Cables - Microphone - Audio - Braid or Wrap Shielded Constructions - Speaker Wire - Coaxial and Open Wire Transmission Lines - Rotor - Telephone and Coil Cord Constructions, as well as many others.

WE USE — Copper (bare, tinned, enameled or silver plated). Steel — (tinned or zinc plated), aluminum, phosphor bronze, and Copperweld.

WE CAN — Efficiently twist, bunch, insulate, tin, cut, strip, notch, lug, hank, coil, shield, stripe, cable and, in fact, do almost anything with wire.

WE STOCK — In addition to the MIL Specs listed below, Thermocouple Wire - TFE Tubing - Heat Shrinkable Tubing - Telephone Cable - Tubular, Oval & Flat Braid - Coaxial Cables - etc.

SOME OF THE MIL SPECS WE USUALLY HAVE IN STOCK ARE AS FOLLOWS:

MIL-W-76B
MIL-W-16878D

OTHER HIGH TEMPERATURE WIRE AND CABLE PRODUCTS FOR MILITARY AND COMMERCIAL USAGE

1. Thermoplastic Wire & Cable	Insulations: Kynar, FEP, Polysulfone and other melt extrudable material	6. Parallel Wrapped PVC and TFE Insulations	Increased flexibility for phonograph tone arms and hearing aids. High dielectric strength for TV and radio wiring.
2. Ultra-Thin Hook-up Wire	250 Vrms Type UT wire, sizes 36 through 26 in solid conductors, and 28 through 36 in stranded conductors. Wall thickness from .0015" to .004".	7. Computer Wire	Wide variety of insulation and conductors for use in automatic wiring equipment.
3. Instrumentation and Control Cables	Fluorocarbon, polyimide or high temperature thermoplastic insulated multi-conductor cables for instrumentation, signal, and control cable applications.	8. Tufflite™ Polyimide Insulated Wires	Medium and heavy wall constructions to MIL-W-81381. Thin wall, .0045", construction also available.
4. Heater Cables	TFE and Polyimide insulated resistance alloy conductors. Ratings to 500°F.	9. Ribbon Cables	Bonded and woven high temperature Teflon, Kapton, and thermoplastic components.
5. Power Cables	600 and 1000 Vrms ratings in sizes AWG 22 through 4/0.	10. Teflon Tape	Extruded, unsintered tape in widths from 1/8" to 12".

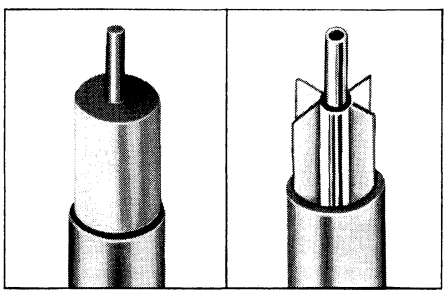
Times interconnection products solve a broad spectrum of transmission problems

Solid metal tube sheathed coaxial cable



ALUMIFOAM® ALUMISPLINE®

What ordinary flexible coaxial cable won't do . . . Times semiflexible will! Here are 7 reasons why: More isolation—at least 80 db more than ordinary coaxial cable. Uniformity average—VSWR 1.1 or less. Stability—10 times better. Lower loss—30% less. Pulse reflection—less than 1%. Less distortion.

Available in three standard versions:

ALUMIFOAM®—Foam polyethylene dielectric where pressurizing isn't practical.

ALUMISPLINE®—Air dielectric where pressurizing is practical. Superior because the dielectric is uniformly extruded directly on the center conductor, guaranteeing lowest attenuation, VSWR, and good nanosecond pulse response.

ALUMISOL®—Solid dielectric
All semiflexibles are available for high temperature applications.

Write or phone for technical data.

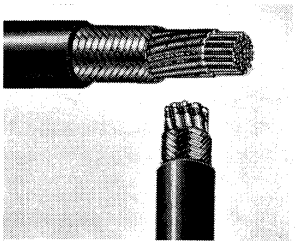
Coaxial cable

RG/U. Over 50 Teflon insulated—and over 125 polyethylene insulated—to MIL-C-17. Over 120 types available from stock. T-Line—Improved RG cable equivalents—specially designed, improved characteristic cable equivalent to RG cables.

Miniaturized low capacitance, low attenuation cables; shielded, low capacitance twisted pairs. Special: Custom engineered coaxial cable is a Times specialty.

Write or phone for technical data.

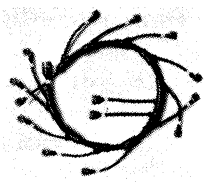
Multi-conductor cable



High and medium temperature cables with up to 198 conductors have been designed and manufactured by TIMES to over 9000 customer and military specifications.

Write or phone for technical data.

Cable assemblies



Times' custom engineering service is qualified to design cable assemblies for the most critical applications, using any combinations of wire and connector constructions. We can take over the complete systems capability from layout to complete construction of cable assembly, which often results in lower engineering, shipping and installation costs.

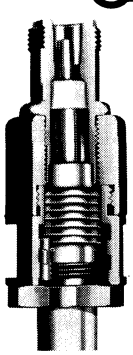
Write or phone for technical data.

New TIMATCH® connector with COILGRIP® CLAMP

- Ready for instant termination
- Re-usable
- Fits most metal tube sheathed coaxial cable
- Has the exclusive CoilGrip Cable Clamp

A major advance in the connector field that virtually makes all other connectors obsolete. Makes it a simple one-step operation to attach connector to semiflex cable without any further connector assembly. Unpack the connector and it's ready for instant use.

Write or phone for technical data.



Coaxial delay lines

Usually the most critical cable components of an interconnection system. Though VSWR, attenuation, or pulse distortion are important, the electrical length or time delay is the most significant factor. Times gives the most serious consideration to the error tolerances assigned to the delay lines, as tight tolerances can significantly affect costs. We are in an excellent position to guarantee precision quality because we use coaxial cable and connectors that we ourselves manufacture in the construction of these delay lines.

MicroCoax

Close-Tolerance Miniature Solid-Jacketed Coaxial Cables

Uses of close-tolerance MicroCoax cables include:

- Microwave transmission and delay lines
- Totally shielded connections (mixers, klystrons, stripline)
- High-speed computer leads
- Audio crosstalk suppression
- Low-noise amplifier isolation

Advantages:

- Low loss
- Essentially total RF shielding
- Easily soldered, stripped and connected
- Close tolerance, resulting in a high degree of uniformity and reliability, both mechanically and electrically
- Comprehensive mechanical and electrical test data available

NOTES: SPCW = Silver Plated Copperweld Wire, SPC = Silver Plated Copper Wire, C = Copper Wire, T = Tophet(1) C Wire, BeCu = Beryllium Copper Wire, 304SS = Stainless Steel, Type 304, TFE = Teflon TFE Resin, FEP = Teflon(2) FEP Resin, IP = Irradiated Polyethylene. (1) = Trade Name W. B. Driver, (2) = Trade Name E. I. Du Pont.

CONDUCTOR MATERIALS

Alloys or Pure Aluminum, Copper, Beryllium Copper, Iron, Nickel, Gold, Silver, Columbium (Niobium), Stainless Steel.

DIELECTRICS

ORGANICS: Teflon (TFE and FEP), KEL-F, PVC, RTV, Polystyrene, Polyethylene.

INORGANICS: Titanite, Alumina, Magnesium Oxide, Beryllium Oxide.

CABLE ASSEMBLIES

Fabricated from any of the standard MicroCoax cables, these assemblies are fully tested for VSWR and attenuation characteristics. A large stock of connectors assures the engineer rapid delivery of either straight or formed units. Comprehensive VSWR and attenuation test data is also available on request.

CUSTOM DELAY LINES

The fabrication of any of the MicroCoax cables listed in the above table into delay elements is one of our specialties. Obtaining the best combination of attenuation, size, shape, cost and weight can be best accomplished by discussing your delay requirements with our engineering staff.

STANDARD DELAY LINES

Stock delivery of delay elements is available for prototype or production requirements. Cable sizes include UT-250, UT-141-A, UT-85, UT-34 and UT-20. Delay values of 5, 10, 25, 50 and 100 nanoseconds allow the cascading of these elements to obtain specific delay and attenuation characteristics.

For further and more complete information, request Bulletin 203 from the MicroDelay Division.

METHODS DESIGNED FOR BETTER QUALITY AND BETTER SERVICE

An important feature in maintaining the quality of our products is our ability to design and construct the tools necessary to do the job. We guarantee continuous performance of equipment & continuity of production.

The exacting specifications of Whitmor's space-age customers require a stringent quality assurance program. Our Q.C. meets Mil-Q-9858 & Mil-I-45208 with modifications required by customers. The same quality consciousness is applied to commercial work. We guarantee trouble free cable and wire!

Whitmor has what it takes to build cables for tough jobs!

20,000 square feet housing modern, high speed equipment makes it possible to fill orders on a 24 hour basis, if required.

WHITMOR WIRE AND CABLE CORPORATION

Manufacturers of custom, multiple conductor, Mil-Spec and U.L. approved cables.

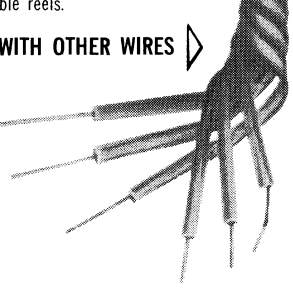
*Designate jacketing desired as follows: V=vinyl X=Dur-X-thane P=polyethylene N=neoprene - Mil-S-6855 - Class 2 - Grade 60
EXAMPLE: W-1827P=Cable w/27 conductors, 18 gauge wire, w/polyethylene jacketing. **Add "S" to PART NO. for Shielded cable.
Other constructions available on request using 1/32" PVC insulation (3000 V, Military Type D); (600 V, Style 1015 U.L. Commercial)

TECHNICAL DATA

Whitmor Wire and Cable Corporation manufactures a complete line of multiple conductor control cables. All conductors are Type C per MIL-W-16878, insulated for 1000 V and 105° C. Conductors are color coded per MIL-STD 681. All conductors are planetary cabled and contra-helically laid with Mylar tape over the cable bundle.

® Dur-X-thane is Whitmor's Registered T.M. for extruded Polyurethane.

SHIELDED CABLES: Same specifications as above with additions of tinned copper braided shield over cable complex with 85%-95% coverage to MIL-C-7078A, cables shipped on non-returnable reels.



WHITMOR WIRE AND CABLE CORPORATION

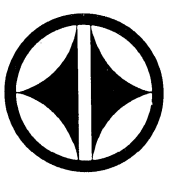
Look in the Green Section for Products and their Manufacturers



Tell them you found them in **eem**

electronic engineers master **eem 69|70**

MANUFACTURERS AND SALES OFFICE DIRECTORY INCLUDING TRADE NAMES

An alphabetical listing of more than 6,000 manufacturers supplying electronic equipment, instrumentation, components, materials and fabrication services. Included are addresses, telephone numbers and key sales executives. Local Sales Offices are shown for those manufacturers who have product information in the Catalog Section (white pages).

Trade Names (preceded by asterisk*), with descriptions of the products and names of their manufacturers, are intermixed alphabetically.

Federal Supply Code (FSC) numbers follow the names of those manufacturers who are currently supplying electronic equipment to the Federal Government.

Bold Face listings preceded by a large black square indicate manufacturers who have product information in the Catalog Section (white pages). Their page numbers are included.

eem — Electronic Engineers Master, containing the catalogs of 871 manufacturers, is the only annual containing completely **verified** listings of sales offices and/or sales representatives. Sales offices are listed by state and city under each manufacturer. Look for the sales office nearest you. Be sure to ask the sales office if there is a parts distributor nearby who handles the line in which you are interested.

A six-year research program in thin-film materials, components, and circuits has resulted in Aerojet's advanced position in the design and automated manufacture of thin film circuitry. Aerojet has pushed the state-of-the-art to exciting new levels by making resistors of much higher values and capacitors with higher breakdown voltages than are available elsewhere. Add to this one of the finest circuit design and automated manufacturing facilities and the result is an important one in terms of tomorrow's electronic hardware. And it's available now, from Aerojet.

Airtec, a manufacturer of microwave components and electro-mechanical devices also offers its services in precision machining, sheet metal fabrication and weldments. We are pleased to announce our entrance into the cryogenic field and are currently producing research dewars in a variety of sizes in addition to cryogen storage vessels and transfer lines. Airtec is equipped to cooperate with clients' technicians in the development of many types of cryogenic equipment.

Allen Avionics manufactures passive delay lines and filters that are used in Broadcast and television, Data transmission, Navigation and guidance, Radar, Satellite and space communications, Telemetry, Telephone and telegraph and Vehicular communications. We are unique in our field in that we build lumped delay lines having time delay to rise time ratios of up to 300/1. See section 2350 for information.

- - - - - - - -Advertisement- - - - - - -
American Radar Flanges have been used in every major system over the last 20 years. While attaining this performance record, we have amassed the largest collection of flange tooling in the world. No order is too large or too small and no requirement is too difficult.

In addition to UG, WR, RE, CMR and CPR flanges we manufacture and almost infinite variety of specials in all types of material.

Alois Zettler, a Swiss company, is one of the largest relay and switch manufacturers in Europe. American Zettler, a wholly owned subsidiary, follows the traditional Swiss observance of quality and precision. Assembly and checkout facilities in the United States are staffed by highly skilled and experienced circuit analysts who are on call to assist you in specifying any relay or switch application. A complete stock of products assures you of immediate, off-the-shelf delivery. Our engineers will be glad to provide you with free samples of American Zettler relays and switches and discuss your problems at no cost or obligation. Simply call or write one of the Sales-Engineering Representatives listed, or contact our headquarters in Costa Mesa, California.

BARKER
MOLDED-ON PLUGS
AND CONNECTORS

The greatest name in "Molded-On" plugs and connectors is Barker - manufacturers of connecting cables for every audio, hi-fi and stereo need.

Barker plugs are solid plastic units, molded directly onto the wire ends to provide unfailing performance and unexcelled appearance. Barker has the most manufacturing experience ... the most engineering experience.

TRANSFORMERS FOR OEM APPLICATION: HIGH FREQUENCY & VOLTAGE

The BEEBE line of transformers are wound specifically for low capacitence, high frequency and high voltage applications. They are used in high voltage AC-DC converters, test equipment, step up, pulse, modulation and isolation transformers. Complete variable or regulated high voltage instrument type (oscilloscope) supplies are available at a reasonable price.

Write for our brochure and/or engineering assistance.

INSTRUMENTATION FOR RESEARCH
Specialists in design, engineering, and manufacture of special purpose instrumentation. A complete line of standard research instruments for the life scientist, medical researcher, and hospital care. Electrical stimulation electrical anesthesia, microscope-pantograph, behavioral equipment, electrophysiological instruments, signal conditioners, peak reading voltmeter, calibrator, amplifier. Complete systems capabilities and data acquisition instruments. High speed A/D converters, electronic counters, digital clock.

- - - - - - - -Advertisement- - - - - - -
Since 1951 we have specialized in custom instrumentation, for workers in the life sciences. Our areas of interest include physiological, radiation and psychological instrumentation; also, analog data recording, reduction and analysis. We also develop specialized industrial instrumentation for measurement and control. For example: counting random pellet holes in a target; measuring turbidity of almost clear water; controlling registration and reading moving printing in a press.

AMPLIFIERS - From a few cycles to 1500 MHz. C-COR, the house of amplifiers - we are specialists in amplifier problems in RF, pulse, and video applications. Ceramic tube and solid state designs available in very wideband rf, low-pass video and pulse, high power, or low noise amplifiers. Look to C-COR for the state-of-the-art in low distortion, high output, broad-band linear amplifiers.

Computer Automation manufactures 8 and 16 bit control computers in the $6K and $11K price range. Each small computer comes standard with 4,096 words of core memory and can be expanded to 16K words. The Model 808 has 73 instructions and the Model 816 has over 160 instructions. Each has 3 hardware priority interrupts and block input and output data channels. Both units are excellent for test equipment control, data logging, process control and communications. Complete software is available including diagnostics, assemblers, math packages and Fortran.

COAXIAL REED SWITCHES offered by Daico Industries are unsurpassed. These rugged, long life units are available in single and multi-throw designs through 1000 MHz.

DIGITALLY PROGRAMMED ATTENUATORS assure rapid, accurate operation in severe environments. Low operating current and long life are the prime design considerations.

DIODE SWITCHES and custom drivers specifically designed to maximize system performance. Daico Industries is noted for quick reaction to customer needs.

DGC manufactures a complete line of digital readout/systems that operate with most of the incremental encoders in today's marketplace. Systems are available in one or two axis models with popular options such as zero offset, preset detection, and BCD output. Also available is a new counter-scaler used with laser interferometers for highly precise measurement in real time ....

Data&telegrapn coupling repeaters. Operational modes, determined by external connections, include single-line, HDX, FDX, HUB, inverse neutral, line/computer, and computer/line.

Solid-state data & teleprinter drivers and solid-state relays with complete input/output isolation. Wide speed range.

Signal operated motor controls, remotely operated switchers, face-plate distributors, specialized power supplies, etc.

Teleprinters for export.

DYTRO'S Printing Digital Voltmeter (PDVM) ends transcription errors. Standard units are available with a printed output tape having 2 logging digits, sign, decimal point, and 4 1/2 digits of voltage. Accessories include a multiplexer controlled by the logging digits, limit options for use with inexperienced personnel, and electrical outputs. Printers and PDVMs are also available for OEM use with many possible variations.
